In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Health Care Financing Administration (HCFA), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

We are, however, requesting an emergency review of the Information collections referenced below. In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, we have submitted to the Office of Management and Budget (OMB) the following requirements for emergency review. Due to an unanticipated event and the fact that this collection of this information is needed before the expiration of the normal time limits under OMB's regulations at 5 CFR part 1320, we are requesting an emergency review.

In an effort to comply with OMB's terms of clearance, HCFA hired a contractor to conduct a study of issues raised by the ACR form in use at the time, and to develop recommendations to further reduce the workload needed to complete a new form. The project

took longer to complete than expected which delayed the submission of the form for OMB approval. However, the statute (section 1854(a) of the Social Security Act) specifically requires this report to be submitted to HCFA by July 1 of each year. The form is used to price the M+C plan to be offered to Medicare beneficiaries and HCFA must approve the pricing structure of the M+C plan before it can be offered to Medicare beneficiaries.

We feel significant improvements were made to the form which are intended to simplify the methodology and submission, to reduce the amount of reporting burden and backup needed, and to provide more flexibility to users.

HCFA is requesting OMB review and approval of this collection by June 1, 2000, with a 180-day approval period. Written comments and recommendations will be accepted from the public if received by the individuals designated below by May 22, 2000. During this 180-day period, we will publish a separate **Federal Register** notice announcing the initiation of an extensive 60-day agency review and public comment period on these requirements. We will submit the requirements for OMB review and an extension of this emergency approval.

Type of Information Collection Request: Revision of a currently approved collection;

Title of Information Collection: Adjusted Community Rate (ACR) and Supporting Regulations in 42 CFR 422.306, 422.501, and 422.510;

Form No.: HCFA–R–228 (OMB# 0938–0742);

Use: This collection effort will be used to price the M+C plan offered to Medicare beneficiaries by an M+C organization. Organizations submitting the Adjusted Community Rate form would include all M+C organizations plus any organization intending to contract with HCFA as a M+C organization. These current M+C organization contractors will be required to submit this form no later than July 1, 2000 for the calendar year 2001.;

Frequency: Annually;

Affected Public: Businesses or other for profit, Not-for-profit institutions;

Number of Respondents: 1,200;

Total Annual Responses: 1,200;

Total Annual Hours Requested: 114,000.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access HCFA's Web Site address at http://www.hcfa.gov/regs/prdact95.htm, or E-mail your request, including your address, phone number, to Paperwork@hcfa.gov, or call the Reports Clearance Office on (410) 786–1326.

Interested persons are invited to send comments regarding the burden or any other aspect of these collections of Information requirements. However, as noted above, comments on these Information collection and recordkeeping requirements must be mailed and/or faxed to the designees referenced below, by May 22, 2000:

Health Care Financing Administration, Office of Information Services, Security and Standards Group, Division of HCFA Enterprise Standards, Attention: Dawn Willinghan, Room N2–14–26, 7500 Security Boulevard, Baltimore, Maryland 21244–1850;

and

Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503, Fax Number: (202) 395–6974 or (202) 395–5167, Attn: Allison Herron Eydt, HCFA Desk Officer.

Dated: April 4, 2000.

John P. Burke III,

HCFA Reports Clearance Officer, HCFA Office of Information Services, Security and Standards Group, Division of HCFA Enterprise Standards.

Fish and Wildlife Service

Availability of argali (*Ovis ammon*) Status Report for the Republic of Tajikistan

AGENCY: Fish and Wildlife Service.

ACTION: Notice of the availability of the contract report "Current Population Status of the Parmir Arhar (argali) in Tajikistan."

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the availability of a report titled "Current Population Status of the Pamir Arhar (Argali) in Tajikistan". This work is part of the continuing evaluation by the Service of the populations of argali in accordance with the species' listing under the U.S. Endangered Species Act. The Service is making copies of the report available to the public for informational purposes.

DATES: The Service will accept requests to obtain a photocopy of the report for 60 days after April 11, 2000.

ADDRESSES: Send your requests to the Chief, Branch of Permits, Office of Management Authority, U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, Room 700, Arlington, Virginia 22203. You may also send your request by fax to Room 700, Arlington, Virginia 22203. You may also send your request by fax to (703) 358–2281, to the attention of Mike Carpenter.

FOR FURTHER INFORMATION CONTACT: Mike Carpenter, Office of Management Authority, telephone (703) 358–2104 or fax (703) 358–2281, (see **ADDRESSES** section)

SUPPLEMENTARY INFORMATION: In 1999 the Service contracted with Dr. A. K. Fedosenko of the Department of Conservation and Rational Use of Game Resources of the Russian Federation to conduct a survey of the argali (*Ovis ammon polii*) population in the eastern portion of the Republic of Tajikistan. This survey is part of the continuing review of the status of populations of argali (*Ovis ammon*) listed as threatened under the Endangered Species Act and effected by the Special Rule at 50 CFR 17.40(j). The present report is a continuation of the 1994 status review of the threatened argali populations completed for the Service by Dr. Anna Lushchekina and Dr. Fedosenko and presents the results of the 1999 survey in the same context as the previous data for the area.

Dated: April 5, 2000.

Kristen Nelson,

Chief, Branch of Permits, Office of Management Authority.

Geological Survey

National Satellite Land Remote Sensing Data Archive Advisory Committee, Committee Meeting

AGENCY: U.S. Geological Survey, Interior.

ACTION: Notice of meeting.

SUMMARY: Pursuant to Public Law 92–463, the National Satellite Land Remote Sensing Data Archive (NSLRSDA) Advisory Committee will meet at or near the U.S. Geological Survey (USGS) National Center in Reston, VA. The Committee, comprised of 15 members from academia, industry, government, information science, natural science, social science, and policy/law, will provide the USGS with advice and consultation on defining and accomplishing the NSLRSDA'a archiving and access goals to carry out the requirements of the Land Remote

Sensing Policy Act; on priorities of the NSLRSDA's tasks; and, on issues of archiving, data management, science, policy, and public-private partnerships.

Topics to be reviewed and discussed by the Committee include determining the content of and upgrading the basic data set as identified by the Congress; metadata content and accessibility; product characteristics, availability, and delivery; and archiving, data access, and distribution policies.

DATES AND LOCATION: April 26–28, 2000, commencing at 8:45 a.m. April 26 and adjourning at 2 pm on April 28. Meeting will be held at the USGS National Center in Reston, Virginia, Room BA102A on April 26–27. On April 28, the meeting will be held at the Hyatt Dulles.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas M. Holm, Acting Chief, Data Services Branch, U.S. Geological Survey, EROS Data Center, Sioux Falls, South Dakota, 57198 at (605) 594–6142 or email at holm@usgs.gov.

SUPPLEMENTARY INFORMATION: Meetings of the National Satellite Land Remote Sensing Data Archive Advisory Committee are open to the public. Previous Committee meeting minutes are available for public review at http://edc.usgs.gov/programs/nslrsda/advcomm.html.

Dated: April 5, 2000.

BILLING CODE 4310–70–P

OFFICE OF THE SPECIAL TRUSTEE FOR AMERICAN INDIANS

[FR00N–0001]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Office of the Special Trustee for American Indians.

ACTION: Notice of Requests for Extension of Information Collection Approvals.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44

U.S.C. 3501 *et seq.*), the Office of the Special Trustee for American Indians (OST) announces the following Information Collection Requests (ICRs) have been submitted to the Office of Management and Budget (OMB) for review and approval: Application for Technical Assistance, OMB No. 1035–0001; Application for Technical Assistance to Withdraw Tribal Funds from Trust Status (General), OMB No. 1035–0002; and Application to Withdraw Tribal Funds from Trust Status, OMB No. 1035–0003. The ICRs describe the nature of the information collections and their expected burdens and costs; where appropriate, they include the actual data collection instruments.

DATES: Comments must be submitted on or before May 11, 2000.

Request for Comments: You may send or deliver comments to the addressee in the **ADDRESSES** section below. Please put the document number on your comments found in brackets in the heading of this notice. OMB has up to 60 days to approve or disapprove the information collection but may respond after 30 days; therefore, public comments should be submitted to OMB within 30 days to assure maximum consideration. We solicit your specific comments as to:

(1) Whether the proposed information collections are necessary for the proper performance of our agency's functions, including whether the information has practical usefulness.

(2) The accuracy of our burden estimates of the collections of information.

(3) How to enhance the quality, utility, and clarity of the information to be collected.

(4) How to minimize the burden of the collections of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: Sarah Yepa at OST by phone at (505) 248–5711, by email at sarah__yepa@ost.doi.gov.

SUPPLEMENTARY INFORMATION:

Titles: Application for Technical Assistance, OMB No. 1035–0001; Application for Technical Assistance to Withdraw Tribal Funds from Trust Status (General), OMB No. 1035–0002; and Application to Withdraw Tribal Funds from Trust Status, OMB No. 1035–0003. The requests to OMB are to extend these currently approved collections for three years.

Abstract: The American Indian Trust Fund Management Reform Act of 1994 (the Reform Act) allows tribes to withdraw their money held in trust by the U.S. Government. To withdraw their money, tribes must first submit an application and get approval from the Secretary of the Interior. The Reform Act also allows tribes to apply for technical assistance and financial assistance to complete the application. Section 1200.13 tells tribes how to submit an application to withdraw their money and Section 1200.14 tells them how they can apply for technical assistance and financial assistance. These information collections allow us to collect documents associated with tribes withdrawing their funds held in trust and applying for technical assistance to withdraw funds under 25 CFR 1200. Responses to these collections of information are required to obtain or retain a benefit. A **Federal Register** notice required under 5 CFR 1320.8(d), soliciting comments on proposed renewal of these collections of information, was published on 12/21/99 (FR99N–0001); no comments were received.

Burden Statement: The current information collection authorizations expire March 31, 2000. A Federal agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The application forms and burden estimates are:

1. OMB No. 1035–0001, OST Form No. SF–424A, Application for Technical Assistance to Withdraw Tribal Funds from Trust Status (Specific Budget):

Respondents: American Indian Tribes
Annual Respondents and Responses—12
Estimated Burden Per Response—39 hours
Estimated Annual Burden—468 hours

2. OMB No. 1035–0002, OST Form No. SF–424, Application for Technical Assistance to Withdraw Tribal Funds from Trust Status (General):

Respondents: American Indian Tribes
Annual Respondents and Responses—12
Estimated Burden Per Response—13 hours
Estimated Annual Burden—156 hours

3. OMB No. 1035–0003, Application to Withdraw Tribal Funds from Trust Status

Respondents: American Indian Tribes
Annual Respondents and Responses—12
Estimated Burden Per Response—342 hours
Estimated Annual Burden—4104 hours

Addresses: Please address your comments to: Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Interior Department, 725 17th Street, NW, Washington, DC 20503.

Please also send a copy of your comments to: Ms. Sarah Yepa, Office of Trust Funds Management, Office of the Special Trustee for American Indians, 505 Marquette, N.W., Suite 1000, Albuquerque, NM 87102.

Dated: March 30, 2000.

Donna Erwin,

Director, Office of Trust Funds Management.

DEPARTMENT OF JUSTICE

Federal Bureau of Investigation

Meeting of the Compact Council for the National Crime Prevention and Privacy Compact

AGENCY: Federal Bureau of Investigation.

ACTION: Meeting notice.

SUMMARY: The purpose of this notice is to announce the meeting of the Compact Council created by the National Crime Prevention and Privacy Compact Act of 1998 (Compact). Thus far, the federal government and five states are parties to the Compact which governs the exchange of criminal history records for licensing, employment, and similar purposes. The Compact also provides a legal framework for the establishment of a cooperative Federal-state system to exchange such records.

The United States Attorney General appointed fifteen persons from federal and state agencies to serve on the Compact Council. The Council will prescribe system rules and procedures for the effective and proper operation of the system.

The meeting will be open to the public on a first-come, first-seated basis. Any member of the public wishing to file a written statement with the Compact Council or wishing to address this session of the Compact Council should notify Mr. Emmet A. Rathbun at (304) 625–2720, at least 24 hours prior to the start of the session. The notification should contain the requestor's name and corporate designation, consumer affiliation, or government designation, along with a short statement describing the topic to be addressed, and the time needed for the presentation. Requestors will ordinarily be allowed not more than 15 minutes to present a topic.

DATES AND TIMES: The Compact Council will meet in open session from 9 a.m. until 5 p.m. on May 23–24, 2000.

ADDRESS: The meeting will take place at the Swissotel Atlanta, 3391 Peachtree Road, NE, Atlanta, Georgia, telephone (404) 365–0065.

FOR FURTHER INFORMATION CONTACT: Inquiries may be addressed to Mr. Emmet A. Rathbun, Unit Chief, Programs Development Section, CJIS Division, FBI, 1000 Custer Hollow Road, Clarksburg, West Virginia 26306–0147, telephone (304) 625–2720, facsimile (304) 625–5388.

Dated: March 31, 2000.

Don M. Johnson,

Section Chief, Programs Development Section, Federal Bureau of Investigation.

BILLING CODE 4410–02–M

DEPARTMENT OF JUSTICE

Office of Justice Programs

Agency Information Collection Activities: Existing Collection; Comment Request

ACTION: Notice of Information Collection Under Review; Extension of a Currently Approved Collection.

National Corrections Reporting Program

The Department of Justice, Office of Justice Programs, Bureau of Justice Statistics, has submitted the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. Office of Management and Budget approval is being sought for the information collection listed below. This proposed information collection was previously published in the **Federal Register** on January 13, 2000, allowing for a 60-day public comment period.

The purpose of this notice is to allow an additional 30 days for public comment until May 11, 2000. This process is conducted in accordance with 5 CFR 1320.10.

Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Department of Justice Desk Officer, Washington, DC 20530. Additionally, comments may be submitted to OMB via facsimile to (202) 395–7285. Comments may also be submitted to the Department of Justice (DOJ), Justice Management Division, Information Management and Security Staff, Attention: Department Clearance Officer, Suite 850, 1001 G Street, NW, Washington, DC 20530. Additionally, comments may be submitted to DOJ via facsimile to (202) 514–1590.

Written comments and/or suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Overview of This Information

(1) *Type of information collection:* Extension of a currently approved collection.

(2) *The title of the form/collection:* National Corrections Reporting Program.

(3) *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* Forms: NCRP–1A, NCRP–1B, NCRP–1C, and NCRP–1D. Corrections Unit, Bureau of Justice Statistics, Office of Justice Programs, United States Department of Justice.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* State Departments of Corrections. The National Corrections Reporting Program is the only national level data collection that provides information on sentence length, expected time to be served in prison, actual time served by released prisoners, method of release, time served on parole, type of parole discharge, offense composition of offenders entering and exiting prison and parole, and other characteristics of inmates and parolees. The data is used by Department of Justice officials, the U.S. Congress, prison administrators, researchers, and policy makers to assess current trends and patterns in the Nation's correctional populations.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond/reply:* It is estimated that 41 respondents will take on average 2 hours to respond.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 2,196 hours annual burden.

If additional information is required contact: Ms Brenda E. Dyer, Deputy Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Suite 1220, National Place, 1331 Pennsylvania Avenue NW, Washington, DC 20530.

Dated: April 6, 2000.

Brenda E. Dyer,

Department Deputy Clearance Officer, United States Department of Justice.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–36,442]

Philips Lighting Company, Fairmont, WV; Notice of Negative Determination on Reconsideration

On November 23, 1999, the Department issued an Affirmative Determination Regarding Application for Reconsideration for the workers and former workers of the subject firm. The notice was published in the **Federal Register** on December 21, 1999 (64 FR 244, Pages 71502–71503).

The Department initially denied TAA to workers of the Fairmont facility because the "contributed importantly" group eligibility requirement of section 222(3) of the Trade Act of 1974, as amended, was not met. The Department's findings determined that separations of workers during the relevant period were the result of fluctuations in demand and a domestic transfer of production. The determination also stated that Philips Lighting Company does not import flourescent lighting products.

The petitioners requesting reconsideration asserted that the company is importing lighting products such as those produced at Fairmont in recent periods and that equipment transferred to a foreign location was being used to manufacture products formerly produced at Fairmont.

The Department's initial Negative Determination noted that workers of the Fairmont facility were covered by a previous TAA certification through April 15, 1999. Thus, the instant investigation focused on separations that have occurred since April 15, 1999.

On reconsideration, the Department conducted further investigation and obtained additional information from the subject firm. The Department has concluded that, although the company does in fact import flourescent lighting products, it does not import any products such as those produced at Fairmont within the past two years. The further investigation substantiated the previous finding that separations of workers from the Fairmont facility in the second half of 1999 were attributable to the transfer of production of certain flourescent lighting products to another domestic location of the subject firm. The further investigation also substantiated previous findings that equipment transferred from the Fairmont plant to a foreign location included such items as fork lifts and that no equipment transferred to the

foreign location is being used to produce articles manufactured at Fairmont during the relevant period.

Conclusion

After reconsideration, I affirm the original notice of negative determination of eligibility to apply for worker adjustment assistance for workers and former workers of Philips Lighting Company, Fairmont, West Virginia.

Signed at Washington, D.C., this 31st day of March, 2000.

Grant D. Beale,

Program Manager, Division of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Division of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Division of Trade Adjustment Assistance, at the address shown below, not later than April 21, 2000.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Division of Trade Adjustment Assistance, at the address shown below, not later than April 21, 2000.

The petitions filed in this case are available for inspection at the Office of the Director, Division of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW, Washington, DC 20210.

Signed at Washington, DC this 20th day of March, 2000.

Grant D. Beale,

Program Manager, Division of Trade Adjustment Assistance.

[TA–W–37,105]

Weiser Lock, a Masco Subsidiary Including Leased Workers of Interim Personnel, ADECCO Employment Services, Inc., TRC Staffing Services, Inc., Tucson, AZ; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on December 28, 1999, applicable to workers of Weiser Lock, a Masco Subsidiary, Tucson, Arizona. The notice will be published soon in the **Federal Register**.

At the request of the company, the Department reviewed the certification for workers of the subject firm. New information provided by the company shows that some employees of Weiser Lock were leased from Interim Personnel, Adecco Employment Services, Inc., and TRC Staffing Services, Inc. to produce residential door hardware at the Tucson, Arizona plant. Worker separations occurred at these companies as a result of worker separations at Weiser Lock, a Masco Subsidiary, Tucson, Arizona.

Based on these findings, the Department is amending the certification to include workers of Interim Personnel, Adecco Employment Services, Inc., and TRC Staffing Services, Inc. leased to Weiser Lock, a Masco Subsidiary, Tucson, Arizona.

Accordingly, the Department is amending the certification to reflect this matter.

The amended notice applicable to TA–W–37,105 is hereby issued as follows:

"All workers of Weiser Lock, a Masco Subsidiary, Tucson, Arizona and leased workers of Interim Personnel, Adecco Employment Services, Inc., and TRC Staffing Services, Inc., Tucson, Arizona engaged in the production of residential door hardware for Weiser Lock, A Masco Subsidiary, Tucson, Arizona who became totally or partially separated from employment on or after November 19, 1998 through December 28, 2001 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974."

Signed at Washington, D.C. this 3rd day of April, 2000.

Grant D. Beale,

Program Manager, Division of Trade Adjustment Assistance.

[NAFTA–3578]

Court Metal Finishing, Inc., Flint, MI; Notice of Affirmative Determination Regarding Application for Reconsideration

By letter of February 2, 2000, petitioners request administrative reconsideration of the Department of Labor's Notice of Negative Determination Regarding Eligibility to Apply for NAFTA-Transitional Adjustment Assistance (NAFTA–3578) for workers or the subject firm. The denial notice was signed on January 6, 2000, and published in the **Federal Register** on January 14, 2000 (65 FR 2433).

The petitioners present information regarding customer imports from Mexico of articles like or directly competitive with those produced at the workers' firm.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, D.C. this 31st day of March 2000.

Grant D. Beale,

Program Manager, Division of Trade Adjustment Assistance.

[NAFTA—03516, et al.]

Delphax Corporation; A Xerox Company, Canton, Massachusetts, etc.

In the matter of: Delphax Corporation, a Xerox Company, Canton, Massachusetts; Including Leased Workers of: Accountemps, Braintree, Massachusetts; Judge Technical Service, Needham, Massachusetts; MMD Temps, Natick, Massachusetts; TAC Engineering, Newton, Massachusetts; New England Engineers & Design, Norwood, Massachusetts; Prosource, Waltham, Massachusetts; Strategy Tech Services, Westboro, Massachusetts; TAC Staffing, Dedham, Massachusetts; Techaid, Waltham, Massachusetts; Technical Personnel Services, Andover, Massachusetts; Winter, Wyman, Boston, Massachusetts, NAFTA—03516A, Delphax Corporation, A Xerox Company, Salem, New Hampshire, NAFTA—03516B; Delphax Corporation, A Xerox Company; Farmington, Connecticut.

Amended Certification Regarding Eligibility to Apply for NAFTA-Transitional Adjustment Assistance

In accordance with section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974 (19 USC 2273), the Department of Labor issued a Certification for NAFTA Transitional Adjustment Assistance on June 3, 1999, applicable to workers of Delphax Corporation, A Xerox Company, Canton, Massachusetts, including its leased workers from the following firms: Accountemps; Judge Technical Service; MMD Temps; TAC engineering; New England Engineers & Design; ProSource, Strategy Tech Services; TAC Staffing; TechAid; Technical Personnel Services; and Winter, Wyman. The notice was published in the **Federal Register** on December 28, 1999 (64 FR 72693).

At the request of the company, the Department reviewed the certification for workers of the subject firm. New information received from the company shows that worker separations occurred at the Salem, New Hampshire and Farmington, Connecticut locations of Delphax Corporation. A Xerox Company, when they close in March and April, 2000 respectively. The workers provided engineering, support services, sales and marketing services to support the production of printers (DocuPrint 900/1300 models) at the Canton, Massachusetts facility.

The intent of the Department's certification is to include all workers of Delphax Corporation, A Xerox Company, who were adversely affected by a shift of production to Canada.

Accordingly, the Department is amending the certification to include workers of Delphax Corporation, A Xerox Company, Salem, New Hampshire and Farmington, Connecticut locations.

The amended notice applicable to NAFTA–03516 is hereby issued as follows:

"All workers of Delphax Corporation, A Xerox Company, Canton, Massachusetts and all temporary workers of Accountemps; Judge Technical Services; MMD Temps; TAC Engineering; New England Engineers & Design; ProSource; Strategy Tech Services; TAC Staffing; TechAid; Technical Personnel Services; and Winter, Wyman (NAFTA–0316) engaged in employment related to the production of printers (DocuPrint 900/1300 models) at the Canton, Massachusetts facility, and all workers of Delphax Corporation, A Xerox Company, Salem, New Hampshire (NAFTA–03516A) and Farmington, Connecticut (NAFTA–3516B) who became totally or partially separated from employment on or after October 12, 1998 through November 18, 2001 are eligible to apply for NAFTA–TAA under Section 250 of the Trade Act of 1974."

Signed at Washington, D.C. this 3rd day of April, 2000.

Grant D. Beale,

Program Manager, Division of Trade Adjustment Assistance.

The Diana Knitting Corporation, Johnstown, NY; Notice of Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on February 8, 2000, in response to a worker petition which was filed on behalf of workers at The Diana Knitting Corporation, Johnstown, New York.

An active certification covering the petitioning group of workers at the subject firm remains in effect (NAFTA–3727E). Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed in Washington, D.C. this 3rd day of April, 2000.

Investigations Regarding Certifications of Eligibility To Apply for NAFTA Transitional Adjustment Assistance

Petitions for transitional adjustment assistance under the North American Free Trade Agreement—Transitional Adjustment Assistance Implementation Act (Pub.L. 103–182), hereinafter called (NAFTA–TAA), have been filed with State Governors under Section 250 (b)(1) of Subchapter D, Chapter 2, Title II, of the Trade Act of 1974, as amended, are identified in the Appendix to this Notice. Upon notice from a Governor that a NAFTA–TAA petition has been received, the Director of the Division of Trade Adjustment Assistance (DTAA), Employment and Training Administration (ETA), Department of Labor (DOL), announces the filing of the petition and takes action pursuant to paragraphs (c) and (e) of Section 250 of the Trade Act.

The purpose of the Governor's actions and the Labor Department's investigations are to determine whether the workers separated from employment on or after December 8, 1993 (date of enactment of Pub.L. 103–182) are eligible to apply for NAFTA–TAA under Subchapter D of the Trade Act because of increased imports from or the shift in production to Mexico or Canada.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing with the Director of DTAA at the U.S. Department of Labor (DOL) in Washington, DC provided such request is filed in writing with the Director of DTAA not later than April 21, 2000.

Also, interested persons are invited to submit written comments regarding the subject matter of the petitions to the Director of DTAA at the address shown below not late than April 21, 2000.

Petitions filed with the Governors are available for inspection at the Office of the Director, DTAA, ETA, DOL, Room C–4318, 200 Constitution Avenue, NW, Washington, DC 20210.

Grant D. Beale,

Program Manager, Division of Trade Adjustment Assistance.

[NAFTA–3691]

S. Bent & Bros., Inc., Gardner, MA; Notice of Termination of Investigation

Pursuant to Title V of the North American Free Trade Agreement Implementation Act (Pub. L. 103–182) concerning transitional adjustment assistance, hereinafter called NAFTA–TAA and in accordance with Section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974, as amended (19 U.S.C. 2331), an investigation was initiated on January 31, 2000, in response to a petition filed on the same day by the IUE Local 154–136B FW, on behalf of workers at S. Bent & Bros., Inc., Gardner, Massachusetts.

The petitioner has requested that the petition be withdrawn. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC, this 4th day of April, 2000.

Grant D. Beale,

Program Manager, Division of Trade Adjustment Assistance.

[NAFTA–03615]

Tandycrafts, Inc., Tandyarts, Inc./ Impulse Designs Pinnacle Art and Frame Division Van Nuys, California; Amended Certification Regarding Eligibility To Apply for NAFTA-Transitional Adjustment Assistance

In accordance with section 250(A), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974 (19 U.S.C. 2273), the Department of Labor issued a Certification for NAFTA Transitional Adjustment Assistance on March 11, 1999, applicable to workers of Tandycrafts, Inc., Pinnacle Art and Frame Division, Van Nuys, California. The notice was published in the **Federal Register** on January 14, 2000 (65 FR 2433).

At the request of the company and State agency, the Department reviewed the certification for workers of the subject firm. The workers are engaged in the production of framed art, mirrors and photo frames. New information shows that in November, 1993, Tandycrafts, Inc. purchased Impulse Designs and formed a new company called Tandyarts, Inc./Impulse Designs. The company also reports that workers separated from employment at Tandycrafts, Inc., Pinnacle Art and Frame Division had their wages reported under a separate unemployment insurance (UI) tax account for Tandycrafts, Incorporated, Tandyarts, Inc./Impulse Designs, Pinnacle Art and Frame Division, Van Nuys, California.

Based on these findings, the Department is amending the certification to reflect this matter.

The intent of the Department's certification is to include all workers of Tandycraft, Inc., Pinnacle Art and Frame Division who were adversely affected by imports from Mexico.

The amended notice applicable to NAFTA–03615 is hereby issued as follows:

"All workers of Trandycraft, Inc., Tandyarts, Inc./Impulse Designs, Pinnacle Art and Frame Division, Van Nuys, California who became totally or partially separated from employment on or after August 23, 1998 through December 22, 2001 are eligible to apply for NAFTA–TAA under Section 250 of the Trade Act of 1974."

Signed at Washington, D.C. this 3rd day of April, 2000.

Grant D. Beale,

Program Manager, Division of Trade Adjustment Assistance.

Employment and Training Administration

[NAFTA—03582]

Weiser Lock, a Masco Subsidiary Including Leased Workers of Interim Personnel Adecco Employment Services, Inc. TRC Staffing Services, Inc. Tucson, Arizona; Amended Certification Regarding Eligibility To Apply for NAFTA—Transitional Adjustment Assistance

In accordance with section 250(A), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974 (19 U.S.C. 2273), the Department of Labor issued a Certification for NAFTA Transitional Adjustment Assistance on December 28, 1999, applicable to workers of Weiser Lock, A Masco Subsidiary, Tucson, Arizona. The notice was published in the **Federal Register** on January 14, 2000 (65 FR 2433).

At the request of the company, the Department reviewed the certification for workers of the subject firm. New information provided by the company shows that some workers of Weiser Lock were leased from Interim Personnel, Adecco Employment Services, Inc., and TRC Staffing Services, Inc. to produce residential door hardware at the Tucson, Arizona plant. Worker separations occurred at these companies as a result of worker separations at Weiser Lock, A Masco Subsidiary, Tucson, Arizona.

Based on these findings, the Department is amending the certification to include workers from Interim Personnel, Adecco Employment Services, Inc., and TRC Staffing Services, Inc., Tucson, Arizona leased to Weiser Lock, A Masco Subsidiary, Tucson, Arizona.

Accordingly, the Department is amending the certification to reflect this matter.

The intent of the Department's certification is to include all workers of Weiser Lock, A Masco Subsidiary, Tucson, Arizona adversely affected by a shift of production to Mexico.

The amended notice applicable to NAFTA—03582 is hereby issued as follows:

"All workers of Weiser Lock, A Masco Subsidiary, Tucson, Arizona and leased workers of Interim Personnel, Adecco Employment Services, Inc., and TRC Staffing Services, Inc., Tucson, Arizona engaged in the production of residential door hardware for Weiser Lock, A Masco Subsidiary, Tucson, Arizona who became totally or partially separated from employment on or after November 19, 1998 through December 28, 2001 are eligible to apply for NAFTA–TAA under Section 250 of the Trade Act of 1974."

Signed at Washington, D.C. this 3rd day of April, 2000.

Grant D. Beale,

Program Manager, Division of Trade Adjustment Assistance.

LEGAL SERVICES CORPORATION

Sunshine Act Meeting of the Board of Directors; Correction

A notice of a meeting of the Board of Directors was published on April 7, 2000 (65 FR 18377). Items 4 and 5 in the agenda for the Open Session were incorrect. This notice contains the correct text, and for the convenience of the reader, the meeting agenda is being republished.

TIME AND DATE: The Board of Directors of the Legal Services Corporation will meet on April 15, 2000. The meeting will begin at 10:00 a.m. and continue until conclusion of the Board's agenda.

LOCATION: Marriott Wardman Park Hotel, 2660 Woodley Road, N.W., Washington, DC 20008.

STATUS OF MEETING: Open, except that a portion of the meeting may be closed pursuant to a vote of the Board of Directors to hold an executive session. At the closed session, the Corporation's General Counsel will report to the Board on litigation to which the Corporation is or may become a party, and the Board may act on the matters reported. The closing is authorized by the relevant provisions of the Government in the Sunshine Act [5 U.S.C. 552b(c)(10)] and the corresponding provisions of the Legal Services Corporation's implementing regulation [45 CFR § 1622.5(h)]. A copy of the General Counsel's Certification that the closing is authorized by law will be available upon request.

Matters To Be Considered

Open Session

1. Approval of agenda.
2. Approval of minutes of the Board's meeting of January 28–29, 2000.
3. Approval of minutes of the executive session of the Board's meeting of January 28–29, 2000.
4. Approval of minutes of the Board's teleconference meeting of November 29, 1999.
5. Approval of minutes of the Annual Performance Reviews Committee's meeting of November 19, 1999.
6. Approval of minutes of the Annual Performance Reviews Committee's teleconference meeting of January 24, 2000.
7. Approval of minutes of the November 19, 1999 meeting of the Committee on Provision for the Delivery of Legal Services.
8. Approval of minutes of the Operations & Regulations Committee's meeting of November 19, 1999.
9. Chairman's Report.
10. Members' Report.
11. Inspector General's Report.
12. President's Report.
13. Report on the status of Strategic Planning by the Corporation.
14. Review of the Corporation's Consolidated Operating Budget, Expenses and Other Funds Available through February 29, 2000.
15. Consider and act on the Board's meeting schedule, including designation of locations, for calendar year 2001.
16. Consider and act on the extension of John McKay's contract of employment as President of the Corporation.

Closed Session

17. Briefing[1] by the Inspector General on the activities of the Office of Inspector General.
18. Consider and act on the Office of Legal Affairs' report on potential and pending litigation involving the Corporation.

Open Session

19. Consider and act on other business.
20. Public Comment.

CONTACT PERSON FOR INFORMATION: Victor M. Fortuno, Vice President for Legal Affairs, General Counsel and Secretary of the Corporation, at (202) 336–8800.

SPECIAL NEEDS: Upon request, meeting notices will be made available in alternate formats to accommodate visual and hearing impairments. Individuals who have a disability and need an accommodation to attend the meeting may notify Shannon Nicko Adaway, at (202) 336–8800.

Dated: April 4, 2000.

Victor M. Fortuno,

Vice President for Legal Affairs, General Counsel and Corporate Secretary.

NATIONAL CREDIT UNION ADMINISTRATION

Notice of Sunshine Act Meetings

TIME AND DATE: 10 a.m., Thursday, April 13, 2000.

PLACE: Board Room, 7th Floor, Room 7047, 1775 Duke Street, Alexandria, VA 22314–3428.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Final Rule: Amendment to Part 701, NCUA's Rules and Regulations, Secondary Capital Accounts.
2. Final Rule: Amendment to Part 707, NCUA's Rules and Regulations, Truth in Savings.
3. Appeal from a Federal Credit Union of the Regional Director's Denial of a Field of Membership Expansion Request.

RECESS: 11 a.m.

TIME AND DATE: 11:30 a.m., Thursday, April 13, 2000.

PLACE: Board Room, 7th Floor, Room 7047, 1775 Duke Street, Alexandria, VA 22314–3428.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Administrative Action under Part 723 of NCUA's Rules and Regulations. Closed pursuant to exemptions (8) and (9)(A)(ii).
2. Field of Membership Appeal. Closed pursuant to exemption (8).
3. One (1) Personnel Matters. Closed pursuant to exemptions (2) and (6).

FOR FURTHER INFORMATION CONTACT: Becky Baker, Secretary of the Board, Telephone (703) 518–6304.

Becky Baker,

Secretary of the Board.

NATIONAL SCIENCE FOUNDATION

Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978 (Pub. L. 95–541)

AGENCY: National Science Foundation.

ACTION: Notice of Permit Applications Received under the Antarctic Conservation Act of 1978, Pub. L. 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act of Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to these permit applications by May 8, 2000. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Room 755, Office of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

FOR FURTHER INFORMATION CONTACT: Nadene G. Kennedy at the above address or (703) 306–1030.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Public Law 95–541, has developed regulations that implement the "Agreed Measures for the Conservation of Antarctic Fauna and Flora" for all United States citizens. The Agreed Measures, developed by the Antarctic Treaty Consultative Parties, recommended establishment of a permit system for various activities in

Antarctica and designation of certain animals and certain geographic areas a requiring special protection. The regulations establish such a permit system to designate Specially Protected Areas and Sites of Special Scientific Interest.

The applications received are as follows:

1. *Applicant:* Anne A. Sturz, Department of Marine Sciences, University of San Diego, 5998 Alcala Park, San Diego, CA 92110–2492.

Permit Application No: 2001–006.

Activity for Which Permit is Requested: Take, Enter Antarctic Specially Protected Areas and Import into the U.S.A. the applicant proposes to enter Area D (Pendulum Cove) of Antarctic Specially Protected Area #140, Shore of Port Foster, Deception Island, for the purpose of collecting shallow seawater samples, see floor sediments (5 grabs of 50 grams each), 50 grams of sand for chemical analyses for comparison to sea floor sediments, and 1 liter of new snow from the shore at Pendulum Cove. Based on previous samples collected in other areas of Deception Island, the chemical analyses of water column samples indicated that dissolved iron is present as a result of hydrothermal fluid, at least in part from dispersed flow near Pendulum Cove. The chemical analyses of new snow may reveal something about aerosol sources of iron. The applicant will import collected samples into the U.S. for further chemical analyses at the University of San Diego.

Location: ASPA 140—Area D (Pendulum Cove), Port Foster, Deception Island, South Shetland Island.

Dates: May 15, 2000 to June 15, 2000.

Nadene G. Kennedy,

Permit Officer, Office of Polar Programs.

[FR Doc. 00–8852 Filed 4–10–00; 8:45 am]

BILLING CODE 7555–01–M

NATIONAL SCIENCE FOUNDATION

Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978 (Pub. L. 95–541)

AGENCY: National Science Foundation.

ACTION: Notice of Permit Modification Received under the Antarctic Conservation Act of 1978, P.L. 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of requests to modify permits issued to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of a requested permit modification.

DATES: Interested parties are invited to submit written data, comments, or views with respect to these permit applications by May 8, 2000. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Room 755, Office of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

FOR FURTHER INFORMATION CONTACT: Nadene G. Kennedy at the above address or (703) 306–1030.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Public Law 95–541), has developed regulations that implement the "Agreed Measures for the Conservation of Antarctic Fauna and Flora" for all United States citizens. The Agreed Measures, developed by the Antarctic Treaty Consultative Parties, recommended establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas a requiring special protection. The regulations establish such a permit system to designate Specially Protected Areas and Sites of Special Scientific Interest.

Description of Permit Modification Requested: The Foundation issued a permit (2000–001) to Dr. Steven D. Emslie on September 21, 1999. The issued permit allows the applicant access to certain Antarctic Specially Protected Areas in order to conduct surveys and excavations of modern and abandoned penguin colonies by surveying ice-free areas to locate evidence of a breeding colony (pebble and/or bone concentrations, and rich vegetation). Not all sites will be visited in single season and access depends upon research vessel cruise tracks and accessibility to the site(s). The sites visited would be sampled by placing a test pit, no more than 1x1 meter in size, in the colony and excavating in 5–10 cm level until bedrock or non-ornithogenic sediments are encountered. To minimize impacts, test pits will be placed in areas with little or no vegetation when possible. Upon completion of the excavation, test pits would be refilled and any vegetation disturbed on the surface replaced. Collected sediments will be taken to the laboratory for processing. Sediments will be washed through fine-mesh screens; all organic remains will be sorted from the sediments and preserved for identification and analysis.

The applicant proposes access additional Antarctic Specially Protected Areas only on an opportunity basis depending upon vessel cruise tracks and schedules. The additional ASPA's are listed under Location, below:

Location

ASPA 104—Sabrina Island, Balleny Island
ASPA 105—Beaufort Island
ASPA 107—Dion Islands
ASPA 108—Green Island, Berthelot Islands
ASPA 112—Coppermine Peninsula, Robert Island
ASPA 115—Legotellerie Island, Marguerite Bay
ASPA 116—New College Valley, Caughley Beach, Cape Bird
ASPA 117—Avian Island, Northwest Marguerite Bay
ASPA 126—Byers Peninsula, Livingston Island
ASPA 133—Harmony Point, Nelson Island
ASPA 134—Cierva Point, Danco Coast
ASPA 149—Cape Shirref, Livingston Island
ASPA 150—Ardley Island, King George Island
ASPA 154—Cape Evans, Ross Island

Dates: January 1, 2000 to December 31, 2005.

Nadene G. Kennedy,

Permit Officr, Office of Polar Programs.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review of continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* Policy Statement on Cooperation with States at Commercial

Nuclear Power Plants and Other Production or Utilization Facilities.

2. *Current OMB approval number:* 3150–0163.

3. *How often the collection is required:* On occasion—when a State wishes to observe NRC inspections or perform inspections for NRC.

4. *Who is required or asked to report:* Those States interested in observing or performing inspections.

5. *The number of annual respondents:* Maximum of 50, although not all States have participated in the program.

6. *The number of hours needed annually to complete the requirement or request:* An average estimate of 10 hours per State or 500 hours if all States participated in the program.

7. *Abstract:* States wishing to enter into an agreement with NRC to observe or participate in NRC inspections at nuclear power facilities are requested to provide certain information to the NRC to ensure close cooperation and consistency with the NRC inspection program as specified by the Commission's Policy of Cooperation with States at Commercial Nuclear Power Plants and Other Nuclear Production or Utilization Facilities. Submit, by June 12, 2000, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the draft supporting statement may be viewed free of charge at the NRC Public Document Room, 2120 L Street NW, (lower level), Washington, DC. OMB clearance requests are available at the NRC worldwide web site (*http://www.nrc.gov/NRC/PUBLIC/OMB/index.html*) The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions about the information collection requirements may be directed to the NRC Clearance Officer, Brenda Jo. Shelton, U.S. Nuclear Regulatory Commission, T–6 E6, Washington, DC 20555–0001, by telephone at (301) 415–7233, or by Internet electronic mail at BJS1@NRC.GOV.

Dated at Rockville, Maryland, this 5th day of April, 2000.

For the Nuclear Regulatory Commission.

Brenda Jo. Shelton,

NRC Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–461]

Amergen Energy Company, LLC, Clinton Power Station; Notice of Consideration of Approval of Transfer of Facility Operating License and Conforming Amendment and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering the issuance of an order under 10 CFR 50.80 approving the transfer of Facility Operating License No. NPF–62 for Clinton Power Station, held by AmerGen Energy Company, LLC (AmerGen), as the owner and licensed operator. The transfer would result from the acquisition of PECO Energy Company's existing interest in AmerGen by a new generation company. This company, presently referred to in the subject application described below as GENCO, is to be a subsidiary of a new holding company Exelon Corporation formed from the proposed merger between PECO Energy Company (PECO) and Unicom Corporation (Unicom). The Commission is also considering amending the license for administrative purposes to reflect the proposed transfer. The facility is located in DeWitt County, Illinois.

According to an application for approval filed by AmerGen, AmerGen is a limited liability company formed to acquire and operate nuclear power plants in the United States. British Energy, Inc. and PECO each own 50% of AmerGen. Following completion of the merger between Unicom and PECO, GENCO will acquire PECO's existing 50% ownership interest in AmerGen. AmerGen, as owned by GENCO and British Energy, Inc. will continue to be responsible for the operation, maintenance, and eventual decommissioning of Clinton Power Station. No physical changes to the facility or operational changes are being proposed in the application.

The proposed amendment to the operating license would add language to the license transfer conditions that were incorporated into the Clinton Operating License upon the initial transfer of the license to AmerGen, to reflect the transfer of PECO's ownership interest in AmerGen to a new entity.

Pursuant to 10 CFR 50.80, no license, or any right thereunder, shall be transferred, directly or indirectly, through transfer of control of the license, unless the Commission shall give its consent in writing. The Commission will approve an application for the transfer of a license if the Commission determines that the proposed transferee is qualified to hold the license, and that the transfer is otherwise consistent with applicable provisions of law, regulations, and orders issued by the Commission pursuant thereto.

Before issuance of the proposed conforming license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

As provided in 10 CFR 2.1315, unless otherwise determined by the Commission with regard to a specific application, the Commission has determined that any amendment to the license of a utilization facility which does no more than conform the license to reflect the transfer action involves no significant hazards consideration. No contrary determination has been made with respect to this specific license amendment application. In light of the generic determination reflected in 10 CFR 2.1315, no public comments with respect to significant hazards considerations are being solicited, notwithstanding the general comment procedures contained in 10 CFR 50.91.

The filing of requests for hearing and petitions for leave to intervene, and written comments with regard to the license transfer application, are discussed below

By May 1, 2000 any person whose interest may be affected by the Commission's action on the application may request a hearing and, if not, the applicant may petition for leave to intervene in a hearing proceeding on the Commission's action. Requests for a hearing and petitions for leave to intervene should be filed in accordance with the Commission's rules of practice set forth in Subpart M, "Public Notification, Availability of Documents and Records, Hearing Requests and Procedures for Hearings on License Transfer Applications," of 10 CFR part 2. In particular, such requests and petitions must comply with the requirements set forth in 10 CFR 2.1306, and should address the considerations contained in 10 CFR 2.1308(a). Untimely requests and petitions may be denied, as provided in 10 CFR 2.1308(b), unless good cause for failure to file on time is established. In addition, an untimely request or

petition should address the factors that the Commission will also consider, in reviewing untimely requests or petitions, set forth in 10 CFR 2.1308(b)(1)–(2).

Requests for a hearing and petitions for leave to intervene should be served upon:

Mr. Kevin P. Gallen, Esq., Morgan, Lewis & Bockius LLP, 1800 M Street, N. W., Washington, D.C. 20036–5869; the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555 (e-mail address for filings regarding license transfer cases only: OGCLT@NRC.gov); and the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, in accordance with 10 CFR 2.1313.

The Commission will issue a notice or order granting or denying a hearing request or intervention petition, designating the issues for any hearing that will be held and designating the Presiding Officer. A notice granting a hearing will be published in the **Federal Register** and served on the parties to the hearing.

As an alternative to requests for hearing and petitions to intervene, by May 11, 2000, persons may submit written comments regarding the license transfer application, as provided for in 10 CFR 2.1305. The Commission will consider and, if appropriate, respond to these comments, but such comments will not otherwise constitute part of the decisional record. Comments should be submitted to the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, and should cite the publication date and page number of this **Federal Register** notice.

For further details with respect to this action, see the application dated February 28, 2000, available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and accessible electronically through the ADAMS Public Electronic Reading Room link at the NRC Web site (*http:www.nrc.gov*).

Dated at Rockville, Maryland this 6th day of April 2000.

For the Nuclear Regulatory Commission.

Jon B. Hopkins,

Project Manager, Section 2, Project Directorate III, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 40–8989; License No. SMC–1559]

Envirocare of Utah and The Snake River Alliance; Receipt of Request for Action Under 10 CFR 2.206

Notice is hereby given that by petitions dated February 24, 2000, and March 13, 2000, the Snake River Alliance and Envirocare of Utah, respectively, have requested that the Nuclear Regulatory Commission (NRC) take action with regard to protecting public health and safety. The petitioners request that the NRC assume responsibility for Formerly Utilized Sites Remedial Action Program (FUSRAP) radioactively contaminated material and ensure its proper disposal in an NRC-licensed facility.

As the basis for these requests, the petitioners state that the NRC, under Sections 81 and 84 of the Atomic Energy Act (AEA), was given authority by Congress to regulate all 11e.(2) material regardless of when it was generated.

The request is being treated pursuant to 10 CFR 2.206 of the Commission's regulations. The request has been referred to the Director of the Office of Nuclear Material Safety and Safeguards. As provided by Section 2.206, appropriate action will be taken on this petition within a reasonable time. Copies of the petitions are available for inspection at the Commission's Public Document Room at 2120 L Street, NW. (Lower Level), Washington, DC 20555–0001.

Dated at Rockville, Maryland this 4th day of April, 2000.

For the Nuclear Regulatory Commission.

Martin J. Virgilio,

Deputy Director, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Notice of Intent To Prepare a Draft Supplement to the Generic Environmental Impact Statement on Decommissioning of Nuclear Facilities and To Hold a Public Meeting for the Purpose of Scoping and To Solicit Public Input into the Process

Notice is hereby given that the U. S. Nuclear Regulatory Commission (NRC, the Commission) intends to prepare a draft supplement to the Final Generic Environmental Impact Statement (GEIS) on Decommissioning of Nuclear Facilities (NUREG–0586, August 1988) and to hold public scoping meetings for the purpose of soliciting comments. Although NUREG–0586 covered all NRC-licensed facilities, this supplement will address only the decommissioning of nuclear power reactors.

The NRC will hold a public scoping meeting on April 27, 2000, at the Radisson Hotel Lisle-Naperville (telephone: 630–505–1000), 3000 Warrenville Road, Lisle, Illinois 60532–3665, to present an overview of the proposed supplement to the GEIS and to accept public comment on its proposal. The public scoping meeting will begin at 7:00 p.m. and continue to 10:00 p.m.

The meeting will be transcribed and will include (1) A presentation by the NRC staff on the reasons for preparing a supplement to the GEIS and the environmental issues related to power reactor decommissioning to be addressed in the GEIS, and (2) the opportunity for interested government agencies, private organizations, and individuals to provide comments. Anyone wishing to attend or present oral comments at this meeting may preregister by contacting Mr. Dino C. Scaletti by telephone at 1–800–368–5642, extension 1104, or by Internet to the NRC at DGEIS@nrc.gov, 1 week prior to a specific meeting. Members of the public may also register to provide oral comments up to 15 minutes prior to the start of each meeting. Individual oral comments may be limited by the time available, depending on the number of persons who register. If special equipment or accommodations are needed to attend or present information at the public meeting, the need should be brought to Mr. Scaletti's attention no later than 1 week prior to a specific meeting, so that the NRC staff can determine whether the request can be accommodated.

Any interested party may submit comments related to the NRC's intent to supplement the GEIS for consideration by the NRC staff. To be certain of consideration, comments on the intent to prepare the supplement must be received by July 15, 2000. Comments received after the due date will be considered if it is practical to do so. At this time, comments are being sought only on the intent to prepare the supplement. The NRC staff currently projects issuance of the draft supplement for comment in early 2001. Comments on the draft supplement will be solicited at that time. Written comments should be sent to Chief, Rules and Directives Branch, Division of Administrative Services, Mail Stop T–6 D59, U.S. Nuclear Regulatory

Commission, Washington, DC 20555–0001.

Comments may be hand-delivered to the NRC at 11545 Rockville Pike, Rockville, Maryland, between 7:45 a.m. and 4:15 p.m. on Federal workdays. Submittal of electronic comments may be sent by the Internet to the NRC at DGEIS@nrc.gov. All comments received by the Commission, including those made by Federal, State, and local agencies, Indian tribes, or other interested persons, will be made available for public inspection at the Commission's Public Document Room, 2120 L Street, NW, in Washington, DC. Also, publicly available records will be accessible electronically from the ADAMS Public Library component on the NRC Web site, *http://www.nrc.gov* (the Public Electronic Reading Room).

FOR FURTHER INFORMATION, CONTACT: Mr. Dino C. Scaletti, Decommissioning Section, Project Directorate IV & Decommissioning, Division of Licensing Project Management, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Mr. Scaletti can be contacted at the aforementioned telephone number.

Dated at Rockville, Maryland, this 6th day of April 2000.

For the Nuclear Regulatory Commission.

Dino C. Scaletti,

Senior Project Manager, Decommissioning Section, Project Directorate IV & Decommissioning, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–286]

Power Authority of the State of New York; Facility Operating License No. DPR–64 Receipt of Petition for Director's Decision Under 10 CFR 2.206

Notice is hereby given that by Petition dated March 14, 2000, Mr. David A. Lochbaum, on behalf of the Union of Concerned Scientists, the Nuclear Information & Resource Service, the PACE Law School Energy Project, and Public Citizen's Critical Mass Energy Project (Petitioners), has requested that the U.S. Nuclear Regulatory Commission (NRC) take action with regard to Indian Point Nuclear Generating Unit 2 (IP2), owned and operated by the Consolidated Edison Company of New York (the licensee).

The Petitioner requested that the NRC issue an order to the licensee preventing the restart of IP2, or modify the licensee for IP2 to limit it to zero power, until (1) all four steam generators are replaced, (2) the steam generator tube integrity concerns identified in Dr. Joram Hopenfeld's differing professional opinion (DPO) and in Generic Safety Issue GSI–163 are resolved, and (3) potassium iodide tablets are distributed to residents and businesses within the 10–mile emergency planning zone (EPZ) or stockpiled in the vicinity of IP2. (The DPO process provides for the review of concerns raised by individual NRC employees who disagree with a position adopted by the NRC staff.)

As the basis for the request that the NRC prevent the licensee from restarting IP2 until all four steam generators are replaced, the Petitioner states that IP2 is equipped with Westinghouse Model 44 steam generators and that all other operating power plants in the United States that were originally equipped with Westinghouse Model 44 steam generators have replaced them. The Petitioner also states that the IP2 steam generators have had an average of 10 percent of their tubes removed from service and that many other tubes have crack indications.

As the basis for the request that the NRC prevent the licensee from restarting IP2 until the DPO filed by Dr. Hopenfeld is resolved, the Petitioner states that the length of time that the staff has taken to resolve this issue has undermined the NRC's four stated objectives: (1) Maintain safety, (2) increase public confidence, (3) improve regulatory efficiency and effectiveness, and (4) reduce unnecessary regulatory burden. The Petitioner also cites Idaho National Engineering Laboratory findings that support Dr. Hopenfeld's opinion.

As the basis for the request that the NRC prevent the licensee from restarting IP2 until potassium iodide tablets have been distributed to people and businesses within the 10-mile EPZ, the Petitioner states that the incident at IP2 demonstrated the potential for a more serious accident. The Petitioner also states that distributing potassium iodide tablets could reduce the consequences from a postulated accident.

The request that the NRC prevent the licensee from restarting IP2 until all four steam generators are replaced is being treated pursuant to 10 CFR 2.206 of the Commission's Regulations. The request has been referred to the Director of the Office of Nuclear Reactor Regulation. As provided by Section 2.206, appropriate action will be taken on this Petition within a reasonable time.

The request that the NRC prevent the licensee from restarting IP2 until the DPO filed by Dr. Hopenfeld is resolved and until potassium iodide tablets are distributed to people and businesses within the 10-mile EPZ or stockpiled in the vicinity of IP2 is not being treated pursuant to 10 CFR 2.206 of the Commission's regulations and shall be handled by separate correspondence.

A copy of the Petition is available for inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC, and accessible electronically through the ADAMS Public Electronic Reading Room link at the NRC Web site (http://www/nrc.gov).

Dated at Rockville, Maryland, this 5th day of April 2000.

For the Nuclear Regulatory Commission.

Roy P. Zimmerman,

Acting Director, Office of Nuclear Reactor Regulation.

Schedule 13E–4F, SEC File No. 270–340, OMB Control No. 3235–0375
Schedule 14D–1F, SEC File No. 270–338, OMB Control No. 3235–0376
Schedule 14D–9F, SEC File No. 270–339, OMB Control No. 3235–0382

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) the Securities and Exchange Commission (Commission) has submitted to the Office of Management and Budget requests for extension on the previously

approved collections of information discussed below.

Form S–2 is used for registration of securities of certain issuers. The Form S–2 provides investors with the necessary information to make investment decisions regarding securities offered to the public. The likely respondents will be public companies. The information collected must be filed with the Commission. All information is provided to the public upon request. Form S–2 takes 470 burden hours to prepare and is filed by 101 respondents for a total of 47,470 burden hours.

Form F–1 is a registration statement of securities of certain foreign private issuers. Form F–1 provides the public with the necessary information to make informed investment decisions regarding securities offered to the public by foreign private issuers. The information provided on Form F–1 is mandatory. All information on Form F–1 is reported to the public upon request. Form F–1 takes approximately 1,868 burden hours to prepare and is filed by 170 respondents. It is estimated that 25% of the 317,560 total burden hours (79,390 hours) would be prepared by the company.

Form F–2 is a registration statement of securities of certain foreign private issuers. Form F–2 provides the public with the necessary information to make informed investment decisions regarding securities offered to the public by foreign private issuers. The information provided on Form F–2 is mandatory. All information on Form F–2 is provided to the public upon request. Form F–2 takes approximately 559 hours to prepare and is filed by 5 respondents. It is estimated that 25% of the 2,795 total burden hours (699 hours) would be prepared by the company.

Form F–3 is a registration statement of securities of certain foreign issuers offered pursuant to certain types of transactions. Form F–3 provides the public with the necessary information to make informed investment decisions regarding securities offered to the public by foreign private issuers. The information provided on Form F–3 is mandatory. All information on Form F–3 is provided to the public upon request. Form F–3 takes approximately 166 burden hours to prepare and is filed by 150 respondents. It is estimated that 25% of the 24,900 total burden hours (6,255 hours) would be prepared by the company.

Form F–7 is a registration statement of securities of certain Canadian issuers offered for cash upon the exercise of rights granted to existing securityholders. Form F–7 provides the public with the necessary information to make informed investment decisions regarding securities offered to the public. The information provided on Form F–7 is mandatory. All information is provided to the public upon request. It takes approximately 1 burden hour to prepare and is filed by 5 respondents.

Form F–8 is a registration statement of securities of certain Canadian issuers to be issued in exchange offers or a business combination. Form F–8 provides the public with the necessary information to make informed investment decisions. The information provided on Form F–8 is mandatory. All information on Form F–8 is provided to the public upon request. Form F–8 takes one burden hour to prepare and is filed by 16 respondents. It is estimated that 25% of the 16 total burden hours (4 hours) would be prepared by the company.

Form F–X is used to appoint an agent for service of process by Canadian issuers registering securities on Form F–7, F–8, F–9 or F–10 or filing periodic reports on Form 40–F under the Securities Exchange Act of 1934. The information required on form F–X provides investors with the necessary information when considering investing in Canadian companies. form F–X takes 2 burden hours to prepare and is filed by 129 respondents. It is estimated that 25% of the 258 total burden hours (64.5 hours) would be prepared by the company.

Form DF is used to allow registrants to identify a filing that was filed late because of electronic filing difficulties in order to preserve the timeliness of the filing. This form is required by all issuers who are required to file on EDGAR. In addition, Form DF is required to be filed on occasion. All information provided on Form DF is provided to the public upon request. Form DF takes 12 minutes to prepare and is filed by 500 respondents for a total of 100 burden hours.

Schedule 13E–4F may be used by any issuer incorporated or organized under the laws of Canada making a tender offer for the issuer's own securities, where less than 20% of the class of such issuer's securities that is subject of the tender offer is held of record by U.S. residents. The information required by Schedule 13E–4F must be filed with the Commission. All information is provided to the public upon request. Schedule 13E–4F takes 2 burden hours to prepare and is filed by 3 respondents for a total of 6 burden hours.

Schedule 14D–1F may be used by any person making a cash tender or exchange offer for securities of any issuer incorporated or organized under the laws of Canada that is a foreign private issuer, where less than 40% of the outstanding class of such issuer's securities that is the subject of the offer is held by U.S. holders. The information required by Schedule 14D–1F must be filed with the Commission. All information is provided to the public upon request. Schedule 14D–1F takes 2 burden hours to prepare and is filed by 5 respondents for a total of 10 burden hours.

Schedule 14D–9F is used by any issuer incorporated or organized under the laws of Canada, or by any director or officer of such issuer, where the issuer is the subject of tender offer for a class of its securities filed on Schedule 14D–1F. The information required by Schedule 14D–9F must be filed with the Commission. All information is provided to the public upon request. Schedule 14D–1F takes 2 burden hours to prepare and is filed by 5 respondents for a total of 10 burden hours.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Written comments regarding the above information should be directed to the following persons (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, D.C. 20503, and (ii) Michael E. Bartell, Associate Executive Director, Office of Information Technology, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comments must be submitted to OMB within 30 days of this notice.

Dated: March 31, 2000.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC–24376; 812–11896]

Penn Series Funds, Inc., et al.; Notice of Application

April 4, 2000.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application under section 6(c) of the Investment Company Act of 1940 (the "Act") for an exemption from section 15(a) of the Act and rule 19f–2 under the Act.

SUMMARY OF APPLICATION: The order would permit applicants to enter into and materially amend investment subadvisory agreements without obtaining shareholder approval.

APPLICANTS: Penn Series Funds, Inc. (the "Company"), on behalf of its series (the "Funds"), and Independence Capital Management, Inc. ("ICMI").

FILING DATES: The application was filed on December 20, 1999. Applicants have agreed to file an amendment during the notice period, the substance of which is reflected in this notice.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the SEC orders a hearing. Interested persons may request a hearing be writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on April 27, 2000, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW, Washington, DC 20549–0609. Applicants, 600 Dresher Road, Horsham, Pennsylvania 19044.

FOR FURTHER INFORMATION CONTACT: J. Amanda Machen, Senior Counsel, (202) 942–7120, or Christine Y. Greenlees, Branch Chief, (202) 942–0564 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch, 450 5th Street, NW, Washington, DC 20549–0102 (tel. 202–942–8090).

Applicants' Representations

1. The Company, a Maryland corporation, is registered under the Act as an open-end management investment company. The Company currently consists of nine Funds, each with different investment objectives and policies. The Funds currently serve as the investment medium for variable life insurance policies and variable annuity contracts issued by The Penn Mutual Life Insurance Company ("Penn Mutual") and its subsidiary, The Penn Insurance and Annuity Company, and will serve as the investment medium for variable contracts that in the future are issued by Penn Mutual or its affiliates.

2. ICMI serves as the investment adviser for each of the Funds and is registered under the Investment Advisers Act of 1940 ("Advisers Act"). ICMI provides investment advisory services to the Funds under three separate investment advisory agreements with the Company (the "Advisory Agreements"). In its capacity as investment adviser, ICMI recommends the selection or termination of one or more sub-advisers ("Managers") to each Fund's board of directors ("Board"). In addition, ICMI oversees and monitors the performance of the Managers and may reallocate a Fund's assets among Managers. Each Manager recommended by ICMI is approved by the Board of each Fund, including a majority of directors who are not "interested persons," as defined in section 2(a)(19) of the Act (the "Independent Directors"). Each Fund pays ICMI a fee for its services based on the Fund's net assets.

3. ICMI has entered into sub-advisory agreements ("Subadvisory Agreements") with four Managers, each of which is registered or is exempt from registration as an investment adviser under the Advisers Act, and none of which is an affiliate of ICMI. Subject to general supervision by ICMI and the Board, each Manager is responsible for the day-to-day management of the assets of a particular Fund or a portion of the assets assigned to such Manager if managed by more than one Manager (each Fund with a Manager, a "Manager of Managers Fund"). ICMI pays the Managers out of the fees ICMI receives from the Funds.

4 Applicants request an order to permit ICMI to enter into and amend Subadvisory Agreements without obtaining Shareholder approval.[1] The requested relief will not extend to a Manager that is an "affiliated person" (as defined in section 2(a)(3) of the Act) of either a Fund or ICMI, other than by reason of serving as Manager of the Fund "Affiliated Manager").[2]

[1] The term "Shareholder" includes variable life and annuity contract owners having the voting interest in a separate account for which the Funds serve as a funding medium.

[2] Applicants also request relief for: (a) future series of the Company; and (b) all subsequently registered open-end management investment companies and their portfolios that in the future: (i) are advised by ICMI or any entity controlling, controlled by, or under common control (as defined in section 2(a)(9) of the Act) with ICMI, (ii) use the "manager of managers" strategy as described in the application, and (iii) comply with the terms and conditions of the application ("Future Funds"). The Company is the only existing investment company that currently intends to rely on the order.

Applicants' Legal Analysis

1. Section 15(a) of the Act makes it unlawful for any person to act as an investment adviser to a registered investment company except pursuant to a written contract that has been approved by a majority of the investment company's outstanding voting securities. Rule 18f-2 under the Act provides that each series or class of stock in a series company affected by a matter must approve the matter if the Act requires shareholder approval.

2. Section 6(c) of the Act authorizes the SEC to exempt persons or transactions from the provisions of the Act to the extent that the exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicants request relief under section 6(c) from section 15(a) of the Act and rule 18f–2 under the Act. For the reasons discussed below, applicants state that the requested relief meets the standard of section 6(c).

3. Applicants assert that the Shareholders, in effect, hire ICMI to manage a Fund's assets by using external Managers, in combination with ICMI's Manager selection and monitoring process, rather than by hiring its own employees to manage assets directly. Applicants believe that Shareholders expect that ICMI will, under the overall authority of the Board, take responsibility for overseeing the Managers and recommending their hiring, termination and replacement. Applicants argue that the requested relief will reduce Fund expenses associated with Shareholder meetings and solicitation of proxies and enable the Funds to operate more efficiently. Applicants also note that the Advisory Agreements will remain subject to the requirements of section 15 of the Act and rule 18f–2 under the Act, including the requirements for Shareholder approval.

Applicants' Conditions

Applicants agree that the order granting the requested relief will be subject to the following conditions:

1. Before any Fund may relay on the requested order, the operation of the Fund in the manner described in the application will be approved by a majority of each Fund's Shareholders, or, in the case of a Future Fund whose public Shareholders purchase shares on the basis of a prospectus containing the disclosure contemplated by condition 2 below, by the sole initial shareholder

before offering shares of any Future Fund to the public.

2. The prospectus for each Manager of Managers Fund will disclose the existence, substance and effect of any order granted pursuant to the application. In addition, each Manager of Managers Fund will hold itself out to the public as employing the "manager of managers" approach described in the application. The prospectus for each Manager of Managers Fund will prominently disclose that ICMI has ultimate responsibility to oversee the Managers and recommend their hiring, termination, and replacement.

3. Within 90 days of the hiring of any new Manager, ICMI will furnish Shareholders all information about the new Manager that would be included in a proxy statement. To meet this obligation, ICMI will provide Shareholders with an information statement meeting the requirements of Regulation 14C, Schedule 14C and Item 22 of Schedule 14A under the Securities Exchange Act of 1934.

4. ICMI will not enter into a Subadvisory Agreement with any Affiliated Manager without such agreement, including the compensation to be paid thereunder, being approved by the Shareholders of the applicable Manager of Managers Fund.

5. At all times, a majority of the Company's Board will be Independent Directors, and the nomination of new or additional Independent Directors will be at the discretion of the then existing Independent Directors.

6. When a Manager change is proposed for a Manager of Managers Fund with an Affiliated Manager, the Company's Board, including a majority of the Independent Directors, will make a separate finding, reflected in the applicable Fund's Board minutes, that such change is in the best interests of the Fund and its Shareholders and does not involve a conflict of interest from which ICMI or the Affiliated Manager derives an inappropriate advantage.

7. ICMI will provide general management services to each Manager of Managers Fund, including overall supervisory responsibility for the general management and investment of each Manager of Managers Fund's securities portfolio, and, subject to Board review and approval, will (i) set each Manager or Managers Fund's overall investment strategies, (ii) recommend and select Managers, (iii) allocate, and when appropriate, reallocate a Manager of Managers Fund's assets among its Managers when a Fund has more than one Manager, (iv) monitor and evaluate Manager performance, and (v) implement procedures designed to ensure that the Manager complies with the Manager of Managers Fund's investment objectives, policies, and restrictions.

8. No director or officer of the Company, or director or officer of ICMI will own, directly or indirectly (other than through a pooled investment vehicle over which such person does not have control), any interest in a Manager, except for (i) ownership of interests in ICMI or any entity that controls, is controlled by or is under common control with ICMI; or (ii) ownership of less than 1% of the outstanding securities of any class of equity or debt of a publicly traded company that is either a Manager or an entity that controls, is controlled by, or is under common control with a Manager.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of April 10, 2000.

A closed meeting will be held on Wednesday, April 12, 2000 at 11:00 a.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and (17) CFR 200.402(a)(4), (8), (9)(A) and (10), permit consideration for the scheduled matters at the closed meeting.

Commissioner Hunt, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Wednesday, April 12, 2000 will be:

Institution and settlement of injunctive actions; and

Institution and settlement of administrative proceedings of an enforcement nature.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact:

The Office of the Secretary at (202) 942–7070.

Dated: April 6, 2000.

Jonathan G. Katz,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

(Release No. 34–42615; File No. SR–CBOE–00–03)

Self-Regulatory Organizations; Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Change by the Chicago Board Options Exchange, Inc., Relating to Rejecting RAES Orders in Certain Limited Situations

April 3, 2000.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on February 22, 2000, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. In this proposed rule change, CBOE seeks to

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

extend a pilot program that was first approved by the Commission on November 22, 1999.[3] On March 22, 2000, CBOE filed Amendment No. 1 to the proposed rule change.[4] The Commission received eight comment letters on the pilot program.[5] The Exchange's response to these comment letters can be found in Item IV. The Commission is publishing this notice and order to solicit comments on the proposal from interested persons and to approve the proposal on an accelerated basis for a 6 month pilot that will expire on August 22, 2000.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE proposes to extend, for a 6 month period, a pilot program that provides for certain orders to be rejected from RAES for manual handling in certain limited situations. The text of the proposed rule change is available at the CBOE and at the Commission's public reference room.

[3] *See* Release No. 34–42168 (November 22, 1999), 64 FR 66952 (November 30, 1999) (File No. SR–CBOE–99–61).

[4] In Amendment No. 1, the CBOE amended the filing to respond to questions from the Commission staff and to incorporate these responses into the text of the rule filing. In addition, the CBOE proposed to adopt an Interpretation that provides protection for orders kicked out of RAES when the prevailing market bid or offer is equal to the best bid or offer on the Exchange's book. This Interpretation, which was part of CBOE's rules until October 1999, would apply to option classes where the Automated Book Priority system has not been implemented (Interpretation .04 to CBOE Rule 6.8). *See* letter from Timothy Thompson, Director, Regulatory Affairs, CBOE, to Elizabeth King, Associate Director, Division of Market Regulation, Commission, dated March 21, 2000 ("Amendment No. 1").

[5] *See* letters from George Brunelle, Law Offices of George Brunelle, to Secretary, Commission, dated December 20, 1999 ("Brunelle Letter 1"); James I. Gelbort, to Jonathan G. Katz, Secretary, Commission, dated December 21, 1999 ("Gelbort Letter"); Thomas Peterffy, Chairman, and David M. Battan, Vice President and General Counsel, Interactive Brokers, The Timber Hill Group, to Jonathan G. Katz, Secretary, Commission, dated December 21, 1999 ("IB Letter"); Linda S. Tors, to Jonathan G. Katz, Secretary, Commission, dated January 6, 2000 ("Tors Letter"); Thomas Coyle, to Jonathan G. Katz, Secretary, Commission, dated January 3, 2000 ("Coyle Letter"); John Rohde, to Jonathan G. Katz, Secretary, Commission, dated January 9, 2000 ("Rohde Letter"); Brent Houston, Senior Vice President, Capital Markets, Datek Online, to Jonathan G. Katz, Secretary, Commission, dated February 1, 2000 ("Datek Letter"); George Brunelle, Brunelle & Hadjikow, to Jonathan G. Katz, Secretary, Commission, dated March 23, 2000 ("Brunelle Letter 2"). The Division of Market Regulation received Brunelle Letter 2 on March 28, 2000. In Brunelle Letter 2, the commenter generally reiterates the comments from his previous letter (Brunelle Letter 1) and also comments on another CBOE rule filing, SR–CBOE–99–57.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CBOE included statements concerning the purpose of, and basis for, the proposed rule change. The text of these statements may be examined at the places specified in Item V below. The CBOE has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule filing is to extend, for an additional 6 month period, the pilot program that provides (where the Exchange's Automated Book Priority ("ABP") system has been implemented) for certain orders to be rejected from RAES for manual handling in the limited situation where the bid or offer for a series of options generated by the Exchange's Autoquote system becomes crossed or locked with the best bid or offer for that series as established by a booked order. The Exchange believes this limited kick-out situation provided by the pilot program is the best alternative currently available to the Exchange to address the particular risk presented by the unusual situation where the Autoquote crosses or locks with an order in the Exchange's book. In fact, as described further below, the Exchange has found that only 0.44% of all orders (in those classes where the ABP system has been implemented) routed to RAES would be rejected pursuant to the pilot program.

1. Background

The Exchange's ABP system allows an order entered into RAES to trade directly with an order on the Exchange's customer limit order book in those cases where the prevailing market bid or offer is equal to the best bid or offer on the Exchange's book.[6] The Commission approved the Exchange's rules implementing the ABP system in October 1999,[7] however, these rule changes do not become operative in a particular class until the Exchange implements the ABP system in that class.[8] In those classes in which the ABP system has yet not been implemented, orders are still subject to Interpretation .04, which requires an order to be rerouted from RAES in the event that an order in the book is establishing the prevailing best bid or offer (whichever one is relevant to the particular order).[9] The Exchange is not proposing to provide this extra protection to orders that are rejected where the ABP system has been implemented for a number of reasons. First, as the Exchange noted in its original filing, in most cases where the order is kicked out due to an Autoquote inversion, the booked order already will have been traded in open outcry before the incoming RAES orders are received. In addition, the Exchange's systems have been designed such that a rejected order will normally be routed directly to the Exchange's electronic brokerage terminal ("PAR") in the trading crowd and will appear on that PAR machine instantaneously. Consequently, these rejected orders will routinely be represented in the trading crowd within a matter of seconds of being rejected. These orders will be entitled, by virtue of the firm quote rule, to be executed at the bid or offer displayed when that order reaches the trading station.

As described in the prior filing, in the course of planning for the implementation of the ABP system, the Exchange became aware of an unintended consequence of the operation of the ABP system. That is, the Exchange realized that in situations where the best bid or offer for one or more series of a particular class is established by one or more orders in the

[6] In the event that the order in the book is for a smaller number of contracts than the RAES order, the balance of the RAES order would be assigned to participating market makers at the same price at which the rest of the order is to be executed

[7] *See* Release No. 34–41995 (October 8, 1999), 64 FR 56547 (October 20, 1999) (File No. SR–CBOE–99–29).

[8] As of February 10, 2000, ABP has been implemented in over 150 classes of equity options on the Exchange floor, including many of the most actively traded option classes. ABP has been implemented in options classes at every trading station on the floor. As the Exchange has noted to Commission staff, the Exchange will continue to roll out ABP to the other option classes on the floor in any orderly manner—in a manner designed to ensure the continued integrity of the ABP system.

[9] In those classes where ABP has not yet been implemented, when a RAES order is entered into the Exchange's Order Routing System at a time when the prevailing market bid or offer is equal to the best bid or offer on the Exchange's book, the order generally is routed electronically to a Floor Broker's terminal or work station in the crowd subject to the volume parameters of each firm. Today, the orders are routed to the Floor Brokers instead of being automatically executed in the crowd at the market price, because execution with the crowd would be inconsistent with CBOE Rule 6.45, which provides that bids or offers displayed on the customer limit order book are entitled to priority over other bids or offers at the same price. Until ABP is implemented in the particular class, the first such order rerouted from RAES due to a situation in which the book touches the market is entitled to be filled at the prevailing quote at the time the order was rerouted. *See* Amendment No. 1.

book, the market makers logged into RAES for that class of options would be subject to a substantial risk in the event that the market in the underlying stock moved significantly and quickly in a direction that made the booked order substantially better than the price calculated by CBOE's Autoquote formula. In that event, while the booked order would quickly be executed, CBOE represents that the ABP system may not be able to react quickly enough to remove the executed order from the limit order book. As a result, once ABP is implemented, orders entered in RAES would automatically be executed against the stale bid or offer still being shown in the book notwithstanding the booked order having already been executed. CBOE contends that this result could cause direct and substantial economic disadvantage to the market makers who are obligated to participate in RAES executions.[10] The Exchange believes there is no question that the consequence of implementing ABP without addressing this substantial increased risk is that (i) market makers may choose not to participate on RAES (thus, affecting the liquidity of those lower volume series traded on RAES and endangering the viability of RAES itself) and/or (ii) market makers may request the Equity Procedure Committee to either reduce the size of orders eligible for RAES or to take some series off of RAES (thus, eliminating significant advances in automatic execution that our customers have requested).

As mentioned in that prior filing, the Exchange expected the number of orders that would be rejected from RAES under this proposed rule would represent only a small subset of the orders that were rejected in those same classes before ABP was implemented in those classes. In fact, the Exchange has found that the number of kick-outs resulting from the implementation of this system is a remarkably small percentage of the RAES-eligible orders. Of the 150 classes in which ABP had been implemented as of February 14, the Exchange found that only 44 of those classes had an ABP order on that day. Over the course of that day, 5908 orders were routed to RAES in those particular 44 classes accounting for 41,102 contracts. Of those 5908 orders, 1054 orders (representing 9017 contracts) were handled by ABP, *i.e.* they were traded against orders in the book and in some cases also against market makers at the price of the booked order. In all 44 classes during the course of the day, there were only 26 orders (representing 130 contracts) rejected from RAES due to the Autoquote bid or offer crossing or locking with the price of the booked order.[11] This is, on average, less than one order per day per class that was rejected pursuant to the pilot program and amounts to only 0.44% of the orders routed to RAES in those 44 classes and only 0.31% of all the contracts routed to RAES in those 44 classes.[12] It should also be noted that if ABP had not been implemented in those classes, all 1054 orders that were handled by ABP would have been rejected from RAES for manual handling because of the situation in which the book touches the market. With ABP in place along with the limited kick-out, only 2.46% of the orders (and 1.44% of the contracts) that would have been rejected without ABP are now rejected with ABP.

Other Alternatives

The Exchange believes that the present alternative of rejecting RAES orders in the limited situation it has described is the most effective way to provide the benefits of the ABP system without creating such a great risk to Exchange market makers that they choose not to participate on RAES, or that they encourage the appropriate Floor Procedure Committee to offer only a few active series on RAES. During the 6 month pilot period, the Exchange will continue to seek other alternatives to having these orders rejected. Among the alternatives the Exchange is presently considering are: (i) Having the Autoquote system generate an order that will be traded on RAES in those cases where the Autoquote crosses with the book value and (ii) having an income order trade against the book order at the book price for the volume in the book and then having the balance of the incoming order trade at the next best available price whether it is another booked order or against the market makers logged onto RAES at the best market maker quote whether from Autoquote or verbalized by a market maker. The Exchange will continue to search for alternatives to develop its systems to provide the best opportunities for its customers. As it is, Exchange customers who enter orders in the RAES system in those classes where the ABP system has been implemented are much less likely to have their orders rejected for manual handling today than they were before the implementation of ABP along with the limited kickout provided by the pilot program.

Monthly Study

The Exchange is committing to provide a study each month during the pilot program detailing the number of kickouts that the Exchange experienced pursuant to the pilot program during the previous month.

2. Statutory Basis

The CBOE believes the proposed rule change is consistent with and furthers the objectives of Section 6(b)(5)[13] of the Act in that it is designed to remove impediments to a free and open market

[10] CBOE explains the potential risk market makers could be subject to by implementing the ABP system without the proposed "carve out" by way of example. Assume that in a volatile stock (where the maximum order size for RAES has been established at 50 contracts) small customer orders in the book are establishing the best bid in six different series. In one particular series, Series A, assume that the CBOE market is 5 (bid)—5⅛ (offer), with a book order to buy 5 contracts at $5 (which establishes the best bid). Assume further that the price of the underlying internet stock drops precipitously in a matter of seconds. When the underlying moves, the Exchange's Autoquote system will also update CBOE market makers' quotes for the options overlying that stock. Assume with the drop in the underlying, the Exchange's Autoquote system establishes a bid and offer of 4¾–⅞ for Series A. (The same scenario would play out with the other five series whose best bid is established by an order in the book.) The order in the book representing the best bid will likely be immediately executed by the crowd in the auction market. For some period of time after the trade has been consummated in open outcry, however, the bid will still be displayed as CBOE's bid while the Order Book Official physically punches the keys to take the bid down from the display. During this period, the displayed bid of 5 in the book will be out of line with the theoretical bid of 4¾ generated by CBOE's Autoquote system. In the meantime, traders who have equipped themselves with the necessary computer equipment and communications facilities could have identified the pricing disparity between the theoretical price of the options and the displayed best bids, could automatically generate orders to sell the affected options and route those orders to RAES. If RAES is allowed to operate as it does under normal circumstances, each order to sell that arrives at the Exchange from these investors, for so long as the out-of-line book bid continues to be displayed, will be assigned to market makers in the trading crowd who are logged on to RAES. These market makers in turn will be obligated to buy at the $5 bid, which could now be significantly away from the theoretical bid. Of course, the same adverse consequences could be experienced in the other five series of the class in which the bid was established by a booked order

[11] In those 44 classes in which an ABP order was received, 26 orders were rejected. While there was a limited concentration of the kickouts in certain classes, no class had more than 5 kickouts for the entire day. Of the 26 rejects, 19 of them occurred in five classes as follows: CSCO (Cisco Systems)—5, YHOO (Yahoo! Inc.)—4, CMGI (CMGI Inc.)—4, AOL (America Online, Inc.)—3, QCOM (Qualcomm Inc.)—3.

[12] Of course, a more revealing statistic might be the percentage of RAES orders rejected compared to all RAES orders received in those 150 classes in which ABP had been implemented, not only those classes in which an ABP order was received. The percentages for the 150 ABP classes would be significantly lower than they are for the 44 classes alone.

[13] 15 U.S.C. 78f(b)(5).

and to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

CBOE does not believe that the proposed rule change will impose a burden on competition that is not necessary or appropriate in furtherance of purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participant, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Summary of Comments

The Commission received eight comment letters on the pilot program.[14] All of the commenters disapprove of the pilot program and ask the Commission not to extend it. Generally, the commenters assert that the pilot program protects CBOE market makers and disadvantages retail customers.[15] A few firms commented on the linking of the options exchanges.[16] The linking issues, however, is not the subject of this filing.

One commenter argues that the pilot program allows CBOE market makers to abandon their firm quote responsibilities.[17] He states that CBOE's Autoquote system does not reflect public bids or offers, but only the activity of a CBOE computer. The commenters asserts that, for example, when this system locks or crosses CBOE's bid as established by a customer limit order, the pilot program will allow market makers to abandon the prevailing public quotation, and to reject all incoming sell orders which would otherwise be entitled to trade against the best published bid. The commenter goes on to state that after these sell orders have been redirected to the crowd, these orders will most likely be executed at an inferior price.

In addition, this commenter believes that CBOE's arguments supporting the pilot program are flawed. He notes that CBOE supports the pilot by arguing that without it, market makers might avoid participating on RAES or might widen their quotes, both in response to the risk created by potential arbitrage situations. He further notes, however, that CBOE also states that it does not anticipate that the potential arbitrage situation will occur that frequently and therefore, the pilot program will have a minimal impact on the market. In sum, he argues that CBOE's support of the proposal is flawed because it simultaneously argues that makers may be exposed to tremendous risk, but the situations creating this risk will occur very infrequently.

Another commenter also refutes CBOE's arguments supporting the pilot program.[18] In particular, the commenter notes that CBOE's fear that market makers may not participate on RAES should be balanced with some of CBOE's other RAES initiatives, such as requiring all DPMs to participate in automatic execution systems and earlier attempts to decrease the number of market makers participating in RAES. Further, the commenter addresses CBOE's argument about market makers widening their quotes by asserting that CBOE already permits double-width quotes in many volatile options classes and also allows market makers to specify a RAES size limit that is less than the class maximum.

In addition, this commenter argues that the changes to various exchanges' automatic execution systems may create public confusion and unfairly restrict customers' trading opportunities. Before the approval of the ABP system and the pilot program, the commenter asserts that public customers knew how their orders would be handled when these orders reached the CBOE floor. When the ABP system was approved, the commenter notes that CBOE deleted Interpretation .04, which provided protection for kicked-out RAES orders, because CBOE believed that the ABP system would reduce or eliminate kick-outs. However, after approval of the ABP system, the commenter points out that CBOE subsequently expanded the situations in which RAES orders could be kicked-out through a series of rule filings, including the pilot program. According to the commenter, the effect of all of these changes is that CBOE still has the ability to kick-out orders, but it no longer has a rule in place which protects these kicked-out orders.

Two broker-dealers commented that the pilot program has an adverse impact on the trading strategies of their customers.[19] In particular, these firms maintain that they have created order routing systems that send customer orders to the market with the best price, and these order routing systems rely on firm quotes and automatic execution. They assert that the kick-out feature of the pilot program hurts their order routing systems because the price displayed by CBOE might not actually be the price that their customers receive. Further, they argue that once an order is kicked-out, their customers lose the advantages of an automatic execution system such as RAES, which according to these commenters, include the ability to modify or cancel orders online. Three other individuals also share these comments.[20]

All of the commenters argue that the pilot program does not allow customers to take advantage of certain trading opportunities, including arbitrage situations. For example, one commenter asserts that the essence of successful options trading, and of successful arbitrage, is the identification of a pricing disparity between the theoretical price of the option and the displayed best bid or offer.[21] This commenter believes that the pilot program, with its kick-out feature, does not allow traders to take advantage of these opportunities.

Two commenters offer suggestions on how to eliminate the need for the pilot program. One of these commenters believes that if CBOE provides additional staff to help take out the booked order when the booked order is locked or crossed by the Autoquote price, the need for the pilot program would be eliminated.[22] The other commenter suggests that when an Autoquote price touches the price of a book order, the system should automatically execute the book order against a market maker.[23] The commenter believes that this would eliminate the need for the pilot program because it would eliminate the possibility of a book order being locked or crossed with the Autoquote price.

In the alternative, this commenter suggests that if the pilot program is to continue, then CBOE should be required to notify broker-dealers that automatic execution is not available in a particular options series. the commenter believes that CBOE should post this notification at least three seconds prior to removing the options series from the automatic execution system. In addition, this commenter believes that the pilot program should not be extended because it gives no incentive to CBOE to fix its systems.

IV. The Exchange's Response to the Commenters

Seven comment letters were submitted on the original proposed rule change: one by Interactive Brokers; one by James Gelbort; one by George

Brunelle on behalf of a private investment firm client; one by Thomas Coyle; one by Linda S. Tors; one by John Rohde; and one from Datek Online.[24] It should be noted that all but three of the letters—the IB Letter, the Gelbort Letter, and the Brunelle Letter 1—were sent to the Commission after the public comment period had expired; the Datek letter was sent more than one month after the comment period ended. Nevertheless, the Exchange is addressing the arguments raised in each of the letters.

Stripped of their rhetoric and inaccuracies, these letters all essentially argue that the Exchange's proposed rule should be disapproved because it does not allow, in their opinion, for the smooth operation of a certain business model of which they presumably want to take advantage. A central theme of many of the letters is that the type of kick-out provided for by this rule (and other procedures at other exchanges) is a step backward in a technological world that is providing quicker and better access for customers to automatic execution systems. What these letters ignore is that the Exchange has continually expanded access to RAES over the last few years by increasing the eligible RAES order size, and that with this new kick-out there are actually fewer orders rejected from RAES today (not more as these letters suggest) than there were just a few months ago before the ABP system was put in place.[25] Before the implementation of ABP in a particular class, every incoming RAES-eligible order would be rejected from RAES in those cases in which a booked order was establishing the best price on that side of the market against which the order would be traded. In those classes where ABP is in place, an incoming RAES-eligible order is only rejected from RAES if the booked order is establishing the best price on the side of the market against which the order would be traded and if the Autoquote bid or offer (as appropriate) crosses or locks with that book price.

The letters also wrongly assume that there is no public benefit to this kick-out[26] and that the proposal was established merely to protect the Exchange's market makers from suffering losses or to protect the market makers' "advantages."[27] Again, these letters ignore the fact that, unlike the professional traders who commented on the pilot program, market makers have become subject to ever greater obligations that have been imposed by Exchange rules. In fact, the ABP system obligates the Exchange's market makers to trade up to fifty (50) contracts (the maximum RAES order size) at a price that was established by a public customer and not by the market makers.

One of the commenters suggested that the book staff have an incentive to continue to display a book price that is crossed or locked with the Autoquote system.[28] Of course, it should be apparent from everything the Exchange has explained why the DPM book staff has an incentive to take down the already traded book price as soon as possible. The longer the book price remains, the more orders that will be sent to the Exchange trying to trade at the erroneous price and the more orders that will subsequently be rejected due to the pilot program. The Exchange's DPMs have an incentive from a customer service standpoint and for the sake of running an efficient business to ensure the displayed prices are accurate and that the prices of orders that are traded are taken down as soon as possible.

While the above discussion addresses the arguments presented in all of the comment letters, the Exchange wanted to address individually some of the letters which raise some issues that are particularly troubling because they state inaccuracies and/or misrepresent the Exchange's intentions.

Brunelle Letter 1

The Brunelle Letter 1, which was sent on behalf of a "private investment firm" who chose to remain anonymous, states that the CBOE is arguing that "the public can have RAES, or they can have the Firm Quote Rule * * * but not both." This statement is contrary to the Exchange's rules and to Exchange practice. In fact, the Exchange's firm quote rule, CBOE Rule 8.51, states in paragraph (a)(2) that "the appropriate Floor Procedure Committee * * * may establish a different firm quote requirement for a particular class of options that is not less than the RAES contract limit and no more than 50 contracts." By virtue of this rule, every order entered for the maximum RAES eligible size or less is entitled to firm quote treatment. This means that every RAES-eligible order, including those that are rejected in the limited circumstance permitted by the pilot program, will absolutely receive firm quote treatment whether through RAES or after having been rejected from RAES. Because the Exchange has developed systems that route those rejected orders instantaneously to electronic PAR terminals in the trading crowd, in most cases these orders will be executed at the prevailing quotes within a few seconds of when they were entered.

Gelbort Letter

The Gelbort Letter states that the "CBOE does not propose to expand the ABP system to insure that booked bids or offers are, in fact, rapidly executed by crossed or locked Autoquotes." As the Exchange has stated herein, the Exchange has in fact considered and continues to consider expanding the ABP system to have the Autoquotes trade against the booked orders. It was simply not possible at the time ABP was implemented to change the system to allow for this to happen and so the method chosen for dealing with the problem was the one with the Exchange determined was the least disruptive of those feasible alternatives.

Mr. Gelbort continues by arguing that "[e]ven in an electronic world, on-floor traders continue to enjoy significant advantages." In fact, what Mr. Gelbort completely neglects to point out is that any "advantages" that on floor traders may have once enjoyed have been eroded over the years as customers have gained access to computers that allow them to identify opportunities for trading and have allowed them to transit orders nearly instantaneously to the floor. In fact, the Exchange has facilitated the erosion of these "advantages" by remaining at the forefront of developing systems that allow for quick access, by increasing the order size eligible for automatic execution, and by guaranteeing that RAES orders will be filled at the NBBO if the NBBO is no more than the step-up amount better than the CBOE best quote. What Mr. Gelbort also conveniently neglects to mention is that in spite of the instantaneous access to the Exchange's markets, high speed computers, and a wealth of information at their fingertips, the professional traders enjoy one enormous advantage over Exchange market makers. They have absolutely no obligation to trade at a particular price, unlike Exchange market makers. CBOE market makers who are logged onto RAES, however, are obligated to trade incoming RAES orders at the disseminated price or better when they are assigned the trade even if that price was established by a

[24] CBOE did not receive a copy of Brunelle Letter 2.

[25] As described above, only 2.46% of the orders (1.44% of the contracts) rejected before the implementation of ABP are rejected pursuant to the pilot program. If the number of rejected orders were compared to all RAES orders in those classes in which ABP had been implemented these percentages would be even smaller.

[26] *See* Brunelle Letter 1 at 1, "Without any countervailing benefit to the public markets. * * *"

[27] *Id.*

[28] *See* IB Letter.

small order in the Exchange's book that was better than the price any CBOE market maker was willing to pay for that particular series.

Mr. Gelbort also argues that the result of these rules is to lead to "needless public confusion." As stated earlier, however, the Exchange has already pointed out that it has gone to great lengths to inform the public of those limited circumstances where an order may be rejected from RAES pursuant to the pilot program both by filing the proposal for pubic comment and by issuing regulatory circulars on the matter. The reasons why an order may be rejected from RAES pursuant to this proposal are clearly defined and have been clearly stated. Mr. Gelbort's final paragraph on the subject rule filing, at the bottom of page 4, is a series of inaccuracies and self-serving statements. Mr. Gelbort argues that if the keystrokes have not been made to trade a booked order it is due to "inattention rather than some inherent systems delay." In fact, at most trading stations there are traders who specifically look for situations where the Autoquotes become crossed with a booked order and trade them immediately. However, even though it takes only "a few quick keystrokes" to trade the order, this is all the time it takes for the RAES system to be flooded with orders from multiple customers. This is particularly true when the DPM staff has to trade more than one booked order at the same time.[29] As far as Mr. Gelbort's assertion that the CBOE has been willing to provide additional book terminals and trained personnel DPMs that request them (presumably to suggest that this could solve the problem without the need for rejecting RAES orders), while this is true and remains true, this is not a solution to the particular problem. The Autoquote system may become crossed with a booked order at any time in any options class across the floor and by the time the situation arises it will be too late to transfer staff as Mr. Gelbort no doubt knows.

Mr. Gelbort continues by correctly stating that DPMs have been assigned to all equity option classes and argues that this should eliminate any concern about market makers not participating on RAES if this particular kick-out were not employed because DPMs, at least, are required to participate on RAES at all times. Mr. Gelbort's conclusion is flawed for a number of reasons. First, the Exchange does not believe it is ideal in most instances for DPMs alone to participate on RAESs. Non-DPM market makers, however, are not required to log onto RAES unless they are present in the trading pit and they have logged on at a prior time in the particular expiration cycle. In fact, to the extent market makers are logged onto the RAES system, these market makers will have an incentive to ensure that the quotes are updated and accurate. In addition, regardless of whether a DPM is logged onto RAES, if the risk involved in trading over RAES becomes so great, the DPM will likely request the Floor Procedure Committee to remove all but the most active series from RAES.

IB Letter

Like the Gelbort Letter, the IB Letter draws faulty conclusions from failing to have access to a number of facts. Like the Gelbort Letter, the IB Letter suggests there are better alternatives than rejecting orders from RAES when the Autoquotes cross with the price of a booked order. Interactive Brokers makes this statement without knowing what alternatives the Exchange considered (and continues to consider) and without knowing what time and effort might be involved in instituting Interactive Brokers' preferred solution to deal with the issue. The simple fact of the matter is that the Exchange, Interactive Brokers and Mr. Gelbort all share the same ultimate goal, to have the CBOE's systems operate in the most efficient manner with the fewest disruptions. However, the Exchange is also concerned about providing market makers with the proper incentives to provide the best and tightest markets for the benefit of all customers. Until the Exchange is confident that the quality of its markets will not be compromised by subjecting market makers to undue risk for which they cannot reasonably account, it should not be forced to adopt any particular methodology for dealing with the issue at hand merely because it happens to more easily accommodate the particular system designed by one firm.

Interactive Brokers' entire first argument on pages 2–4 of the IB Letter is predicated on the notion that the number of exceptions to automatic execution is growing on the options exchanges. However, as discussed previously, the number of kick-outs that result from the current pilot program is only a very small subset of the orders that have been kicked out in situations before ABP was implemented on the Exchange. It is the Exchange's judgment, however, that although it is not ideal, it would prefer the limited number of kick-outs provided for by the pilot program than to risk losing liquidity on RAES or having series taken off of RAES.

Interactive Brokers, in fact, suggests an alternative solution on page 5 to deal with the Exchange's particular concern that the Exchange is already considering. Namely, Interactive Brokers suggests that when an Autoquote price touches the price of a booked order, the system should automatically execute the booked order against a market maker. The CBOE agrees that this may well be a longer term solution to the particular issue. In light of the complexities of the RAES system and the Exchange's other current system priorities (including a conversation to decimalization), "fixing" the problem would entail more than "a few of programming work" as Interactive Brokers suggests.

Finally, Interactive Brokers argues that in lieu of disapproving the proposed rule that the Exchange be required to post in electronic form, accessible to broker-dealer routing systems, a notification that automatic execution is not available for a particular option series. Interactive Brokers argues this notice should be accessible at least three seconds prior to such options series being removed from the automatic execution system. The Exchange is, in fact, exploring having a code placed next to its disseminated quotes that indicates when the best quote for a particular series is being established by a booked order. The Exchange believes it may be able to provide such notice in the near future and this would undoubtedly benefit Interactive Brokers' system. It would not be feasible to wait three seconds to remove the series from automatic execution, however, because the instant that a booked order becomes the CBOE's best bid or offer, the market makers become subject to the risk that the pilot program was designed to manage.

V. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington D.C. 20549–0609. Copies of submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the

[29] The Exchange estimates that for one series it will generally take the DPM book staff 1 to 4 seconds to complete the transaction. Of course, there are some instances where more than one booked order may be traded at the same time. As soon as the booked order is traded, the book-Autoquote inversion will generally cease to exist and all incoming RAES orders after that point will be automatically traded and not rejected from RAES.

Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to File No. SR–CBOE–00–03 and should be submitted by May 2, 2000.

VI. Commission's Findings and Order Granting Accelerated Approval of Proposed Rule Change

After careful review, the Commission finds that the proposal is consistent with the requirements of the Act.[30] In particular, the Commission finds the proposal is consistent with Section 6(b)(5)[31] of the Act. Section 6(b)(5) requires, among other things, that the rules of an exchange be designed to remove impediments to a free and open market and to protect investors and the public interest.

In extending this pilot, the Commission has balanced the commenters concerns with those expressed by CBOE. The Commission notes that CBOE has provided figures the show that kick-outs under this pilot program occur infrequently. Specifically, on February 14, 2000, CBOE conducted a study to determine how often kick-outs from RAES occurred as a result of this pilot program. On that date, CBOE found that out of the 150 classes for which the ABP system had been implemented, only 44 of those classes had an order executed through the ABP system, *i.e.*, the RAES order interacted with an order on the limit order book. In those 44 classes, 1054 orders (representing 9017 contracts) were executed through the ABP system. In those same 44 classes, only 26 orders (representing 130 contracts) were rejected from RAES due to the Autoquote system locking or crossing CBOE's best bid or offer as established by the book. Moreover, the orders rejected from RAES as a result of this pilot represent a small percentage of the total amount of orders routed to RAES in these 44 options classes on February 14 (5908 orders representing 41,102 contracts). These figures support CBOE's position that kick-outs under this pilot program occur infrequently.

Nevertheless, the Commission is mindful of the commenters concerns. In particular, the Commission agrees with the commenters that there are other solutions than the one employed by CBOE in this pilot program. In this filing, CBOE listed two alternative solutions. One of these alternatives involves having an incoming order trade against the book order at the book price for the volume in the book and then having the balance of the incoming order trade at the next best available price—whether it is with another booked order or with a market makers logged onto RAES. This alternative would allow customer orders to interact with orders on the limit order book, but would eliminate the risk to market makers of executing a RAES order for the maximum eligible size when the limit order is for a smaller number of contracts. In this regard, the CBOE has represented that it will continue work on systems changes to address the situation when the Autoquote system locks or crosses CBOE's best bid or offer as established by the book and has assigned a high priority these systems changes. CBOE stated that it is confident that these changes could be implemented by the end of this calendar year, after it has completed the projects needed for it to convert to decimal trading.[32]

In the meantime, the Commission agrees with one of the commenters that CBOE should provide protection to kicked-out orders in options classes where the ABP system has not yet been implemented. When the ABP system was originally proposed, CBOE represented that the ABP system, by allowing RAES orders to interact directly with orders in the exchange's limit order book, would reduce or eliminate the need for kick-outs. Because of this representation, CBOE eliminated Interpretation .04, which provided protection for orders that had been kicked-out. As of the date of this filing, CBOE has not implemented the ABP system on a floor-wide basis. The Commission therefore believes that Amendment No. 1, which re-adopts Interpretation .04, should help provide protection to orders kicked-out in those classes in which the ABP system has not been implemented. CBOE also stated that it would continue to roll out the ABP system in those classes in which it had not yet been implemented.

In light of the likely benefits to customer limit orders expected to be gained by the continued implementation of the ABP system, the Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice thereof in the **Federal Register**. Further, the Commission notes that the CBOE has agreed to provide monthly reports to the Commission regarding the number of times an incoming RAES order is rejected pursuant to this pilot.[33]

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[34] that the proposed rule change (SR–CBOE–00–03) is hereby approved through August 22, 2000.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[35]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–42617; File No. SR–EMCC–00–3]

Self-Regulatory Organizations; Emerging Markets Clearing Corporation; Notice of Filing and Order Granting Accelerated Approval of a Proposed Rule Change Relating to the Exclusion of Excess Clearing Fund Deposits in the Calculation of an Inter-Dealer Broker Member's Minimum Margin Amount

April 4, 2000.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on March 30, 2000, the Emerging Markets Clearing Corporation ("EMCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which items have been prepared primarily EMCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested parties and to grant accelerated approval of the proposed rule change.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The text of the proposed rule change provides EMCC the right, in its discretion, to exclude from an inter-

[1] 15 U.S.C. 78s(b)(1).

dealer member's "minimum margin amount" additional margin that such member has posted to the clearing fund due to its contra-party's failure to timely submit one or more trades to EMCC once the underlying trade(s) have been compared or settled.[2]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, EMCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. EMCC has prepared summaries set forth in sections (A), (B) and (C) below, of the most significant aspects of these statements.[3]

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

EMCC's rules require that inter-dealer broker members ("IDBs") be margined in the same way as dealer members. Rule 4, Section 5(A) of EMCC's Rules requires members' clearing fund deposits to equal the greater of (i) their daily margin amount (*i.e.*, the amount calculated for each member on each business day) and (ii) their minimum margin amount (*i.e.*, their "floor"). The floor is the amount equal to the largest single daily margin amount computed for a member during the relevant calendar month and the previous calendar month.

As EMCC has developed and expanded its membership base, there have been concerns about the effect of the late trade matching on IDBs. That is, where an IDB and one of its contra-parties submit a trade on a timely basis but the other contra-party dealer does not, the IDB will be required to post additional clearing fund with EMCC. EMCC's Addendum B requires the late submitting dealer in that situation to cover the IDB's financing cost for the excess clearing fund deposit. Addendum B does not, however, address the impact of such additional margin requirement on the computation of the IDB's floor. The intent of requiring the additional margin from the IDB is to cover EMCC's risk exposure until the trade is compared or settled. As written, the IDB Member would have to maintain that additional amount on deposit as its floor for an additional 30 to 60 days. Accordingly, the proposed rule would amend Rule 4 to permit EMCC, in its discretion, to exclude the additional margin from the calculation of the IDB's floor once the underlying trade(s) have been compared or settled and thus return the excess clearing fund so posted by the IDB.

This rule change should encourage IDBs to become participants in EMCC, and therefore facilitate the prompt and accurate clearance and settlement of emerging market securities transactions. The proposed rule change is therefore consistent with the requirements of section 17A(b)(3)(F) of the Act, as amended, and the rules and regulations thereunder.

(B) Self-Regulatory Organization's Statement on Burden on Competition

EMCC does not believe that the proposed rule change will have an impact on or impose a burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments relating to the proposed rule change have been solicited or received. EMCC will notify the Commission of any written comments received by EMCC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Commission finds that the proposed rule change is consistent with section 17A(b)(3)(F) of the Act, as amended, and the rules and regulations thereunder. Section 17A(b)(3)(F) of the Act requires that the rules of a clearing agency be designed to assure the safeguarding of securities and funds which are in the custody or control of the clearing agency or for which it is responsible.[4] The Commission believes that EMCC's proposal to exclude from the calculation of an IDB's minimum margin amount clearing fund deposits which are made by an IDB due to the failure of a contra-party dealer to submit a trade in a timely fashion is consistent with EMCC's safeguarding obligations because EMCC will be able to so adjust the minimum margin amount only (1) for an IDB and not a dealer member, (2) where the IDB has deposited the additional margin because of the untimely submission of trade(s) by one of its dealer counterparties, and (3) where the trade(s) have been compared or settled.

EMCC has requested that the Commission find good cause for approving the proposed rule change prior to the thirtieth day after publication on the notice of filing. The Commission finds good cause to approve the rule change prior to the thirtieth day after publication of notice because so approving will permit EMCC to immediately exclude the additional margin requirement in the computation of the IDB's floor. This should encourage more IDBs to become participants in EMCC which should contribute to the safe and efficient clearance and settlement of emerging market debt securities.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW, Washington, DC 20549. Copies of such filing also will be available for inspection and copying at the principal office of EMCC. All submissions should refer to File No. SR–EMCC–00–3 and should be submitted by May 2, 2000.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change (File No. SR–EMCC–00–3) be, and hereby is, approved on an accelerated basis.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[5]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–42619; File No. SR–NASD–00–04]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the National Association of Securities Dealers, Inc. Relating to Its Corporate Financing Rule

April 4, 2000.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b-4 thereunder,[2] notice is hereby given that on January 21, 2000, the National Association of Securities Dealers, Inc. ("NASD"), through its wholly-owned subsidiary, NASD Regulations, Inc. ("NASD Regulation"), filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by NASD Regulations. NASD Regulation filed Amendments No. 1,[3] No. 2,[4] and No. 3[5] to the proposed rule change on March 6, 2000, March 21, 2000, and March 30, 2000, respectively, the substance of which has been incorporated into this filing. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

NASD Regulation proposes to amend NASD Conduct Rule 2710. Below is the text of the proposed rule change. Proposed new language is in italics; proposed deletions are in brackets.

* * * * *

2710. Corporate Financing Rule—Underwriting Terms and Arrangements

(a) Definitions: No change.

(b) Filing Requirements

(1)–(5) No change.

(6) Information Required to be Filed

(A) Any person filing documents pursuant to subparagraph (4) above shall provide the following information with respect to the offering:

(i)–(iii) No change.

(iv) [a statement addressing the factors in subparagraph c)(4)(C) and(D), where applicable;]

[(v)] a detailed explanation of any other arrangement entered into during the [12-month] *180-day* period immediately preceding the filing *date* of the *public* offering, which arrangement provides for the receipt of any item of value [and/]or the transfer of any warrants, options, or other securities from the issuer to the underwriter and related persons; and

[(iv)] (*v*) a detailed explanation and any documents related to:

a. the modification of any *information or representation previously provided to the Association or of any* item of underwriting compensation[,]; *or*

b. any new arrangement that provides for the receipt of any additional item of value by the underwriter and related persons subsequent to the [review and approval of such compensation] *issuance of an opinion of no objections to the underwriting terms and arrangements* by the Association *and within 90 days immediately following the effective date of the public offering.*

(B) No change.

(7)–(12) No change.

(c) Underwriting Compensation and Arrangements

(1)–(2) No change.

(3) Items of Compensation

(A) For purposes of determining the amount of underwriting compensation received or to be received by the underwriter and related persons pursuant to subparagraph (2) above, the following items and all other items of value received or to be received by the underwriter and related persons in connection with or related to the distribution of the *public* offering, as determined pursuant to subparagraph (4) below shall be included:

(i)–(v) No change.

(iv) financial consulting and advisory fees whether in the form of cash, securities, or any other item of value;

(vii) *common or preferred* stock, options, warrants, and other *equity* securities, *including debt securities convertible to or exchangeable for equity securities* [including securities] received [as underwriting compensation, for example]:

a. [in connection with] *for arranging* a private placement of securities for the issuer.

b. for providing or arranging *a loan, credit facility, or* bridge financing for the issuer;

c. as a finder's fee;

d. for *providing* consulting services to the issuer; [and]

e. [securities purchase] *as an investment* in private placement made by the issuer; *or*

f. at the time of the public offering;

(viii)–(x) No change.

(xi) commissions, expense reimbursements, or other compensation to be received by the underwriter and related persons as a result of the exercise or conversion, within twelve (12) months following the effective date of offerings, of warrants, options, convertible securities, or similar securities distributed as part of the *public* offering; *and*

(xii) fees of a qualified independent underwriter[; and].

[(xiii) compensation, including expense reimbursements, paid in the six (6) months prior to the initial or amended filing of the prospectus or similar documents to any member or person associated with a member for a public offering that was not completed.]

(B) *Notwithstanding paragraph (c)(3)(A) above, the calculation of underwriting compensation shall not include:*

(i) [E] expenses customarily borne by an issuer, such as printing costs; SEC, "blue sky" and other registration fees; Association filing fees; and accountant's fees, [shall be excluded from underwriter's compensation] whether or not paid through an underwriter;

(ii) compensation, including expense reimbursements, previously paid to any member in connection with a proposed public offering that was not completed, if the member does not participate in the revised public offering; and

(iii) financial consulting and advisory fees, on the basis of information that establishes that an ongoing relationship between the issuer and the financial advisor or consultant was established more than twelve months before the filing date of the public offering.

(4) Determination of Whether Compensation Is Received in Connection With the Offering

(A) All items of value received [or to be received] by the underwriter and

[3] Letter from Suzanne E. Rothwell, Chief Counsel, Corporate Financing, NASD Regulation, to Katherine A. England, Assistant Director, Division of Market Regulation ("Division"), Commission, dated March 3, 2000 ("Amendment No.. 1"). Amendment No. 1 makes certain clarifying and non-substantive changes to the proposed rule change.

[4] Letter from Suzanne E. Rothwell, Chief Counsel, Corporate Financing, NASD Regulations, to Katherine A. England, Assistant Director, Division, Commission, dated March 20, 2000 ("Amendment No. 2"). Amendment No. 2 revises the language of proposed Rule 2710(c)(4)(D)(i) relating to "members of a group." Amendment No. 2 also states that NASD Regulations consents to a 90 day extension of the time period for Commission action specified in Section 19(b)(2) of the Act.

[5] Letter from Suzanne E. Rothwell, Chief Counsel, Corporate Financing, NASD Regulation, to Katherine A. England, Assistant Director, Division, Commission, dated March 29, 2000 ("Amendment No. 3"). Amendment No. 3 states NASD Regulation's rationale for deleting the exception from the current Venture Capital lock-up in Rule 2710(c)(C)(i) for transactions in which a qualified independent underwriter provides a pricing opinion and performs due diligence.

related persons during the [twelve (12) months] *180-day* period immediately preceding the filing *date* of the registration statement or similar document, and at the time of [and subsequent to] the public offering, will be [examined to determine whether such items of value are] *considered to be* underwriting compensation in connection with the *public* offering [and, if received during the six (6) month period immediately preceding the filing of the registration statement or similar document, will be presumed to be underwriting compensation received in connection with the offering, provided, however, that such presumption may be rebutted on the basis of information satisfactory to the Association to support a finding that the receipt of an item is not in connection with the offering and shall not include cash discounts or commissions received in connection with a prior distribution of the issuer's securities].

[(B) Items of value received by an underwriter and related person more than twelve (12) months immediately preceding the date of filing of the registration statement or similar document will be resumed not to be underwriting compensation. However, items received prior to such twelve (12) month period may be included as underwriting compensation on the basis of information to support a finding that receipt of the item is in connection with the offering.]

[(C) For purposes of determining whether any item of value received or to be received by the underwriter and related persons is in connection with or related to the distribution of the public offering, the following factors, as well as any other relevant factors and circumstances, shall be considered:]

[(i) the length of time between the date of filing of the registration statement or similar document and:]

[a. the date of the receipt of the item of value;]

[b. the date of any contractual agreement for services for which the item of value was or is to be received; and]

[c. the date the performance of the service commenced, with a shorter period of time tending to indicate that the item is received in connection with the offering;]

[(ii) the details of the services provided or to be provided for which the item of value was or is to be received;]

[(iii) the relationship between the services provided or to be provided for which the item of value was or is to be received and:]

[a. the nature of the item of value;]

[b. the compensation value of the item; and]

[c. the proposed public offering;]

[(iv) the presence or absence of arm's length bargaining or the existence of any affiliate relationship between the issuer and the recipient of the item of value, with the absence of arm's length bargaining or the presence of any affiliation tending to indicate that the item of value is received in connection with the offering.]

[(D) For purposes of determining whether securities received or to be received by the underwriter and related persons are in connection with or related to the distribution of the public offering, the factors in subparagraph (C) above and the following factors shall be considered:]

[(i) any disparity between the price paid and the offering price or the market price, if a bona fide independent market exists at the time of acquisition, with a greater disparity tending to indicate that the securities constitute compensation;]

[(ii) the amount of risk assumed by the recipient of the securities, as determined by:]

[a. the restrictions on exercise and resale;]

[b. the nature of the securities (*e.g.*, warrant, stock, or debt); and]

[c. the amount of securities, with a larger amount of readily marketable securities without restrictions on resale or a warrant for securities tending to indicate that the securities constitute compensation; and]

[(iii) the relationship of the receipt of the securities to purchases by unrelated purchasers on similar terms at approximately the same time, with an absence of similar purchases tending to indicate that the securities constitute compensation.]

[(E) Notwithstanding the provisions of subparagraph (3)(A)(vi) above, financial consulting and advisory fees may be excluded from underwriting compensation upon a finding by the Association, on the basis of information satisfactory to it, that an ongoing relationship between the issuer and the underwriter and related person has been established at least twelve (12) months prior to the filing of the registration statement or similar document or that the relationship, if established subsequent to that time, was not entered into in connection with the offering, and that actual services have been or will be rendered which were not or will not be in connection with or related to the offering.]

(B) Securities of the issuer acquired by the underwriter and related persons before the filing date of a public offering will be considered to be received for purposes of subparagraph (c)(4)(A) and (E) as of the date of the:

(i) closing of a private placement, if the securities were purchased from or received as compensation for the private placement;

(ii) execution of an agreement for a loan or credit facility, if the securities were received as compensation for the loan or credit facility; or

(iii) transfer of beneficial ownership of the securities to a consultant, if the securities were received as compensation for consulting services.

(C) All items of value received by the underwriter and related persons during the 90-day period immediately following the effective date of a public offering will be examined to determine whether such items of value are considered underwriting compensation in connection with the public offering.

(D) For purposes of subparagraph (c)(4)(E) below, the following terms will have the meanings stated below.

(i) An entity will include a group of legal entities that either:

a. are contractually obligated to make co-investments and have previously made at least one such investment; or

b. have filed a Schedule 13D or 13G with the SEC that identifies the entities as members of a group who have agreed to act together for the purpose of acquiring, holding, voting or disposing of equity securities of an issuer for purposes of Section 13(d) or 13(g) of the Securities Exchange Act of 1934.

(ii) An institutional investor will mean any individual or entity that has at least $50 million invested in securities in the aggregate in its portfolio or under management; provided that an institutional investor will not include any member participating in the public offering, any of its associated or affiliated persons, or an immediate family member of its associated or affiliated persons.

(E) Notwithstanding subparagraph (c)(4)(A) above, the following acquisitions of securities will not be considered underwriting compensation:

(i) Purchases and Loans by Certain Entities—Securities of the issuer purchased in a private placement or received as compensation for a loan or credit facility more than 90 days before the filing date of the public offering, by certain entities if:

a. the entity:

1. either:

A. manages capital contributions of $100 million or more, at least $75 million of which has been committed by persons that are not underwriters or related persons; or

B. manages capital contributions of $25 million or more, at least 75% of

which has been committed by persons that are not underwriters or related persons;

2. is a separate and distinct legal entity from the member and is not registered as a broker/dealer;

3. makes investments or loans subject to the evaluation and review of individuals who have a contractual or fiduciary duty to select investments and loans based on the risks and rewards to the entity and not based on opportunities for the member to earn investment banking revenues;

4. does not participate directly in investment banking fees received by the member for underwriting public offerings;

5. is engaged primarily in the business of making investments in or loans to private or start-up companies or companies in the early process of developing products or services, or participating in leveraged buy-out transactions; and

b. the member maintains and enforces written procedures reasonably designed to ensure that the member's participation in the public offering is not contingent on the entity's participation in the private placement or loan.

(ii) Investments In and Loans to Certain Issuers—Securities of the issuer purchased in a private placement or received as compensation for a loan or credit facility more than 90 days before the filing date of the public offering, by certain entities if:

a. the entity:

1. manages capital contributions or loan commitments of at least $50 million;

2. is a separate and distinct legal entity from the member and is not registered as a broker/dealer;

3. does not participate directly in investment banking fees received by the member for underwriting public offerings;

4. is engaged primarily in the business of making investments in or loans to private or start-up companies or companies in the early process of developing products or services, or participating in leveraged buy-out transactions; and

b. institutional investors beneficially own at least 33% of the total number of the issuer's equity securities outstanding on a fully diluted basis;

c. an institutional investor is a member of the issuer's board of directors;

d. the transaction was approved by a majority of the issuer's board of directors and by the affirmative vote of institutional investors that are board members;

e. the total amount of securities received by all entities related to each member does not exceed 5% of the total number of the issuer's equity securities outstanding on a fully diluted basis; and

f. the member maintains and enforces written procedures reasonably designed to ensure that the member's participation in the public offering is not contingent on the entity's participation in the private placement or loan.

(iii) Private Placements With Institutional Investors—Securities of the issuer purchased in or received as placement agent compensation for a private placement more than 90 days before the filing date of the public offering if:

a. institutional investors purchase at least 51% of the total offering (comprised of the total number of securities, on a fully diluted basis, sold in the private placement and received as placement agent compensation by a member);

b. an institutional investor was the lead negotiator with the issuer to establish the terms of the private placement;

c. the underwriter and related persons (excluding any entities qualified under paragraph (c)(4)(D)(i) above):

1. have not, in the aggregate, purchased or received as placement agent compensation more than 20% of the total offering; and

2. have purchased securities that were at the same price and with the same terms as the securities purchased by other investors; and

d. the member maintains and enforces written procedures reasonably designed to ensure that its participation in the public offering will not be contingent on its participation in the private placement.

(iv) Purchases Under a preemptive Right—Securities of the issuer under a right of preemption if:

a. the right of preemption was granted either:

1. by contract or the terms of the security in connection with a purchase from a private placement of the issuer's securities made more than 180 days before the filing date of the public offering; or

2. in connection with a security purchased from a public offering or the public market; and

b. the purchase under the right of preemption:

1. was exercised in connection with a private placement of the issuer's securities that was for cash;

2. was to all similar preemptive right holders;

3. was at the same price and had the same terms as the securities purchased by other investors; and

4. did not increase the purchaser's percentage ownership of the same class of securities of the issuer.

(5) Valuation of Non-Cash Compensation

For purposes of determining the value to be assigned to securities received as underwriting compensation, the following criteria and procedures shall be applied:

(A) [No underwriter and related person may receive a security or a warrant for a security as compensation in connection with the distribution of a public offering that is different than the security to be offered to the public unless the security received as compensation has a bona fide independent market, provided, however, that: (i) in exceptional and unusual circumstances, upon good cause shown, such arrangement may be permitted by the Association; and (ii) in an offering of units, the underwriter and related persons may only receive a warrant for the unit offered to the public where the unit is the same as the public unit and the terms are no more favorable than the terms of the public unit.]

An underwriter and related person may not receive a security (including securities in a unit) or a warrant for a security as underwriting compensation in connection with a public offering unless: (i) the security received or the security underlying the warrant received is identical to the security offered to the public or to a security with a bona fide independent market; or (ii) the arrangement, upon good cause shown, is permitted by the Association.

(B) [s] *S*ecurities that are not options, warrants or convertible securities shall be valued on the basis of:

(i) the difference between [the per security cost and]:

a. either the market price per security on the date of acquisition, [where a] *or, if no* bona fide independent market exists for the security, [or] the [proposed (and actual)] public offering price per security; *and*

b. the per security cost;

(ii) multiplied by the number of securities received or to be received as underwriting compensation;

(iii) divided by the *public* offering proceeds; and

(iv) multiplied by one hundred [(100)].

(C) [o] *O*ptions, warrants or convertible securities *("warrants")* shall be valued on the basis of [the following formula]:

(i) the [proposed (and actual)] public offering price per security multiplied by .65 [(65%)];

(ii) minus the difference between:

a. the exercise or conversion price per [security] *warrant;* and

b. either the market price per security on the date of acquisition, [where a] *or, if no* bona fide independent market exists for the security, [or] the [proposed (and actual)] public offering price per security;

(iii) divided by two [(2)];

(iv) multiplied by the number of *securities underlying the* warrants[, options, and convertible securities received or to be received as underwriting compensation];

(v) less the total price paid for the [securities] *warrants;*

(vi) divided by the *public* offering proceeds; and

(vii) multiplied by one hundred [(100)].

(D) [a lower value equal to 80% and 60% of the calculated value shall be assigned if securities, and where relevant, underlying securities, are or will be restricted from sale, transfer, assignment or other disposition for a period of one and two years, respectively, beyond the one-year period of restriction required by subparagraph (7)(A)(i) below.] *A lower value equal to 10% of the calculated value shall be assigned for each 180-day period that the securities or underlying securities are restricted from sale or other disposition beyond the 180-day period of restriction required by subparagraph (c)(7)(A)(i) below. The transfers permitted by subparagraphs (c)(7)(B)(i)(c) and (d) are not available for the sale of such securities.*

(6) Unreasonable Terms and Arrangements

(A) No change.

(B) Without limiting the foregoing, the following terms and arrangements, when proposed in connection with [the distribution of] a public offering of securities, shall be unfair and unreasonable:

(i)–(vii) No change.

(viii) the receipt by the underwriter and related persons of underwriting compensation consisting of any option, warrant or convertible security [which] *that:*

a.–f. No change.

g. has anti-dilution terms designed to provide the underwriter and related persons with disproportionate rights, privileges and economic benefits which are not provided to the purchasers of the securities offered to the public (or the public shareholders, if in compliance with subparagraph (5)(A) above); *or*

h. has anti-dilution terms designed to provide for the receipt or accrual of cash dividends prior to the exercise or conversion of the security[;or];

[i. is convertible or exercisable or otherwise is on terms more favorable than the terms of the securities being offered to the public;]

(ix)–(x) No change.

[(xi) stock numerical limitation. The receipt by the underwriter and related persons of securities which constitute underwriting compensation in an aggregate amount greater than ten (10) percent of the number or dollar amount of securities being offered to the public, which is calculated to exclude:]

[a. any securities deemed to constitute underwriting compensation;

b. any securities issued or to be issued pursuant to an overallotment option;]

[c. in the case of a "best efforts" offering, any securities not actually sold; and]

[d. any securities underlying warrants, options, or convertible securities which are part of the proposed offering, except where acquired as part of a unit;]

(xii)–(xiv) Renumbered (xi)-(xiii).

(C) In the event that the underwriter and related persons receive securities deemed to be underwriting compensation in an amount [constituting] *that results in* unfair and unreasonable compensation [pursuant to the stock numerical limitation in subparagraph (B)(ix) above], the recipient shall return any excess securities to the issuer or the source from which received at cost and without recourse, except that [in exceptional and unusual circumstances], upon good cause show, a different arrangement may be permitted.

(7) Restrictions on Securities

(A) [No member or person associated with a member shall participate in a] *Any* public offering *in* which [does not] *a member or person associated with a member participates must* comply with the following requirements:

(i) *any common or preferred stock, options, warrants, and other equity* securities [deemed to be underwriting compensation], *including debt securities convertible to or exchangeable for equity securities, of the issuer beneficially owned by an underwriter and related person at the time of effectiveness of the public offering* shall not be sold, transferred, assigned, pledged or hypothecated by any person, except as provided in subparagraph (B) below, for a period of [(a) one year] *180 days immediately* following the effective date of the *public* offering [for which the securities were received.];

[However, securities deemed to be underwriting compensation may be transferred to any member participating in the offering and the bona fide officers or partners thereof and securities which are convertible into other types of securities or which may be exercised for the purchase of other securities may be so transferred, converted or exercised if all securities so transferred or received remain subject to the restrictions specified herein for the remainder of the initially applicable time period;]

[(ii) certificates or similar instruments representing securities restricted pursuant to subparagraph (i) above shall bear an appropriate legend describing the restriction and stating the time period for which the restriction is operative;] and

[(iii)] *(ii)* securities [to be] received by a member as underwriting compensation shall only be issued to a member participating in the offering and the [bona fide] officers or partners thereof.

(B) [The provisions of] *Notwithstanding* subparagraph (A) [notwithstanding] *above, the following shall not be prohibited:*

(i) the transfer of any security:

a. by operation of law or by reason of reorganization of the issuer [shall not be prohibited.];

b. to any member participating in the offering and the officers or partners thereof, if all securities so transferred remain subject to the restrictions in subparagraph (A) above for the remainder of the applicable time period;

[(C) Venture capital restrictions. When a member participates in the initial public offering of an issuer's securities, such member or any officer, director, general partner, controlling shareholder or subsidiary of the member or subsidiary of such controlling shareholder or a member of the immediate family of such persons, who beneficially owns any securities of said issuer at the time of filing of the offering, shall not sell such securities during the offering or sell, transfer, assign or hypothecate such securities for ninety (90) days following the effective date of the offering unless:]

[(i) the price at which the issue is to be distributed to the public is established at a price no higher than that recommended by a qualified independent underwriter who does not beneficially own 5% or more of the outstanding voting securities of the issuer, who shall also participate in the preparation of the registration statement and the prospectus, offering circular, or similar document and who shall exercise the usual standards of "due diligence" in respect thereto; or]

[(ii)] *c. if* the aggregate amount of such securities held by [such a member and its related persons enumerated above would] *an underwriter and its related persons do* not exceed 1% of the securities being offered; *or*

d. if the class of security qualifies as an "actively traded security" for purposes of SEC Regulation M as of the date of effectiveness of the public offering; and

(ii) the exercise or conversion of any security, if all securities received remain subject to the restrictions in subparagraph (A) above for the remainder of the applicable time period.

(8) Conflicts of Interest. No change.

(d) Exemptions

Pursuant to the Rule 9600 Series, the Association may exempt a member or person associated with a member from the provisions of this Rule for good cause shown.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NASD Regulation included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NASD Regulation has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

(a) Current Corporate Financing Rule

(1) Scope of the Corporate Financing Rule

NASD Conduct Rule 2710 ("Corporate Financing Rule" or "Rule") is intended to ensure that the underwriting terms and arrangements of a public offering [6] in which an NASD member participates [7] are fair and reasonable. The Rule requires a member to file certain information with NASD Regulation about the underwriting arrangements of a public offering in which the member participates. The Corporate Financing Department ("Department") of NASD Regulation reviews this information prior to commencement of the offering in order to determine whether the underwriting compensation and other terms and arrangements meet the requirements of applicable NASD rules.[8]

The Corporate Financing Rule regulates, among other matters, the total amount of underwriting compensation that the "underwriter" and related persons [9] may receive in connection with a public offering. The term "underwritten and related persons" includes all broker/dealers (and the associated persons [10] and affiliates [11] of the broker/dealers) participating in any capacity in the proposed public offering, as well as other non-broker/dealers who act as counsel, finders, or consultants, or are members of the immediate family, or are related persons [12] to other persons in the definition. In order to facilitate the following discussion, participating broker/dealers and their associated persons, affiliates, and related persons are together referred to as "members."

(2) Calculating Underwriting Compensation

The Corporate Financing Rule currently provides in paragraph (c)(4) that any item of values as set forth in Rule 2710(c)(3)(A), including certain securities of the issuer,[13] acquired by the underwriter and related persons within the 12-month period before the filing date of a proposed public offering will be examined by the Department to determine whether it was acquired "in connection with the public offering" and therefore, is deemed to be underwriting compensation. The Rule presumes that any such item of value acquired within the six-month period before filing is underwriting compensation, but this presumption may be rebutted by the member based on information satisfactory to the Department.[14]

The Corporate Financing Rule currently requires in paragraphs (c)(4)(C) and (D) that the Department weigh as many as ten different factors to determine whether the item of value received by the underwriter and related persons within the 12-month period before the filing date of a public offering is received "in connection with the public offering" and, therefore, included in the calculation of underwriting compensation. In many cases, an

---

[6] Rule 2720(b)(14) defines "public offering" as "any primary or secondary distribution of securities made pursuant to a registration statement or offering circular including exchange offers, rights offerings, offerings made pursuant to a merger or acquisition, straight debt offerings, offerings pursuant to SEC Rule 504, and all other securities distributions of any kind whatsoever, except any offering made pursuant to an exemption from registration under Sections 4(1), 4(2), or 4(6) of the Securities Act of 1933, as amended, or pursuant to SEC Rule 504 if the securities are "restricted securities" under SEC Rule 144(a)(3), SEC Rule 505, or SEC Rule 506 adopted under the Securities Act of 1933, as amended. The term public offering shall exclude exempted securities as defined in Section 3(a)(12) of the Act." This definition of "public offering" also applies to Rule 2710.

[7] Rule 2710(a)(4) defines "participation" or "participating in a public offering" as "participation in the preparation of the offering or other documents, participation in the distribution of the offering on an underwritten, non-underwritten, or any other basis, furnishing of customer and/or broker lists for solicitation, or participation in any advisory or consulting capacity to the issuer related to the offering, but not the preparation of an appraisal in a savings and loan conversion or a bank offering or the preparation of a fairness opinion pursuant to SEC Rule 13e–3."

[8] Rule 461(b)(6) under the Securities Act of 1933, as amended, provides that the Commission may refuse to accelerate the effective date of an offering if the "NASD has not issued a statement expressing no objections to the compensation and other arrangements." *See* 17 CFR 230.461(b)(6).

[9] Rule 2710(a)(6) defines "underwriter and related persons" as "underwriters, underwriter's counsel, financial consultants and advisors, finders, members of the selling or distribution group, any member participating in the public offering, and any and all other persons associated with or related to and members of the immediate family of any of the aforementioned persons."

[10] Article I, paragraph (ee) of the NASD By-Laws defines "associated person of a member" as "(1) any natural person registered under the Rules of the Association; or (2) a sole proprietor, partner, officer, director, or branch manager of a member, or a natural person occupying a similar status or performing similar functions, or a natural person engaged in the investment banking or securities business who is directly or indirectly controlling or controlled by a member, whether or not any such person is registered or exempt from registration with the NASD under the By-Laws or the Rules of the Association."

[11] For purposes of Rules 2710 and 2720, Rule 2720(b)(1) provides that an "affiliate" presumptively includes "(1) a company that beneficially owns 10 percent or more of the outstanding voting securities of a member; (2) a member that beneficially owns 10 percent or more of the outstanding voting securities of a company; and (3) a company and a member that are under the common control of a person or company who beneficially owns 10 percent or more of the outstanding voting securities of the company and/or member or who has the power to direct the management or policies of the company and/or member. The Department's long-standing practice is to deem any company or member that comes within these presumptions to be an affiliate."

[12] In SR–NASD–01–19, the NASD stated that "[t]he concept of whether the person is 'related to' any of the enumerated persons in the definition is determined by whether there is an investment or business relationship between the parties an is based on objective facts." *See* Securities Exchange Act Release No. 29928 (Nov. 12 1991), 56 FR 58257 (Nov. 18, 1991).

[13] The term "issuer" is defined in Rule 2710(a)(2) to include "[t]he issuer of the securities offered to the public, any selling security holders offering securities to the public, any affiliate for the issuer or selling security holder, and the officers or general partners, directors, employees and security holders thereof."

[14] Rule 2710(c)(4)(B) provides that items of value received more than 12 months before the filing date of the public offering are presumed not to be underwriting compensation unless the staff has satisfactory information supporting a conclusion that the item is additional underwriting compensation.

underwriter or related person has acquired unregistered equity securities [15] of the issuer. Members typically acquire these unregistered securities as an investment in a private placement, as compensation for the member's services as private placement agent, or for providing a loan or credit facility to the issuer.

The Rule requires the staff to consider the following factors—as well as "any other relevant factors and circumstances"—to determine whether securities have been received in connection with the public offering:

- The length of time between the date of the receipt of the security and the filing date;
- Details of any services provided;
- The presence or absence of arm's length bargaining;
- The disparity between the price paid for a security and the proposed public offering price;
- The existence of restrictions on exercise and resale;
- The nature of the securities;
- The amount of securities; and
- The relationship of the receipt of securities to purchases by other unrelated purchasers.

The factor-weighing process requires the staff to review each acquisition of the issuer's securities by members on a case-by-case basis. The value of any securities that the Department determines are underwriting compensation, as calculated under Rule 2710(c)(5), is added to the underwriting discount or commission and any fees or reimbursements received by underwriting syndicate to determine whether the compensation is unfair or unreasonable.

(3) Restrictions on Resale

Securities included in the calculation of underwriting compensation are also restricted by the Rule from sale for one year following the effective date of the offering under Rule 2710(c)(7)(A) ("compensation lock-up"). In the case of an initial public offering, if the members and certain senior persons and subsidiaries of the member hold securities of the issuer that are not deemed to be underwriting compensation, a 90-day lock-up is nonetheless imposed under Rule 2710(c)(7)(B) ("venture capital lock-up").[16]

(4) Limitation on Amount of Securities

Rule 2710(c)(6)(B)(xi) limits the amount of securities that can be received by the underwriter and related persons as underwriting compensation to 10% of the number of securities to be sold in the public offering ("stock numerical limitation").

(b) Changes in the Capital Markets

In recent years, many NASD members have expanded the variety of services that they provide to their corporate financing clients. These services may include venture capital investment, consulting, commercial lending, and investment banking. Moreover, the pace of corporate financing activities has accelerated, and the time period between private fundraising and the issuer's initial public offering has often been shortened. These developments necessitate a review of the Corporate Financing Rule to ensure that it accommodates the modern, legitimate capital financing activities of NASD members, while continuing to protect investors and issuers from unreasonable underwriting activities.

The current subjective, factor-weighing process for determining whether securities were acquired in connection with a public offering is an inefficient method to achieve these objectives. The subjectivity hampers the Department's ability to provide clear and predictable guidance to members. The consequences under the Rule of a particular venture capital or other private placement financing are sometimes uncertain until a public offering is filed and the Department's review is completed. This uncertainty unnecessarily complicates the capital-raising process, to the detriment of issuers and investors.

(c) Description of Proposed Rule Change

(1) Summary of Proposed Rule Change

NASD Regulation proposes to amend the Corporate Financing Rule to allow members to provide legitimate capital-raising services to issuers, while adopting restrictions that are designed to minimize the opportunity for abusive practices by members. NASD Regulation also proposes to eliminate or revise other burdensome and obsolete provisions, including rules regulating the exercise price of warrants received as underwriting compensation and the treatment of fees paid to a previous underwriter for an uncompleted offering. In addition, the proposed rule change would clarify a member's obligation to update previously filed information.

(2) Treatment of Securities As Underwriting Compensation

(i) Six-Month Pre-Offering Objective Test

The proximity of an acquisition of equity securities of an issuer (or any other item of value) to filing date of its public offering has proven to be the most significant factor in determining whether those securities constitute underwriting compensation. The Department has found that the application of the six-month presumption contained in the Rule generally minimizes the opportunity for abusive practices by members. Application of a longer time period has typically been unnecessary to achieve this goal.

NASD Regulation proposes to amend the Corporate Financing Rule to provide greater clarity and predictability regarding whether equity securities [17] of the issuer and other items of value acquired by the underwriter and related persons constitute underwriting compensation. The proposed rule change would replace the twelve-month review period, the six-month presumption, and the subjective review factors with an objective standard in Rule 2710(c)(4)(A) under which all items of value acquired during the 180-day period immediately preceding the filing date of the registration statement or similar document and at the time of the public offering will constitute underwriting compensation. The proposed rule change would also provide four safe harbors from this general standard.[18] These safe harbors are described below.

Replacement of the existing subjective analysis with an objective, bright-line test would provide greater clarity and predictability concerning application of the Rule to specific transactions. Consequently, members and their venture capital and lending affiliates should find it easier to determine at the time of a private placement or other financing whether their investment will be treated as underwriting

[15] Securities purchased in the public market are not considered to be "items of value."

[16] The venture capital lock-up only applies to securities of the issuer held by the member, or any officer, director, general partner, controlling shareholder or subsidiary of the member, or by a subsidiary of a controlling shareholder of the member, or by a member of the immediate family of such persons. In comparison, the compensation lock-up applies to all securities considered to be underwriting compensation that are held by the underwriter and related persons, as defined by Rule 2710(a)(b)

[17] The proposed rule change would clarify that the securities that will be considered to be underwriting compensation include common or preferred stock, options, warrants, and debt securities convertible to or exchangeable for equity securities.

[18] Regardless of when an underwriter or related person acquires securities of the issuer, or the availability of any safe harbor, all securities held by the underwriter and related persons are proposed to be subject to a lock-up on their sale, as described below.

compensation when the subsequent public offering is filed with the Department for review.

(ii) Safe Harbor Provisions

NASD Regulation proposes four safe harbors from the determination that certain acquisitions of securities during the 180-day review period are deemed to be underwriting compensation.[19] The four safe harbors are intended to identify acquisitions that occur in *bona fide* capital-raising transactions and would impose restrictions designed to minimize the opportunity for abusive practices.

The First three safe harbors in proposed Rule 2710(c)(4)(E)(i)–(iii), would be available for acquisitions by certain entities that regularly make venture capital investments; for acquisitions in issuers with significant institutional investor involvement in their corporate governance; and for acquisitions in private placements that have significant institutional investor participation. The fourth safe harbor in Rule 2710(c)(4)(E)(iv) would exempt acquisitions that occur from the exercise of a preemptive right to purchase.

The first three safe harbors would be available only for acquisitions that occur more than 90 days before the filing date of the public offering. These safe harbors would also require that the member maintain and enforce written procedures reasonably designed to ensure that the member's participation in the public offering is not contingent on the acquiring party's participation in the private placement or loan.

(A) Safe Harbor No. 1—Purchases And Loans By Certain Entities

The first safe harbor, proposed in Rule 2710(c)(E)(i), is intended for acquisitions of the issuer's securities by certain entities that routinely make venture capital investments or provide loans or credit facilities. The safe harbor would be available (1) To any qualifying entities related to any member participating in an offering; (2) for purchases in a private placement and for the receipt of securities as compensation for a loan or credit facility; and (3) without any limitation on the amount of securities purchased or received.

(1) Legal Entity/Registration

The related entity would have to be a legal entity that is separate and distinct from the member and not registered as a broker/dealer. The term "entity" would be defined in new Rule 2710(c)(4)(D)(i) to include a group of legal entities that either are contractually obligated to make co-investments and have previously made at least one such investment or have filed a Schedule 13D or 13G with the SEC that identifies the entities as members of a group who have agreed to act together for the purpose of acquiring, holding, voting or disposing of equity securities of an issuer for purposes of Section 13(d) or 13(g) of Act.

(2) Venture Capital/Fiduciary Duty

The related entity must also be "primarily engaged in the business of making investments in or loans to private or start-up companies or companies in the early process of developing products or services, or participating in leveraged buy-out transactions." The related entity can make investments or loans that are under the safe harbor only if they are subject to the evaluation and review of individuals who have a contractual or fiduciary duty to select investments and loans based on the risks and rewards to the related entity and not based on opportunities for the member to earn investment banking revenues.

(3) Sharing in Investment Banking Fees

The related entity could not participate directly in investment banking fees received by the member for underwriting public offerings.

(4) Captil Under Management

The related entity would have to either (1) manage capital contributions of $100 million or more, at least $75 million of which has been committed by persons that are not underwriters or related persons; or (2) manage capital contributions of $25 million or more, at least 75% of which has been committed by persons that are not underwriters or related persons.[20] The requirement for significant third-party capital would protect against potentially abusive situations, as the related entity must make its investment or lending decision in the interest of investors who are not underwriters or related persons.

(B) Safe Harbor No. 2—Investments in and Loans to Certain Issuers

The second safe harbor, proposed in Rule 2710(c)(4)(E)(ii), is intended for acquisitions of securities of issuers that have significant institutional investor involvement in their corporate governance. The proposed safe harbor would be available for acquisitions by qualifying related entities: (1) in a private placement; and (2) as compensation for a loan or credit facility, with a limitation on the amount acquired.

(1) 5% Limitation on Acquisition

The total amount of securities acquired by all entities that are related to a single member could not exceed 5% of the issuer's outstanding equity securities, on a fully diluted basis. The 5% limitation would apply on a member-by-member basis when more than one member proposes to rely on this safe harbor.

(2) Related Entity Qualifications

The related entity would have to manage capital contributions and loan commitments of at least $50 million. Unlike the first safe harbor, there would not be a requirement that the entity manage third-party capital contributions. The related entity would also have to be a separate legal entity and not registered as a broker/dealer; could not participate directly in the member's investment banking fees; and would have to be primarily engaged in the business of making venture capital investments.

(3) 33% Institutional Investor Ownership

The proposed safe harbor would require that institutional investors beneficially own at least 33% of the total number of the issuer's equity securities outstanding on a fully diluted basis. The term "institutional investor" would be defined in Rule 2710(c)(4)(D)(ii) to include any individual or entity (including a group of legal entities as proposed to be defined in Rule 2710(c)(4)(D)(i)) that has at least $50 million invested in securities in the aggregate in its portfolio or under management and is not (1) a member participating in the public offering; (2) any of the member's associated or affiliated persons; or (3) an immediate family member of any associated or affiliated person of the member.[21]

---

[19] The Department will maintain its authority under the Rule 9600 Series to grant exemptions on a case-by-case basis from the determination that certain securities are deemed to be underwriting compensation. The Department expects to exercise this authority sparingly and only in exceptional and unusual circumstances.

[20] In both instances, such third-party capital commitments could come from members and their associated and affiliated persons, so long as those members do not participate in the public offering.

[21] An institutional investor could be a member, or a person associated or affiliated with a member, that is not participating in the public offering.

(4) Participation on and Vote of Board of Directors

At least one of those institutional investors would have to serve as a member of the issuer's board of directors and the transaction would have to be approved by a majority of the issuer's board of directors and by an affirmative vote of the institutional investors that are board members.

(C) Safe Harbor No. 3—Private Placements with Institutional Investors

The third safe harbor, proposed in Rule 2710(c)(4)(E)(iii), is intended for acquisitions in private placements with significant institutional investor participation. The safe harbor would be available for purchases of securities in a private placement and for the receipt of securities as placement agent compensation.

(1) 20% of Total Offering Limitation

The underwriter and related persons could not, in the aggregate, acquire more than 20% of the "total offering". The "total offering" would be defined to consist of the total number of securities, on a fully diluted basis, sold in the private placement *and* received as placement agent compensation by a member.[22] The 20% calculation would exclude purchases by those affiliates and other related persons of a member that would be qualified to acquire securities of the issuer under the first safe harbor.

(2) Same Terms and Price

All securities purchased by the underwriter and related persons from the private placement must have the same terms[23] and be purchased at the same price[24] as securities purchased by the other investors.

(3) 51% Institutional Investor Participation

Institutional investors would have to purchase at least 51% of the total offering.[25] In addition, an institutional investor would have to be the lead negotiator with the issuer to establish the terms of the private placement. This requirement would not prevent an underwriter or related person from participating in the negotiation of the terms of the private placement.

(D) Safe Harbor No. 4—Purchases Under a Preemptive Right

The fourth safe harbor, proposed in Rule 2710(c)(4)(E)(iv), is intended for any acquisition of the issuer's securities by any underwriter or related person that is made pursuant to a right of preemption, whether that preemptive right was granted by contract, by the terms of the securities, or by applicable law.[26] Purchases pursuant to a right of preemption generally do not raise the sorts of concerns that the Rule was designed to address because they are based on a purchase right granted to the purchaser in a prior investment. The right of preemption merely protects the purchaser from dilution when the company issues additional securities.

(1) Requirements Applicable to Acquisition of Preemptive Right

If the security with a preemptive right was acquired from a private placement, the private placement would have to occur more than 180 days before the filing date of the public offering. If the security with a preemptive right was acquired from the public market or from a public offering, there would be no limitation on when the security must have been purchased, *i.e.*, the security could have been purchased less than 180 days before the subsequent public offering is filed.

(2) Requirements Applicable to Purchase under the Preemptive Right

Under the safe harbor: (1) the right of preemption must be exercised in connection with a private placement of the issuer's securities for cash; (2) the private placement must be to all similar preemptive right holders; (3) the price and terms of the securities purchased must be the same as that for all other investors in the private placement; and (4) the purchaser may not, through the exercise of its preemptive rights, increase its ownership of the same class of securities of the issuer.

(iii) Calculation of the 180-Day Review Period

The 180-day review period and the 90-day safe harbor period are proposed to be calculated from the filing date of a public offering with the appropriate regulatory authority in order to provide a readily identifiable standard. Consistent with existing Department practice, the "filing date" for purposes of this calculation would be the *earlier* of the date of filing with the SEC, state securities commission, or other regulatory authority, or the date of filing with the Association. Thus, if an offering is filed with the SEC before it is filed with the NASD, the "filing date" will be the SEC filing date. In addition, offerings submitted to the SEC for review on a confidential basis will be considered filed with the SEC as of the date of the confidential submission for purposes of Rule 2710.

(iv) Determination of when Securities are Considered "Received"

The purposed rule change would adopt Rule 2710 (c)(4)(B) to clarify when securities will be considered to be "received" under the Rule for purposes of the 180-day review period under Rule 2710(c)(4)(A) and the 90-day safe harbor period under Rule 2710(c)(4)(E). Securities purchased from or received as compensation for a private placement will be deemed to have been received on the date of the closing of the private placement.[27] Securities received as compensation for a loan or credit facility will be deemed to have been received on the date the loan or credit facility agreement is executed. Securities received for consulting services to the issuer will be deemed to have been received on the date that beneficial ownership of the securities is transferred to the consultant. These proposals are consistent with existing Departmental practice.

(v) 90-Day Post-Offering Objective Test

Rule 2710(c)(4)(A) permits the staff to examine items of value received "subsequent to the public offering" to determine whether the items of value are considered to be underwriting compensation in connection with the

[22] For example, if the private placement consists of 100,000 shares of common stock and the issuer pays placement agent compensation to a member that includes a warrant for 10,000 shares of common stock, the total offering is 110,000 shares of common stock. The acquisition by the underwriter and related persons that are not qualified to purchase under the first safe harbor could not exceed 22,000 shares of common stock. Of these 22,000 shares, 10,000 shares would be accounted for by the warrant and up to 12,000 shares could be purchased as an investment.

[23] A security would be considered to have the same terms if it is a security of the same class with the same rights as the security sold to other investors. Thus, in a unit offering, the unit purchased by a member must be composed of the same number and type of securities and any exerciseable security within a unit must have the same exercise price as the exerciseable security within the unit purchased by other investors.

[24] If the purchasing member is also acting as placement agent, purchases by the member at a price that is net of the commission it receives for sales to the other investors will be considered to be "at the same price" for purposes of this provision.

[25] In the example provided above, institutional investors must purchase at least 56,100 shares of the total offering of 110,000. *See supra*, n.22.

[26] The Corporate Financing rule does not prohibit a member from exercising a preemptive right to purchase securities from the issuer's public offering. However, such purchases by members, their associated and related persons, and affiliates are regulated by SEC Regulation M and the NASD's Free-Riding and Withholding Interpretation, IM–2110–1. *See also* Securities Exchange Act Release No. 42325 (Jan. 10, 2000), 65 FR 2656 (Jan. 18, 2000).

[27] The Department relies on the closing date rather than the date of a commitment letter because a commitment letter does not transfer beneficial ownership of the securities.

public offering. The ability of the staff to include items of value received after the public offering in the calculation of underwriting compensation is necessary to avoid circumvention of the Rule.

In order to provide greater clarity concerning the extent of the "subsequent" time period, the proposed rule change would replace this language with new Rule 2710(c)(4)(C), under which items of value received within the 90-day period immediately following the effective date of a public offering would be examined to determine whether they constitute underwriting compensation.

(vi) Valuation of Warrants

Rule 2710(c)(6)(B)(viii)(i) provides that any option, warrant or convertible securities received by the underwriter and related persons as underwriting compensation may not be convertible or exercisable on terms more favorable than the terms of the securities being offered to the public. The provision, therefore, prohibits members from receiving compensation in the form of warrants that have an exercise price below the proposed public offering price.

The Rule requires that the warrants be valued, that they be included in the calculation of the underwriting compensation, and that they be subject to the Rule's compensation provisions. Therefore, the requirement that members revise the exercise price of their warrants seems unnecessary and Rule 2710(c)(6)(B)(viii)(i) is proposed to be deleted.

The proposed rule change would amend Rule 2710(c)(5)(A), which prohibits the payment of underwriting compensation in the form of securities that are not identical to those offered to the public or to a security that has a bona fide independent market, in order to clarify the application of this prohibition.

(3) Restrictions on Resale of Securities

As discussed above, the Corporate Financing Rule currently imposes a one-year compensation lock-up on securities that constitute underwriting compensation or, in the case of an initial public offering, a 90-day venture capital lock-up on all securities held by members and certain senior persons and subsidiaries.

(i) Background—Compensation Lock-Up

The compensation lock-up was adopted primarily to protect the aftermarket in a new security from the potential for fraud and manipulation that exists when a member is an underwriter, actively trades the securities, and is a selling securityholder. These multiple roles for a broker/dealer were a basic concern discussed at length in the Report of the Special role for a broker/dealer were a basic concern discussed at length in the Report of the Special Study of the Securities Markets of the Securities and Exchange Commission issued in 1963 ("Special Study").[28] In the testimony underlying the Special Study, industry members also stated that sales of an underwriter's private placement investments in an issuer shortly after the completion of an offering creates a negative appearance as the member has previously recommended the purchase of the security to its customers.

(ii) Background—Venture Capital Lock-Up

The venture capital lock-up was intended to address similar potentials for abuse in the context of an initial public offering, by imposing a lock-up restriction that prohibits the sale of *any* of the issuer's securities (not just those considered to be underwriting compensation) held by a member and certain senior persons and subsidiaries at the time of the offering and for 90 days thereafter. The venture capital lock-up does provide exceptions for *de minimis* transactions and transactions in which a qualified independent underwriter[29] provides due diligence and a pricing opinion.

(iii) Proposed 180-Day Lock-Up

NASD Regulation understands that it is common industry practice to impose a 180-day lock-up on the securities of the issuer held by certain officers and directors of the issuer. Consistent with this industry practice, NASD Regulation proposes to amend Rule 2710(c)(7)(A) and delete Rule 2710(c)(7)(C) to impose a 180-day lock-up on all equity securities of the issuer held by the underwriter and related persons at the time of effectiveness of the public offering. Securities purchased from the public market would not be subject to the lock-up. The new 180-day lock-up would replace the one-year compensation lock-up and the 90-day venture capital lock-up. It would apply to both initial public offerings" and to secondary offerings, subject to the following exceptions in amended Rule 2710(c)(7)(B) for:

- Transfers of otherwise restricted securities that occur by operation of law or by reason of reorganization of the issuer;
- Transfers to participating members and their officers and partners, so long as the transferred securities remain subject to any remaining lock-up period;
- Transfers if a member and its related persons do not, in the aggregate, own more than 1% of the securities being offered; and
- The exercise of securities, so long as the exercised securities remain subject to any remaining lock-up period.

In addition, secondary offerings of securities would be able to rely on an exception for transfers of securities that qualify as an "actively traded security" for purposes of SEC Regulation M as of the date of effectiveness of the public offering.[30]

The proposal would eliminate the existing exception in Rule 2710(c)(7)(C)(i) from the venture capital lock-up for transactions in which a qualified independent underwriter provides a pricing opinion and performs due diligence. The exception does not adequately address the potential negative impact of immediate sales of members' securities into the after-market of an initial public offering or of securities with a thinly traded market nor the conflicts-of-interest present when an underwriter is also a selling securityholder.

The proposed 180-day lock-up would address the concerns discussed in Part 1, Chapter IV of the Special Study related to the disposition of securities considered underwriting compensation. The Special Study did not focus on a particular time period that was appropriate for such a lock-up, but note with approval testimony that underwriting compensation securities were held by underwriters for some time period after the initial public offering and the practice of one broker/dealer that imposed a minimum six-month holding period.[31]

The discussion in the Special Study expressed concern regarding the opportunities for fraud and manipulation in the after-market of a company's initial public offering when a member is an underwriter, actively trades the securities, and is a selling securityholder, stating that the underwriter may be placed "in situations where its duties and obligations to the issuer's stockholders, its own customers, and the general investing public may come into conflict.

---

[28] Report of the Special Study of the Securities Markets of the Securities and Exchange Commission, 88th Cong., 1st Session, House Document No. 95, Part 1, Chapter IV.

[29] The term "qualified independent underwriter" is defined in NASD Rule 2720(b)(15).

[30] Under SEC Regulation M, a security is considered to be an "actively traded security" if it has at least $1 million average daily trading volume and $150 million public float value. 17 CFR 242.100 through 242.105.

[31] Special Study, at 541–542.

* * *"[32] NASD Regulation believes it is appropriate to extend the protections intended for the after-market of an initial public offering to secondary offering of securities that do not have a sufficiently liquid market to address these conflicts-of-interest and to apply the lock-up to all equity securities of the issuer held by underwriters and related persons. This category of persons would include broker/dealers that are participating in the public offering and all of the broker/dealer's associated, affiliated, and related persons.[33]

The proposed exception for sales of an "actively traded security" will permit a member to sell the issuer's equity securities during the lock-up period in the case of a secondary public offering only if the security's market has sufficient liquidity to decrease the opportunity for a member to engage in fraud and manipulation in connection with the sale transaction. As stated by the Commission, "[t]he costs of manipulating such securities generally are high. In addition, because actively-traded securities are widely followed by the investment community, aberrations in price are more likely to be discovered and quickly corrected. Moreover, actively-traded securities are generally traded on exchanges or other organized markets with high levels of transparency and surveillance."[34]

(iv) Lower Compensation Value for Longer Lock-Up

In valuing any securities considered to be underwriting compensation, current Rule 2710(c)(5)(D) permits a lower valuation when the securities are subject to a lock-up beyond the one-year compensation lock-up period. This paragraph would be amended to discount the compensation value of securities by 10% for each 180-day period that the securities (or underlying securities) are restricted from sale beyond the proposed 180-day lock-up period.

When a person agrees to such a longer lock-up in order to obtain a lower compensation value for the securities, the person would not be able to later rely on the exceptions from the 180-day lock-up for *de minimis* sales and sales of an "actively traded security." However, the other exceptions would be available.

(v) Restrictive Legend

The proposed rule change would delete Rule 2710(c)(7)(A)(ii), which requires that certificates representing any security subject to a lock-up bear a restrictive legend describing the lock-up. NASD Regulation understands that members are required to obtain a CUSIP number for the securities subject to the lock-up imposed by the rule that is different from the number assigned to other securities of the same issue. NASD Regulation proposes to delete this requirement, as it places an unintended burden on members that is unnecessary. Members would still be required to establish appropriate written procedures pursuant to NASD Rule 3010(b)(1) for ensuring compliance with the proposed 180-day lock-up.

(4) Stock Numerical Limitation

(i) Elimination of Requirement

The proposed rule change would eliminate the 10% stock numerical limitation in Rule 2710(c)(6)(B)(xi) on the amount of securities that participating underwriters and related persons may receive as underwriting compensation. The Rule already restricts the total value of all items that a member may receive as compensation, and Rule 2720 addresses the conflicts-of-interest that may arise when a member is an affiliate of the issuer. Therefore, the stock numerical limitation is unnecessary to achieve the purposes of the Rule.

(ii) Sales of Securities Considered to be Underwriting Compensation

Rule 2710(c)(6)(C) requires that when the stock numerical limitation has been exceeded, the recipient of the securities must return any excess securities to the issuer or the source from which received at cost and without recourse. A different arrangement may be permitted by the Association. In light of the proposed elimination of the stock numerical limitation, this provision would be amended to apply to an acquisition of securities that results in unfair and unreasonable compensation.

(5) Other Amendments[35]

(i) Types of Securities Considered to be Items of Value

NASD Regulation proposes to amend Rule 2710(c)(3)(vii) to make non-substantive amendments to the description of the types of equity securities that are considered items of value to be included in the calculation of underwriting compensation.

(ii) Exclusions From the Calculation of Underwriting Compensation

The proposed rule change would amend Rule 2710(c)(3)(B) to put into one place all items of value that will be excluded from the calculation of underwriting compensation.

(A) Payments to a Previous Underwriter

Rule 2710(c)(3)(A)(xiii) requires the Department to include any fees paid to a previous underwriter that failed to complete a public offering in the calculation of underwriting compensation for a subsequent underwriter. This provision is intended to restrict the total amount of compensation paid to all underwriters, but it has imposed an unfair restriction on the compensation of replacement underwriters. Consequently, the proposed rule change would delete this provision.

The proposed rule change would further codify this determination in new Rule 2710(c)(3)(B)(ii) by excluding from the calculation of underwriting compensation any payment to a member in connection with a proposed public offering that was not completed, if the member does not participate in the revised offering.[36]

(B) Consulting Agreements

The requirements of Rule 2710(c)(4)(E) would be moved to new Rule 2710(c)(3)(B)(iii), which would continue to exclude from the calculation of underwriting compensation any payments received under a consulting agreement entered into more than one year before the filing date of the public offering.

(iii) Members' Obligation to File Information

Current Rule 2710(b) requires that members file certain documents and

---

[32] Special Study, at 539.

[33] In comparison, the current one-year compensation lock-up only covers those securities deemed to be underwriting compensation and, therefore, does not restrict the resale of other securities of the issuer by participating members. Further, the current 90-day venture capital lock-up only applies in the case of an initial public offering and only covers securities held by the member, its officers, directors, and certain of its affiliates. The 90-day venture capital lock-up, therefore, does not apply to secondary offerings and does cover securities held by other associated, affiliated, and related persons to the member.

[34] Securities Act Release No. 7375 (Dec. 20, 1996); 62 FR 520 (Jan. 3, 1997).

[35] The proposed rule change includes non-substantive amendments to Rule 2710 that are intended to provide clarity and consistency.

[36] NASD Rule 2710(c)(6)(B)(iv) would continue to prohibit payment of any compensation by an issuer to a member in connection with an offering of securities that is not completed according to the terms of agreement between the issuer and underwriter, except for reimbursement of out-of-pocket accountable expenses actually incurred by the member.

other information with the Department in connection with a public offering. The Department must rely on the adequacy and accuracy of the information filed by members in order to carry out its regulatory obligations under the rules that apply to public offerings of securities. To the extent, therefore, that a member or its counsel or other agent fails to provide all of the facts necessary for the Department's review of a public offering, files inaccurate information, fails to update or correct previously filed information, or fails to comply with representations made to the Department, the member would violate the Rule and NASD Conduct Rule 2110 (the Association's basic ethical conduct rule).

The proposed rule change would clarify this obligation of the member in several respects. First, Rule 2710(b)(6)(A)(v) would be amended to require members to provide the Department with a detailed explanation and documents related to a modification of any information or representation previously provided to the Association or of any item of underwriting compensation. Thus, in the event that the member (or member's counsel or other agent) determines that subsequent events have made inaccurate any information or representations previously provided to the Department, the member must inform the Department regarding the change. This obligation applies regardless of whether the change occurs before or after the issuance of the Department's opinion of a "no objections" to the underwriting terms and arrangements.

Second, proposed Rule 2710(b)(6)(A)(v)(b) would provide that if an underwriter or related person receives any additional item of value subsequent to the Department's issuance of a "no objections" opinion and within 90 days following the offering's effective date, then the member must provide a detailed explanation and any documents related to the new arrangement to the Department.

The proposed rule change would also delete Rule 2710(b)(6)(iv), as it requires the submission of information addressing the subjective review factors in Rules 2710(c)(4)(C) and (D). As set forth above, paragraphs (C) and (D) are proposed to be deleted.

(d) Implementation of Proposed Rule Change

NASD Regulation proposes to implement the proposed rule change upon approval by the SEC. Any public offering filed subsequent to the adoption of the amendments and any public offering that had been filed with the Department but for which a "no objections" letter has yet to be issued, would be subject to the new requirements. In addition, with respect to public offerings for which a "no objections" letter has been issued at the time the amendments are adopted, the one-year compensation lock-up on securities would be shortened to 180 days and members could rely on the exceptions from the 180 day lock-up.[37] Upon adoption of the amendments, any securities that are subject to the 90-day venture capital lock-up would remain subject to that lock-up until it expires, but any person holding such securities could rely on the exceptions from the 180-day lock-up.

2. Statutory Basis

NASD Regulation believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,[38] which requires, among other things, that the Association's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just equitable principles of trade and, in general, to protect investors and the public interest. The NASD believes that the proposed rule change will burdensome rules that no longer distinguish between *bona fide* capital-raising and lending practices and abusive arrangements and will minimize the opportunity for abusive practices by members in connection with underwriting public offerings of securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

NASD Regulation does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Written comments were not solicited on the proposed rule change. However, NASD Notice to Members 98–81 requested comment on whether any NASD rules are obsolete. NASD Regulation received a comment letter from The Bond Market Association ("TBMA") that included two recommended amendments to Rule 2710 that are pertinent to the proposed rule change.[39] The recommendations of TBMA to amend other provisions of Rule 2710 are under consideration by the Association and are not pertinent to the proposed rule change.

TBMA recommends that the subjective review factors of Rule 2710(c)(4)(D) be amended to consider whether there is a bona fide business purpose for an acquisition of securities.[40] Rule 2710(c)(4)(D) is proposed to be deleted and Rule 2710(c)(4)(A) would be amended to adopt an objective, bright-line test to include in the calculation of underwriting compensation all items of value received by the underwriter and related persons during the 180-day period immediately preceding the filing of the public offering and during the public offering. Thus, the subjective factor proposed by TBMA is no longer necessary to the Department's review of underwriting compensation.

In addition, TBMA recommends that Rule 2710(c)(5)(A) be amended to permit the underwriter and related person to receive as compensation a security different than the security offered to the public if there is a reasonable method to value the security received.[41] The proposed rule change would amend Rule 2710(c)(5)(A) to clarify the current language of the provision, which allows the Department to permit the underwriter and related person to receive a security that is different than the security offered to the public and that does not have a *bona fide* independent market, if good cause can be shown for the arrangement. One of the considerations in permitting such an arrangement would be whether the Department can value the security for compensation purposes. In the absense of a *bona fide* independent market for a security, the decision on whether a security that is different than the security to be offered to the public can be reliably valued is subjective and, therefore, not amenable to codification.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or

---

[37] For these offerings, the lock-up period would apply only to securities deemed to be underwriting compensation, as required by current Rule 2710(c)(7)(A)(i). (ii) as to which NASD Regulation consents,[42] the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposal is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the File No. SR–NASD–00–04 and should be submitted by May 26, 2000.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[43]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–42618; File No. SR–NASD–00–14]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the National Association of Securities Dealers, Inc. Extending the Pilot Program for the Nasdaq Application of the OptiMark System

April 4, 2000.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 28, 2000, the National Association of Securities Dealers, Inc. ("NASD" or "Association"), through its wholly owned subsidiary, the Nasdaq Stock Market, Inc. ("Nasdaq"), filed a proposed rule change with the Securities and Exchange Commission ("SEC" or "Commission"). The proposed rule change is described in Items I, II, and III below, which Items have been prepared by Nasdaq. On March 30, 2000, Nasdaq filed Amendment No. 1 to the proposed rule change.[3] The Exchange filed the proposed rule change, as amended, pursuant to Section 19(b)(3)(A) of the Act,[4] and Rule 19b–4(f)(6) thereunder,[5] which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Nasdaq is proposing to extend the pilot period for the Nasdaq application of the OptiMark System (the "Nasdaq Application") for an additional six months from April 3, 2000. No changes to the existing rule language are being proposed.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, Nasdaq included statements concerning the purpose of and basis for the proposed rule change, as amended, and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. Nasdaq has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On January 5, 1999, the Commission approved a proposed rule change filed by the NASD to implement the Nasdaq Application.[6] The Nasdaq Application permits NASD members and their customers to enter large orders in Nasdaq stocks into an anonymous matching system that has been designed, developed, and patented by OptiMark Technologies, Inc. ("OptiMark Match") and has been integrated into Nasdaq's facilities in Trumbull, Connecticut. The anonymity offered by this facility limits the market impact of trading in larger quantities of securities and provides NASD members with a new, additional tool to trade Nasdaq securities more effectively.

The Nasdaq Application allows NASD members (and if sponsored by NASD members, customers of such members) to enter trading interests, called profiles, into Nasdaq-operated systems where those profiles are collected and matched periodically by the OptiMark Match. As currently approved, these matches occur no more frequently than every five minutes. In addition to matching profiles entered directly into the system, the Nasdaq Application incorporates bids and offers in the Nasdaq Quote Montage, creates profiles for such quotes, and includes the quotes in the next match. The OptiMark Match then attempts to match contra interests at the best prices and sizes according to the rules of the match process. If the system finds that a quote profile matches another profile, the system sends a message to the market participant (via the Nasdaq SelectNet system) seeking to trade at the market participant's quoted price or better and at round lot sizes, up to the amount quoted by that market participant.

The Commission approved the Nasdaq Application on a pilot basis for a six-month period ending April 3, 2000.[7] The Commission's rationale for limiting the period was based partly on the perceived need to enhance certain aspects of clearing brokers' capabilities to monitor trading activity occurring in the Nasdaq Application. Nasdaq is in the process of adding new features to the Nasdaq Application that address all of the stated concerns regarding clearing and anonymity, and plans to file with

[3] *See* March 30, 2000 letter from Peter R. Geraghty, Assistant General Counsel, Nasdaq, to Rebekah Liu, Special Counsel, Division of Market Regulation, SEC ("Amendment No. 1"). In Amendment No. 1, Nasdaq requested that the proposed rule change be filed under Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6) thereunder. 15 U.S.C. 78s(b)(3)(A) and 17 CFR 240.19b–4(f)(6). Nasdaq also requested that the Commission waive the 5-day notice of its intent to file the proposal by treating the original proposed rule change as the prefiling notice required under Rule 19b–4(f)(6); and requested that the Commission waive the 30-day period before the proposal becomes effective to permit the proposed rule change to become immediately effective.

[4] 15 U.S.C. 78s(b)(3)(A).

[5] 17 CFR 240.19b–4(f)(6).

[6] Securities Exchange Act Release No. 41967 (September 30, 1999), 64 FR 54704 (October 7, 1999)(SR–NASD–98–85).

[7] See *supra* note 6.

the Commission a proposed change reflecting these new features. Because these new features will not be in place until the second quarter 2000 and must be subject to notice and comment before approval, the pilot will end prior to such time periods. Nasdaq believes that the Nasdaq Application provides benefits to the market and should be allowed to continue to operate as currently operating for an additional six months to permit Nasdaq to implement the system changes that address the Commission's concerns.

2. Statutory Basis

Nasdaq believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act[8] in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national markets system, and, in general to protect investors and the public interests.

Nasdaq also believes the proposed rule change is consistent with Section 11A of the Act[9] in general, and Section 11A(a)(1)(A)[10] in particular, by promoting economically efficient execution of securities transactions, fair competition among markets, the best execution of customer orders, and an opportunity for orders to be executed without the participation of a dealer.

B. Self-Regulatory Organization's Statement on Burden on Competition

Nasdaq does not believe that the proposed rule change, as amended, will result in any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Nasdaq has neither solicited nor received written comments on the proposed rule change, as amended.

III. Date of Effectiveness of the Proposed Rule Change and Timing For Commission Action

The foregoing rule change has become effective upon filing pursuant to Section 19(b)(3)(A)(iii) of the Act[11] and Rule 19b–4(f)(6)[12] thereunder because the proposed rule change does not (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which the proposed rule change was filed, or such shorter time as the Commission may designate. At any time within 60 days of the filing of a rule change pursuant to Section 19(b)(3)(A) of the Act, the Commission may summarily abrogate the rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

The Commission finds that it is appropriate to accelerate the effective date of the proposed rule change and to permit the proposed rule change to become immediately effective because the proposed simply extends a previously approved pilot program for an additional six months. By extending the pilot program, the Commission will enable Nasdaq to continue to offer this additional trading mechanism without interruption. In addition, the Commission finds that Nasdaq provided the required prefiling written notice of its intent to file this proposed rule change when it filed the original proposed rule change.[13]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the File No. SR–NASD–00–14 and should be submitted by May 2, 2000.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[14]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–42607; File No. SR–NASD–00–05]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the National Association of Securities Dealers, Inc. Relating to the Release of Disciplinary Information

April 3, 2000

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on February 16, 2000, the National Association of Securities Dealers, Inc. ("NASD" or "Association"), through its wholly owned subsidiary NASD Regulation, Inc. ("NASD Regulation"), filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by NASD Regulation. The Commission is publishing this notice of the proposed rule change to solicit comments on the proposal from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

NASD Regulation is proposing to amend IM–8310–2 of the Association, to provide for the publication of all final, litigated decisions issued by the Office of Hearing Officers ("OHO"),[3] the National Adjudicatory Council ("NAC"), and the NASD Board, regardless of sanctions imposed. Below is the text of the proposed rule change. Proposed new language is in *italics*.

* * * * *

IM–8310–2. Release of Disciplinary Information

(a) through (c) No change.

(d)(1) The Association shall release to the public information with respect to

[1] 15 U.S.C. 78s(b)(1)
[2] 17 CFR 240.19b–4.
[3] The OHO issues decisions rendered by Hearing Officers (default decisions) and Hearing Panels.

any disciplinary decision issued pursuant to the Rule 9000 Series imposing a suspension, cancellation or expulsion of a member; or suspension or revocation of the regulation of a person associated with a member; or suspension or barring of a member or person associated with a member from association with all members; or imposition of monetary sanctions of $10,000 or more upon a member or person associated with a member; or containing an allegation of a violation of a Designated Rule; and may also release such information with respect to any disciplinary decision or group of decisions that involve a significant policy or enforcement determination where the release of information is deemed by the President of NASD Regulation, Inc. to be in the public interest. The Association also may release to the public information with respect to any disciplinary decision issued pursuant to the Rule 8220 Series imposing a suspension or cancellation of the member or a suspension of the association of a person with a member, unless the National Adjudicatory Council determines otherwise. The National Adjudicatory Council may, in its discretion, determine to waive the requirement to release information with respect to a disciplinary decision under those extraordinary circumstances where the release of such information would violate fundamental notions of fairness or work an injustice.

The Association may release to the public information on any other final, litigated, disciplinary decision issued pursuant to the Rule 8220 Series or Rule 9000 Series, not specifically enumerated in this paragraph, regardless of sanctions imposed, so long as the names of the parties and other identifying information is redacted.

(2) No changes.

(e) through (m) No change.

* * * * *

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NASD Regulation included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NASD Regulation has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Some, but not all, NASD disciplinary decisions are currently available in electronic legal research databases, such as Westlaw, Lexis-Nexis, and Books on Screen. Interpretive Material 8310–2 (the "Interpretation") permits the NASD to release any disciplinary decision: (1) Imposing a suspension, cancellation or expulsion of a member; (2) imposing a suspension or revocation of the registration of any associated person; (3) imposing a suspension or barring a member or associated person from association with all members; (4) imposing monetary sanctions of $10,000 or more on a member or associated person; (5) containing an alleged violation of a Designated Rule; or (6) deemed by the President of NASD Regulation to involve a significant policy or enforcement determination where the release of information would be in the public interest.

Disciplinary decisions provide guidance in how NASD rules are to be interpreted and enforced. The Association believes that providing vendors of legal research databases with all final, litigated decision issued by the OHO, the NAC, and the NASD Board, edited to prevent the disclosure of the identities of respondents upon whom minimal or no sanctions are imposed, is in the public interest.

Accordingly, the Association is proposing to amend the Interpretation to provide for the publication of all final, litigated decisions issued by the OHO, the NAC, and the NASD Board, regardless of sanctions imposed. However, the names of the parties and other identifying information mentioned in the decisions that do not meet the current enumerated publication criteria, as outlined in the Interpretation (and listed above), will be redacted from these decisions. Settlements, Letters of Acceptance, Waivers and Consents ("AWCs"), and Minor Rule Violation Plan letters are excluded from the proposal. This proposal will not have any impact on the information contained in or disclosed by the Central Registration Depository system.

The Association will make all decisions covered under this proposal available that were issued after August 7, 1997, the effective date of the most recent significant changes to the NASD Code of Procedure.[4] The Association believes that the disciplinary decisions issued after August 7, 1997, are of special value in providing a clearer picture of the Association's current application and interpretation of its substantive and procedural rules. The Association does not believe that the benefits that would arise from publishing decisions that pre-date August 7, 1997, justify the administrative burdens that would result from having to redact the names of parties and other identifying information from these decisions.

2. Statutory Basis

NASD Regulation believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,[5] which requires, among other things, that the Association's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. The NASD believes that the proposed rule change is consistent with Section 15A(b)(7) of the Act[6] in that it works to adequately safeguard the interests of investors while establishing fair and reasonable rules for its members and persons associated with its members. The NASD also believes that the proposed changes are consistent with Section 15A(b)(8) of the Act[7] in that they further the statutory goals of providing a fair procedure for disciplining members and associated persons.

B. Self-Regulatory Organization's Statement on Burden on Competition

NASD Regulation does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and

[4] *See* Special NASD Notice to Members 97–55 (August 1997).

[5] 15 U.S.C. 78o–3(b)(6).

[6] 15 U.S.C. 78o–3(b)(7).

[7] 15 U.S.C. 78o–3(b)(8).

publishes its reasons for so finding or (ii) as to which the sale-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to File No. SR–NASD–00–05 and should be submitted by May 2, 2000.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

DEPARTMENT OF COMMERCE

Request for Public Views

April 3, 2000.

AGENCIES: Office of the United States Trade Representative and Department of Commerce.

ACTION: Request for public views on procedures for obtaining trade policy advice from nongovernmental organizations.

SUMMARY: Recently the United States Trade Representative (the USTR) and the Secretary of Commerce (the Secretary) announced a joint initiative to enhance opportunities for nongovernmental organizations to provide their views to the Administration on key trade issues. As part of that initiative USTR and Commerce are seeking comments and suggestions from the public on ways to strengthen channels of communication between these groups and the Administration on trade policy matters.

DATES: Written comments should be sent no later than July 10, 2000 to the Office of the United States Trade Representative at the address indicated below.

FOR FURTHER INFORMATION: Contact Pate Felts, Assistant USTR for Intergovernmental Affairs and Public Liaison ((202) 395–6120), or Patrick Morris, Director of the Office of Export Promotion Coordination, Department of Commerce ((202) 482–4501).

SUPPLEMENTARY INFORMATION: Congress and the Administration have established a variety of advisory committees from which the Executive Branch solicits and obtains advice on trade policy matters, including from environmental, labor, and consumer groups. Section 2155 of title 19, U.S. Code, establishes a three-tier trade policy advisory committee system, with one committee addressing overall policy advice, several committees providing advice on more specific policy issues, and a larger number of committees covering sectoral, technical, or functional issues.

The Administration seeks trade policy advice from environmental, labor, consumer, and other groups through three advisory committees. Specifically, the Advisory Committee for Trade Policy and Negotiations (ACTPN) provides the President and the USTR with broad advice on trade matters. The ACTPN membership is drawn from chief executive officers of agriculture, consumer, environment, industry, and labor groups. The President has also established a Trade and Environment Policy Advisory Committee (TEPAC), which primarily addresses trade and environment issues. TEPAC members are drawn from agriculture, consumer, environmental, industry, and labor groups, and from non-federal governments. A Labor Advisory Committee (LAC) provides advice on trade issues and labor. The LAC is administered by the Department of Labor and is composed exclusively of labor union representatives.

The Administration seeks trade policy advice on environmental, labor, consumer, and other issues in other ways as well. For example, in formulating specific U.S. objectives in major trade negotiations, USTR routinely solicits written comments from the public, consults with interested constituencies, holds public hearings, and meets with a broad spectrum of non-governmental groups at their request.

On January 11, 2000, the Secretary and the USTR announced an initiative to seek views from the public on ways to enhance the effectiveness of Administration efforts to obtain advice from non-governmental organizations on important trade policy matters. Through this notice, USTR and Commerce are seeking comments from the public on changes to the advisory committee system that would help to ensure that the Administration obtains timely, relevant trade policy advice from consumer, environmental, labor, and other non-governmental organizations.

Public Comments

Persons wishing to submit written comments should provide twenty (20) typed copies no later than July 10, 2000 to Gloria Blue, Office of the U.S. Trade Representative, Room 122, 600 17th Street, NW., Washington, DC 20508.

Written comments submitted in connection with this request will be available for inspection in the USTR Reading Room. An appointment to review the file at USTR may be made by calling Brenda Webb (202) 395–6186. The USTR Reading Room is located at the Office of the United States Trade Representative, 600 17th Street, NW, Washington, DC and is open to the public from 9:30 a.m. to 12 noon, and from 1 p.m. to 4 p.m., Monday through Friday.

Pate Felts,

Assistant United States Trade Representative, Intergovernmental Affairs and Public Liaison.

Michael J. Copps,

Assistant Secretary for Trade Development, U.S. Department of Commerce.

BILLING CODE 3190–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Proposed Advisory Circular 25.905–X, Minimizing the Hazards From Propeller Blade and Hub Failures

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability of proposed Advisory Circular (AC) 25.905–X and request for comments.

[8] 17 CFR 200.30–3(a)(12).

SUMMARY: This notice announces the availability of and requests comment on a proposed advisory circular (AC) that provides methods acceptable to the Administrator for showing compliance with the airworthiness standards for propeller installations on transport category airplanes. The guidance provided in the AC supplements the engineering and operational judgment that must form the basis of any compliance findings relative to design precautions that should be taken to minimize the hazards to an airplane in the event that a propeller blade fails or is released by a hub failure. This notice is necessary to give all interested persons an opportunity to present their views on the proposed AC.

DATES: Comments must be received on or before June 12, 2000.

ADDRESSES: Send all comments on the proposed AC to: Federal Aviation Administration, Attn: Michael Dostert, FAA, Transport Airplane Directorate, Aircraft Certification Service, Propulsion/Mechanical Systems Branch, ANM–112, 1601 Lind Avenue SW., Renton, Washington 98055–4056. Comments may be inspected at the above address between 7:30 a.m. and 4:00 p.m. weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jill DeMarco, Program Management Branch, ANM–114, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, Washington 98055–4056; telephone (425) 227–1313.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to comment on the proposed AC by submitting such written data, views, or arguments as they may desire. Commenters must identify the AC by title and submit comments in duplicate to the address specified above. The Transport Airplane Directorate will consider all communications received on or before the closing date for comments before issuing the final AC.

Availability of Proposed AC

The proposed AC can be found and downloaded from the Internet at *http://www.faa.gov/avr/air/airhome.htm*, at the link titled "Draft AC's" under the "Available Information" drop-down menu. A paper copy of the proposed AC may be obtained by contacting the person named above under the caption "**FOR FURTHER INFORMATION CONTACT.**"

Discussion

Proposed AC 25.905–X, "Minimizing the Hazards from Propeller Blade and Hub Failures," has been prepared to provide guidance on one means of demonstrating compliance with the requirements of § 25.905, "Propellers," of Title 14, Code of Federal Regulations (CFR) part 25, commonly referred to as part 25 of the Federal Aviation Regulations (FAR). Part 25 contains the airworthiness standards applicable to transport category airplanes.

The means of compliance described in proposed AC 25.905–X is intended to provide guidance to supplement the engineering and operational judgment that must form the basis of any compliance findings relative to paragraph § 25.905(d). That paragraph addresses design precautions that should be taken to minimize the hazards to an airplane in the event that a propeller blade fails or is released by a hub failure.

In accordance with § 25.905(d), the hazards that must be considered include:

1. Damage to structure and vital systems due to the impact of a failed or released blade, and

2. The consequent unbalance created by such failure or release.

The proposed AC addresses the hazards associated with damage created by the impact of failed or released propeller blades, and provides a discussion of design practices to minimize such hazards. However, it does not address the hazard associated with unbalance created by such failure or release.

Harmonization of Standards and Guidance

The proposed AC is based on recommendations submitted to the FAA by the Aviation Rulemaking Advisory Committee (ARAC). The FAA tasked ARAC (63 FR 50954, September 23, 1998) to provide advice and recommendations on "harmonizing" certain sections of part 25 (including § 25.1183) with the counterpart standards contained in Joint Aviation Requirements (JAR) 25. The goal of "harmonization tasks," such as this, is to ensure that:

- Where possible, standards and guidance do not require domestic and foreign parties to manufacture or operate to different standards for each country involved; and
- The standards and guidance adopted are mutually acceptable to the FAA and the foreign aviation authorities.

The guidance contained in the proposed AC has been harmonized with that of the JAA, and provides a method of compliance that has been found acceptable to both the FAA and JAA.

Issued in Renton, Washington, on March 31, 2000.

Vi L. Lipski,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Availability of the Record of Decision for the 1999 Final Supplemental Environmental Impact Statement for 1992 Environmental Impact Statement for Master Plan Development, Indianapolis International Airport

AGENCY: Federal Aviation Administration (FAA, DOT).

ACTION: Notice of availability of a record of Decision.

SUMMARY: The FAA is issuing this notice to advise the public that the FAA Regional Administrator has approved and signed the Record of Decision (ROD) for implementation of air traffic control noise abatement procedures and land use mitigation measures at Indianapolis International Airport on March 20, 2000.

ADDRESSES: The Record of Decision is available for review at: Federal Aviation Administration, Airspace Branch, AGL–520, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

FOR FURTHER INFORMATION CONTACT: Ms. Annette Davis, Environmental Specialist, AGL–520.E, 2300 East Devon Avenue, Des Plaines, Illinois 60018, Telephone (847) 294–8091.

SUPPLEMENTARY INFORMATION: The FAA is issuing this notice of availability of its March 20, 2000 Record of Decision to assure that all persons have notification that the FAA has decided to implement the air traffic control noise abatement procedures and land use mitigation measures for Indianapolis International Airport contained in the 1999 Final Supplemental Environmental Impact Statement for the 1992 Environmental Impact Statement for the 1992 Environmental Impact Statement for Master Plan Development.

Issued in Des Plaines, Illinois on March 22, 2000.

David B. Johnson,

Acting Manager, Air Traffic Division.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Prepare an Environmental Impact Statement and to Hold an Environmental Scoping Meeting for Runway Safety Area Improvements at Groton-New London Airport, Groton, Connecticut

AGENCY: Federal Avation Administration, DOT.

ACTION: Notice of Public Environmental Scoping Meeting.

SUMMARY: The Federal Aviation Administration (FAA) is issuing notice to advise the public that an Environmental Impact Statement (EIA) will be prepared for a proposal by the State of Connecticut to construct Runway Safety Area improvements to Runway 5–23 at Groton-New London Airport, Groton, Connecticut. To ensure that all significant issues related to the proposed action are identified a public scoping meeting will be held.

FOR FURTHER INFORMATION CONTACT: Frank Smigelski, Environmental Specialist, Airports Division, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803. Telephone number: 781–238–7613.

SUPPLEMENTARY INFORMATION: Because of the potential for significant adverse environmental impact, primarily to wetlands and estuarine resources adjacent to the runway, comments and suggestions are invited from federal, state and local agencies and other interested members of the public on order to ensure that a full range of issues related to the proposed project are identified and addressed in the scope of work for the EIS. Comments and suggestions may be mailed to the FAA at the above address.

Public Scoping Meeting

In order to provide public input, a scoping meeting for federal, state and local agencies and other interested members of the public will be held on May 10, 2000 at 11:00 a.m. at the Connecticut Air National Guard AVCARD Facility, 139 Tower Road, Groton-New London Airport, Groton, CT. The scoping meeting will include a field tour of the project area. Representatives of federal, state and local agencies and other interested members of the public are encouraged to attend and comment. Additional Information may be obtained by contacting FAA at the above address or telephone number.

Issued in Burlington, Massachusetts on March 30, 2000.

Vincent A. Scarano,

Manager, Airports Division FAA, New England Region.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Rule on Application to Impose and Use the Revenue from a Passenger Facility Charge (PFC) at Sawyer International Airport, Marquette, MI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Intent to Rule on Application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Sawyer International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR part 158).

DATES: Comments must be received on or before May 11, 2000.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Federal Aviation Administration, Detroit Airports District Office, Willow Run Airport, East, 8820 Beck Road, Belleville, MI 48111.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Harold R. Pawley, Airport Manager, of the Sawyer International Airport, at the following address: 225 Airport Avenue, Gwinn, MI 49841.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the County of Marquette under section 158.23 of Part 158.

FOR FURTHER INFORMATION CONTACT: Mr. Jon Gilbert, Program Manager, Federal Aviation Administration, Detroit Airports District Office, Willow Run Airport, East, 8820 Beck Road, Belleville, MI 48111 (734–487–7281). The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Sawyer International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On March 22, 2000, the FAA determined that the application to impose and use the revenue from a PFC submitted by Marquette County was substantially complete within the requirements of section 158.25 of Part 158. The FAA will approve or disapprove the application, in whole or in part, no later than July 18, 2000.

The following is a brief overview of the application:

PFC Application No.: 00–05–C–00–SAW.

Level of the proposed PFC: $3.00.

Proposed charge effective date: June 1, 2000.

Proposed charge expiration date: October 30, 2002.

Total estimated PFC revenue: $369,235.00.

Brief description of proposed projects: (1) North Access Road to terminal, (2) FAR Part 77 grading, (3) VOR/DMS, (4) Rehabilitate terminal apron, (5) Rehabilitate hangar, (6) Terminal lighting, (7) Groove Runway 1/19, (8) Runway 1/19 joint repairs, (9) Taxiway relighting, (10) Rehabilitate taxiway and construct taxi streets, (11) ILS paving, (12) Renovate ARFF building, (13) Environmental Assessment for North Access Road and Runway 13/31, (14) North Access Road (design only).

Class or classes of air carriers that the public agency has requested not be required to collect PFC's: None.

Any person may inspect the application in person at the FAA office listed above under **"FOR FURTHER INFORMATION CONTACT"**.

In addition, any person may, upon request, inspect the application, notice, and other documents germane to the application in person at the Sawyer International Airport.

Issued in Des Plaines, Illinois, on March 29, 2000.

Benito De Leon,

Manager, Planning/Programming Branch, Airports Division, Great Lakes Region.

[FR Doc. 00–8973 Filed 4–10–00; 8:45 am]

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Randolph and Tucker Counties, West Virginia

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that a Supplemental Environmental Impact Statement (SEIS) will be prepared for the Kerens-to-Parsons portion of the proposed Appalachian Corridor H highway project.

FOR FURTHER INFORMATION CONTACT: Henry E. Compton, Division Environmental Coordinator, Federal Highway Administration, West Virginia Division, Geary Plaza, Suite 200, 700 Washington Street East, Charleston, West Virginia 25301, Telephone: (304) 347–5268.

SUPPLEMENTARY INFORMATION: In accordance with a court approved settlement agreement, the FHWA in cooperating with the West Virginia Department of Transportation (WVDOH) will prepare a supplemental environmental impact statement (SEIS) to examine one or more potential alignment shifts for the Kerens-to-Parsons portion of the proposed Appalachian Corridor H highway in Randolph and Tucker Counties, West Virginia. A Record of Decision (ROD) for the entire Appalachian Corridor H Highway (FHWA–WV–EIS–92–01–F) from Aggregates to the WV/VA state line, a distance of approximately 100 miles, was approved on August 2, 1996. The proposed Kerens-to-Parsons project will provide a divided four-lane, partial control of access highway on new location for a distance of approximately 20 miles. The purpose of this project is to provide safe and efficient travel between the population centers of Randolph (Elkins/Kerens Area) and Tucker (Parsons Area) counties, while also contributing to the completion of Corridor H in West Virginia.

Alternates under consideration in the SEIS will be: (1) The no action alternative, (2) the preferred alternative that was approved in the 1996 ROD, and (3) one or more alternatives that avoid impacts to the Corricks Ford Battlefield. Based on preliminary studies, it is expected that the avoidance alternatives considered in the SEIS will include one or more alignments that would shift the project to the north, resulting in additional connections to US 219, WV Route 72, and County Route 17 in the vicinity of Parsons. However, final decisions on the scope of the SEIS will be made only after an opportunity for comment by interested agencies and the public during the scoping process, which will occur in early to mid-April 2000.

Letters describing the proposed action and soliciting comments will be sent to appropriate federal, state, and local agencies, and to private organizations and citizens who have expressed or are known to have an interest in this proposal.

To ensure the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities to this program)

Issued on: March 28, 2000.

Henry E. Compton,

Environmental Coordinator, Charleston, West Virginia.

[FR Doc. 00–8869 Filed 4–10–00; 8:45 am]

BILLING CODE 4910–22–M

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with part 211 of Title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

Aberdeen Carolina and Western Railway

[Docket Number FRA–1999–6067]

The Aberdeen Carolina and Western Railway (ACWR) seeks a permanent waiver of compliance with the *Safety Glazing Standards*, 49 CFR 223.11(c), which requires certified glazing in all locomotive windows, except those locomotives used in yard service. ACWR seeks this waiver for locomotive number 1132. The owner states that the locomotive would be used one way (20 miles) as back-up power for a dinner/excursion train operating on weekends between Aberdeen and Pinehurst, North Carolina.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (*e.g.*, Waiver Petition Docket Number 1999–6067) and must be submitted to the Docket Clerk, DOT Docket Management Facility, Room PL–401 (Plaza Level), 400 7th Street, SW, Washington, DC 20590. Communications received within 45 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.–5 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's web site at *http://dms.dot.gov.*

Issued in Washington, DC on April 4, 2000.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with part 211 of Title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

Buffalo Southern Railroad, Inc.

Docket Number FRA–1999–6069

The Buffalo Southern Railroad, Inc. (BSOR) seeks a permanent waiver of compliance with the Safety Glazing Standards, 49 CFR 223.11(c), which requires certified glazing in all locomotive windows, except those locomotives used in yard service. BSOR seeks this waiver for five locomotives, numbers 5010, 107, 100, 93 and 105. BSOR states that they operate on 30 miles of track at speeds not to exceed 20

mph between Buffalo and Gowanda, New York. They also state that all locomotives are equipped with shatterproof type safety glazing and have never experienced any problems with window breakage or vandalism.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (*e.g.*, Waiver Petition Docket Number 1999–6069) and must be submitted to the Docket Clerk, DOT Docket Management Facility, Room PL–401 (Plaza Level), 400 7th Street, SW, Washington, DC 20590. Communications received within 45 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.–5 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's web site at *http://dms.dot.gov*.

Issued in Washington, D.C. on April 4, 2000.

Grady C. Cothen, Jr.,

Deputy Associate Administrator for Safety Standards and Program Development.

[FR Doc. 00–8856 Filed 4–10–00; 8:45 am]

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 of the Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) has received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

National Railroad Passenger Corporation

[Docket No. FRA–2000–7199]

The National Railroad Passenger Corporation (Amtrak) seeks a temporary waiver of compliance with section 203 of FRA's Passenger Equipment Safety Standards (49 CFR part 238). On October 18, 1999, Amtrak, pursuant to 49 CFR 238.203, filed a "grandfathering" petition with FRA (Docket No. FRA–1999–6404), in which it requested approval to continue using five trainsets manufactured by Talgo, Inc. in the Pacific Northwest that do not meet the buff strength standards specified in Part 238. Section 203 of that part provides that use of non-compliant equipment subject to a grandfathering petition must cease on May 8, 2000, unless FRA has approved the petition by that date.

Amtrak, in its petition for waiver, states that it believes there is a significant risk that FRA, will be unable to resolve administrative issues concerning information in the docket, obtain final comments from all interested parties, and then perform its own internal analysis and issue a final decision by May 8, 2000. Amtrak further states that "in order to ensure there is no short term [service] disruption, Amtrak feels that it is essential that FRA extend the period during which operation of Talgo equipment is permissible beyond the current May 8, 2000 date, until a date that is 30 days after the date on which FRA acts finally on Amtrak's grandfathering petition."

Interested parties are invited to participate in this proceeding by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with this proceeding since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA's Docket Clerk at Federal Railroad Administration, Office of Chief Counsel, 1120 Vermont Avenue, MS 10, Washington, DC, 20590, in writing, by April 20, 2000 and specify the basis for their request.

All other communications concerning this proceeding should identify the appropriate docket number (*e.g.* Docket No. FRA–2000–7199) and must be submitted to the Docket Clerk, DOT Docket Management Facility, Room PL–40–1 (Plaza Level), 400 7th Street, SW, Washington, DC 20590. Communications received by April 26, 2000 will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning this proceeding are available for examination during regular business hours (9:00 am—5:00 pm) at the above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's web site at *http://dms.dot.gov*.

Issued in Washington, DC on April 6, 2000.

Grady C. Cothen, Jr.,

Deputy Associate Administrator for Safety Standards and Program Development.

[FR Doc. 00–8935 Filed 4–6–00; 3:11 pm]

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

Union Pacific Railroad Company

(Docket Number FRA–1999–5755)

Union Pacific Railroad Company (UP) seeks a permanent waiver of compliance from certain provisions of the Power Brakes and Drawbars regulations, 49 CFR part 232, at Proviso Yard in Chicago, Illinois. Specifically, UP requests relief from the requirements of 49 CFR 232.12(i)(1), which requires that when a train airbrake system is tested from a yard test plant, the air source must be connected to the end of the train which will be nearest to the hauling road locomotive.

UP provides the following information to justify this request. At Proviso Yard, trains are regularly made up and depart from Yard Four. The tracks in Yard Four hold approximately 60 cars. Most trains consist of one hundred or more cars, which requires a double or triple over be made to make up an outbound train. The standard procedure is to fill one or more tracks with the head end portion and set the rear end portion as a rear end fill in an adjacent track. When this rear end fill is short (thirty cars or less), it presents an operational and safety problem. Yard air is at the extreme ends of Yard Four. If the rear fill is set at the end of the yard where hauling locomotives are attached,

it requires the carman to either walk thirty car lengths or more to apply the end-of-train device (EOT) or cross several tracks with the EOT in order to install the device to the rear of the train. Either alternative presents both a safety factor for the carman and a time factor for completing the air test, since there are no access roads for the carmen to use.

Based on the above, UP believes that a permanent waiver permitting the yard air source to be applied to the rear end fill at Proviso's Yard Four would improve the safety and efficiency of operations without any adverse effect on safety.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (*e.g.*, Waiver Petition Docket Number 1999–5755) and must be submitted to the Docket Clerk, DOT Docket Management Facility, Room PL–401 (Plaza Level), 400 7th Street, S.W., Washington, D.C. 20590. Communications received within 45 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.–5 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's web site at *http://dms.dot.gov*.

Issued in Washington, DC on April 4, 2000.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

Announcing the First Quarterly Meeting of the Crash Injury Research and Engineering Network

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Meeting Announcement.

SUMMARY: This notice announces the First Quarterly Meeting of members of the Crash Injury Research and Engineering Network. CIREN is a collaborative effort to conduct research on crashes and injuries at eight Level 1 Trauma Centers which are linked by a computer network. Researchers can review data and share expertise, which could lead to a better understanding of crash injury mechanisms and the design of safer vehicles.

DATE AND TIME: The meeting is scheduled from 8:30 a.m. to 5:00 p.m. on May 5, 2000.

ADDRESSES: The meeting will be held in Room 6200–04 of the U.S. Department of Transportation Building, which is located at 400 Seventh Street, SW, Washington, DC.

SUPPLEMENTARY INFORMATION: The CIREN System has been established and crash cases have been entered into the database by each Center. NHTSA has held three Annual Conferences (two in Detroit and one in conjunction with STAPP in San Diego) where CIREN research results were presented. Further information about the three previous CIREN conferences is available through the NHTSA website at: *http://www-nrd.nhtsa.dot.gov/bio__and__trauma/ciren-final.htm*.

NHTSA plans to begin holding quarterly meetings on a regular basis to disseminate this information to interested parties. This is the first such meeting. The topic for this meeting is lower extremity injuries in motor vehicle crashes. Subsequent meetings have tentatively been scheduled for July and October. These quarterly meetings will be in lieu of an annual CIREN conference.

FOR FURTHER INFORMATION CONTACT: Mrs. Donna Stomski, Office of Human-Centered Research, 400 Seventh Street, SW, Room 6220, Washington, DC 20590, telephone: (202) 366–5662.

Issued on: April 5, 2000.

Joseph N. Kanianthra,

Acting Associate Administrator for Research and Development, National Highway Traffic Safety Administration.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2000–7112]

Notice of Receipt of Petition for Decision That Nonconforming 1987–1989 Bentley Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice of receipt of petition for decision that nonconforming 1987–1989 Bentley passenger cars are eligible for importation.

SUMMARY: This document announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a decision that 1987–1989 Bentley passenger cars that were not originally manufactured to comply with all applicable Federal motor vehicle safety standards are eligible for importation into the United States because (1) they are substantially similar to vehicles that were originally manufactured for importation into and sale in the United States and that were certified by their manufacturer as complying with the safety standards, and (2) they are capable of being readily altered to conform to the standards.

DATES: The closing date for comments on the petition is May 11, 2000.

ADDRESSES: Comments should refer to the docket number and notice number, and be submitted to: Docket Management, Room PL–401, 400 Seventh St., SW, Washington, DC 20590. [Docket hours are from 9 am to 5 pm]

FOR FURTHER INFORMATION CONTACT: George Entwistle, Office of Vehicle Safety Compliance, NHTSA (202–366–5306).

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle

originally manufactured for importation into and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable Federal motor vehicle safety standards.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

Champagne Imports of Lansdale, Pennsylvania ("Champagne") (Registered Importer 90–009) has petitioned NHTSA to decide whether 1987–1989 Bentley passenger cars are eligible for importation into the United States. The vehicles which Champagne believes are substantially similar are 1987–1989 Bentley passenger cars that were manufactured for importation into, and sale in, the United States and certified by their manufacturer as conforming to all applicable Federal motor vehicle safety standards.

The petitioner claims that it carefully compared non-U.S. certified 1987–1989 Bentley passenger cars to their U.S. certified counterparts, and found the vehicles to be substantially similar with respect to compliance with most Federal motor vehicle safety standards.

Champagne submitted information with its petition intended to demonstrate that non-U.S. certified 1987–1989 Bentley passenger cars, as originally manufactured, conform to many Federal motor vehicle safety standards in the same manner as their U.S. certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that non-U.S. certified 1987–1989 Bentley passenger cars are identical to their U.S. certified counterparts with respect to compliance with Standards Nos. 102 *Transmission Shift Lever Sequence* * * * *, 103 *Defrosting and Defogging Systems*, 104 *Windshield Wiping and Washing Systems*, 105 *Hydraulic Brake Systems*, 106 *Brake Hoses*, 109 *New Pneumatic Tires*, 113 *Hood Latch Systems*, 116 *Brake Fluid*, 124 *Accelerator Control Systems*, 201 *Occupant Protection in Interior Impact*, 202 *Head Restraints*, 203 *Impact Protection for the Driver from the Steering Control System*, 204 *Steering Control Rearward Displacement*, 205 *Glazing Materials*, 206 *Door Locks and Door Retention Components*, 207 *Seating Systems*, 209 *Seat Belt Assemblies*, 210 *Seat Belt Assembly Anchorages*, 212 *Windshield Retention*, 216 *Roof Crush Resistance*, 219 *Windshield Zone Intrusion*, and 302 *Flammability of Interior Materials*.

Petitioner also contends that the vehicles are capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays:* (a) Substitution of a lens marked "Brake" for a lens with a noncomplying symbol on the brake failure indicator lamp; (b) installation of a seat belt warning lamp that displays the appropriate symbol; (c) recalibration of the speedometer/odometer from kilometers to miles per hour.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment:* (a) Installation of U.S.-model headlamp assemblies that incorporate headlamps with DOT markings; (b) installation of U.S.-model front and rear sidemarker/reflector assemblies; (c) installation of U.S.-model taillamp assemblies; (d) installation of high mounted stop lamps.

Standard No. 110 *Tire Selection and Rims:* installation of a tire information placard.

Standard No. 111 *Rearview Mirror:* replacement of the convex passenger side rearview mirror.

Standard No. 114 *Theft Protection:* installation of a warning buzzer microswitch in the steering lock assembly and a warning buzzer.

Standard No. 118 *Power Window Systems:* rewiring of the power window system so that the window transport is inoperative when the ignition is switched off.

Standard No. 208 *Occupant Crash Protection:* (a) installation of a U.S.-model seat belt in the driver's position, or a belt webbing-actuated microswitch inside the driver's seat belt retractor; (b) installation of an ignition switch-actuated seat belt warning lamp and buzzer; (c) installation of automatic lap and shoulder belts at each front designated seating position. The petitioner states that the vehicles are equipped with combination lap and shoulder restraints that release by means of a single push button at both rear outboard designated seating positions, and with a lap belt in the rear center designated seating position.

Standard No. 214 *Side Impact Protection:* installation of reinforcing beams.

Standard No. 301 *Fuel System Integrity:* installation of a rollover valve in the fuel tank vent line between the fuel tank and the evaporative emissions collection canister.

Additionally, the petitioner states that the bumpers on the non-U.S. certified 1987–1989 Bentley passenger cars must be reinforced or U.S.-model bumper components must be installed to comply with the Bumper Standard found in 49 CFR Part 581.

The petitioner also states that a vehicle identification number plate must be affixed to the vehicle to meet the requirements of 49 CFR Part 565.

Interested persons are invited to submit comments on the petition described above. Comments should refer to the docket number and be submitted to: Docket Management, Room PL–401, 400 Seventh St., SW, Washington, DC 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A) and (b)(1); 49 CFR 593.8; delegations of authority at 49 CFR 1.50 and 501.8.

Issued on: April 6, 2000.

Marilynne Jacobs,

Director, Office of Vehicle Safety Compliance.

[FR Doc. 00–8938 Filed 4–10–00; 8:45 am]

BILLING CODE 4910–59–P

National Highway Traffic Safety Administration

[Docket No. NHTSA–2000–7173]

Notice of Receipt of Petition for Decision that Nonconforming 1988–1990 Jaguar XJS and XJ6 Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice of receipt of petition for decision that nonconforming 1988–1990 Jaguar XJS and XJ6 passenger cars are eligible for importation.

SUMMARY: This document announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a decision that 1988–1990

Jaguar XJS and XJ6 passenger cars that were not originally manufactured to comply with all applicable Federal motor vehicle safety standards are eligible for importation into the United States because (1) they are substantially similar to vehicles that were originally manufactured for importation into and sale in the United States and that were certified by their manufacturer as complying with the safety standards, and (2) they are capable of being readily altered to conform to the standards.

DATES: The closing date for comments on the petition is May 11, 2000.

ADDRESSES: Comments should refer to the docket number and notice number, and be submitted to: Docket Management, Room PL–401, 400 Seventh St., SW, Washington, DC 20590. [Docket hours are from 9 am to 5 pm].

FOR FURTHER INFORMATION CONTACT: George Entwistle, Office of Vehicle Safety Compliance, NHTSA (202–366–5306).

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable Federal motor vehicle safety standards.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

J.K. Technologies of Baltimore, Maryland ("J.K.")(Registered Importer 90–006) has petitioned NHTSA to decide whether 1988–1990 Jaguar XJS and XJ6 passenger cars are eligible for importation into the United States. The vehicles which J.K. believes are substantially similar are 1988–1990 Jaguar XJS and XJ6 passenger cars that were manufactured for importation into, and sale in, the United States and certified by their manufacturer as conforming to all applicable Federal motor vehicle safety standards.

The petitioner claims that it carefully compared non-U.S. certified 1988–1990 Jaguar XJS and XJ6 passenger cars to their U.S.-certified counterparts, and found the vehicles to be substantially similar with respect to compliance with most Federal motor vehicle safety standards.

J.K. submitted information with its petition intended to demonstrate that non-U.S. certified 1988–1990 Jaguar XJS and XJ6 passenger cars, as originally manufactured, conform to many Federal motor vehicle safety standards in the same manner as their U.S. certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that non-U.S. certified 1988–1990 Jaguar XJS and XJ6 passenger cars are identical to their U.S. certified counterparts with respect to compliance with Standard Nos. 102 *Transmission Shift Lever Sequence . . . ,* 103 *Defrosting and Defogging Systems,* 104 *Windshield Wiping and Washing Systems,* 105 *Hydraulic Brake Systems,* 106 *Brake Hoses,* 109 *New Pneumatic Tires,* 113 *Hood Latch Systems,* 116 *Brake Fluid,* 124 *Accelerator Control Systems,* 201 *Occupant Protection in Interior Impact,* 202 *Head Restraints,* 203 *Impact Protection for the Driver from the Steering Control System* (for all vehicles except the 1990 Jaguar XJS, to which the standard is inapplicable because the vehicle meets the frontal barrier crash test requirements in paragraph S5.1 of Standard No. 208), 204 *Steering Control Rearward Displacement,* 205 *Glazing Materials,* 206 *Door Locks and Door Retention Components,* 207 *Seating Systems,* 209 *Seat Belt Assemblies,* 210 *Seat Belt Assembly Anchorages,* 212 *Windshield Retention,* 216 *Roof Crush Resistance,* 219 *Windshield Zone Intrusion,* 301 *Fuel System Integrity,* and 302 *Flammability of Interior Materials.*

Additionally, the petitioner states that non-U.S. certified 1988–1990 Jaguar XJS and XJ6 passenger cars comply with the Bumper Standard found in 49 CFR Part 581.

Petitioner also contends that the vehicles are capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays*: (a) substitution of a lens marked "Brake" for a lens with a noncomplying symbol on the brake failure indicator lamp; (b) replacement of the speedometer with one calibrated in miles per hour. The petitioner states that owing to a shortage of dealer available parts for earlier models, these parts may be purchased from aftermarket Jaguar suppliers, and that in some cases the instrument clusters will be replaced with complete units as opposed to individual parts.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment*: Inspection of all vehicles, and, where necessary, (a) installation of U.S.-model headlamps and front sidemarker lamps; (b) installation of U.S.-model taillamp assemblies which incorporate rear sidemarker lights; (c) installation of a U.S.-model high mounted stop lamp.

Standard No. 110 *Tire Selection and Rims:* installation of a tire information placard on vehicles that are not already so equipped.

Standard No. 111 *Rearview Mirror*: replacement of the passenger side rearview mirror with a U.S.-model component on vehicles that are not already so equipped.

Standard No. 114 *Theft Protection*: installation of a warning buzzer and a warning buzzer microswitch in the steering lock assembly on vehicles that are not already so equipped.

Standard No. 118 *Power Window Systems*: installation, on vehicles that are not already so equipped, of a relay in the power window system so that the window transport is inoperative when the ignition is switched off.

Standard No. 208 Occupant Crash Protection:

All vehicles: installation of a safety belt warning buzzer, wired to the driver's seat belt latch.

1988–1989 Jaguar XJS and the 1988–1990 Jaguar XJS: replacement of the motorized automatic belts with U.S.-model components on vehicles that are not already so equipped. The petitioner states that these vehicles are equipped with combination lap and shoulder belts at the rear outboard seating positions and with a lap belt at the rear center seating position.

1990 Jaguar XJS: replacement of the driver's side air bag and knee bolster with U.S.-model components on vehicles that are not already so equipped. The petitioner states that these vehicles are equipped with combination lap and shoulder belts at the front and rear outboard seating positions, and "with rear center seat lap belt."

Standard No. 214 *Side Impact Protection*: installation of U.S.-model doorbars in vehicles that are not already so equipped.

The petitioner states that all vehicles will be inspected prior to importation to ensure that they comply with the parts marking requirements of the Theft Prevention Standard at 49 CFR Part 541, and that these markings will be embossed or engraved on any required parts from which they are missing.

The petitioner also states that a vehicle identification plate must be affixed to the vehicle near the left windshield post and a reference and certification label must be affixed in the area of the left front door post to meet the requirements of 49 CFR Part 565.

Interested persons are invited to submit comments on the petition described above. Comments should refer to the docket number and be submitted to: Docket Management, Room PL–401, 400 Seventh St., SW, Washington, DC 20590. [Docket hours are from 9 am to 5 pm]. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A) and (b)(1); 49 CFR 593.8; delegations of authority at 49 CFR 1.50 and 501.8.

Issued on: April 6, 2000.

BILLING CODE 4910–59–P

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Research and Special Programs Administration

Results of a Departmentwide Program Evaluation of the Hazardous Materials Transportation Programs (HMPE)

AGENCY: Office of Inspector General (OIG) and Research and Special Programs Administration (RSPA), DOT.

ACTION: Notice of Findings and Recommendations.

SUMMARY: This notice announces the completion of a Departmentwide Program Evaluation of the Hazardous Materials Transportation Programs. The program evaluation found that the Department's hazardous materials program is working reasonably well, but could be improved through Departmentwide strategic planning and program coordination, more focused delivery, and better data. To address these findings, the program evaluation recommended that DOT establish a focal point to administer and deliver a Departmentwide hazardous materials program, aimed at intermodal and cross-modal issues, to provide for more effective deployment of its resources. DOT should also place more emphasis on hazardous materials safety in its Strategic and Performance Plan(s) to better guide program delivery and measure results. Furthermore, the program evaluation recommended that the Department develop DOT-wide strategies to focus more on high-risk or problem shippers through targeted outreach activities and inspections, and strengthen its training standards to improve industry safety practices and compliance with the hazardous materials regulations to reduce incidents. The program evaluation also recommended that DOT take steps to improve its hazardous materials data Departmentwide and develop ways to increase data availability and usefulness. The results of the Hazardous Materials Program Evaluation (HMPE) are intended to improve the effectiveness and efficiency of the Department's hazardous materials program. Copies of the Executive Summary and full report are available electronically through DOT at: http://hazmat.dot.gov/hmpe.htm.

FOR FURTHER INFORMATION CONTACT: Jackie A. Goff, Esq., 202–493–0326, or George A. Whitney, 202–366–4831, HMPE Co-Chairs, U.S, Department of Transportation; 400 Seventh Street SW, Washington, DC 20590–0001.

SUPPLEMENTARY INFORMATION:

I. Background

On March 9, 1999, DOT published a Notice in the **Federal Register** (64 FR 11528) announcing the initiation of an internal Departmentwide Program Evaluation of the Hazardous Materials Transportation Programs. In that Notice it was announced that the HMPE team was being jointly lead by the Office of Inspector General (OIG) and the Research and Special Programs Administration (RSPA). The HMPE team was staffed by 10 full-time persons, including at least one full-time person from the OIG and RSPA and each of the following DOT Operating Administrations: the United States Coast Guard; the Federal Aviation Administration; the Federal Motor Carrier Safety Administration; and the Federal Railroad Administration.

The HMPE team examined the Federal hazardous materials transportation law, the program structure defined by the delegation of authority within DOT, and assessed program delivery. The HMPE was intended to determine the effectiveness of DOT's current hazardous material programs, including the division of responsibilities across and within modes, and the allocation of resources dedicated to specific functions. The HMPE focused on cross-modal issues, including an analysis and critique of DOT's current program intervention tools (regulation, education, training, outreach, inspection, and enforcement).

The scope of the HMPE included those activities covered by 49 CFR parts 106 (Rulemaking Procedures) and 107 (Hazardous Materials Program Procedures), and the Hazardous Materials Regulations (HMR), 49 CFR parts 171–180. International shipments of hazardous materials were also included in the scope of the HMPE to permit a review of the International Maritime Dangerous Goods Code (IMDG) and the International Civil Aviation Organization's Technical Instructions on the Transportation of Dangerous Goods by Air (ICAO), both of which are authorized by HMR as alternative standards for many of the requirements in the HMR for shipments destined for import export.

II. Findings

There are roughly 300 million hazardous materials shipments in the nation each year and the vast majority of these shipments arrive at their destinations safely. In 1998, there were 15,322 reported hazardous materials incidents, including 429 serious incidents; 13 deaths; and 198 injuries. Although this is a relatively good safety record, given the total amount of shipments and movements, there remains the potential for catastrophic incidents in the transportation of hazardous materials where multiple fatalities, serious injuries, large-scale evacuations, and other costs to society could result.

Total tons of hazardous materials produced are forecast to grow by 2 percent per year. Growth in the amount of hazardous materials transported by air and intermodally could be 4 times and 3 times faster, respectively, than the overall production growth. Therefore, the potential risk to the public may also increase unless effective safeguards are in place. The Department has responsibility for protecting the public

from the inherent risks associated with transporting hazardous materials.

The HMPE team found that DOT's hazardous materials programs work reasonably well but could be improved. The hazardous materials programs lack Departmentwide strategic planning and direction necessary to ensure effective deployment of resources, and there are insufficient reliable data upon which to make informed program decisions. The program evaluation's major findings were:

- The Secretarial delegations do not provide for Departmentwide coordination or oversight of the five Operating Administrations responsible for ensuring hazardous materials safety. To address this, DOT needs to establish a focal point to administer and deliver a Departmentwide hazardous materials program, aimed at intermodal and cross-modal issues, to provide for more effective deployment of resources. DOT should also place more emphasis on hazardous materials safety in its Strategic and Performance Plan(s) to better guide program delivery and measure results.
- Shippers of hazardous materials generally receive less attention Departmentwide than carriers, yet they offer the greatest opportunity to improve safety. Shippers are a common element across the Operating Administrations, perform critical functions early in the transportation stream, and can impact safety system-wide. As a result, the Department needs to develop Departmentwide strategies and actions to focus more on high-risk or problem shippers through targeted outreach and inspection activities.
- Human error continues to be the single greatest contributing factor in hazardous materials incidents and DOT has not been effective in changing this trend. To address this, in part, DOT should strengthen its training standards to improve industry safety practices and compliance with the HMR to reduce incidents. Also, the traveling public is largely unaware of the dangers of the hazardous materials they bring into the transportation system and the dangerous consequences of unsafe driver actions around vehicles, especially those transporting hazardous materials. Accordingly, DOT needs to develop a coordinated, national campaign to increase the traveling public's awareness of the dangers of hazardous materials and reduce the risk of hazardous materials incidents.
- DOT lacks reliable, accurate, and timely data to measure program effectiveness and make informed program delivery and resource decisions. DOT needs to improve hazardous materials census, incident, compliance, and budget data Departmentwide and develop ways to increase data availability and usefulness. DOT should also improve its analysis of incident data to better understand the root causes of hazardous materials incidents and address these through Departmentwide hazardous materials actions and broader safety program initiatives.
- In addition, a number of areas were identified requiring further analysis or other actions related to: better understanding undeclared shipments; the complexity and adequacy of the current regulations; safety gaps related to hazardous materials shipments in the US mail; enhanced inspection authority; and ways to improve DOT's current performance measure.

III. Recommendations

The HMPE team recommends the hazardous materials program be improved by:

- Strengthening strategic planning and coordination by establishing an institutional capacity in the Department to administer and deliver a coordinated hazardous materials program with the authority to establish Departmentwide policy, program objectives, and priorities and focus budget and resource strategies. For example, if analysis of inspection and incident data revealed that improper preparation of closure devices on plastic drums was becoming a problem, the recommended institutional capacity would be able to develop Departmentwide objectives and strategies to address the issue.
- Enhancing program delivery by identifying and focusing more on high-risk or problem shippers, more effectively using all available tools at DOT's disposal, and identifying other critical points in the transportation stream for program focus. For example, problem shippers, such as those with many hazardous materials incidents, may be targeted for inspections, while infrequent hazardous materials shippers may benefit more from outreach.
- Improving outreach aimed at the traveling public by better educating passengers on what materials are hazardous and should not be carried aboard, or placed in stowed luggage on, planes, trains, and buses. DOT should also take steps to increase public awareness about the dangerous consequences of unsafe driver actions around vehicles transporting hazardous materials.
- Strengthening the training regulations and tasking the institutional capacity to work with RSPA, the other Operating Administrations, and industry to identify ways to ensure hazardous materials employees are adequately trained to carry out their jobs in a safe manner.
- Using strike force inspections to cross-train inspectors as well as enforce regulations. Strike force operations concentrate inspectors from the Operating Administrations and other Federal, state, and local agencies at intermodal locations for a specific time period to conduct hazardous materials inspections of more than one mode of transportation using that targeted location. In addition to enforcing compliance, strike force operations can be used to train inspectors from one Operating Administration on the issues, problems, and regulatory requirements of other Operating Administrations.
- Enriching the quality of hazardous materials data by tasking the Bureau of Transportation Statistics to work with the Operating Administrations to determine data needs, collection strategies, and analytical techniques.
- Having the new institutional capacity address several regulatory and programmatic issues identified by the team during the program evaluation, but which were too complex or time consuming for this program evaluation.

Summary findings of the HMPE were published in the combined DOT Performance Plan (FY 2001) and Report (FY 1999) dated March 31, 2000, in support of the Government Performance and Results Act. An electronic copy of the HMPE Executive Summary and the full HMPE report is available on the internet at: http://hazmat.dot.gov/hmpe.htm.

Issued in Washington, DC on April 5, 2000.

Jackie A. Goff,

Co-Chair, Hazardous Materials Program Evaluation Team.

George A. Whitney,

Co-Chair, Hazardous Materials Program Evaluation Team.

DEPARTMENT OF TRANSPORTATION

Saint Lawrence Seaway Development Corporation

Advisory Board; Notice of Change of Meeting Location

The location of the meeting of the Advisory Board of the Saint Lawrence Seaway Development Corporation, to be held at 9 a.m. on Wednesday, April 12, 2000, notice of which was published in the **Federal Register** on March 30 (65 FR 17000), has been changed. The new location is the Sheraton West Palm

Beach Hotel, 630 Clearwater Park Road, West Palm Beach, Florida.

Issued at Washington, D.C. on April 7, 2000.

Marc C. Owen,

Advisory Board Liaison.

[FR Doc. 00–9073 Filed 4–10–00; 8:45 am]

BILLING CODE 4910–61–M

DEPARTMENT OF THE TREASURY

Fiscal Service

Financial Management Service; Proposed Collection of Information: Final Rule—Administrative Offset, Collection of Past-Due Child Support

AGENCY: Financial Management Service, Fiscal Service, Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Financial Management Service, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a continuing information collection. By this notice, the Financial Management Service solicits comments concerning the "Final Rule—Administrative Offset, Collection of Past-Due Child Support".

DATES: Written comments should be received on or before June 12, 2000.

ADDRESSES: Direct all written comments to Financial Management Service, 3700 East West Highway, Programs Branch, Room 144, Hyattsville, Maryland 20782.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Mary MacLeod, Manager, Customer Liaison Branch, Room 439F, 401—14th Street, SW, Washington, DC 20227, (202) 874–7451.

SUPPLEMENTARY INFORMATION: Pursuant to the Paperwork Reduction Act of 1995, (44 U.S.C. 3506(c)(2)(A)), the Financial Management Service solicits comments on the collection of information described below.

Title: Final Rule—Administrative Offset, Collection of Past-Due Child Support.

OMB Number: 1510–0069.

Form Number: N/A.

Abstract: The Debt Collection Improvement Act of 1996 authorizes the collection of past-due child support by offset of nontax Federal payments. Executive Order 13019 of September 28, 1996, requires Treasury to promptly develop and implement procedures necessary to implement this authority.

Current Actions: Extension of currently approved collection.

Type of Review: Regular.

Affected Public: State, Local or Tribal Government.

Estimated Number of Respondents: 54.

Estimated Time Per Respondent: 103 hours.

Estimated Total Annual Burden Hours: 5,562.

Comments: Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance and purchase of services to provide information.

Dated: April 4, 2000.

Nancy C. Fleetwood,

Assistant Commissioner, Debt Management Services.

[FR Doc. 00–8860 Filed 4–10–00; 8:45 am]

BILLING CODE 4810–35–M

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0073]

Proposed Information Collection Activity: Proposed Collection; Comment Request

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Veterans Benefits Administration (VBA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice. This notice solicits comments for information needed to determine the amount of educational benefits payable to veterans or eligible persons.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before June 12, 2000.

ADDRESSES: Submit written comments on the collection of information to Nancy J. Kessinger, Veterans Benefits Administration (20S52), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420. Please refer to "OMB Control No. 2900–0073" in any correspondence.

FOR FURTHER INFORMATION CONTACT: Nancy J. Kessinger at (202) 273–7079 or FAX (202) 275–5947.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Public Law 104–13; 44 U.S.C., 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: Enrollment Certification, VA Form 22–1999. (NOTE: A reference to VA Form 22–1999 also includes VA Forms 22–1999–1, 22–1999–2, and 22–1999–3 unless otherwise specified. VA Forms 22–1999–1, 22–1999–2, and 22–1999–3 contain the same information as VA Form 22–1999.)

OMB Control Number: 2900–0073.

Type of Review: Extension of a currently approved collection.

Abstract: Educational institutions and job establishments use VA Form 22–1999 to report information concerning the enrollment or reenrollment into training of veterans, service persons, reservists, and other eligible persons. The information collected on VA Form 22–1999 is used by VA to determine the amount of educational benefits payable to the trainee during the period of

enrollment or training and to determine whether the trainee has requested an advanced payment of benefits. Without the information, VA would not have a basis upon which to make payment.

Affected Public: Not-for-profit institutions, Business or other for-profit, and State, Local or Tribal Government.

Estimated Annual Burden: 120,975 hours.

Estimated Average Burden Per Respondent: 10 minutes.

Frequency of Response: On occasion (The number of responses per respondent will vary according to the number of trainees who receive VA benefits at the educational institution or job training establishment during a 12-month period).

Estimated Annual Responses: 725,802.

Estimated Number of Respondents: 7,514.

Dated: March 23, 2000.

By direction of the Secretary.

Donald L. Neilson,

Director, Information Management Service.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–NEW]

Proposed Information Collection Activity: Proposed Collection; Comment Request

AGENCY: Veterans Health Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Veterans Health Administration (VHA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed new collection, and allow 60 days for public comment in response to the notice. This notice solicits comments for information needed to identify individuals at risk for stress-related illnesses.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before June 12, 2000.

ADDRESSES: Submit written comments on the collection of information to Ann W. Bickoff, Veterans Health Administration (193B1), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420. Please refer to "OMB Control No. 2900–NEW" in any correspondence.

FOR FURTHER INFORMATION CONTACT: Ann W. Bickoff (202) 273–8310 or FAX (202) 273–9381.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Public Law 104–13; 44 U.S.C., 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VHA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VHA's functions, including whether the information will have practical utility; (2) the accuracy of VHA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: Study of Individuals at Risk for Stress Related Illness, VA Form 10–21036(NR).

OMB Control Number: 2900–NEW.

Type of Review: New collection.

Abstract: This survey collection is intended for the development of "psychological and biomedical measurements for early identification of individuals at risk for stress-related illness." VA proposes to design and validate a psychometrically sound inventory of psychosocial risk and resilience factors that will be empirically related to self-reported physical and mental health and health-related quality of life in Gulf War veterans. The inventory will include assessments of multiple dimensions of war-zone stress, predeployment vulnerabilities, and reentry-postwar circumstances.

Affected Public: Individuals or households.

Estimated Annual Burden: 525 hours.

Estimated Average Burden Per Respondent: 45 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 700.

Dated: March 17, 2000.

Donald L. Neilson,

Director, Information Management Service.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0180]

Proposed Information Collection Activity: Proposed Collection; Comment Request

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Veterans Benefits Administration (VBA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed reinstatement, without change, of a previously approved collection for which approval has expired, and allow 60 days for public comment in response to the notice. This notice solicits comments for information needed to determine whether or not proprietary education institutions receiving Federal financial assistance are in compliance with the applicable civil rights statute and regulations.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before June 12, 2000.

ADDRESSES: Submit written comments on the collection of information to Nancy J. Kessinger, Veterans Benefits Administration (20S52), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420. Please refer to "OMB Control No. 2900–0180" in any correspondence.

FOR FURTHER INFORMATION CONTACT: Nancy J. Kessinger at (202) 273–7079 or FAX (202) 275–5947.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Pub. L. 104–13; 44 U.S.C., 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites

comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: Compliance Report of Proprietary Institutions, VA Form 27–4274.

OMB Control Number: 2900–0180.

Type of Review: Reinstatement, without change, of a previously approved collection for which approval has expired.

Abstract: VA Form 27–4274 is used to determine whether or not proprietary educational institutions receiving Federal financial assistance are in compliance with applicable civil rights statute and regulations. The collected information is used to identify areas that may indicate, statistically, disparate treatment of minority group members.

Affected Public: Business or other for-profit.

Estimated Annual Burden: 124 hours.

Estimated Average Burden Per Respondent: 60 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 124.

Dated: March 24, 2000.

By direction of the Secretary.

Donald L. Neilson,

Director, Information Management Service.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0104]

Agency Information Collection Activities Under OMB Review

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C., 3501 *et seq.*), this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, has submitted the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before May 11, 2000.

FOR FURTHER INFORMATION OR A COPY OF THE SUBMISSION CONTACT: Denise McLamb, Information Management Service (045A4), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 273–8030 or FAX (202) 273–5981. Please refer to "OMB Control No. 2900–0104."

SUPPLEMENTARY INFORMATION:

Title: Report of Accidental Injury in Support of Claim for Compensation or Pension, VA Form 21–4176.

OMB Control Number: 2900–0104.

Type of Review: Extension of a currently approved collection.

Abstract: The form is used in support of claims for disability benefits based on a disability that is the result of an accident. The information given by the veteran is used as a source to gather specific data regarding the accident and to afford the veteran an opportunity to provide information from his or her own knowledge regarding the accident.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on November 29, 1999, at page 66693.

Affected Public: Individuals or households.

Estimated Annual Burden: 2,200 hours.

Estimated Average Burden Per Respondent: 30 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 4,400.

Send comments and recommendations concerning any aspect of the information collection to VA's OMB Desk Officer, Allison Eydt, OMB Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503 (202) 395–4650. Please refer to "OMB Control No. 2900–0104" in any correspondence.

Dated: March 2, 2000.

By direction of the Secretary.

Agency Information Collection Activities Under OMB Review

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C., 3501 *et seq.*), this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, has submitted the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before May 11, 2000.

FOR FURTHER INFORMATION OR A COPY OF THE SUBMISSION CONTACT: Denise McLamb, Information Management Service (045A4), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 273–8030 or FAX (202) 273–5981. Please refer to "OMB Control No. 2900–0105."

SUPPLEMENTARY INFORMATION:

Title: Statement of Witness to Accident, VA Form Letter 21–806.

OMB Control Number: 2900–0105.

Type of Review: Extension of a currently approved collection.

Abstract: The form letter is used to gather information to support veterans' claims for disability benefits based on disability(ies) which is/are the result of an accident. The information given by a witness to the accident is used as a source to gather specific data regarding the accident and to obtain from the witness opinions as well as facts based on his or her own knowledge and beliefs regarding the accident. Benefits may be paid if a disability is incurred in the line of duty and is not the result of the veteran's own willful misconduct.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on November 29, 1999, on pages 66693 and 66694.

Affected Public: Individuals or households.

Estimated Annual Burden: 4,400 hours.

Estimated Average Burden Per Respondent: 20 minutes.
Frequency of Response: On occasion.
Estimated Number of Respondents: 13,200.

Send comments and recommendations concerning any aspect of the information collection to VA's OMB Desk Officer, Allison Eydt, OMB Human Resources and Housing Branch, New Executive Office Building, Room 12035, Washington, DC 20503 (202) 395–4650. SUPPLEMENTARY INFORMATION:

Title: Application for Amounts on Deposit for Deceased Veteran, VA Form 21–6898.

OMB Control Number: 2900–0133.

Type of Review: Extension of a currently approved collection.

Abstract: VA Form 21–6898 is used to determine the individual(s) who may be entitled to accrued benefits of deceased beneficiaries.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on November 29, 1999, at page 66694.

Affected Public: Individuals or households.

Estimated Annual Burden: 175 hours.

Estimated Average Burden Per Respondent: 15 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 700.

Send comments and recommendations concerning any aspect of the information collection to VA's OMB Desk Officer, Allison Eydt, OMB Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503 (202) 395–4650. Please refer to "OMB Control No. 2900–0133" in any correspondence.

Dated: March 2, 2000.

By direction of the Secretary.

Donald L. Neilson,

Director, Information Management Service.

BILLING CODE 8320–01–U

DEPARTMENT OF VETERANS AFFAIRS

Fund Availability Under the VA Homeless Providers Grant and Per Diem Program

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Department of Veterans Affairs is announcing the availability of funds for applications for assistance under the grant component of VA's Homeless Providers Grant and Per Diem Program. This Notice contains information concerning the program, application process, and amount of funding available.

DATES: An original completed and collated grant application (plus three completed collated copies) for assistance under the VA Homeless Providers Grant and Per Diem Program must be received in Mental Health Strategic Health Care Group, Washington, DC, by 4:00 PM Eastern Time on May 31, 2000. Applications may not be sent by facsimile (FAX). In the interest of fairness to all competing applicants, this deadline is firm as to date and hour, and VA will treat as ineligible for consideration any application that is received after the deadline. Applicants should take this practice into account and make early submission of their material to avoid any risk of loss of eligibility brought about by unanticipated delays or other delivery-related problems.

FOR A COPY OF THE APPLICATION PACKAGE, CONTACT: The Grant and Per Diem Program at (toll-free) 1–877–332–0334 or download directly from VA's Special Homeless Assistance Programs and Initiatives web page at: http://www.va.gov/health/homeless/grants.htm. For a document relating to the VA Homeless Providers Grant and Per Diem Program, see the final rule codified at 38 CFR Part 17.700.

SUBMISSION OF APPLICATION: Original completed and collated grant application (plus three copies) must be submitted to the following address: Mental Health Strategic Health Care Group (116E), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420. Applications must be received in the Mental Health Strategic Health Care Group by the application deadline.

FOR FURTHER INFORMATION CONTACT: Roger Casey, VA Homeless Providers Grant and Per Diem Program, Mental Health Strategic Health Care Group (116E), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420; (toll-free) 1–877–332–0334.

SUPPLEMENTARY INFORMATION: This Notice announces the availability of funds for assistance under VA's Homeless Providers Grant and Per Diem Program for eligible entities to: (1) Expand existing projects; or (2) develop new programs or new components of existing projects. This program is authorized by Public Law 102–590, the Homeless Veterans Comprehensive Service Programs Act of 1992, as amended. Funding applied for under this Notice may be used for: (1) Remodeling or alteration of existing buildings; (2) acquisition of buildings, acquisition and rehabilitation of buildings; (3) new construction; and (4) acquisition of vans for outreach to and/or transportation for homeless veterans. Applicants may apply for more than one type of assistance.

Although a separate Notice has been published announcing funding availability for the Per Diem Component of the program, grant applicants seeking such assistance should indicate this request on the application submitted for a grant. The applicants who are awarded grants will not be required to complete a separate application for per diem assistance. VA will review those portions of the grant application that pertain to per diem.

Grant applicants may not receive assistance to replace funds provided by any State or local government to assist homeless persons. A proposal for an existing project that seeks to shift its focus by changing the population to be served or the precise mix of services to be offered is not eligible for consideration. No more than 25 percent of services available in projects funded through this grant program may be provided to clients who are not receiving those services as veterans.

Authority: VA's Homeless Providers Grant and Per Diem Program is authorized by Sections 3 and 4 of Public Law 102–590, the Homeless Veterans Comprehensive Service Programs Act of 1992 (38 USC 7721 note) and has been extended through Fiscal Year 2003 by Public Law 106–117. The program is implemented by the final rule codified at 38 CFR Part 17.700. The final rule was published in the **Federal Register** on June 1, 1994, and February 27, 1995, and revised February 11, 1997. The regulations can be found in their entirety in 38 CFR, Volume 1, Sec. 17.700 through 17.731, revised July 1, 1997. Funds made available under this Notice are subject to the requirements of those regulations.

Allocation

Approximately $13 million is available for the grant component of this program.

Application Requirements

The specific grant application requirements will be specified in the application package. The package includes all required forms and certifications. Conditional selections will be made based on criteria described in the application. Applicants who are conditionally selected will be notified of the additional information needed to confirm or clarify information provided in the application. Applicants will then have approximately one month to submit such information.

If an applicant is unable to meet any conditions for grant award within the specified time frame, VA reserves the right to not award funds and to use the funds available for other grant and per diem applicants.

Dated: April 4, 2000.

Togo D. West, Jr.,

Secretary of Veterans Affairs.

Coal Mining Point Source Category; Amendments to Effluent Limitations Guidelines and New Source Performance Standards; Proposed Rule

VOL 65 ISS 70 AP 11 2000 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 434

[FRL–6571–9]

RIN 2040–AD24

Coal Mining Point Source Category; Amendments to Effluent Limitations Guidelines and New Source Performance Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to amend the current regulations for the Coal Mining Point Source Category by adding two new subcategories to the existing regulation. First, EPA proposes to establish a new subcategory that will address pre-existing discharges at coal remining operations. EPA also proposes to establish a second new subcategory that will address drainage from coal mining reclamation areas in the arid and semiarid western United States. This proposal would not otherwise change the existing regulations.

The establishment of new subcategories has the potential to create significant environmental benefits at little or no additional cost to the industry. Establishing the Coal Remining Subcategory will encourage remining activities and will reduce hazards associated with abandoned mine lands. The new subcategory has the potential to significantly improve water quality by reducing the discharge of acidity, iron, manganese, and sulfate from abandoned mine lands. EPA projects total monetized annual benefits of $0.70 million to $1.2 million. Additionally, EPA expects that this regulation will result in significant ecological and public safety benefits that could not be quantified and/or monetized. EPA projects that the annual compliance cost for this new subcategory will be $0.33 million to $0.76 million.

EPA estimates that the proposed Western Alkaline Coal Mining Subcategory will result in a net cost savings to affected surface mine operators. The monetized and non-monetized benefits for this subcategory are a result of adopting alternative sediment control technologies for reclamation areas in the arid west. These technologies are projected to increase the volume of storm water drainage to arid watersheds and avoid the disturbance of 26,000 acres, thus reducing severe erosion, sedimentation, hydrologic imbalance, and water loss. EPA projects that the proposed subcategory will result in annualized monetized benefits of $43,000 to $769,000.

DATES: Comments on the proposed regulation must be received on or before July 10, 2000. Public meetings will be held during the comment period. Further details of the public meetings, including dates and specific locations, will be published in the **Federal Register** at a later date.

ADDRESSES: Send written comments on the proposed rule to Mr. Joseph Vitalis (4303); U.S. Environmental Protection Agency; 1200 Pennsylvania Ave, NW; Washington, DC 20460. Comments delivered by hand should be brought to Room 641, West Tower; 401 M Street, SW Washington, DC. Please submit any references cited in your comments. Submit an original and three copies of your written comments and enclosures. No facsimiles (faxes) will be accepted. For information on how to submit electronic comments see "**SUPPLEMENTARY INFORMATION,** How to Submit Comments."

A copy of the supporting documents cited in this proposal is available for review at EPA's Water Docket; Room EB57, 401 M Street, SW, Washington, DC 20460. A copy of the record supporting proposal of a Western Alkaline Coal Mining Subcategory is also available for review at the Office of Surface Mining Library, 1999 Broadway, 34th Floor, Denver, CO. The public record for this rulemaking has been established under docket number W–99–13, and includes supporting documentation, but does not include any information claimed as Confidential Business Information (CBI). For access to docket materials, please call (202) 260–3027 between 9:00 a.m. and 3:30 p.m., Monday through Friday, excluding Federal holidays, to schedule an appointment. For access to docket materials at the Office of Surface Mining Library, please call (303) 844–1436 between 8:00 a.m. and 4:00 p.m. to schedule an appointment.

See the **SUPPLEMENTARY INFORMATION** section for locations of the public meetings regarding this proposal.

FOR FURTHER INFORMATION CONTACT: For additional technical information contact John Tinger at (202) 260–4992 or *"Tinger.John@epa.gov"*; or Joseph Vitalis at (202) 260–7172. For additional economic information contact Kristen Strellec at (202) 260–6036 or *"Strellec.Kristen@epa.gov"*.

SUPPLEMENTARY INFORMATION:

Regulated Entities: Entities potentially regulated by this action include:

Category	Examples of regulated entities	SIC codes	NAICS codes
Industry	Operations engaged in the remining of abandoned surface and underground coal mines and coal refuse piles for remaining coal reserves in areas containing discharges defined as "pre-existing'. Operations engaged in coal mine reclamation activities in the arid and semiarid western coal region.	1221 1222 1231	212111 212112 212113

The preceding table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by this action. This table lists the types of entities that EPA is now aware potentially could be regulated by this action. Other types of entities not listed in the table could also be regulated. To determine whether your facility is regulated by this action, you should carefully examine the applicability criteria in § 434.70 and 434.80 of today's rule. If you have questions regarding the applicability of this action to a particular entity, consult the person listed for technical information in the preceding **FOR FURTHER INFORMATION CONTACT** section.

Locations of Public Meetings

Public meetings regarding proposal of the Western Alkaline Coal Mining Subcategory will likely be held in Gillette, WY; Flagstaff, AZ; and Denver, CO during the public comment period. Public meetings regarding proposal of the Remining Subcategory also will likely be held near Charleston, WV; Lexington, KY; and Zanesville, OH during the public comment period. Further details of the public meetings, including dates and specific locations, will be published in the **Federal Register** at a later date. If you wish to present formal comments at the public meetings, you should have a written copy for submittal. No meeting materials will be distributed in advance

of the public meetings; all materials will be distributed at the meetings.

How to Submit Comments

Comments also may be submitted electronically to *vitalis.joseph@epa.gov*. Electronic comments must be submitted as a Word Perfect 5/6/7/8 or ASCII file. Please avoid using special characters, form and encryption. Electronic comments must be identified with the docket number (W–99–13). EPA also will accept comments and data on disks in WP 5/6/7/8 or ASCII file format. Electronic comments on this document may be filed online at some Federal Depository Libraries. No Confidential Business Information (CBI) should be sent via e-mail.

Supporting Documentation

The proposed regulations are supported by several key documents:

1. *"Coal Remining Best Management Practices Guidance Manual"* (EPA 821–R–00–007). This document describes abandoned mine land conditions and the performance of Best Management Practices (BMPs) that have been implemented at remining operations for over ten years. The BMP Guidance Manual is a technical reference document that presents research and data concerning the prediction and prevention of acid mine drainage to the waters of the United States.

2. *"Coal Remining Statistical Support Document"* (EPA 821–R–00–001). This document establishes the statistical methodology for establishing baseline conditions and setting discharge limits at remining sites.

3. *"Development Document for Proposed Effluent Limitations Guidelines and Standards for the Western Alkaline Coal Mining Subcategory"* (EPA 821–R–00–008): This document presents EPA's technical conclusions concerning the Western Alkaline Mining Subcategory proposal.

4. *"Economic and Environmental Impact Assessment of Proposed Effluent Limitations Guidelines and Standards for the Coal Mining Industry: Remining and Western Alkaline Subcategories"* (EPA–821–B–00–002): This document presents the methodology employed to assess economic and environmental impacts of the proposed rule and the results of the analysis.

Major supporting documents are available from the National Service Center for Environmental Publications (NSCEP), 11029 Kenwood Road, Cincinnati, OH 45242, (800) 490–9198; *http://www.epa.gov/ncepi*. You can obtain copies of this preamble and rule at http://www.epa.gov/OST/guide.

I. Legal Authority

These regulations are proposed under the authority of sections 301, 304, 306, 308, 402, 501, and 502 of the Clean Water Act, 33 U.S.C. 1311, 1314, 1316, 1318, 1342, 1361, and 1363.

II. Background

A. Statutory Authorities

1. Clean Water Act

Congress adopted the Clean Water Act (CWA) to "restore and maintain the chemical, physical, and biological integrity of the Nation's waters' (section 101(a), 33 U.S.C. 1251(a)). To achieve this goal, the CWA prohibits the discharge of pollutants into navigable waters except in compliance with the statute. The Clean Water Act confronts the problem of water pollution on a number of different fronts. Its primary reliance, however, is in establishing restrictions on the types and amounts of pollutants discharged from various industrial, commercial and public sources of wastewater.

Direct dischargers must comply with effluent limitations in National Pollutant Discharge Elimination System ("NPDES") permits; indirect dischargers must comply with pretreatment standards. These limitations and standards are established by regulation for categories of industrial dischargers and are based on the degree of control that can be achieved using various levels of pollution control technology.

a. Best Practicable Control Technology Currently Available (BPT)—Section 304(b)(1) of the CWA. Effluent limitations guidelines based on BPT apply to discharges of conventional, toxic, and non-conventional pollutants from existing sources. BPT guidelines are generally based on the average of the best existing performance in terms of pollution control by plants in a particular industrial category or subcategory. In establishing BPT, EPA considers the cost of achieving pollution reductions in relation to the pollution reduction benefits, the age of equipment and facilities, the processes employed, process changes required, engineering aspects of the control technologies, non-water quality environmental impacts (including energy requirements), and other factors the Administrator deems appropriate. CWA Section 304(b)(1)(B). Where the pollution control performance of existing sources for a category or subcategory is uniformly inadequate, EPA may set BPT by

transferring technology used in a different subcategory or category.

b. Best Available Technology Economically Achievable (BAT)—Section 304(b)(2) of the CWA. In general, BAT effluent limitations guidelines are based on the degree of pollution control achievable by applying the best available technology economically achievable for facilities in the industrial subcategory or category. The CWA requires BAT for controlling the direct discharge of toxic and non-conventional pollutants. The factors considered in determining BAT for a category or subcategory include the age of the equipment and facilities involved, the process employed, potential process changes, engineering aspects of the control technologies, non-water quality environmental impacts (including energy requirements), and other factors the Administrator deems appropriate. EPA retains considerable discretion in assigning the weight to be accorded these factors. Generally, economic achievability is determined on the basis of total costs to the industrial subcategory and their effect on the overall industry's (or subcategory's) financial health. As with BPT, where existing performance is uniformly inadequate, BAT may be transferred from a different subcategory or category. BAT may be based upon process changes or internal controls, such as product substitution, even when these technologies are not common industry practice. The CWA does not require cost-benefit comparison in establishing BAT.

c. Best Conventional Pollutant Control Technology (BCT)—Section 304(b)(4) of the CWA.

The 1977 amendments to the CWA established BCT as an additional level of control for discharges of conventional pollutants from point sources other than publicly owned treatment works. In addition to other factors specified in section 304(b)(4)(B), the CWA requires that BCT limitations be established in light of a two part "cost-reasonableness" test. EPA published a methodology for the development of BCT limitations which became effective August 22, 1986 (51 FR 24974, July 9, 1986).

Section 304(a)(4) designates the following as conventional pollutants: biochemical oxygen demanding pollutants (measured as BOD_5), total suspended solids (TSS), fecal coliform, pH, and any additional pollutants defined by the Administrator as conventional. The Administrator designated oil and grease as an additional conventional pollutant on July 30, 1979 (44 FR 44501).

d. New Source Performance Standards (NSPS)—Section 306 of the CWA. NSPS reflect effluent reductions that are achievable based on the best available demonstrated control technology. New facilities have the opportunity to install the best and most efficient production processes and wastewater treatment technologies. As a result, NSPS should represent the most stringent controls attainable through the application of the best available control technology for all pollutants (i.e., conventional, nonconventional, and priority pollutants). In establishing NSPS, EPA is directed to take into consideration the cost of achieving the effluent reduction and any non-water quality environmental impacts and energy requirements.

e. Pretreatment Standards for Existing Sources (PSES)—Section 307(b) of the CWA—and Pretreatment Standards for New Sources (PSNS)—section 307(b) of the CWA. Pretreatment standards are designed to prevent the discharge of pollutants to a publicly-owned treatment works (POTW) which pass through, interfere, or are otherwise incompatible with the operation of the POTW. Since none of the facilities to which this rule applies discharge to a POTW, pretreatment standards are not being considered as part of this rulemaking.

f. CWA Section 304(m) Requirements. Section 304(m) of the CWA, added by the Water Quality Act of 1987, requires EPA to establish schedules for (1) reviewing and revising existing effluent limitations guidelines and standards and (2) promulgating new effluent guidelines. On January 2, 1990 (55 FR 80), EPA published an Effluent Guidelines Plan, which established schedules for developing new and revised effluent guidelines for several industry categories. The Natural Resources Defense Council, Inc., challenged the Effluent Guidelines Plan in a suit filed in the U.S. District Court for the District of Columbia (*NRDC* v. *Browner*, Civ. No. 89–2980). On January 31, 1992, the Court entered a consent decree (the "304(m) Decree"), which established schedules for EPA's proposal and promulgation of effluent guidelines for a number of point source categories. The most recent Effluent Guidelines Plan was published in the **Federal Register** on September 4, 1998 (63 FR 47285). This plan required, among other things, that EPA propose the Coal Mining Guidelines by December 1999 and promulgate the Guidelines by December 2001. On November 19, 1999, the court modified the decree revising the deadline for proposal to March 31, 2000. The deadline of December 2001 for promulgation of these guidelines was not modified.

2. Pollution Prevention Act

The Pollution Prevention Act of 1990 (PPA) (42 U.S.C. 13101 *et seq.*, Pub. L. 101–508, November 5, 1990) "declares it to be the national policy of the United States that pollution should be prevented or reduced whenever feasible; pollution that cannot be prevented should be recycled in an environmentally safe manner, whenever feasible; pollution that cannot be prevented or recycled should be treated in an environmentally safe manner whenever feasible; and disposal or release into the environment should be employed only as a last resort * * *" (Sec. 6602; 42 U.S.C. 13101(b)). In short, preventing pollution before it is created is preferable to trying to manage, treat or dispose of it after it is created.

The PPA directs EPA to, among other things, "review regulations of the EPA prior and subsequent to their proposal to determine their effect on source reduction" (Sec. 6604; 42 U.S.C. 13103(b)(2)). Source reduction reduces the generation and release of hazardous substances, pollutants, wastes, contaminants, or residuals at the source, usually within a process. The term source reduction "includes equipment or technology modifications, process or procedure modifications, reformulation or redesign of products, substitution of raw materials, and improvements in housekeeping, maintenance, training or inventory control. * * * The term "source reduction" does not include any practice which alters the physical, chemical, or biological characteristics or the volume of a hazardous substance, pollutant, or contaminant through a process or activity which itself is not integral to or necessary for the production of a product or the providing of a service" (42 U.S.C. 13102(5)). In effect, source reduction means reducing the amount of a pollutant that enters a waste stream or that is otherwise released into the environment prior to out-of-process recycling, treatment, or disposal.

In this proposed rule, EPA encourages pollution prevention by requiring the use of site-specific Best Management Practices (BMPs) that are integral to remining operations in abandoned mine lands and to reclamation activities in the arid and semiarid western coal regions. These BMPs, under each subcategory, are designed and implemented to improve existing conditions and to reduce pollutant discharges at the source, thereby reducing the need for treatment.

B. Current Requirements for the Coal Mining Point Source Category

1. EPA Regulations at 40 CFR Part 434

On October 9, 1985 (50 FR 41296), EPA promulgated effluent limitations guidelines and standards that are in effect today under 40 CFR part 434. Currently, there are four subcategories: Coal Preparation Plants and Coal Preparation Plant Associated Areas; Acid or Ferruginous Mine Drainage; Alkaline Mine Drainage; and Post-Mining Areas. Additionally, there is a subpart for Miscellaneous Provisions. The subcategories include BPT, BAT, and NSPS limitations for TSS, pH, iron, manganese, and/or settleable solids (SS).

2. Surface Mining Control and Reclamation Act

In 1977, Congress enacted the Surface Mining Control and Reclamation Act (SMCRA), 30 U.S.C. 1201 *et seq.*, to address the environmental problems associated with coal mining on a nationwide basis. SMCRA created the Office of Surface Mining Reclamation and Enforcement (OSM) within the Department of Interior, which is responsible for preparing regulations and assisting the States financially and technically to carry out regulatory activities.

Title V of the statute gives OSM broad authority to regulate specific management practices before, during, and after mining operations. OSM has promulgated comprehensive regulations to control both surface coal mining and the surface effects of underground coal mining (30 CFR parts 700 *et seq*). Implementation of these requirements has significantly improved mining practices, control of water pollution, and protection of other resources. Title IV of SMCRA addresses the problem of presently abandoned coal mines by authorizing and funding abandoned mine reclamation projects.

All mining operations subject to today's proposal must also comply with SMCRA requirements. EPA has worked extensively with OSM in the preparation of this proposal in order to ensure that the requirements proposed today are consistent with OSM requirements.

3. Rahall Amendment

As part of 1987 amendments to the CWA, Congress added section 301(p), often called the Rahall Amendment, to provide incentives for remining abandoned mine lands that pre-date the passage of SMCRA in 1977. Section 301(p) provides an exemption for remining operations from the BAT effluent limits for iron, manganese, and pH for pre-existing discharges from abandoned mine lands. Instead, a permit writer may set site-specific, numerical BAT limits for pre-existing discharges determined based on Best Professional Judgement (BPJ). The permit effluent limits may not allow discharges to exceed pre-existing "baseline" levels of iron, manganese, and pH. In addition, the permit applicant must demonstrate that the remining operation "will result in the potential for improved water quality from the remining operation." The Rahall Amendment defines remining as "a coal mining operation which began after February 4, 1987 at a site on which coal mining was conducted before August 3, 1977," which was the effective date of the Surface Mining Control and Reclamation Act. Thus, the Rahall Amendment attempted to encourage remining by allowing operators not to treat degraded pre-existing discharges to the levels set in EPA's current effluent limitations guidelines for coal mining.

Despite the statutory authority provided by the Rahall Amendment, coal mining companies and most States remain hesitant to pursue remining without formal EPA approval and guidelines. Today's Document proposes to establish requirements for determining baseline pollutant loadings in pre-existing discharges. It also proposes to specify how to determine site-specific BAT requirements for remining operations and how to demonstrate the potential for environmental improvement from a remining operation.

4. Clean Water Action Plan

On October 18, 1997, the 25th anniversary of the enactment of the Clean Water Act, Vice President Gore called for a renewed effort to restore and protect water quality. EPA and other Federal agencies were directed to develop a Clean Water Action Plan (CWAP) that would continue to provide clean water successes and would address three major goals: (1) Enhanced protection from public health threats caused by water pollution; (2) more effective control of polluted runoff; and (3) promotion of water quality protection on a watershed basis.

Based on the efforts of interagency work groups and comments from the public, EPA and other Federal agencies developed the final CWAP on February 14, 1998. One of several Key Actions specifically identified to implement the goals of the CWAP was EPA's project to re-examine 40 CFR part 434 to "better address coal mining in arid western areas" and "to address coal remining operations."

III. Scope of Proposal

Today, EPA is proposing effluent limitations and performance standards for the Coal Remining Subcategory and for the Western Alkaline Coal Mining Subcategory. The new subcategories will be added to the existing regulations for the Coal Mining Point Source Category found in 40 CFR part 434. The new subcategories will create a set of standards and requirements for the specific waste streams defined in today's proposal.

The existing provisions will continue to apply to discharges produced or generated in active mining areas, which include the active mining areas of remining operations. Section 434.11(b) defines active mining area as "the area, on and beneath land, used or disturbed in activity related to the extraction, removal, or recovery of coal from its natural deposits. This term excludes coal preparation plants, coal preparation plant associated areas and post-mining areas." Wastewater discharges produced or generated by active coal mining operations will not be affected by this proposed regulation and will remain subject to the effluent limitations already established in part 434.

Additionally, in accordance with section 434.61, any waste stream subject to this proposed rule that is commingled with a waste stream subject to another subpart of part 434 will be required to meet the most stringent limitations applicable to any component of the combined waste stream. EPA's proposed regulatory text simply maintains the current regulatory approach on this issue.

A. Coal Remining Subcategory

The effluent limitations and standards proposed for the Coal Remining Subcategory apply to pre-existing discharges that are located within areas of a coal remining operation and that are not commingled with waste streams from active mining areas. Coal remining is the mining of surface mine lands, underground mine lands, and coal refuse piles that were abandoned prior to August 3, 1977.

EPA's rationale for the proposed Remining Subcategory is discussed in Section VI.

B. Western Alkaline Coal Mining Subcategory

The effluent limitations and performance standards for the Western Alkaline Coal Mining Subcategory apply to alkaline mine drainage from

reclamation areas associated with western coal mining operations.

"Alkaline mine drainage" is defined in the existing regulations as "mine drainage which, before any treatment, has a pH equal to or greater than 6.0 and total iron concentration of less than 10 mg/L." 40 CFR 434.11(c). "Reclamation area" is defined in the existing regulations as "the surface area of a coal mine which has been returned to required contour and on which revegetation (specifically, seeding or planting) work has commenced." 40 CFR 434.11(l). EPA is not proposing to make any changes to these existing definitions.

EPA is proposing to define a "western coal mining operation" in arid or semiarid areas as a surface or underground coal mining operation located in the interior western United States, west of the 100th meridian west longitude, in an arid or semiarid environment with an average annual precipitation of 26.0 inches or less. This definition is consistent with the way OSM currently identifies and addresses western coal mining operations (see 30 CFR 701.5 and 30 CFR 816.116) and with SMCRA's provisions with respect to arid and semiarid lands (i.e., extended liability time frames for areas with less than 26 inches of annual precipitation, protection of the alluvial valley floors found in the western environments, and recognition of geological, hydrological and ecological differences found in arid and semiarid environments).

EPA discusses the rationale for the proposed Western Alkaline Coal Mining Subcategory in Section VI.

IV. Industry Profile

A. Coal Mining Industry

The United States is divided into three major coal producing regions termed the Appalachian, Interior, and Western regions. The States included in each are as follows:

- Western Coal Region—Alaska, Arizona, California, Colorado, Montana, New Mexico, North Dakota, Utah, Washington, and Wyoming;
- Appalachian Coal Region—Alabama, Georgia, Eastern Kentucky, Maryland, Ohio, Pennsylvania, Tennessee, Virginia and West Virginia; and
- Interior Coal Region—Arkansas, Illinois, Iowa, Kansas, Western Kentucky, Louisiana, Missouri, Oklahoma, and Texas.

Historically, the Appalachian Region has been the Nation's most important source of coal, accounting for about three-fourths of the total annual production as recently as 1970. In 1970, most of the coal produced domestically was mined east of the Mississippi River (567.8 million tons east of the Mississippi River, compared to 44.9 million tons west of the Mississippi River). Appalachian coals are predominantly bituminous, with a high Btu content and a wide range of sulfur content. Coal in this Region generally occurs in beds that tend to be less than 15 feet thick.

There are two distinct coal-producing areas in the Interior Region. The Illinois Basin, which includes most of Illinois, parts of Indiana and western Kentucky, produces high Btu bituminous coal with medium to high sulfur content. The second major coal producing area in this Region consists of the lignite fields within the Coastal Plain along the Gulf of Mexico.

The Western Coal Region contains extensive deposits of sub-bituminous, low sulfur-content coal. This coal occurs in thick coal seams and shallow overburden conditions that enable the extraction of large volumes at relatively low cost. Consequently, these coal resources represent a highly competitive fuel in the power generation market based on chemical qualities and cost per kilowatt-hour.

Production from U.S. surface coal mines has increased by more than 90 percent since 1970, and there have been dramatic changes in the domestic production of coal due to environmental concerns and market demands. Environmental laws have increased government regulation of the industry. In addition, the Clean Air Act emission requirements to reduce acid rain have shifted market demand to lower sulfur content fuel sources. With this change in the coal market, coal production in the west has increased, and is now nearly equal to that in the Appalachian region (Energy Information Administration, Coal Industry Annual, 1997). In 1970, the Appalachian Region produced a total of 427.6 million tons. The Interior Region total production was 149.9 million tons. By comparison, in 1970, the Western Region produced only 35.1 million tons. By 1993, the market share of production from eastern coal mines had dropped to 55 percent (516.2 million tons), while western mine output had increased to 45 percent (429.2 million tons).

In 1997 the United States produced 1.09 billion short tons of coal, with the Appalachian Region producing approximately 468 million short tons, the Interior Region producing approximately 172 million short tons and the Western Region producing approximately 451 million short tons. While domestic coal production has increased since 1970, fewer operating mines exist today. In 1991, the number of mines producing coal was less than half the number in 1976 (e.g., 6,553 mines in 1976 compared to 3,022 mines in 1991). Coal-fired electric power generating plants are the largest single source of domestically produced primary energy.

B. Coal Remining Subcategory

Coal mining in the eastern United States has been an important industry for several centuries. The lack of adequate environmental controls, until recently, has produced hundreds of thousands of acres of abandoned mine land. Prior to passage of SMCRA in 1977, reclamation of coal mining sites was not a Federal requirement, and drainage from these abandoned mine lands has become the number one water quality problem in Appalachia.

Based on information supplied by the Interstate Mining Compact Commission (IMCC) and OSM's Abandoned Mine Land Inventory System (AMLIS), EPA estimates there currently are over 1.1 million acres of abandoned coal mine lands in the United States. These have produced over 9,709 miles of streams polluted by acid mine drainage. In addition, there are over 18,000 miles of abandoned highwalls, 16,326 acres of dangerous piles and embankments, and 874 dangerous impoundments. Of the land disturbed by coal mining between 1930 and 1971, only 30 percent has been reclaimed to acceptable levels. Several States have indicated that acid mine drainage from abandoned coal mine land is their most serious water pollution problem.

Streams that are impacted by acid mine drainage characteristically have low pH levels (less than 6.0 standard units) and contain high concentrations of sulfate, acidity, dissolved iron and other metals. These conditions commonly will not support fish or other aquatic life. The flows from abandoned mine lands can range from unmeasurable to huge torrents of thousands of gallons per minute. Ninety percent of acid mine drainage comes from coal mines (mostly underground mines) that were abandoned prior to the enactment of SMCRA. Many of the streams impacted by acid mine drainage could be resources for drinking water and the propagation and maintenance of aquatic life, and could support water-based recreation if they were remediated. Their restoration also would contribute to the enhancement of regional economies in areas that have been socio-economically disadvantaged for decades.

Development of modern surface-mining techniques has allowed for more efficient removal of coal deposits and more effective implementation of BMPs that provide pollution abatement and remediation. Consequently, mining is now feasible in areas where mining was previously uneconomical.

More than ten years of remining under the requirements of the Rahall Amendment have demonstrated success in improving abandoned mine land and acid mine drainage. IMCC member States have estimated that there are currently 150 mining companies in ten States involved in remining operations (under either Rahall-type permits or current 40 CFR part 434 limitations) or in operations affecting abandoned mine lands. These companies are producing at least 25 million tons of coal annually, and are employing approximately 3,000 people. To date, approximately 1,072 permits that include coal remining operations have been issued. Of these 1,072 permits, 330 (31 percent) are Rahall-type permits where the operator is required to meet a determined baseline limit for pre-existing discharges. Approximately 300 of these Rahall-type permits are in Pennsylvania alone. Of the 1,072 remining permits, 742 (69 percent) are non-Rahall permits where all discharges must meet current effluent limitations. These permits have tended to be issued at sites where the effects of acid mine drainage are not as significant. Remining operations are affecting approximately 270 abandoned coal refuse piles; 1,600 abandoned surface mines; and 1,100 abandoned underground mines. Information provided by IMCC indicates that there are approximately 2,100 coal refuse piles; 2,000 abandoned surface mines (plus 228,000 acres); and over 8,000 abandoned underground mines that have the potential for remining. Information provided by IMCC is discussed in the Coal Remining BMP Guidance Manual and is included in Section 7.0 of the Rulemaking Record.

Many States have not been able to establish the guidelines and procedures required to issue Rahall permits. However, IMCC member States have indicated that they would be able to establish formal remining programs under guidelines set forth under an EPA effluent limitation Coal Remining subcategory. With the establishment of State remining programs, mine operators would be more inclined to enter into remining projects as discussed in Section VI.

C. Western Alkaline Coal Mining Subcategory

EPA is proposing to address western alkaline mines which would be defined as mines that are (1) west of the 100th meridian, (2) have annual precipitation of 26 inches or less, (3) are in an arid or semiarid environment, and (4) produce alkaline mine drainage. Western coal producing States qualifying are: Arizona, Colorado, Utah, Montana, New Mexico, Wyoming, and all coal fields in North Dakota located west of the 100th meridian.

Coal mining operations in arid and semiarid western regions operate under environmental conditions that are significantly different from those in other regions of the United States. Western arid and semiarid areas are naturally unstable with highly eroded landscapes that are created by flash flood runoff transporting large volumes of sediment. Water resources are severely limited and highly valuable. Specific differences include:

- Precipitation—Annual precipitation averages 26 inches or less, with about one-half occurring as snowfall and one-half as rainfall. The average annual precipitation received by relevant western coal-producing States are: Arizona—13 inches; Colorado—16 inches; Montana—15 inches; New Mexico—13 inches; and Wyoming—13 inches. Rainfall is commonly received during localized, high-intensity, short-duration thunderstorms.
- Temperature—Temperatures fluctuate over wide daily ranges of 30° to 50°F and extreme seasonal ranges (−40° to 115°F). These temperature fluctuations contribute to the physical weathering of surface materials.
- Solar intensity—Solar energy is high and humidity is characteristically very low. As a result, evapotranspiration normally exceeds precipitation. Water infiltration and retention in soil is limited, which results in severe soil moisture deficits, extremely limited surface water resources, and poor vegetative growth.
- Erosion—Natural soils tend to be erosion prone and soil-forming materials frequently erode faster than they are formed. Soil that does form can be poorly developed with low organic matter and limited plant nutrient content. Soil moisture content is low and precipitation easily mobilizes sediment.
- Hydrology—Drainage systems are composed primarily of dry washes and arroyos. These drainage features provide an unlimited source of sediment that may be mobilized by flash flooding. For approximately eleven months per year, the washes and arroyos are dry, flowing only in response to precipitation runoff. Runoff is frequently characterized by high volume, high velocity, sediment laden, turbulent flows with tremendous kinetic energy. Flows can be expected to contain sediment concentrations ranging upwards to 500,000 mg/L during flash flood runoff events.
- Vegetation—Areas are characterized by discontinuous and sparsely distributed grasses, shrubs and trees. The major vegetation types are desert grass and brush, and open forests with pinyon-juniper and ponderosa pine.

EPA has identified 46 surface coal mines in the western region that potentially will be affected by this proposed rule (two percent of the total number of coal mines in the United States). These mines produce approximately one-third of the total annual U.S. coal production.

V. Summary of Data Collection Activities

A. Expedited Guidelines Approach

EPA is developing this regulation using an expedited rulemaking process. This process relies on stakeholder support to develop the initial technology and regulatory options. At various stages of information gathering, OSM, States, Tribes, industry, EPA and other stakeholders have presented and discussed their preferred options and identified differences in opinion. EPA developed this proposal more quickly than a typical effluent guidelines proposal, and the proposal contains less information than EPA usually provides for effluent guidelines. EPA expects to identify any gaps and gather additional information through the public comment process.

EPA encourages full public participation in developing the final Coal Remining and Western Alkaline Coal Mining Guidelines. This expedited rulemaking process relies more on open communication between EPA, the regulated community, and other stakeholders, and less on formal data and information gathering mechanisms. The expedited guidelines approach is suitable when EPA, States, industry, and other stakeholders have a common goal in regards to the purpose of the effluent guidelines. EPA believes this is the case with the Coal Remining and Western Alkaline Coal Mining rulemaking. EPA is proposing to allow site-specific effluent limits for pre-existing discharges at remining operations and alternative sediment control technologies at western alkaline mine reclamation operations. EPA believes that this rule will provide

better environmental results than the current requirements. EPA welcomes comment on all options and issues and encourages commenters to submit additional data during the comment period. EPA also is willing to meet with interested parties during the comment period to ensure that EPA considers the views of all stakeholders and the best possible data upon which to base a decision for the final regulation.

As part of the expedited approach to this rulemaking, EPA has chosen not to gather data using the time consuming approach of a Clean Water Act Section 308 questionnaire. Rather, EPA is using data voluntarily submitted by industry, permitting authorities, vendors, academia, and others, along with data EPA can develop in a limited period of time. Because all of the facilities affected by this proposal are direct dischargers, EPA did not conduct an outreach survey to POTWs.

Throughout regulatory development, EPA has worked with representatives from the U.S. Office of Surface Mining Reclamation and Enforcement, the Interstate Mining Compact Commission, State regulatory authorities, the Western Interstate Energy Board (WIEB), the National Mining Association (NMA), the coal mining industry, and research organizations to submit data and develop effluent limitations guidelines and standards that represent the appropriate level of technology (e.g., BAT, BCT, BPT, and NSPS).

EPA plans to continue its data gathering efforts for support of the final rule. EPA may publish a subsequent document of data availability for data either generated by EPA or submitted after this proposal and used by EPA to develop the final rule.

Databases and reports containing the information and data provided and used by EPA in support of this rule proposal are available in the Rulemaking Record. The following summarizes the data EPA has collected in support of this proposal.

B. Coal Remining Data Collection Activities

Following promulgation of the final effluent limitation guidelines for the Coal Mining industry in 1985, EPA began working with the Pennsylvania Department of Environmental Resources (now the Pennsylvania Department of Environmental Protection or "PADEP"), the Office of Surface Mining (now the Office of Surface Mining Reclamation and Enforcement or "OSM") and various stakeholders to address the remining issue.

In 1988, EPA, PADEP, Pennsylvania State University, and Kohlmann Ruggiero Engineers developed a computer software package (Coal Remining Best Professional Judgement Analysis, Record Section 3.2.6) to enable best professional judgement (BPJ) analyses for remining operations. The software includes a Surface Mine Materials Handling and Cost Module, a Baseline Pollution Load Statistics Module, and a Water Treatment Cost Calculation Module. It has been used by the Commonwealths of Pennsylvania and Virginia to prepare NPDES Coal Remining Permits. The software is designed to:

- Input and revise pre-existing pollution discharge data;
- Calculate baseline pollution loads and perform additional statistical analyses on pre- and post-mining discharge data;
- Calculate capital and annual wastewater treatment cost;
- Input and revise mining plans;
- Simulate mining operations for a production rate and the associated mining costs;
- Compare mining plans and costs with and without abatement plans and evaluate abatement procedures; and
- Calculate relative mining costs with and without wastewater treatment costs added.

Pennsylvania DEP provided EPA with 41 remining permit application modules submitted by Pennsylvania remining operations. These modules are included in the Record at Section 3.2.4, and are titled Module 26: Remining of Areas with Pre-existing Pollutional Discharges. The modules follow the BPJ analyses provided in the EPA and PADEP Coal Remining—Best Professional Judgement Analysis ("REMINE") User's Manual and Software Package. Eleven of these modules were submitted to EPA as part of data packages demonstrating BMP implementation at remining sites. The remaining 30 modules (ten modules from each of three Bureau Mining Offices) were submitted to EPA as representative of approximately 10 percent of Pennsylvania's Rahall permit operations to date. The modules include the following information:

- Abandoned mine land and mine drainage quantities and descriptions;
- Baseline pollution load summaries;
- Detailed descriptions of BMP abatement plans and descriptions of how they are expected to reduce baseline pollution loadings and improve environmental conditions;
- Detailed calculations including materials costs and handling costs for each step of the abatement plan;
- Detailed calculations of construction, operation, and maintenance costs for treatment of pre-existing discharges to current effluent limits; and
- Anticipated pollution reduction benefit resulting from implementation of the abatement plan, including impacts on discharge quality and quantity.

EPA reviewed information provided in these permit modules that compared the cost of treating pre-existing discharges to existing effluent limitations verses the implementation of site-specific BMP plans with the potential to improve baseline pollution loading. This cost comparison portion of Module 26 was completed in 40 of 41 respondents. In all 40 cases, remining was considered not economically feasible if treatment of pre-existing discharges to current effluent limits was required. In the same 40 cases, remining was economically feasible if the abatement plan was implemented as proposed.

In 1996, IMCC, EPA, and OSM formed a Remining Task Force and expanded investigations of opportunities to encourage remining of abandoned coal mines consistent with the requirements of SMCRA and the CWA. In February 1998, IMCC, EPA and OSM released a discussion paper entitled "Water Quality Issues Related to Coal Remining" that is included in the Rulemaking Record at Section 8.1. The paper provided an overview of current discussions between State and Federal agencies regarding water quality issues and concerns pertaining to coal remining operations. The paper focused on opportunities to encourage remining through adjustments to the current regulatory regime while assuring adequate protection of surface and ground water quality. The paper also presented several approaches for providing remining incentives, including the use of effluent limits set at baseline discharge levels for pre-existing discharges. IMCC collected written comments from environmental groups, industry, Federal agencies, and State agencies. The comments generally supported and recognized the value of remining, although commenters expressed some differences of opinion regarding regulatory approaches.

As discussed in Section VI, the discussion paper also presented an alternative BMP-based remining permit approach in which the permit focuses on implementation of BMPs, and does not include numerical limits for pre-existing discharges. Some commenters were concerned that reliance on the implementation of BMPs in lieu of numeric limitations could result in backsliding from existing requirements.

VOL 65 ISS 70 AP 11 2000 UMI

The Remining Task Force believes that BMPs can result in improved water quality and, in certain cases, can qualify as BAT for achieving standards required by the Clean Water Act.

To support this rulemaking, the IMCC submitted data and information specific to abandoned mine lands on pre-existing discharge water quality, BMP implementation, and remining activities in the eastern coal regions. IMCC member States and State regulatory authorities provided sixty-one data packages from Alabama, Kentucky, Pennsylvania, Tennessee, Virginia and West Virginia that include the following data and information:

- Remining permit applications and approved remining permits;
- Abandoned mine land reclamation project plans and results;
- Descriptions of abandoned mine conditions and extent of abandoned mine land;
- BMP implementation plans targeting pre-existing discharges and abandoned mine land;
- Site geology and overburden analysis data;
- Water quality data (surface water, ground water, and pre-existing discharges);
- Best professional judgement analysis of treatment and BMP implementation plans;
- Topographic maps indicating permit areas, active mining areas, pre-existing conditions, and water quality monitoring points;
- Mining operation plans; and
- Unit costs of best management practices.

EPA assessed portions of these data to determine the types and effectiveness of remining operations, abandoned mine land reclamation projects, and BMP implementation procedures that have occurred throughout the affected coal regions. EPA evaluated data packages from closed remining operations as case studies of the effectiveness of BMPs and of remining in terms of improving pre-existing water quality and non-water quality environmental conditions. Detailed case studies are provided in each section of the Coal Remining Best Management Practices Guidance Manual. Information and data provided in these data packages were compiled into a Coal Remining Database that is included in the Rulemaking Record at Section 3.5.1.

On September 3, 1998, IMCC distributed a Solicitation Sheet to States to collect information regarding the extent of existing abandoned mine land, characteristics of current remining operations, type and extent of BMP implementation, remining industry production and employment statistics, and potential for remining operations. Twenty States responded and IMCC submitted the responses to EPA. EPA used this information to develop a profile of the remining industry, estimate the potential for remining activity, and provide an indication of the types and efficiencies of BMPs currently being implemented during remining operations. State responses are included in the Rulemaking Record at Section 3.2.2. A detailed summary of these responses is provided in the Coal Remining BMP Guidance Manual, Appendix C.

In support of BMP implementation evaluation, PADEP provided EPA with a database containing summary pre- and post-mining water quality data and the associated BMPs for 112 closed remining sites throughout the bituminous coal regions of Pennsylvania (Record Section 3.2.3). EPA believes these are the most extensive data currently available for assessment of the water quality impacts of BMP implementation at remining operations. Data from 231 pre-existing discharges affected by BMPs at these closed sites were used to assess the efficiencies of remining BMPs in terms of water quality improvement. The data often demonstrate improvement in, or elimination of, the pollution loadings of acidity, iron, manganese, sulfate, and aluminum, and are presented in Appendix B of the Coal Remining BMP Guidance Manual. Detailed results of this assessment are presented in Section 6 of the Coal Remining BMP Guidance Manual.

C. Western Alkaline Coal Mining Data Collection Activities

In developing the portion of this proposal related to western mines, EPA has worked with a Western Coal Mining Work Group composed of representatives from OSM, the Western Interstate Energy Board (WIEB), State regulatory authorities, the National Mining Association (NMA), and other industry stakeholders to identify, compile and analyze existing information and data.

This work group has supplied EPA with data and information to support the development of new sediment control requirements relying on BMPs for surface reclamation activities in Western Alkaline coal mines. NMA supplied EPA with a number of reports supporting the need for, and feasibility of, establishing a separate Western Alkaline Coal Mining Subcategory. The reports include the following information and supporting data:

- Performance evaluation studies to determine the effectiveness of sediment control BMPs implemented at sites with environmental conditions similar to those of the arid and semiarid western coal region;
- In-stream monitoring programs evaluating background sediment;
- Site-specific sediment control plans targeting arid and semiarid western watersheds;
- Cost evaluations of BMP implementation and treatment requirements; and
- Case studies of mine sites in Arizona, New Mexico, and Wyoming.

The work group also supplied EPA with a mine modeling study sponsored by the National Mining Association and reviewed by OSM. The study compared the predicted performance, costs and benefits of current 40 CFR part 434 Guidelines to the requirements proposed for this rulemaking for a representative model mine in the arid western coal region. Characterization of background water quality, soil loss rates, and sediment yield were predicted using computer models for both pre-mining (undisturbed) and post-mining (reclamation) conditions. The study estimated that the cost of compliance with the proposed subcategory requirements for a typical western surface coal mine will be less than the cost of meeting the existing 40 CFR part 434 guidelines. Details of this study are included in Section 3.3 of the Rulemaking Record and are summarized in the Development Document for Proposed Effluent Limitations Guidelines and Standards for the Western Alkaline Coal Mining Subcategory.

EPA identified, compiled, and analyzed additional sources of existing information and data during the development of this proposed rule including:

- Final NPDES Storm Water Multi-Sector General Permit for Industrial Activities, 60 FR 50804, September 29, 1995. This document includes a section on storm water discharges from inactive coal mines and selected areas within active coal mines, and presents an overview and descriptions of applicable BMPs;
- Sediment control guidelines from State regulatory programs (Wyoming DEQ, Land Quality Division, Guideline No. 15; New Mexico's 19 NMAC 8.2 Subpart 20, Section 2009);
- Performance evaluations demonstrating effectiveness of BMPs (Water Engineering & Technology Studies); and
- Computer-based, predictive soil loss models developed by government,

academia, and industry to model and assess erosion, soil loss, and sediment yields from disturbed lands; capable of determining effectiveness of BMPs on erosion control and sediment production prior to field use (SEDCAD 4.0; Revised Universal Soil Loss Equation (RUSLE); Erosion and Sediment Impacts (EASI) Model).

This information is included in Section 4.3 of the rulemaking record, and is discussed in the Development Document for Proposed Effluent Limitations Guidelines and Standards for the Western Alkaline Coal Mining Subcategory.

VI. Development of Proposed Effluent Limitations Guidelines

A. Coal Remining Subcategory

The effluent limitations and standards proposed for the Coal Remining Subcategory would apply to pre-existing discharges located in areas of a coal remining operation that are not commingled with waste streams from active mining areas.

As noted previously in Section III, coal remining is the mining of surface mine lands, underground mine lands, and coal refuse piles that were abandoned prior to the enactment of the Surface Mining Control and Reclamation Act on August 3, 1977. Acid mine drainage from abandoned coal mines is damaging a significant number of waterways in the Appalachian and mid-continent Coal Regions of the Eastern United States. Information gathered from the Interstate Mining Compact Commission (IMCC) and OSM's Abandoned Mine Land Inventory System (AMLIS) indicates there are over 1.1 million acres of abandoned coal mine lands and over 9,709 miles of streams polluted by acid mine drainage in Appalachia alone.

Acid mine drainage can result from abandoned surface and underground coal mines and coal refuse piles. If acid-forming minerals are present in significant quantities, exposure to air and water can result in the formation of acid mine drainage. At abandoned underground mines, large reservoirs of acid mine drainage can continue to be replenished by ground water movement through the mineral-bearing rocks, creating more acid mine drainage. Water from these "mine pools" seeps through the hillsides or flows freely from abandoned mine entries, enters streams, and deposits metal-rich precipitates downstream.

In 1977, Congress included a provision in SMCRA to establish a fund (the Abandoned Mine Land Program) to address abandoned mine lands, with the highest priority given to cleaning up sites that pose a threat to the health, safety, and general welfare of people. Of the $3.6 billion of high priority (Priority 1 and 2) coal related abandoned mine land (AML) problems in the AML Program inventory, $2.5 billion, or 69 percent, have yet to be funded and reclaimed. Current estimates indicate that ninety percent of the $1.9 billion coal related environmental (Priority 3) problems in the AML inventory have not been funded and reclaimed (OSM Abandoned Mine Land Program, 1999). Although progress has been made in cleaning up abandoned sites, the funds released have not been sufficient to correct the majority of the environmental and safety problems associated with the large numbers of abandoned mine land sites.

EPA recognizes that one of the most successful means for improvement of abandoned mine land is for coal mining companies to remine abandoned areas and extract the coal reserves that remain. EPA also recognizes that if abandoned mine lands are ignored during coal mining of adjacent areas, a time-critical opportunity for reclaiming the abandoned mine land is lost. Once coal mining operations have ceased on the adjacent areas, there is little incentive for operators to return.

During remining operations, acid-forming materials are removed with the extraction of the coal, pollution abatement BMPs are implemented under applicable regulatory requirements, and the abandoned mine land is reclaimed. During remining, many of the problems associated with abandoned mine land, such as dangerous highwalls, vertical openings, and abandoned coal refuse piles can be corrected at no cost to OSM's Abandoned Mine Land Program. Furthermore, implementation of appropriate BMPs during remining operations can be effective at improving the water quality of pre-existing discharges. For example, implementation of appropriate BMPs during 112 remining operations in Pennsylvania was effective in improving or eliminating acidity loading in 45 percent of the pre-existing discharges, total iron loading in 44 percent of the discharges, and total manganese in 42 percent of the discharges. This improvement resulted in reduced annual pollutant loadings of up to 5.8 million pounds of acidity, 189,000 pounds of iron, 11,400 pounds of manganese, and 4.8 million pounds of sulfate. The environmental benefits associated with reclamation of abandoned mine lands are discussed further in Section IX of this document.

The current regulations at 40 CFR part 434 create a disincentive for remining because of their high compliance costs. Moreover, the potential of the statutory exemption contained in the Rahall Amendment to overcome this disincentive and derive the maximum environmental benefits from remining operations has not been fully realized in the absence of implementing regulations. If mining companies face substantial potential liability or economic loss from remining, they will continue to focus on mining virgin areas and ignore abandoned mine lands that may contain significant coal resources. Based on information collected in support of this proposal, EPA believes that remining operations are environmentally preferable to ignoring the coal resources in abandoned mine lands. EPA is soliciting comment on this conclusion, and on potential options that may be environmentally preferable to the new subcategory being proposed today.

As described in Section II of this document, Congress attempted to address the problems associated with acid mine drainage at abandoned mine lands by passing the Rahall Amendment to provide incentives to encourage coal remining. The Rahall Amendment (section 301(p)) allows permit writers to issue NPDES permits for remining sites with requirements less stringent than those in the existing regulations for some pollutant limits. Specifically, section 301(p) allows permit writers to use best professional judgement (BPJ) to set site-specific BAT limits determined for pre-existing discharges. These limits may not exceed baseline levels of iron, manganese, and pH. The operator must also demonstrate that the remining operation will result in the potential for improved water quality. The statute does not specify how to determine site-specific BAT, baseline pollutant discharge levels, or the potential for improved water quality and has left these up to each permitting authority to determine.

The statute does not allow site-specific limits for TSS. EPA also is not proposing alternative limitations for total suspended solids (TSS) or settleable solids (SS) in pre-existing discharges. EPA believes the current level of sediment control is necessary during surface disturbance operations to avoid sedimentation and erosion that can clog streams, increase the risk of flooding, impair land stability, and destroy aquatic habitats. Except for the alternate SS effluent limitations for 10-year, 24-hour precipitation events provided in 40 CFR 434.63, existing effluent limits for TSS and SS will

continue to apply to pre-existing discharges.

Since passage of the Rahall Amendment, seven States have established formal remining programs that have issued approximately 330 Rahall permits with numerical limits for pre-existing discharges that are less stringent than those in the existing regulations. Of these 330 Rahall Remining permits, approximately 300 were issued by the Commonwealth of Pennsylvania. Of the remaining thirty Rahall permits, ten were issued by Alabama, eight by West Virginia, four by Kentucky, three by Virginia, three by Ohio, and two by Maryland. Under these Rahall permits, remining operations must meet the alternate numeric limits specified in the permits and must implement site-specific BMPs. These BMPs include special handling of acid-producing materials, daylighting of abandoned underground mines, control of surface water and ground water, control of sediment, addition of alkaline material, and passive treatment. Remining operations currently underway have proven to be a viable means of remediating the environmental conditions associated with these abandoned mine lands without imposing a significant cost burden on industry (Skousen, Water Quality Changes and Costs of Remining in Pennsylvania and West Virginia, 1997).

A discussion paper released by IMCC, EPA and OSM in February 1998 (Discussion Paper on Water Quality Issues Related to Remining) and discussed further in Section V of this document, presented an alternative BMP-based remining permit approach where implementation of BMPs is the central focus of permitting. This alternative would not impose any numerical limits for pre-existing discharges, but only would require implementation of selected BMPs. The IMCC Remining Task Force believes that BMPs can result in improved water quality and, in certain cases, can qualify as BAT for achieving standards required by the Clean Water Act. EPA is considering conditions under which remining permits based solely on BMP implementation in lieu of numerical effluent limits may be appropriate. In addition, EPA recently accepted a Coal Remining and Reclamation Project XL proposal from the Pennsylvania Department of Environmental Protection. Once finalized, this pilot project is expected to provide a substantial amount of data about the feasibility of using the BMP-based remining permit approach in eight different watersheds throughout Pennsylvania. EPA does not currently have sufficient information on the environmental effectiveness and potential regulatory structure for such an approach, and is not including permits based solely on BMPs in today's proposal. EPA is soliciting additional comments and data supporting BMP-based remining permits and situations for which they may be appropriate.

Despite the statutory authority provided by the Rahall Amendment, coal mining companies and most States remain hesitant to pursue remining without formal EPA approval and guidelines. The Rahall Amendment requires application of the best available technology economically achievable on a case-by-case basis, using best professional judgment to set specific numerical effluent limitations in each permit. However, it does not provide guidelines for how to determine baseline pollutant loadings in pre-existing discharges. It also does not provide guidance on how to determine site-specific BAT requirements for a remining operation, or how to demonstrate the potential for environmental improvement from a remining operation. Without standardized procedures for developing effluent limits for pre-existing discharges, many States with extensive abandoned mine lands have not initiated formal remining programs.

EPA is today proposing a new remining subcategory with effluent limitation guidelines based on a combination of numeric limits and non-numeric BMP requirements. EPA is proposing a standardized procedure for determining pollutant loadings for baseline and compliance monitoring. This procedure is described in Appendix B of this proposed regulation. Example calculations using these procedures and further discussion of EPA's determination of these procedures are provied in the Coal Remining Statistical Support Document. EPA intends these proposed regulations to control pre-existing discharges at remining operations in a manner consistent with requirements under the Rahall Amendment. In effect, these proposed requirements are effluent limitation guidelines authorized under section 304(b) of the CWA, but are also implementing regulations for section 301(p), providing EPA's interpretation of unspecified aspects of that provision. Section 301(p) requires the permit to establish BAT on a case-by-case basis, using best professional judgment to set specific numerical effluent limitations for pH, iron, and manganese in each permit. The operator must demonstrate that the coal remining operation will result in the potential for improved water quality, and in no event may pH, iron, or manganese discharges exceed the levels discharged prior to the remining operation. No discharge from, or affected by, the remining operation may exceed State water quality standards. EPA solicits comments on the consistency of the proposal with the Rahall Amendment and existing State remining programs.

Under the proposed regulations, the permit would contain specific numeric and non-numeric requirements, constituting BPT and BAT. The numeric requirements would be established on a case-by-case basis in compliance with standardized requirements for statistical procedures and monitoring to establish baseline. The numeric effluent limitations set at baseline levels would ensure that in no event will the pollutant discharges exceed the discharges prior to remining, as required by section 301(p)(2). The stringency of the non-numeric permit provisions would be established using best professional judgement to evaluate the adequacy of the selected BMPs contained in a pollution abatement plan. The pollution abatement plan would demonstrate that the remining operation will result in the potential for improved water quality, as also required by section 301(p)(2). Together, the numeric and non-numeric requirements would constitute BPT and BAT.

EPA is proposing to require operators to use BMPs by proposing that remining operators must develop and implement a site-specific pollution abatement plan for each remining site. EPA is proposing that the pollution abatement plan must identify the characteristics of the remining area and the pre-existing discharges at the site; identify design specifications for selected best management practices; and include periodic inspection and maintenance schedules. The pollution abatement plan must demonstrate that there is a potential for water quality improvement, as required by the Rahall Amendment.

EPA is also proposing that this pollution abatement plan must be developed for the entire "pollution abatement area." By applying the pollution abatement plan to the entire pollution abatement area, the proposed Remining Subcategory effluent limitations would cover all pre-existing discharges that are hydrologically connected to the active mining area, but that are not commingled with active mining discharges. EPA is proposing to define the "pollution abatement area" as the part of the permit area that is causing or contributing to the baseline pollution load, including areas that

would need to be affected to reduce the pollution load. This is similar to the definition used by Pennsylvania's remining program in Pennsylvania's Chapter 87, Subchapter F Surface Mining Regulations (Record Section 1.3). The success of the abatement plan is premised on a hydrological connection between the pollution abatement area and the baseline pollutant load. If there is no hydrologic connection between the pre-existing discharge and the operator's remining and reclamation efforts, there can be no water quality improvement. For further information on this rationale see The Preliminary Engineering Cost Manual for Development of BPJ Analysis, 1986, Kohlmann Ruggiero for PA DER and EPA. EPA is providing a supporting document, the Coal Remining Best Management Practices Guidance Manual to assist industry and permit writers in the development and implementation of the pollution abatement plan.

EPA is soliciting comment on the definition of pollution abatement area. EPA is also soliciting comment on any additional requirements for the pollution abatement plan that would ensure the proper use, design and implementation of BMPs.

In many cases, EPA believes that the requirements for the pollution abatement plan will be satisfied by an approved SMCRA plan. However, EPA or the State NPDES permitting authority will review the plan and will retain the authority to recommend additional or incremental BMPs as necessary to ensure that implementation of the identified BMPs is consistent with Clean Water Act requirements.

EPA is proposing regulatory text to make it clear that the requirements of this subcategory apply only to pre-existing discharges that are not commingled with waste streams from active mining areas. This will ensure that all mine drainage produced by the active mining operation is treated to meet existing part 434 guidelines. Any wastewater that is commingled with active mining wastewater would be subject to the most stringent limitations applicable to any component of the wastestream. This maintains the current regulatory approach expressed in section 434.61, that in cases where wastestreams subject to two different effluent limits are commingled, the combined discharge is subject to the more stringent limitation.

During remining, it may be necessary or even preferable for an operator to intercept and/or commingle a pre-existing discharge with active mining wastewater. This wastewater would then be required to meet the more stringent applicable limitations for active coal mining operations and would not be covered by the conditions of the proposed Coal Remining Subcategory. However, that pre-existing discharge may not be eliminated by the remining activity and may remain after remining in the area has been completed. In this instance the pre-existing discharge would no longer be commingled with active mining wastewater. EPA is proposing that a discharge that is no longer being commingled would become subject to the Coal Remining Subcategory requirements which bar an increase in pollutant loadings from baseline conditions.

EPA does not believe that a pre-existing discharge that has been intercepted or commingled should have to continue to meet the more stringent effluent limitations applicable to active mining operations after this activity has been completed. If EPA were to require that pre-existing discharges that are commingled with wastewater remain subject to effluent limitations designed for active mining operations once interception or commingling has ceased, EPA believes it would create a significant disincentive for remining activities. Based on anecdotal and historical evidence of current mining activities, mining companies may try to avoid intercepting pre-existing discharges because they do not want to assume the liability for future treatment of discharges that were not the result of their mining operations. This can result in a "donut hole" in the permitted area, to which BMPs are not applied and from which pre-existing acid mine drainage continues to be discharged. In many cases, EPA believes that the most environmentally beneficial approach would be for the coal operation to physically intercept this pre-existing discharge, treat the discharge to current standards during active mining and reclamation, implement BMPs, and then allow the pre-existing discharge to continue discharging at or below baseline pollutant levels. This approach is consistent with the way Pennsylvania has been implementing the Rahall provisions. Another option for a remining operator would be to divert the discharge stream away from the active mining area. In this case, the pre-existing discharge that has been diverted would be subject to the proposed subcategory effluent limitations, and the mine operator would have to implement BMPs and demonstrate that the pollutant loadings of the diverted discharge stream have not been increased.

These proposed limitations and standards would apply to coal remining operators under new remining permits. EPA is considering coverage of existing remining operations with Rahall-type permits and established BPJ limitations. EPA is also considering situations where coal remining operations seek reissuance of an existing remining permit. In both cases, EPA believes that it may not be feasible for a remining operator to re-establish baseline pollutant levels during active remining. Therefore, EPA is considering an alternative where pre-existing discharges at these operations would remain subject to baseline pollutant levels established during the original permit application. EPA is soliciting comment on the applicability of the proposed Coal Remining Subcategory in regard to both cases.

EPA expects this new subcategory to provide further incentives for industry to remine abandoned mine lands, which will result in reclamation of abandoned mine lands that would otherwise remain unreclaimed and hazardous. EPA solicits comment on the potential for improving hazardous conditions and improving acid mine drainage based on implementation of this subcategory. EPA also solicits comment on the proposed applicability of the remining subcategory as it relates to intercepted pre-existing discharges.

1. BPT for the Coal Remining Subcategory

EPA today proposes BPT effluent limitations for the Coal Remining Subcategory to control identified conventional, toxic, and non-conventional pollutants. For further information on the basis for the limitations and technologies selected, see the Coal Remining BMP Guidance Manual.

As previously described in Section II, section 304(b)(1)(A) of the CWA requires EPA to identify effluent reductions attainable through the application of "best practicable control technology currently available for classes and categories of point sources." Generally, EPA determines BPT effluent levels based upon the average of the best existing performance by facilities of various sizes, ages, and unit processes within each industrial category or subcategory. In establishing BPT, EPA considers the cost of achieving pollution reductions in relation to the pollution reduction benefits, the age of equipment and facilities, the processes employed, process changes required, engineering aspects of the control technologies, non-

water quality environmental impacts, and other factors the Administrator deems appropriate.

EPA is proposing that BPT for the Coal Remining Subcategory be defined through a combination of numeric and non-numeric standards. Specifically, EPA is proposing that the best practicable control technology currently available for remining operations is implementation of a pollution abatement plan that incorporates BMPs designed to improve pH and reduce pollutant loadings of iron and manganese, and a requirement that such pollutant levels are not increased over baseline conditions. This is essentially the level of treatment currently required under permits issued in accordance with the Rahall Amendment, which has been demonstrated to be currently available by remining facilities included in EPA's Coal Remining database (Record Section 3.5.1) and in Pennsylvania's study of 112 closed remining sites (Record Section 3.5.3).

In order to evaluate available technologies to determine BPT, EPA relied on data from 41 remining operations in Pennsylvania. This data is contained in Section 3.2.4 of the regulatory record. All of these facilities used various combinations of BMPs as their pollutant control technology. EPA reviewed the expected performance, cost, and design of the BMPs used by these remining operations. EPA determined that the facilities were able to show potential for significant removals of loading as compared to pre-existing discharge conditions. EPA also determined that design and implementation of a BMP plan should, in most cases, achieve reductions below baseline discharge levels.

This same data from Pennsylvania supports a conclusion that the proposed pollution abatement plan requiring use of BMPs also represents the best available technology economically achievable (BAT) levels of control. Section 301(p) allows permit writers to use best professional judgement (BPJ) to set site-specific BAT limits determined for pre-existing discharges. Pennsylvania completed this BAT determination for 40 of 41 respondents. Pennsylvania's remining permit modules indicated that the only more stringent technology available included chemical addition, precipitation, and settling. In all 40 cases, remining was considered not economically feasible if treatment of pre-existing discharges to current effluent limits was required. In the same 40 cases, remining was economically feasible if the abatement plan was implemented as proposed. Thus, the Pennsylvania remining permits issued under Rahall were issued as BAT permits. This conclusion is supported by the adoption of the Rahall Amendment by Congress in 1987. At that time, Congress recognized that remining was not being conducted on abandoned mine lands because of the cost and liability of requiring treatment to meet existing regulations and authorized less stringent requirements for remining operations.

Therefore, EPA is proposing that the implementation of a pollution abatement plan represents BAT level of control. Furthermore, EPA is aware that permits containing these BMPs are in place and are being implemented by a large number of operators. Thus, EPA is proposing that pollution abatement plans also represent the average of the best technology currently available.

The problem with setting numeric effluent limitations representing the reductions achieved through implementation of a pollution abatement plan is that it is difficult to project the results, in terms of measured improvements in pollutant discharges, that will be produced through the application of any given BMP or group of BMPs at a particular site. EPA believes that the Coal Remining BMP Guidance Manual compiles the best information available on appropriate application and projected performance of all currently identified BMPs applicable to coal remining operations. However, the Coal Remining BMP Guidance Manual provides only reasonable estimates of ranges of projected performance and efficiency. There are numerous variables associated with the design and application of a particular BMP at a particular site, let alone multiple BMPs at a site. Additionally, all of these estimates are subject to substantial uncertainties. In some cases, despite appropriate design and implementation of a BMP plan, there may be little or no improvement over baseline discharges. Thus, it is simply not practicable to project the expected numeric improvements that will occur for a specific pre-existing discharge through application of a particular BMP plan. As a consequence, EPA is proposing to establish a non-numeric requirement to implement a pollution abatement plan incorporating implementation of BMPs designed to reduce the pollutant levels of pH, iron and manganese in pre-existing discharges.

EPA interprets the CWA as authorizing the Agency to establish non-numeric effluent limitations where it is infeasible to establish numeric effluent limitations. Section 502 of the Act defines "effluent limitation" as "*any* restriction established by a State or the Administrator on quantities, rates, and concentrations of chemical, physical, biological, and other constituents which are discharged from point sources." (Emphasis added.) This language does not restrict the form of effluent limitations to only numeric limits. The courts have held, in the context of permits, that the CWA does not require EPA to set numeric limits where such limits are infeasible. "When numerical effluent limitations are infeasible, EPA may issue permits with conditions designed to reduce the level of effluent discharges to acceptable levels. This may well mean opting for a gross reduction in pollutant discharge rather than the fine-tuning suggested by numerical limitations. But this ambitious statute is not hospitable to the concept that the appropriate response to a difficult pollution problem is not to try at all." *Natural Resources Defense Council* v. *Costle*, 568 F.2d 1369, 1380 (D.C. Cir. 1977). EPA's NPDES permit regulations reflect this longstanding interpretation in 40 CFR 122.44(k), which provides that permits may include BMPs to supplement, or in lieu of, numeric effluent limitations when "numeric effluent limitations are infeasible" or "the practices are reasonably necessary to achieve effluent limitations and standards or to carry out the purposes and intent of [the] CWA." Sections 402(a)(2) and 501 further authorize EPA to prescribe as wide a range of permit conditions as the Agency deems appropriate to assure compliance with applicable effluent limits. EPA believes that the same considerations underlying the court's statutory interpretation with respect to non-numeric effluent limitations in permits also support an interpretation that the Agency may establish non-numeric effluent limitation regulations where numeric limitations are infeasible. Because it is infeasible here to express the expected performance of the identified best practicable control technology in numeric terms, EPA believes that establishment of non-numeric effluent limitations is authorized under, and is necessary to carry out, the purposes and intent of the CWA.

Although it is not feasible to establish numeric limits predicting pollutant reductions, it is possible to calculate baseline pollutant levels in pre-existing discharges. Moreover, the record indicates that application of appropriately designed BMPs should be able to prevent any increase in pollutant loadings for pre-existing discharges. Accordingly, it is feasible to set a

minimum numeric requirement based on baseline pollutant levels. Therefore, EPA is today proposing to establish numeric effluent limitations that require that the pollutant levels for pH, iron and manganese do not increase over baseline levels. EPA is proposing a uniform methodology to use for this calculation. Baseline level determination and monitoring procedures are presented in the Coal Remining Statistical Support Document.

EPA requests comment on how to describe and structure the requirement to design and implement a pollution abatement plan to reduce pollutant loadings from pre-existing discharges. EPA has proposed a fairly general qualitative description of the requirement, which leaves it up to the permit writer to determine whether in a particular case BPT or BAT would require additional or more intensive BMPs than identified in an applicant's proposed plan. The proposed regulation would require that an operator identify the characteristics of the remining area and the pre-existing discharges at the site, identify design specifications for selected BMPs, and include periodic inspection and maintenance schedules. These requirements are intended to help the permit writer evaluate the likely cost and efficacy of the proposed plan in relation to the conditions existing at the site. EPA requests comment on whether there are additional criteria that EPA could establish to provide applicants and permit writers further guidance in determining whether a particular BMP plan meets the regulatory criteria. For example, the requirement to develop and implement a pollution abatement plan to maintain or reduce pollution in pre-existing discharges is a fairly general directive for what the plan should achieve. EPA requests comment on how the regulations could better define the type of plan that would constitute BPT and BAT.

The primary alternative control technology that EPA could determine to be BPT would be to require remining operations to treat pre-existing discharges to meet the effluent guideline limitations for active mining discharges. As discussed above, EPA does not believe that this is a practical option for remining operations, given cost and liability concerns. EPA is requesting comment and data for any other treatment technologies that would be economically feasible and available for control of pre-existing discharges to meet more stringent limitations.

EPA projects that the annual compliance cost for this new subcategory will be approximately $330,000 to $759,000.

2. BCT for the Coal Remining Subcategory

In July 1986, EPA promulgated a methodology for establishing BCT effluent limitations. EPA evaluates the reasonableness of BCT candidate technologies—those that are technologically feasible—by applying a two-part cost test: (1) a POTW test; and (2) an industry cost-effectiveness test.

EPA first calculates the cost per pound of conventional pollutant removed by industrial dischargers in upgrading from BPT to a BCT candidate technology and then compares this cost to the cost per pound of conventional pollutants removed in upgrading POTWs from secondary treatment. The upgrade cost to industry must be less than the POTW benchmark of $0.25 per pound (in 1976 dollars).

In the industry cost-effectiveness test, the ratio of the incremental BPT to BCT cost divided by the BCT cost for the industry must be less than 1.29 (i.e., the cost increase must be less than 29 percent).

In today's proposal, EPA is proposing to establish BCT effluent limitations guidelines equivalent to the BPT guidelines for the Coal Remining Subcategory. In developing BCT limits, EPA considered whether there are technologies that achieve greater removals of conventional pollutants than proposed for BPT, and whether those technologies are cost-reasonable according to the BCT Cost Test. EPA identified no technologies that can achieve greater removals of conventional pollutants than proposed for BPT that are also cost-reasonable under the BCT Cost Test, and accordingly EPA proposes BCT effluent limitations equal to the proposed BPT effluent limitations guidelines.

3. BAT for the Coal Remining Subcategory

As discussed above, EPA concluded that the requirement to design and implement a pollution abatement plan represents BAT and that there are no more stringent technologies that are economically achievable. The pollution abatement plan is required to be designed to control conventional, toxic and non-conventional pollutants, and the plan must reflect levels of control consistent with BAT for toxic and non-conventional pollutants. Of course, EPA expects that a facility will have a single plan to control all pollutants. In addition, EPA would expect that the permit writer would determine the adequacy of the plan based on the Coal Remining BMP Guidance Manual. As discussed above, EPA concluded that it is infeasible to express BAT as a numeric limit. EPA is proposing to set a combination of site-specific numeric and non-numeric effluent limitation guidelines for BAT identical to those for BPT for iron and manganese.

4. NSPS for the Coal Remining Subcategory

In today's proposal, EPA did not consider any regulatory options for new sources for the Coal Remining Subcategory. By definition, pre-existing discharges at abandoned mine lands covered by this proposal were in existence prior to passage of SMCRA in 1977. Therefore, EPA is designating pre-existing discharges existing sources. EPA is proposing that pre-existing discharges are subject to requirements proposed for BPT, BCT, and BAT. NSPS effluent limitations are not applicable to this subcategory. A new discharge from remining operations that is not designated as a pre-existing discharge must meet applicable effluent limitations at sections 434.35, 434.45, or 434.55, as appropriate.

B. Western Alkaline Coal Mining Subcategory

The effluent limitations and performance standards for the Western Alkaline Coal Mining Subcategory apply to alkaline mine drainage from reclamation areas associated with western coal mining operations.

Alkaline mine drainage is defined in the existing regulations as "mine drainage which, before any treatment, has a pH equal to or greater than 6.0 and total iron concentration of less than 10 mg/L." Reclamation area is defined in the existing regulation as "the surface area of a coal mine which has been returned to required contour and on which revegetation (specifically, seeding or planting) work has been commenced." EPA is not proposing to make any changes to these existing definitions.

EPA is proposing to define a western coal mining operation in arid or semiarid areas as a surface or underground coal mining operation located in the interior western United States, west of the 100th meridian west longitude, in an arid or semiarid environment with an average annual precipitation of 26.0 inches or less. This definition is consistent with the definition for western coal mining currently used by OSM (30 CFR 701.5 and 30 CFR 816.116).

The existing effluent guidelines for reclamation areas establish BPT, BAT, and NSPS numeric effluent limits based on the use of sedimentation pond technology. The discharge from

reclamation areas must meet effluent limitations for settleable solids and pH. The existing guidelines apply to all reclamation areas throughout the United States, regardless of climate, topography, or type of drainage (i.e., acid or alkaline). The existing guidelines do not take into consideration the dramatic differences in naturally occurring sedimentation that can result from the different environmental conditions in the arid and semiarid coal regions compared to the eastern United States.

The existing guidelines establish relatively stringent controls on the amount of sediment that can be discharged into waterways from post-mined areas. In the arid west, data have shown that the use of sedimentation ponds becomes necessary for compliance. Although sedimentation ponds are proven to be effective at reducing sediment discharge, EPA believes that there are numerous non-water quality impacts that may harm the environment when sedimentation ponds are necessary to meet discharge requirements for reclamation areas in the arid and semiarid west. Sedimentation ponds in reclamation areas are designed to capture and store water from a precipitation event and then slowly release the water in a continuous, low-velocity discharge. EPA believes that the slow release of water containing low amounts of sediment has caused negative environmental impacts in arid regions. The negative impacts caused by the predominant use of sedimentation ponds include disruption of the natural hydrologic and sediment balance, stream channel instability, and water loss due to evaporation.

EPA is proposing a new subcategory for reclamation areas of western alkaline coal mines primarily because of negative impacts caused by the predominant use of sedimentation ponds in arid regions as is necessary to meet the current guidelines.

In arid and semiarid western coal mine regions, climate, topography, soils, vegetation, and hydrologic components all combine to form a hydrologic balance that is naturally sediment rich. Sediment is defined as all undissolved organic and inorganic material transported or deposited by water. In arid regions, the natural vegetative cover is sparse and rainfall is commonly received during localized, high-intensity, short-duration thunderstorms. These conditions contribute to flash-floods and turbulent flows that readily transport large amounts of sediment. Runoff from natural, undisturbed arid lands may contain up to several hundred thousand milligrams per liter TSS.

Fluvial areas and receiving channels in the arid west have developed according to the natural conditions present in arid regions. The receiving channels are primarily ephemeral arroyos that transport large volumes of flow and sediment. The natural conditions of these channels may be affected by the alteration of sediment concentration and flow volume as a result of constructed sedimentation ponds. Discharge of sediment-free water from a sedimentation pond may actually accelerate channel erosion because the sediment-free water will entrain sediment from the channel immediately below the pond. Later, when the sedimentation pond is removed, drainage from the reclaimed area will flow uninterrupted into the downstream watershed. This return to natural flow volumes and sediment concentrations essentially "shocks" the drainage channel and may be extremely disruptive to the fluvial and hydrologic balance that has developed based on the sedimentation pond discharge. Severe channel reconfiguration can occur at this stage, making the area more susceptible to instability and erosion than the pre-mining undisturbed conditions. EPA is soliciting comment on the environmental impacts and benefits associated with the predominant use of sedimentation ponds in the arid west for control of sediment from post-mining areas.

For arid and semiarid western coal mines, EPA believes that the most environmentally responsible goal is to reclaim the land such that the natural sediment loadings and hydrologic balance of undisturbed conditions is maintained at post-mined lands. EPA solicits comment on this conclusion, and on the problems that are associated with disturbing the hydrologic balance in arid regions.

Following the 1985 promulgation of the current regulations, new and more accurate sediment control modeling, designs and plans have been developed and evaluated for use with drainage from reclamation areas at coal mines in the western United States. The States of Wyoming and New Mexico have developed regulations to allow the use of sediment control BMPs to prevent environmental problems associated with predominant use of sedimentation ponds. These State program BMP applications are considered to meet the sediment control provisions of SMCRA and are sanctioned by the delegated Clean Water Act regulatory authority in each State. These regulations include specific provisions to allow the use of BMPs and avoid the unique environmental problems that are associated with the predominant use of sedimentation ponds on coal mine reclamation areas. Provisions under SMCRA related to sediment control require coal mining operations to be conducted so as to prevent, to the extent possible, using the best technology currently available, additional contributions of suspended solids to streamflow, or run-off outside the permit area. Corresponding regulations are found at 30 CFR 816.45 which include the above language and also require the permittee to minimize erosion and meet the more stringent of applicable State and Federal effluent standards. The standards contained in this Western Alkaline Coal Mining Subcategory will be the framework for designing, installing, and maintaining sediment control measures that are expected to function as designed in a manner to meet the statutory and regulatory provisions for sediment control and modeling predictions.

Under Wyoming's Coal Rules and Regulations, Chapter IV, alternative sediment control measures may be used when it can be demonstrated that drainage will either meet effluent limitation standards or will not degrade receiving waters. Wyoming's regulations and accompanying guidance (Wyoming Department of Environmental Quality, Land Quality Division, Guideline No. 15, Alternative Sediment Control Measures) state that appropriate sediment control measures shall be designed, constructed, and maintained using best technology currently available to prevent additional contributions of sediment to streams or to runoff outside the affected area.

Under New Mexico's "ASC Windows Program" (19 NMAC 8.2 Subpart 20, Section 2009), SMCRA requirements to pass all disturbed area runoff through sedimentation ponds can be waived if the operator demonstrates that erosion is sufficiently controlled and that the quality of area runoff is as good as, or better than, that of water entering the permit area. The operator's plan for alternative sediment control must demonstrate that there will be no increase in the sediment load to receiving streams. Several mine operations in New Mexico have applied for and received reclamation liability bond releases for lands where sediment control BMP plans were implemented. These sites demonstrated that there was no additional annual contribution of suspended solids to the hydrologic regime of the area and that runoff from regraded areas had characteristics

similar to runoff from undisturbed areas.

In order to maintain natural conditions on reclamation areas, EPA is proposing that non-numeric effluent limits be based on the design, implementation, and maintenance of BMPs. Sediment control BMP technologies for the coal mining industry are well known and established. Common BMPs used at post-mining coal areas include regrading, revegetation, mulching, check dams, vegetated channels, and contour terracing as well as sedimentation ponds. The range and implementation of available BMPs are summarized in the Development Document for Proposed Effluent Limitations Guidelines and Standards for the Western Alkaline Coal Mining Subcategory. All of these BMPs are designed to stabilize the soil and control the amount of sediment released into the environment.

Erosion and sediment control plans and technology application have evolved since the passage of SMCRA and the promulgation of the current 40 CFR part 434 effluent limitations guidelines. Extensive monitoring and case studies have been performed on arid and semiarid lands to characterize the nature and extent of erosion occurring within these areas. Computer sediment modeling of arid and semiarid fluvial systems has advanced significantly, evolving into site-specific models that are able to account for local environmental factors found within the region. Under this proposed subcategory, prediction models will be used to design site-specific BMP plans that are effective in the arid and semiarid western coal regions. Sedimentation ponds may be used in conjunction with other BMPs to prevent additional contributions of sediment to streamflow or to runoff outside reclamation areas.

Specifically, EPA is proposing a requirement to develop and implement site-specific sediment control plans that would apply in lieu of numeric limits for pH and settleable solids applicable under current guidelines for reclamation areas. EPA is proposing that a mine operator must develop a site-specific sediment control plan for surface reclamation areas. The sediment control plan must identify BMPs and present design, construction, and maintenance specifications for the BMPs, and their expected effectiveness. The goal of the site-specific sediment control plan would be to specify BMPs sufficient to control sediment discharges from the reclamation area so that they do not exceed natural background levels. The proposed regulations would require the operator to demonstrate, using watershed models accepted by the regulatory authority, that implementation of the selected BMPs would meet this goal. The permit would then incorporate the site-specific sediment control plan and would require the operator to implement the plan.

EPA is proposing to establish requirements for site-specific sediment control plans based on computer modeling in lieu of nationally applicable numerical effluent limitations. As discussed above in Section VI.A.1, such requirements are authorized as non-numeric effluent limitations where it is infeasible to establish numeric effluent limitations.

EPA believes that determining compliance based on numerical standards for runoff from BMPs is infeasible due to the environmental conditions present in Western coal mine reclamation areas. As mentioned previously, precipitation events are often localized, high-intensity, short-duration thunderstorms. Rain may fall in one area of a watershed while other areas remain dry. This makes it extremely difficult to evaluate overall performance of the BMPs. Additionally, watersheds and reclaimed mine lands often cover vast and isolated areas. These factors combine to make it burdensome for a CWA permit authority to extract periodic, meaningful samples on a timely basis to determine if a facility is meeting effluent limitations for settleable solids. The difficulty of sample collection is described in the Phase I Report: Technical Information Package provided by the Western Coal Mining Work Group (Record Section 3.3.1).

Requirements based on BMP plans would ease the implementation burden of the rule and allow a permit authority to determine compliance on a regular basis. A permit authority would be able to visit the site and determine if BMPs have been implemented according to the site's sediment control plan. The permit authority would not have to wait for a significant precipitation event to determine compliance, and the facility would have the opportunity to improve BMP implementation prior to a precipitation event. EPA believes a key factor in using BMPs is the opportunity for continual inspection and maintenance by coal mine personnel to ensure that sediment control measures will continue to function as designed. Under SMCRA, inspections of the coal mining operations are conducted monthly. EPA is soliciting comments on the appropriateness of BMP inspection to determine compliance with the requirements of this subcategory and on recommended procedures for, and frequency of, such inspections. Because it is infeasible here to determine compliance and performance of the BMPs in numeric terms, EPA believes that establishment of non-numeric effluent limitations for this subcategory is authorized under and is necessary to carry out the purposes and intent of the CWA.

In addition, EPA believes that there are several advantages to establishing requirements for site-specific sediment control plans based on computer modeling in lieu of nationally applicable numerical effluent limitations. First, according to the applicability of the proposed subcategory, the discharge associated with this subcategory is alkaline, not acidic. Therefore, EPA does not believe that pH monitoring is necessary for reclamation areas associated with alkaline coal mines.

Also, existing regulations (40 CFR part 434.63) allow for alternative limitations during precipitation events of the specified magnitudes, which may generate a significant amount of sediment, especially in the arid West. Under the proposed subcategory, the BMP plan requirement would not allow for alternative (i.e., less stringent) limits because computer models are able to account for precipitation events that typically occur in the arid west. The BMP plan requirement would be based on a demonstration that the average yearly sediment yield will not increase over undisturbed conditions, and would consider precipitation events. NMA's model mine study Draft Western Alkaline Mining Subcategory—Mine Modeling and Performance Cost-Benefit Analysis (Record Section 3.3.6) conducted in support of this proposal predicted sediment yield and BMP effectiveness based on a 24-hour, 10-year storm event. Under the proposed requirements, the coal mine operator would have to design and construct sediment controls that are adequate for high precipitation events rather than meeting the existing alternative limitations during these events. Sediment control measures under BMP plans would be designed to control annual sediment yield, not only the 10-year, 24-hour storm. This would result in retaining more soil on the slopes, rather than collecting it in a sedimentation pond. At the same time, sediment control measures under BMP plans would no longer allow the exemptions provided during high intensity flows exceeding a 10-year, 24-hour storm event in which only pH

limits apply under the current regulations (434.63(a)(2)).

The Western Coal Mining Work Group has suggested that EPA consider applying the new subcategory to all non-process water. Non-process water would include runoff from pre-stripping areas (i.e., development areas where brushing, topsoil salvage, and other types of general construction earthwork are being conducted). EPA has considered including non-process water from other areas, but does not believe there is sufficient data to expand the applicability of the proposed Western Alkaline Coal Mining Subcategory at this time. EPA solicits comment on the appropriateness of expanding the applicability of this proposed subcategory to include the control of non-process water from other coal mining related areas.

EPA expects that, in general, the sediment control plan will largely consist of materials generated as part of the SMCRA permit application. The SMCRA permit application process requires a coal mining operator to submit an extensive reclamation plan, documentation, and analysis to OSM or the permitting authority for approval. The requirements of the reclamation plan are specified in 30 CFR 780.18 *Reclamation plan: General requirements.*

In brief summary, some of the OSM requirements that also directly relate to this proposal include requirements for coal mining operators to provide: A description of coal mining operations; a plan for regrading mined lands; a plan for revegetating mined lands; a description of baseline ground water and surface water characteristics; and an analysis of the hydrologic and geologic impacts caused by the reclamation activity.

Specifically, the plan requires a "probable hydrologic consequences (PHC) determination." 30 CFR 780.21 (f) (3) states:

> The PHC determination shall include findings on: (i) Whether adverse impacts may occur to the hydrologic balance; (ii) Whether acid-forming or toxic-forming materials are present that could result in the contamination of surface or ground water supplies; (iii) Whether the proposed operation may proximately result in contamination, diminution or interruption of an underground or surface source of water within the proposed permit or adjacent areas which is used for domestic, agricultural, industrial or other legitimate purpose; and (iv) What impact the proposed operation will have on: (A) Sediment yields from the disturbed area; (B) acidity, total suspended and dissolved solids, and other important water quality parameters of local impact; (C) flooding or streamflow alteration; (D) ground water and surface water availability; and (E) other characteristics as required by the regulatory authority.

Additional OSM requirements relevant to the proposed sediment control plan are given in Section 780.2 (h) "Hydrologic reclamation plan."

> The application shall include a plan, with maps and descriptions, indicating how the relevant requirements of part 816, including Secs. 816.41 to 816.43, will be met. The plan shall be specific to the local hydrologic conditions. It shall contain the steps to be taken during mining and reclamation through bond release to minimize disturbances to the hydrologic balance within the permit and adjacent areas; to prevent material damage outside the permit area; to meet applicable Federal and State water quality laws and regulations; and to protect the rights of present water users. The plan shall include the measures to be taken to: Avoid acid or toxic drainage; prevent, to the extent possible using the best technology currently available, additional contributions of suspended solids to streamflow; provide water-treatment facilities when needed; control drainage; restore approximate premining recharge capacity and protect or replace rights of present water users. The plan shall specifically address any potential adverse hydrologic consequences identified in the PHC determination prepared under paragraph (f) of this section and shall include preventive and remedial measures.

Based on these requirements, EPA believes that plans developed to comply with SMCRA requirements will usually fulfill the requirements proposed by EPA for sediment control plans. The requirement to use modeling techniques also is consistent with OSM reclamation plans, and mining facilities already submit a watershed model as part of their SMCRA reclamation plan. EPA believes modeling is particularly valuable in arid and semiarid areas where the infrequency of precipitation makes it difficult to gather data. While EPA is not proposing to require that operators use a specific model, the operator would have to use the same model as was, or will be, used to acquire the SMCRA permit. This would ensure that the model used will be consistent with OSM requirements and reclamation plans. While EPA is proposing that an appropriate sediment control plan will depend on the sediment yield calculation, these models also typically calculate additional parameters for undisturbed areas and reclamation areas for expected storm events including: total runoff volume, peak sediment yield, peak sediment concentration, average annual sediment yield and average annual peak water discharge. A guidance manual entitled "Guidelines for the Use of the Revised Universal Soil Loss Equation (RUSLE) Version 1.06 on Mined Lands, Construction Sites, and Reclaimed Lands" published in August, 1998 describes the use of RUSLE for watershed modeling. Additionally, SEDCAD™ 4.0 is a widely accepted model for predicting BMP performance and is currently being used by many mine sites. NMA describes use of RUSLE 1.06 and SEDCAD 4.0 models in the Mine Modeling and Performance Cost-Benefit Analysis (Record Section 3.3.6) to determine the costs and loadings for a representative model mine associated with this proposed subcategory.

EPA is proposing to define the term "sediment yield" to mean the sum of the soil losses from a surface minus deposition in macro-topographic depressions, at the toe of the hillslope, along field boundaries, or in terraces and channels sculpted into the hillslope. This definition is consistent with the definition established for the RUSLE modeling program. EPA solicits comment on this definition of sediment yield and on the appropriateness of using this parameter as the basis for determining sediment loadings.

EPA is soliciting comment on establishing non-numeric effluent limits in the form of a requirement to develop and implement a BMP-based sediment control plan rather than setting numeric effluent limitations.

1. BPT for the Western Alkaline Coal Mining Subcategory

EPA today proposes BPT effluent limitations for the Western Alkaline Coal Mining Subcategory to control sediment discharge from reclamation areas. For further information on the basis for the limitations and technologies selected see the Development Document for Proposed Effluent Limitations Guidelines and Standards for the Western Alkaline Coal Mining Subcategory.

As previously described in Section II, section 304(b)(1)(A) of the CWA requires EPA to identify effluent reductions attainable through the application of "best practicable control technology currently available for classes and categories of point sources." Generally, EPA determines BPT effluent levels based upon the average of the best existing performance by facilities of various sizes, ages, and unit processes within each industrial category or subcategory. In establishing BPT, EPA considers the cost of achieving pollution reductions in relation to the pollution reduction benefits, the age of equipment and facilities, the processes employed, process changes required, engineering aspects of the control technologies, non-water quality environmental impacts,

and other factors the Administrator deems appropriate.

EPA is proposing that BPT for the Western Coal Mining Subcategory consist of designing and implementing BMPs to maintain the average annual sediment yield equal to or below pre-mined, undisturbed conditions. EPA is proposing this new subcategory primarily because of the negative non-water quality environmental impacts created by the current requirements.

Current requirements for reclamation areas (40 CFR part 434, subpart E) establish BPT, BAT, and NSPS based on the use of sedimentation pond technology, and set effluent limitations for settleable solids and pH. The existing guidelines apply to all reclamation areas throughout the United States, regardless of climate, topography, or type of mine drainage (i.e., acid or alkaline).

Existing effluent limitation guidelines establish relatively stringent controls on the amount of settleable solids that can be discharged into waterways from reclamation areas. Although sedimentation ponds are proven to be effective at reducing sediment discharge, EPA believes that there are numerous non-water quality impacts that may harm the environment when sedimentation ponds are required to meet current effluent limits. The negative non-water quality impacts associated with existing regulations include: disturbing the natural hydrologic balance of arid western drainage areas; accelerating erosion; reducing groundwater recharge; reducing water availability; and impacting large areas of land for pond construction. A further discussion of these impacts can be found in Sections IV and IX of this document.

EPA believes that the current requirements are not appropriate for arid and semiarid western reclamation areas because of the negative non-water quality impacts associated with the predominant use of sedimentation ponds, as discussed above. The appropriate goal for reclamation and discharges from post-mined lands should be to mimic the natural conditions of the area that were present prior to mining activities. In order to do this, it is necessary to maintain the hydrologic balance and sediment loadings of natural, undisturbed conditions on post-mined lands. EPA believes that use of BMPs to control sediment discharges is the only effective alternative control technology to sedimentation ponds. Therefore, EPA is proposing that BPT consist of designing and implementing BMPs projected to maintain the average annual sediment yield equal to or below pre-mined, undisturbed conditions. This would ensure that natural conditions are maintained. In order to achieve these results, EPA would require that the coal mining operator develop a sediment control plan and run models. Requirements are further described in the proposed regulatory text.

As discussed in Section X of this document, EPA estimates that today's proposal will result in a net cost savings to all affected surface mine operators, and will be at worst cost-neutral for affected underground operators (although EPA believes that most will also incur cost savings). Therefore, implementing these standards will result in no facility closures or negative economic impact to the industry. EPA projects that the proposed subcategory will result in annualized monetized benefits of $43,000 to $769,000.

2. BCT for the Western Alkaline Coal Mining Subcategory

In today's proposal, EPA is not proposing effluent limitations for any conventional pollutant and hence need not propose to establish BCT limitations for this subcategory at this time.

3. BAT for the Western Alkaline Coal Mining Subcategory

EPA is proposing that BAT be equivalent to BPT for this subcategory to control sediment discharge for reclamation areas. Existing effluent limitations guidelines established BAT based upon sedimentation pond technology. However, as previously noted, non-water quality impacts can occur that may harm the environment when sedimentation ponds are required to comply with current effluent limits for settleable solids. EPA is proposing that BAT consist of designing and implementing BMPs projected to maintain the average annual sediment yield equal to or below pre-mined, undisturbed conditions, which is equivalent to proposed BPT.

EPA has not identified any more stringent treatment technology that could represent BAT level of control for maintaining discharge levels of settleable solids consistent with natural, undisturbed conditions on post-mined land in the arid west. EPA is therefore proposing that BAT standards be established equivalent to BPT. Further, as discussed in Section X of this document, EPA estimates that today's proposal will result in a net cost savings to all affected surface mine operators, and will be at worst cost-neutral for affected underground operators. Therefore, implementing BAT standards will result in no facility closures or negative economic impact to the industry.

4. NSPS for the Western Alkaline Coal Mining Subcategory

As discussed for BAT, EPA has not identified any more stringent treatment technology option that it considers to represent NSPS level of control for discharges from post-mined land. Further, EPA estimates that today's proposal will result in a net cost savings to all affected surface mine operators, and will be at worst cost-neutral to affected underground operators. Therefore, implementing of NSPS standards will result in no barrier to entry based upon the establishment of this level of control for new sources. EPA is therefore proposing that NSPS standards be established equivalent to BAT.

VII. Statistical and Monitoring Procedures for the Coal Remining Subcategory

A. Statistical Procedures for the Coal Remining Subcategory

EPA's proposed statistical procedures are presented in Appendix B of the proposed regulation and described in detail in the Coal Remining Statistical Support Document. These procedures apply to the Coal Remining Subcategory.

The objective of these statistical procedures is to provide a method for deciding when the pollutant levels of a discharge exceed baseline pollutant levels. These procedures are intended to provide a good chance of detecting a substantial, continuing state of exceedance, while reducing the likelihood of a "false alarm." To do this, it is essential to a have an adequate duration and frequency of sample collection to determine baseline and to determine compliance.

In developing these procedures, EPA considered the statistical distribution and characteristics of discharge loadings from pre-existing discharges, the suitability of parametric and non-parametric statistical procedures for such data, the number of samples required for these procedures to perform adequately and reliably, and the balance between false positive and false negative decision error rates. EPA also considered the cost involved with sample collection as well as delays in permit approval during the establishment of baseline, and is concerned that increased sampling could potentially discourage remining. In order to sufficiently characterize pollutant levels during baseline determination and during each annual

monitoring period, EPA is requiring that at least one sample result be obtained per month for a period of 12 months.

It is possible that one year of sampling may not accurately characterize baseline levels, because discharge flows can vary among years in response to inter-year variations in rainfall and ground water flow. There is some risk that the particular year chosen to characterize baseline flows and loadings will be a year of atypically high or low flow or loadings. There may be a need to evaluate differences among baseline years in loadings and flows, based on further analysis of data. Using such information, EPA may provide optional statistical procedures in a final rulemaking and in the final version of the Coal Remining Statistical Support Document that could be used to account for the uncertainty in characterizing baseline from a one-year sample duration, or that could be used to account for the unrepresentative character of a baseline sampling year. Such procedures could employ modifications of the proposed statistical procedures that use estimates of the variance among baseline years in loadings, developed from long-term datasets. Such procedures could employ adjustments to the baseline sample statistics to account for a baseline sampling year that was atypical in rainfall or discharge flow; such an adjustment could be a factor (multiplier) or a statistical equation estimated by regression.

The proposed statistical procedures are intended to provide environmental protection and to ensure compliance with the effluent limitation guidelines for BPT, BAT, and BCT. EPA has not yet evaluated quantitatively the error rates of these decision procedures. EPA intends to evaluate the decision error rates of each procedure by computer simulations. EPA solicits comments on the proposed statistical procedures presented in Appendix B of the proposed regulation for calculating limits and warning levels using baseline and post-baseline data: Baseline Determination and Compliance Monitoring for Pre-existing Discharges at Remining Operations. Development of these procedures is described in the Coal Remining Statistical Support Document. In particular, EPA solicits comments on (1) the details of the proposed statistical methodologies, (2) the relative merits of Procedures A and B, (3) the merits of other statistical procedures that commenters may propose, (4) the advantages and disadvantages of the use of accelerated monitoring and decision rules based upon accelerated monitoring, and (5) the effectiveness of the proposed statistical procedures in correctly indicating when baseline conditions have been exceeded and in providing reasonable protection from incorrectly deciding that baseline conditions have been exceeded. Depending upon comments and associated evidence, and depending upon EPA's further evaluations, EPA may modify or reject these procedures, or may change the recommended sample amount, to provide suitable decision error rates.

B. Monitoring To Establish Baseline Conditions and To Demonstrate Compliance for the Coal Remining Subcategory

EPA evaluated the duration and frequency of sampling necessary to apply the proposed statistical procedures. Those procedures are used to compare the levels of baseline loadings to the levels of loadings during remining or the period when the discharge is permitted. Without an adequate duration and frequency of sampling, the statistical procedures would often fail to detect genuine exceedance of baseline conditions.

Based on the considerations described below, EPA is proposing that the smallest acceptable number and frequency of samples is 12 monthly samples, taken consecutively over the course of one year. EPA believes this number represents the absolute minimum.

EPA considered an adequate number of samples per year to be that number that would allow an appropriate statistical procedure to detect a difference, between a baseline year and a remining year, in the mean or median loading, of one standard deviation (determined for the baseline loadings), with a probability (power) of at least 0.75.

The t-test is an appropriate statistical procedure for a yearly comparison because loadings from mine discharges appear to be approximately distributed log-normally, and thus logarithms of loadings are expected to be approximately distributed normally. The (non-parametric) Wilcoxon-Mann-Whitney test is also appropriate for yearly comparisons and has a power nearly equal to that of the t-test when applied to normally distributed data. EPA determined that annual comparisons of baseline to remining years based upon 12 samples in each year were expected to have a power 0.75 to detect a difference of one standard deviation.

An increase of one standard deviation can represent a large increase in loading, given the large variability of flows and loadings observed in mine discharges. The coefficient of variation (CV) is the ratio of standard deviation to mean. Sample CVs for iron loadings range approximately from 0.25 to 4.00, and commonly exceed 1.00. Sample CVs for manganese loadings range approximately from 0.24 to 5.00. When the CV equals 1.00, an increase of the average loading by one standard deviation above baseline implies a doubling of the loading.

The duration, frequency, and seasonal distribution of sampling are important aspects of a sampling plan, and can affect the precision and accuracy of statistical estimates as much as can the number of samples. To avoid systematic bias, sampling, during and after baseline determination, should systematically cover all periods of the year during which substantial discharge flows can be expected.

Unequal sampling of months could bias the baseline mean or median toward high or low loadings by over-sampling of high-flow or low-flow months. However, unequal sampling of different time periods can be accounted for using statistical estimation procedures appropriate to stratified sampling. Stratified seasonal sampling, possibly with unequal sampling of different time periods, is a suitable alternative to regular monthly sampling, provided that correct statistical estimation procedures for stratified sampling are applied to estimate the mean, median, variance, interquartile range, and other quantities used in the proposed statistical procedures.

There may be acceptable alternatives to the proposed minimum duration and frequency of one sample per month for twelve months. EPA has not thoroughly evaluated the merits of alternative sampling plans. Alternative plans could be based upon subdivision of the year into distinct time periods that might be sampled with different intensities, or could be based on other types of stratified sampling plans that attempt to account for seasonal variations. Seasonal stratification has the potential to provide a basis for more precise estimates of baseline characteristics, if the sampling plan is designed and executed correctly and if results are calculated using appropriate statistical estimators.

EPA solicits comments on the requirements for the number of samples to determine and monitor baseline, the sampling duration and frequency, and the plan of sampling over time. In particular, EPA solicits comments on (1) the adequacy of a sampling plan consisting of twelve monthly observations of concentration and flow

to calculate a monthly loading, (2) the advantages and disadvantages of seasonally-stratified sampling or other plans for sampling over time, (3) the adequacy of a baseline characterization based upon one year of sampling and the likelihood and consequences of the baseline year being atypical of long-term baseline conditions, and (4) the effectiveness of the proposed sampling requirements in correctly indicating when baseline conditions have been exceeded and in providing reasonable protection from incorrectly deciding that baseline conditions have been exceeded.

C. Additional Pollutant Parameters in Pre-existing Discharges

Although EPA is proposing to regulate iron, manganese, and pH, which is a subset of the parameters regulated under the current guidelines and which are the parameters addressed by the Rahall Amendment, EPA is considering establishing limitations or monitoring requirements for additional parameters that may also be indicators that a discharge is the result of coal mine operations. Acidity has been selected in Pennsylvania preferentially to pH because a baseline load can be calculated for acidity, whereas pH does not readily lend itself to calculation of load. In addition, pH is a measurement of effective hydrogen ion concentration and does not measure potential hydrogen ions that are generated during neutralization by the hydrolysis of metals such as iron, manganese and aluminum. Typically, the (passive) treatment systems and chemical addition used for acid mine drainage are designed with regards to acidity or net alkalinity (i.e., alkalinity minus acidity) and not pH. EPA is soliciting comments and data regarding the merits of acidity, net alkalinity, and pH as regulated parameters, or as parameters required to be monitored but not regulated.

Many mining operations also routinely monitor sulfate, which, in the temperate climate of the Appalachian Basin, is considered the most stable and reliable indicator of coal mine drainage (Lovell, 1985, The Chemistry of Mine Drainage, and McCurry, 1986, Characterization of Ground Water Contamination Associated with Coal Mines in West Virginia). Under most conditions associated with mining and mine drainage in the Appalachian Region and the Interior Basin, sulfate does not easily leave solution and is a direct indicator of pyrite oxidation (acid mine drainage production). EPA is soliciting comments and data regarding the merits of using sulfate as a parameter for assessment of pollution loading from pre-existing discharges as an unregulated requirement for monitoring.

VIII. Non-Water Quality Environmental Impacts of Proposed Regulations

The elimination or reduction of pollution has the potential to aggravate other environmental problems. Under sections 304(b) and 306 of the CWA, EPA is required to consider these non-water quality environmental impacts (including energy requirements) in developing effluent limitations guidelines and NSPS. In compliance with these provisions, EPA has evaluated the effect of this proposed regulation on air pollution, solid waste, energy requirements, and safety.

Today's proposed rule does not require the implementation of treatment technologies that result in any increase in air emissions, in solid waste generation or in energy consumption over present industry activities.

Non-water quality environmental impacts are a major consideration for this rule because the rule is intended to improve or eliminate a number of existing non-water quality environmental and safety problems. Remining operations have improved or eliminated adverse non-water quality environmental conditions such as abandoned and dangerous highwalls, dangerous spoil piles and embankments, dangerous impoundments, subsidence, mine openings, and clogged streams that pose a threat to health, safety, and the general welfare of people. EPA expects this proposed rule to improve or eliminate these hazardous conditions at abandoned mine sites and believes that remining has the potential to eliminate nearly three million feet of dangerous highwall in the Appalachian and mid-Continent coal regions.

EPA also does not expect this proposed rule to have an adverse impact on health, safety, and the general welfare of people in the arid and semiarid western coal region. The intent of the rule is to allow runoff to flow naturally from disturbed and reclaimed areas. EPA believes this is preferable to retention in sedimentation ponds that is accompanied by periodic releases of runoff containing sediment imbalances potentially disruptive to land stability. Alternate sediment control technologies in these regions address and alleviate adverse non-water quality environmental conditions such as: quickly eroding stream banks, water loss through evaporation, soil and slope instability, and lack of vegetation.

Based on this evaluation, EPA prefers the options proposed under these new subcategories over existing AML conditions in the eastern United States and over the hydrologic imbalances produced by application of current regulations in the western arid United States.

IX. Environmental Benefits Analysis

This section presents EPA's estimates of the environmental benefits that would occur under the proposed regulatory options. EPA's complete benefits assessment can be found in Benefits Assessment of Proposed Effluent Limitations Guidelines and Standards for the Coal Mining Industry: Remining and Western Alkaline Subcategories (hereafter referred to as the "Benefits Assessment"; Record Section 5.0). A detailed summary is also contained in Economic and Environmental Impact Analysis of Proposed Effluent Limitations Guidelines and Standards for the Coal Mining Industry: Remining and Western Alkaline Subcategories (hereafter referred to as the "EA").

A. Coal Remining Subcategory

The water quality improvements associated with the proposed rule for remining depend on (1) changes in annual permitting rates for remining; (2) characteristics of sites selected for remining; and (3) the type and magnitude of the environmental improvements expected from remining. The subcategory is designed to standardize and facilitate the remining permitting process to increase future permitting rates. Remining permits in Pennsylvania increased by an estimated factor of three to eight following State implementation of a regulation that is similar to today's proposed remining rule. EPA believes that implementing today's proposed rule is likely to have a similar effect on other States with remineable coal reserves and similar acid mine drainage problems. The type and magnitude of site-specific water quality improvements under the proposed rule are not expected to be dramatically different than those that have occurred under existing requirements in Pennsylvania.

Of approximately 9,500 miles of acid mine drainage impacted streams in States where coal mining has previously occurred (Record Section 3.2.2), EPA estimates that 2,900 to 4,800 miles may be improved by remining, with a predicted 1,100 to 2,100 miles improved significantly. Based on the range of expected stream mile improvements per 1,000 acres of Abandoned Mine Land (AML) reclaimed (one to six) and an average of 38 acres of AML reclamation per permit, EPA estimates

approximately 0.04 to 0.2 miles of stream improvement per remining project. EPA estimates that AML sites affected by the proposed rule have an average of 70 highwall feet per acre. EPA also estimates that an additional 216,000 to 307,000 feet of highwall (41 to 58 miles) will be targeted for removal each year as a result of the proposed rule. EPA solicits comments on additional or alternative sources of data for estimating the extent of AML affected by the proposed rule.

EPA assessed the potential impacts of remining BMPs on water quality using pollutant loadings data from pre-existing discharges at 13 mines included in EPA's Coal Remining Database (Record Section 3.5.1). Approximately 58 percent of the post-baseline observations showed a decrease in mean pollutant loadings. Approximately half of these sites (27 percent of the post-baseline observations) showed a statistically significant decrease in loadings. The 13 mines examined by EPA are active remining operations; decreases in pollutant loads are expected to become more significant with time. In comparison, Pennsylvania's Remining Site Study of 112 closed remining sites (Record Section 3.5.3) found significant decreases or elimination of loadings for acidity, total iron and total manganese in 44 percent, 42 percent, and 41 percent respectively, of the pre-existing discharges monitored. The Pennsylvania Remining Site Study focused on sites reclaimed to at least Stage II bond release standards, so that the mitigating impacts of BMPs had ample time to take effect. EPA solicits comments on alternative or additional data sources for assessing the impacts of remining BMPs.

Remining generates human health benefits by reducing the risk of injury at AML sites and reducing discharge of acid mine drainage to waterways that are drinking water sources. However, the human health benefits associated with consumption of water and organisms are not likely to be significant because (1) acid mine drainage constituents are not bioaccumulative, and adverse health effects associated with fish consumption are therefore not expected; and (2) public drinking water sources are treated for most acid mine drainage constituents associated with adverse health effects. Eliminating safety hazards by closing abandoned mine openings, regrading highwalls, stabilizing unstable spoils, and removing hazardous waterbodies potentially prevents injuries and saves lives.

EPA evaluated the potential impacts to human and aquatic life by comparing the number of water quality criteria exceedances in receiving water bodies in the baseline (pre-remining) and post-baseline sampling periods for 11 remining sites in the Coal Remining Database for which relevant data exist. Exceedances of the human health criterion for pH (water plus organism consumption, field pH) were eliminated at two sites while exceedances of chronic aquatic life criteria were eliminated for pH (field pH) at two sites and iron at two sites. Exceedances of the acute aquatic life criterion for manganese were eliminated at two sites. Although surface water quality data examined indicate changes in the number of water quality exceedances due to remining, nine of the 11 sites consist of active remining operations where the full environmental impacts of BMPs have yet to be realized. Correlations between pre-existing discharge loads and pollutant concentrations in receiving water can be used to determine the extent to which remining BMPs are responsible for changes in surface water quality. However, the lack of sufficient data on relevant sources of acid mine drainage upstream from pre-existing discharges at the selected mine sites made it difficult to estimate these correlations.

Remining and the associated reclamation of AML is expected to generate ecological and recreational benefits by (1) improving terrestrial wildlife habitat, (2) reducing pollutant concentrations below levels that adversely affect aquatic biota, and (3) improving the aesthetic quality of land and water resources. EPA was able to quantify and monetize some of the benefits expected from increased remining using a benefits transfer approach. The benefits transfer approach relies on information from existing benefit studies applicable to assessing the benefits of improved environmental conditions at remining sites. Benefits are estimated by multiplying relevant values from the literature by the additional acreage reclaimed under the remining subcategory.

EPA used the following assumptions to estimate annual benefit values for ecological improvements: (1) 3,100 to 4,400 acres will be permitted for reclamation under the proposed subcategory; (2) 57 percent of the acres permitted will actually be reclaimed (1,800 to 2,500 acres) ; (3) 38 percent to 44 percent of acres reclaimed per year are expected to be associated with significant decreases in AMD pollutant loads to surface water bodies; and (4) annualized benefits from remining begin to occur five years after permit issuance and are calculated for a five year period. EPA assumed that 57 percent of the acres permitted would actually be reclaimed based on a study of 105 remining permits in Pennsylvania (Hawkins, 1995, Characterization and Effectiveness of Remining Abandoned Coal Mines in Pennsylvania). The study found that on average, a remining site had 67 AML acres, of which 38 acres (or 57 percent), were actually reclaimed. The assumption that 38 to 44 percent of acres reclaimed would be associated with significant decreases in AMD pollutant loads was based on the results of Pennsylvania's study of 112 closed remining sites, which showed significant decreases in loads of acidity (44 percent), manganese (41 percent), iron (42 percent), and aluminum (38 percent) of the associated pre-existing discharges. A detailed explanation of all assumptions is provided in the Benefits Assessment document.

EPA estimated water-related ecological benefits using the benefits transfer approach with values taken from a benefit-cost study of surface mine reclamation in central Appalachia by Randall et al. (1978, Reclaiming Coal Surface Mines in Central Appalachia: A Case Study of the Benefits and Costs). EPA's analysis is based on two values from the study: (1) Degradation of life-support systems for aquatic and terrestrial wildlife and recreation resources, valued at $37 per acre per year (1998$); and (2) aesthetic damages, valued at $140 per acre per year (1998$). EPA estimated nonuse benefits using a widely accepted approach developed by Fisher and Raucher (1984, Intrinsic Benefits of Improved Water Quality: Conceptual and Empirical Perspectives), where nonuse benefits are estimated as one-half of the estimated water-related recreational use benefits. The estimated water-related benefits range from $0.53 to $0.89 million per year.

Reclaiming the surface area at AML sites will enhance the sites' appearance and improve wildlife habitats, positively affecting populations of various wildlife species, including game birds. This is likely to have a positive effect on wildlife-oriented recreation, including hunting and wildlife viewing. EPA estimated land-related ecological benefits using the benefits transfer approach with values taken from a study of improved opportunities for hunting and wildlife viewing resulting from open space preservation by Feather et al. (1999, Economic Valuation of Environmental Benefits and the Targeting Conservation Programs). EPA's analysis is based on two values from the study: (1) The average wildlife viewing value, $21 per acre per year;

and (2) the improved pheasant hunting value, $7 per acre per year. Based on an aggregate value of $28 per acre per year, EPA estimates land-related benefits of $0.20 to $0.29 million per year.

The sum of the estimated monetary values of the different benefit categories results in total annual benefits of $0.73 to $1.17 million from implementing the proposed remining subcategory. This estimate does not include benefit categories that EPA was unable to quantify and/or monetize, which include human health and safety impacts. A more detailed discussion of the benefits analysis is contained in both the EA and the Benefits Assessment.

B. Western Alkaline Coal Mining Subcategory

Only a small percentage of potentially affected western coal mines discharge to permanent or perennial water bodies. Information about receiving waters is available for 39 of the existing western surface coal mines, and 30 of these discharge to intermittent or ephemeral creeks, washes, or arroyos. Only two of the mines list a permanent water drainage feature as the primary receiving water. It is therefore difficult to describe the benefits of the Western subcategory in terms of the use designations referenced in the section 101(a) goals of the Clean Water Act.

The environmental conditions and naturally high sediment yields in arid and semiarid coal regions are discussed in Section IV. The potential impacts of the predominant use of sedimentation ponds to control settleable solids in these regions include reduced sediment loads to natural drainage features, reduced downstream flood peaks and runoff volumes, and downstream channel bed and bank changes. The environmental and water quality effects of these hydrologic impacts include: (1) Reducing ground water recharge, (2) shrinking biological communities consisting of and reliant upon riparian and hydrophytic vegetation, (3) degrading downstream channel beds from "clean" water releases, and (4) accelerating erosion.

Site-specific alternative sediment control plans incorporating BMPs designed and implemented to control sediment and erosion have the potential to provide both land and water-related benefits. Land-related benefits include decreased surface area disturbance, increased soil conservation, and improved vegetation. Surface disturbance is estimated to decrease by approximately 1,700 acres per year across all existing potentially affected surface mine sites in the western region. Vegetative cover may increase by five percent when BMPs are used.

EPA was only able to monetize land-related benefits associated with decreased surface area disturbance. Hunting benefits from increased availability of undisturbed open space were estimated to be between $0.37 and $2.46 per acre per year based on Feather et al. (1999) and Scott et al. (1998). Annual land-related benefits of the proposed subcategory range from $5,500 to $36,500 per year, based on the value of enhanced hunting opportunities. However, this estimate does not account for a number of benefit categories, including nonuse ecological benefits that may account for the major portion of land-related benefits in relatively unpopulated areas such as those affected by the proposed rule.

Water-related benefits include improved hydrologic and fluvial stability in the watersheds affected by western mining operations. These benefits will be site-specific and depend upon the nature of environmental quality changes; the current in-stream water uses, if any, and; the population expected to benefit from increased water quantity. EPA estimated water-related benefits using the estimated mean "willingness to pay" (WTP) values for preservation of perennial stream flows adequate to support abundant stream side plants, animals and fish from Crandall et al. (1992, Valuing Riparian Areas: A Southwestern Case Study). The WTP value is applied to water-based recreation consumers residing in counties affected by western mining operations discharging to, or affecting, water bodies with perennial flow. EPA identified seven perennial streams located in six counties that are likely to be affected by the proposed rule. The estimated monetary value of recreational water-related benefits for these streams ranges from $25,000 to $488,000. As noted above, EPA estimates that nonuse benefits are equal to one-half of the water-related recreational benefits, or $12,500 to $244,000 per year.

Total estimated annualized benefits from implementing the proposed subcategory range from $43,000 to $768,500. This estimate does not include benefit categories that EPA was unable to quantify and/or monetize, which include increased vegetative cover and some additional recreational and non-use benefits associated with western alkaline coal mine reclamation areas. A more detailed discussion of the benefits analysis is contained in both the EA and the Benefits Assessment.

X. Economic Analysis

A. Introduction, Overview, and Sources of Data

This section presents EPA's estimates of the economic impacts that would occur under the proposed regulatory options. The economic impacts are evaluated for each subcategory for BPT, BCT, BAT, and NSPS as applicable. The description of each proposed option and the rationale for selection are given in Section VI of today's document. EPA's detailed economic impact assessment can be found in Economic and Environmental Impact Analysis of Proposed Effluent Limitations Guidelines and Standards for the Coal Mining Industry: Remining and Western Alkaline Subcategories (referred to as the "EA"). EPA also prepared the Coal Remining and Western Alkaline Mining: Economic and Environmental Profile (Record Section 5.0) in support of today's proposal.

This section of today's document describes the segment of the coal industry that would be impacted by the rule (i.e., the number of firms and number of mines that would incur costs or realize savings under the proposed rule), the financial condition of the potentially affected firms, the aggregate cost or cost savings to that segment, and economic impacts attributed to the proposed rule. The section also discusses impacts on small entities and presents a cost-benefit analysis. This discussion will form the basis for EPA's findings on regulatory flexibility, presented in Section XI.B. All costs are reported in 1998 dollars unless otherwise noted. As described in Section V of this document, EPA developed this proposal using an expedited rulemaking procedure. Therefore, EPA's economic analysis relied on industry profile information voluntarily provided by stakeholders, on data compiled from individual mining permits, and on data from publicly available sources. For the Coal Remining Subcategory, EPA obtained information on abandoned mine lands from the Abandoned Mine Lands Information System (AMLIS) maintained by the Office of Surface Mining (Record Section 3.5.2), the National Abandoned Lands Inventory System (NALIS) database maintained by the Pennsylvania Department of Environmental Protection (Record Section 3.5.5), and a survey of states conducted by the Interstate Mining Compact Commission (Record Section 3.2.2). For Western Alkaline mines, EPA relied on industry profile data developed and submitted to EPA by the Western Coal Mining Work Group as

described in Section V. Specifically, the work group provided data on: coal mine operator, mine location, annual production, reclamation permit numbers, acres of land reclaimed, and reclamation bond amounts. This information is included in Section 3.3 of the Record.

Data on the coal industry as a whole, including coal production, employment, and prices, as well as information on individual western alkaline underground mines, were obtained from various Energy Information Administration (EIA) sources, including the 1997 Coal Industry Annual, the 1998 Annual Energy Outlook, and the 1992 Census of Mineral Industries. EPA used the Security and Exchange Commission's (SEC's) Edgar database, which provides access to various filings by publicly held firms, such as 8Ks and 10Ks, for financial data and information on corporate structures. EPA also used a database maintained by Dun & Bradstreet, which provides estimates of employment and revenue for many privately held firms, and obtained industry financial performance data from Leo Troy's Almanac of Business and Industrial Financial Ratios.

B. Method for Estimating Compliance Costs

The costs and savings of today's proposal are associated with modeling requirements, BMP implementation, baseline monitoring, and performance monitoring. For each option and geographic area, EPA estimated economic baseline conditions based on existing State and Federal regulations and current industry practices. For remining, EPA assumed as economic baseline conditions remining under a Rahall permit, pursuant to section 301(p), rather than comparing to compliance with current Part 434 regulations. Following this, EPA estimated the incremental compliance costs for each option proposed.

1. Coal Remining Subcategory

EPA projected costs for each remining site by calculating the cost of increased monitoring requirements for determining baseline, the cost of potential increases in compliance monitoring requirements, and the potential costs associated with implementing the required pollution abatement plan. To assess the increased monitoring requirements of the proposal, EPA evaluated current State requirements for operations permitted under the Rahall provision and calculated the proposed monitoring costs that exceed the current State requirements. Current State sample collection requirements for determining and monitoring baseline are included in the Record at Section 3.4.

Although EPA estimated that the Remining Subcategory would be applicable to 64 to 91 remining sites and 3,810 to 5,400 acres annually, EPA projects that fewer sites would realize costs or benefits from this proposal. As noted throughout this proposal, the Commonwealth of Pennsylvania has an advanced remining program and EPA does not believe that the proposal will have a measurable impact on Pennsylvania's remining activities. Therefore, EPA did not include Pennsylvania's remining sites in the estimation of costs or benefits. EPA's cost and benefit analysis were calculated for a total of 43 to 61 sites representing 3,100 to 4,400 permitted acres each year. EPA estimates that approximately 1,800 to 2,500 of these acres would actually be reclaimed each year. Table X. B.1 shows the various estimates EPA used in the estimation of costs and benefits.

TABLE X. B.1.—ANNUAL ESTIMATES OF AFFECTED REMINING SITES USED IN THE ECONOMIC ANALYSES

Additional sites permitted	Number of sites	Acres	Used in analysis of:
All types, all states (initial estimate)	64–91	3,812–5,401	
All types, excluding PA	43–61	3,111–4,407	Monitoring costs for selected states; NPDES permitting authority costs.
10% of surface & under-ground sites only (no coal refuse piles), excluding PA.	3.9–5.6	309–438	Costs of additional BMPs.
Additional acres reclaimed: (57% of acres permitted, all types excluding PA).		1,773–2,512	Benefits from recreational use of reclaimed land.
Additional acres reclaimed expected to have significant decreases in AMD pollutant loads (37.6–44.4% of additional reclaimed acres).		667–1,115	Benefits from recreational use of improved water bodies; Aesthetic improvements in water bodies; Non-use benefits.

2. Western Alkaline Coal Mining Subcategory

The proposed subcategory will include alkaline drainage from reclamation areas at surface and underground coal mines located west of the 100th meridian in arid or semiarid environments with average annual precipitation of 26 inches or less. EPA's Coal Remining and Western Alkaline Mining: Economic and Environmental Profile provides profile information on the 47 surface coal mines and 24 underground coal mines EPA initially believed to be in the scope of the proposed subcategory. However, EPA determined that one of the surface mines profiled was already in the final reclamation stage and would not be affected by today's proposal; hence only the remaining 46 surface mines were included in the analyses of costs and benefits.

The only incremental cost attributed to the proposed subcategory is associated with the watershed modeling requirements discussed in Section VI. Information provided by OSM (Record Section 7.2) indicates that most coal mine operators already perform modeling (to support their SMCRA permit applications) that is sufficient to meet today's proposed requirements. The information also indicates that a typical underground operator would not incur any additional modeling costs as a result of today's proposed rule due to the small acreage and lack of complexity associated with surface reclamation areas at underground mines.

Although EPA believes that compliance with the proposed rule would result in operational savings for both surface mine operators and many underground producers, EPA did not estimate the savings for underground producers due to data limitations. The industry profile submitted by the Western Coal Mining Work Group did not provide information on disturbance acreage, mine life, or bond amounts for the underground mines, and the model mine analysis addressed conditions typical of surface mines rather than underground mines. It was therefore not possible to estimate cost savings associated with the proposed

subcategory for reclamation of surface areas at underground mines. However, any savings are likely to be small given the limited acreage and lack of complexity associated with these reclamation areas. Hence, EPA assumes that today's proposal would be cost-neutral for underground operators. EPA solicits any data or comments regarding these assumptions. The remainder of this section considers only the 46 active existing surface mines in its discussion.

C. Costs and Cost Savings of the Regulatory Options

1. Coal Remining Subcategory

Under the proposed rule, EPA is requiring that operators conduct one year of monthly sampling to characterize the baseline pollutant levels for pH, iron (total), and manganese (total). Although most states with remining activities have similar requirements, remining sites in Alabama and Kentucky will be required to add six samples annually. EPA did not have data for Illinois, Indiana, or Tennessee because the remining operations that occur in these States do not incorporate Rahall provisions for pre-existing discharges. EPA has conservatively assumed monitoring costs for 12 additional samples annually for these states. Information representing current State sampling requirements is included in the Record at Section 5.

Although EPA is not requiring a specific monitoring frequency to demonstrate compliance, EPA has assumed monthly compliance monitoring for costing purposes. Most states already have similar requirements, with the exception of Ohio, which currently requires quarterly modeling. Again, EPA did not have data for Illinois, Indiana, or Tennessee because these states do not incorporate Rahall provisions in their remining permits. For these states, EPA has conservatively assumed that an additional 12 compliance monitoring samples per year would be required for five years.

Because each remining site will typically have more than one pre-existing discharge, EPA reviewed Pennsylvania remining sites to estimate the average number of pre-existing discharges per site. EPA used this calculated average of four pre-existing discharges per site for estimating baseline determination and compliance monitoring costs (Record Section 3.3.1). Additionally, EPA assumed that remining operators would have to purchase and install flow weirs to comply with the baseline monitoring requirements in the States that do not incorporate Rahall provisions in their remining permits. These assumptions result in an upper bound estimate of additional monitoring costs for the 43 to 61 potentially affected sites per year.

EPA estimates the total annual incremental monitoring costs to be in the range of $133,500 to $193,500. Of this, between $83,000 and $120,000 is associated with incremental baseline monitoring requirements and between $50,500 and $73,500 results from incremental compliance monitoring during the five year mining period. Detailed assumptions and calculations are presented in the EA.

In addition to monitoring, remining operators must develop and implement a site-specific pollution abatement plan for each remining site. In many cases, EPA believes that the requirements for the pollution abatement plan will be satisfied by an approved SMCRA plan. However, EPA recognizes that some operators may be required to implement additional or more intensive BMPs under the proposed rule beyond what is included in a SMCRA-approved pollution abatement plan.

EPA developed a general estimate of the potential costs of additional BMPs based on review of the existing remining permits contained in the Coal Remining Database (Record Section 3.5.1), and on information provided in the Coal Remining BMP Guidance Manual. EPA determined that the most likely additional BMP that NPDES permit writers might require would be a one-time increase in the amount of alkaline material used as a soil amendment to prevent the formation of acid mine drainage. EPA assumed that an average mine facility requiring additional BMPs would need to increase its alkaline addition by a rate of 50 to 100 tons per acre to meet the additional NPDES permit review requirements. EPA estimated an average cost for alkaline addition of $12.90/ton, and assumed that 10 percent of surface and underground remining sites would be required to incur these additional BMP costs. Because the typical BMP for coal refuse piles is simply removal of the pile, no incremental BMP costs would be incurred for these sites. Based on EPA's estimate that between 309 and 438 acres could be required to implement additional or more intensive BMPs each year, the estimated annual cost of additional BMP requirements would range from $199,500 to $565,000.

Based on the above assumptions, the total estimated incremental costs associated with the proposed rule range from $333,000 to $758,500 per year. These costs are based on EPA's estimates of what is likely to happen in the future, and they would be incurred by new remining operations. Table X. C.1 summarizes the incremental costs associated with the proposed subcategory.

TABLE X. C.1.—ANNUAL COSTS FOR THE REMINING SUBCATEGORY

Monitoring Costs	$133,500–$193,500
Additional BMPs	$199,500–565,000
Total Compliance Costs	$333,000–758,500

2. Western Alkaline Coal Mining Subcategory

The cost impacts of the proposed subcategory will vary, depending on site-specific conditions at each eligible coal mine. However, based on data and information gathered to date, EPA believes that the costs of reclamation under today's proposal will be less than or equal to reclamation costs under the existing effluent guidelines for each individual operator, and thus to the subcategory as a whole.

EPA expects that, in general, the sediment control plan will largely consist of materials generated as part of the SMCRA permit application. The SMCRA permit application process requires that a coal mining operator submit an extensive reclamation plan, documentation and analysis to OSM or the permitting authority for approval. Based on these requirements, EPA believes that plans developed to comply with SMCRA requirements will usually fulfill the requirements proposed by EPA for sediment control plans.

EPA believes that the only incremental cost attributed to the proposed subcategory is associated with the watershed modeling requirements discussed in Section VI of today's document. The requirement to use modeling techniques is also consistent with OSM reclamation plans. While

OSM does not specifically require modeling, most coal mine operators already perform watershed modeling to support their SMCRA permit applications that is sufficient to meet today's proposed requirements. However, some incremental costs may occur in cases where the rule increases model complexity. Information provided by OSM indicates that a typical surface mine operator may incur a one-time additional cost of zero to $50,000 to meet the modeling requirements in today's proposal. These figures represent the additional modeling effort attributed to today's proposed requirements; they do not represent the total cost associated with watershed modeling. Although most sites would not incur additional modeling costs, EPA conservatively assumes that all 46 existing surface operators would incur additional modeling costs of $50,000. This assumption results in a total cost estimate of $327,500 on an annualized basis. These costs would be offset by cost savings discussed below.

EPA projects that cost savings for this subcategory would result from lower capital and operating costs associated with implementing the proposed BMP plans, and from an expected reduction in the reclamation bonding period. The cost savings for controls based on BMPs were calculated for a representative model mine and were submitted by the Western Coal Mining Work Group. The cost model is discussed in detail in the Development Document for Proposed Effluent Limitations Guidelines and Standards for the Western Alkaline Coal Mining Subcategory and is included in the Record at Section 3.3.2. The cost estimates of the model mine relied on data taken from case study mine permit applications, mine records, technical resources and industry experience. The study estimated capital costs (design, construction and removal of ponds and BMPs) and operating costs (inspection, maintenance, and operation) over the anticipated bonding period.

Cost savings for reclamation at existing surface mines were calculated by extrapolating the cost savings from the model mine. The present value of savings over a 10-year period for the model mine was calculated to be $672,000 (annualized at seven percent) or $1,764 saving per acre. EPA used the projected disturbance acreage divided by the remaining mine life to estimate the annual acres reclaimed at each existing mine site. This information was available for 26 mines and totaled 9,880 acres per year, or an average of 380 annual acres per mine. EPA assumed that the remaining 20 mines with incomplete data would each reclaim the average 380 acres per year, resulting in a total of 17,480 acres. Based on an average savings of $1,764 per acre, EPA projects that the proposed subcategory will result in annual savings of $30.8 million. EPA solicits comment on this approach for estimating reclamation cost savings.

EPA has also calculated cost savings that may result from earlier Phase II bond release. The OSM hydrology requirements to release performance bonds at Phase II at 30 CFR part 800.40(c)(1), requires compliance with the existing 0.5 ml/L effluent standard. The Western Coal Mining Work Group, in its draft Mine Modeling and Performance Cost Report (Record Section 3.3.2) estimates that the typical post-mining Phase II bonding period can be ten years or more under the current effluent guidelines. Reclamation areas must achieve considerable maturity before they are capable of meeting the existing standard. The BMP-based approach in today's proposal uses the inspection of BMP design, construction, operation and maintenance to demonstrate compliance instead of the current sampling and analysis of surface water drainage for reclamation success evaluations. The report estimates that the BMP-based approach would reduce the time it takes reclaimed lands to qualify for Phase II bond release to about five years.

EPA used the following assumptions to estimate cost savings due to earlier Phase II bond release: (1) a Post-mining Phase II bonding period of ten years under the current effluent guidelines and five years under the proposed subcategory; (2) twenty-five percent of the reported bond amount would be released at the end of Phase II; and (3) surety bonds were used, with annual fees between $3.75 and $5.50 per thousand. Twenty-six mines provided information necessary to calculate associated bond savings. The total estimated savings for these mines range from $197,000 to $289,000 when annualized at seven percent over the five year permit period. EPA assumes that the remaining 20 mines for which savings could not be calculated would achieve the average savings per mine ($7,600 to $11,100) resulting in total annualized savings between $349,000 and $511,500. Detailed assumptions and calculations are contained in the EA.

The estimated net savings in compliance costs associated with the proposed subcategory, considering additional modeling costs and the savings to mining operations in sediment control and bonding costs, is estimated to be approximately $31 million, as shown in Table X. C.2.

TABLE X. C.2.—ANNUAL COSTS AND COST SAVINGS FOR THE WESTERN ALKALINE SUBCATEGORY

[Discounted at 7%]

Incremental Modeling Costs	$327,500
Sediment Control Costs (Savings)	($30,835,000)
Earlier Phase 2 Bond Release (Savings)	($349,000–$511,500)
Total Compliance Costs (Savings)	($30,857,000–$31,019,000)

D. Economic Impacts of Proposed Options

1. Economic Impacts of Proposed Coal Remining Subcategory

As discussed in Section VI, EPA is proposing BPT, BCT, and BAT that have an equivalent technical basis and is not proposing NSPS limitations for the Remining Subcategory. EPA believes that the proposed option will not impact existing remining permits. For new permits, remining operators will have the ability to choose among potential remining sites, and will only select sites that they believe are economically achievable to remine. Furthermore, any additional BMPs required by the NPDES authority under the proposed rule will be site-specific, with economic achievability considered in making a BPJ determination. The proposed requirements will not create any barriers to entry in coal remining, but instead are specifically designed to encourage new remining operations. Hence, the Agency finds no significant negative impacts to the industry associated with the proposed subcategory.

The implementation of a pollution abatement plan containing BMPs may impose additional costs beyond what is included in a SMCRA-approved

pollution abatement plan. At the same time, the proposed subcategory may increase profits at remining sites by providing an incentive to mine coal from abandoned mine land areas that may have been avoided in the absence of implementing regulations. The proposed subcategory will also affect the relative profitability of remining different types of sites, with the potential to encourage remining of the sites with the worst environmental impacts. An analysis by the Department of Energy (DOE) of potential remining sites estimated an average coal recovery of between 2,300 and 3,300 tons per acre of remined land (1993, Coal Remining: Overview and Analysis). At these coal recovery rates, the estimated steady state annual increase in acres being remined would produce between 7.1 and 14.5 million tons of coal per year. This represents only 1.5 to 3.1 percent of total 1997 Appalachian coal production of 468 million tons. The same DOE report noted that, given the general excess capacity in the coal market, it is likely that coal produced from new remining sites will simply displace coal produced elsewhere, with no net increase in production overall. The proposed remining subcategory is therefore not expected to have a significant impact on overall coal production or prices.

2. Economic Impacts of Proposed Western Alkaline Coal Mining Subcategory

As discussed in Section VI, EPA is proposing BPT, BAT, and NSPS limitations that have an equivalent technical basis for the Western Alkaline Coal Mining Subcategory. EPA concludes that nearly all economic impacts are positive for the proposed option and finds the preferred option to be a cost savings to the industry and thus, economically achievable. Because reclamation costs under today's proposal will be less than or equal to those under the existing effluent guidelines for all individual operators, and thus, to the subcategory as a whole, no facility closures or direct job losses associated with post-compliance closure are expected. However, EPA estimated changes in labor requirements attributed to the proposed subcategory by extrapolating from the model mine results, which calculated changes in labor hours associated with those erosion and sediment control structures that were used, or no longer used, under either the existing guidelines or the proposed subcategory for the model mine. The results indicated that the proposed subcategory would reduce annual labor requirements by approximately 0.2 work years for the model mine. EPA assumed that each of the 46 western alkaline surface mines would experience the same employment impact as predicted by the model mine study (Record Section 3.3.6), resulting in the loss of 9.2 full-time employees (FTEs) per year. This represents 0.1 percent of the total 1997 coal mine employment (6,862 FTEs) in the western alkaline region States.

The cost savings associated with the proposed subcategory are not expected to have a substantial impact on the industry average cost of mining per ton of coal, and therefore are not expected to have major impacts on coal prices. While the savings are substantial in the aggregate and for some individual mine operators, on average they represent a small portion of the total value of coal produced from the affected mines. As described in the EA, the estimated savings from the proposed subcategory are equivalent to only 0.6 percent of the value of production at 25 mines for which enough information was available to make site-specific estimates of savings. As with the Coal Remining Subcategory, the proposed Western Alkaline Coal Mining Subcategory is not expected to result in significant industry-level changes in coal production or prices.

EPA is proposing NSPS limitations equivalent to the limitations that are proposed for BPT and BAT for the Western Alkaline Coal Mining Subcategory. In general, EPA believes that new sources will be able to comply at costs that are similar to or less than the costs for existing sources, because new sources can apply control technologies more efficiently than sources that need to retrofit for those technologies. Specifically, here, to the extent that existing sources have already incurred costs associated with installing sedimentation ponds, new sources would be able to avoid such costs. There is nothing about today's proposal that would give existing operators a cost advantage over new mine operators; therefore, NSPS limitations will not present a barrier to entry for new facilities.

E. Additional Impacts

1. Costs to the NPDES Permitting Authority

Additional costs will be incurred by the NPDES permitting authority to review new permit applications and issue revised permits based on the proposed rule. Under the proposed rule, NPDES permitting authorities will review baseline pollutant levels and proposed pollution abatement plans for the Coal Remining Subcategory and watershed modeling results and sediment control plans for the Western Alkaline Coal Mining Subcategory.

EPA estimates that permit review will require an average of 35 hours of a permit writer's time per site and that permit writers receive an hourly wage of $31.68. Based on these assumptions, total annual costs to the NPDES permitting authorities range from $47,500 to $67,500 for the 43 to 61 additional sites that can be expected to be permitted under the proposed subcategory. An upper bound estimate of costs associated with implementing the proposed western subcategory assumes that all 46 existing surface mine permits are renewed. The total incremental annual cost would be $12,500 per year when annualized over the 5-year permit life (using a seven percent discount rate). Total additional permit review costs for the proposed rule are therefore estimated to be between $60,000 and $80,000 per year. A detailed analysis is contained in the EA.

2. Community Impacts

The proposed rule could have community-level and regional impacts if it significantly altered the competitive position of coal produced in different regions of the country, or led to growth or reductions in employment in different regions and communities. As described in the EA, the proposed rule is not likely to have significant impacts on relative coal production in the West versus the East. The proposed Remining Subcategory is likely to shift the location of production and employment toward eligible abandoned mine lands, but not to increase national coal production and employment or affect coal prices significantly overall.

EPA projects that impacts of the proposed Western Alkaline Coal Mine Subcategory on mine employment will also be minor. As discussed above, EPA estimated a reduction in labor requirements of 9.2 FTEs per year by extrapolating from the model mine results. This represents 0.1 percent of the total 1997 coal mine employment in the western alkaline region States. Regional multipliers relating total direct and indirect employment to coal industry employment range from 2.6 to 3.2 for the western alkaline region states (U.S. Bureau of Economic Analysis, Regional Input-Output Modeling Systems, "RIMSII"). Therefore, the total impact on employment, direct and indirect, that may result from the proposed western alkaline subcategory is a reduction of between 24 and 29 FTEs per year. This reduction in

employment might be offset if lower costs under the proposed subcategory encourage growth in coal mining in the western alkaline region.

3. Foreign Trade Impacts

EPA does not project any foreign trade impacts as a result of the proposed effluent limitations guidelines and standards. U.S. coal exports consist primarily of Appalachian bituminous coal, especially from West Virginia, Virginia and Kentucky (U.S. DOE/EIA, Coal Data: A Reference; U.S. DOE/EIA Coal Industry Annual 1997). Coal imports to the U.S. are insignificant. Impacts are difficult to predict, since coal exports are determined by economic conditions in foreign markets and changes in the international exchange rate for the U.S. dollar. However, no foreign trade impacts are expected given the relatively small projected increase in production and projected lack of impact on costs of production or prices.

F. Cost-effectiveness Analysis

Cost-effectiveness calculations are used during the development of effluent limitations guidelines and standards to compare the efficiency of regulatory options in removing toxic and non-conventional pollutants. Cost-effectiveness is calculated as the incremental annual cost of a pollution control option per incremental pollutant removal. The increments are considered relative to another option or to a benchmark, such as existing treatment. In cost-effectiveness analysis, pollutant removals are measured in toxicity normalized units called "pounds-equivalent." The cost-effectiveness value, therefore, represents the unit cost of removing an additional pound-equivalent of pollutants. In general, the lower the cost-effectiveness value, the more cost-efficient the regulation will be in removing pollutants, taking into account their toxicity. While not required by the Clean Water Act, cost-effectiveness analysis is a useful tool for evaluating regulatory options for the removal of toxic pollutants.

While cost-effectiveness results are usually reported in the Notice of Proposed Rulemaking for effluent guidelines, such results are not presented in today's document because of the nature of the two subcategories. For the Coal Remining Subcategory, EPA is unable to predict pollutant reductions that would be achieved at future remining operations. As described in Section VI, it is difficult to project the results, in terms of measured improvements in pollutant discharges, that will be produced through the application of any given BMP or group of BMPs at a particular site. EPA is therefore unable to calculate cost-effectiveness. For the Western Alkaline Coal Mining Subcategory, cost-effectiveness was not calculated because there are no incremental costs attributed to the proposed option.

G. Cost Benefit Analysis

EPA estimated and compared the costs and benefits for each of the proposed subcategories. EPA concludes that both subcategories have the potential to create significant environmental benefits at little or no additional cost to the industry. The cost and benefit categories that the Agency was able to quantify and monetize for the proposed Coal Remining Subcategory are shown in Table X. G.1. The monetized annual benefit estimates ($734,000 to $1,175,500) substantially outweigh the projected annual costs ($380,500 to $825,500).

TABLE X. G.1.—ANNUALIZED SOCIAL COSTS AND BENEFITS OF PROPOSED REMINING SUBCATEGORY

Social Costs (Discounted at 7%):	
Industry Compliance Costs	$330,000–$758,500
NPDES Permitting Costs	$47,500–$67,500
Total Social Costs	$380,500–$865,000
Monetized Social Benefits (Discounted at 3%):	
Recreational use of improved water bodies	$100,500–$168,000
Aesthetic improvements to water bodies	$380,000–$635,500
Non-use (related to improved water bodies)	$51,500–$86,000
Total Water-Related Benefits	$532,000–$889,500
Recreational use of reclaimed land	$202,000–$286,000
Total Monetized Benefits	$734,000–$1,175,500

In addition to the monetized benefits shown in Table X. G.1, the increase in remining is projected to result in the removal of some 216,000 to 307,000 feet of highwall each year, with benefits in increased public safety. The increased remining also has the potential to recover an estimated 7.1 to 14.5 million tons of coal per year that might otherwise remain unrecovered, with a value of approximately $188.5 to $ 385.0 million (based on an average 1997 value per ton of coal in Appalachia of $26.55).

The proposed Western Alkaline Coal Mining Subcategory is projected to result in net cost savings to society while increasing environmental benefits to society. The industry compliance costs consist of watershed modeling costs and are offset by cost savings associated with the proposal, specifically reduced costs for sediment control and earlier Phase II bond release. Total annual cost savings to society are expected to be approximately $31 million. The proposed subcategory is also expected to result in annual environmental benefits valued between $43,000 and $768,500—with the majority of benefits resulting from recreational use of waters with improved water flow. Table X. G.2 summarizes the social costs and benefits of the proposed Western Alkaline Coal Mining Subcategory.

TABLE X. G.2.—ANNUAL SOCIAL COSTS/SAVINGS AND BENEFITS OF THE PROPOSED WESTERN SUBCATEGORY

Social Costs and Cost Savings (Discounted at 7%):	
Associated Industry Cost Savings	($31,183,000–$31,346,000)
Industry Compliance Costs	$327,500
NPDES Permitting Costs	$12,500
Total Social Cost Savings	($30,845,000–$31,007,000)
Monetized Benefits (Discounted at 3%):	
Avoided surface disturbance	$5,500–$36,500
Recreational benefits from improved water flow	$25,000–$488,000
Non-use benefits	$12,500–$244,000
Total Monetized Benefits	$43,000–$768,500

XI. Administrative Requirements

A. Executive Order 12866: Regulatory Planning and Review

Under Executive Order 12866 (58 FR 51735, October 4, 1993), the Agency must determine whether the regulatory action is "significant" and therefore subject to OMB review and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

It has been determined that this proposed rule is not a "significant regulatory action" under the terms of Executive Order 12866 and is therefore not subject to OMB review.

B. Regulatory Flexibility Act as Amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), 5 U.S.C. 601 et seq.

The Regulatory Flexibility Act generally requires an agency to prepare a regulatory flexibility analysis for any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

For purposes of assessing the impacts of today's rule on small entities, small entity is defined as: (1) A small business that has 500 or fewer employees (based on SBA size standards); (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impact of today's proposed rule on small entities, I certify that this action will not have significant economic impact on a substantial number of small entities. In determining whether a rule has significant economic impact on a substantial number of small entities, the impact of concern is any significant *adverse* economic impact on small entities, since the primary purpose of the regulatory flexibility analysis is to identify and address regulatory alternatives "which minimize any significant economic impact of the proposed rule on small entities." 5 U.S.C. 603 and 604. Thus, an agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, or otherwise has a positive economic effect on all of the small entities subject to the rule. EPA projects that the proposed subcategory for Western alkaline mines results in cost savings for all small surface mine operators. For all small underground mine operators, EPA projects no incremental costs, and the Agency believes that many are likely to experience some cost savings. Section X of this document discusses the likely cost savings associated with the subcategory in more detail. As described in Section III of this document, the current regulations at 40 CFR part 434 create a disincentive for remining by imposing limitations on pre-existing discharges for which compliance is cost prohibitive. Despite the statutory authority for exemptions from these limitations provided by the Rahall Amendment, coal mining companies and States remain hesitant to pursue remining without formal EPA guidelines. The proposed remining subcategory provides standardized procedures for developing effluent limits for pre-existing discharges, thereby eliminating the uncertainty involved in interpreting and implementing current Rahall requirements. The proposed subcategory for remining is intended to remove barriers to the permitting of remining sites with pre-existing discharges, and is therefore expected to encourage remining activities by small entities. Thus, we have concluded that today's proposed rule will relieve regulatory burden for all small entities. We continue to be interested in the potential impacts of the proposed rule on small entities and welcome comments on issues related to such impacts.

C. Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures to State, local, and tribal governments, in the aggregate, or to the private sector, of $100 million or more in any one year. Before promulgating an EPA rule for which a written statement is needed, section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-

effective or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective or least burdensome alternative if the Administrator publishes with the final rule an explanation why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMRA a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

EPA has determined that the proposed rule, if promulgated, would not contain a Federal mandate that will result in expenditures of $100 million or more for State, local and tribal governments, in the aggregate, or the private sector in any one year. Although the proposed rule will impose some permit review and approval requirements on regulatory authorities, EPA has determined that this cost burden will be less than $80,000 annually. Accordingly, today's proposal is not subject to the requirements of sections 202 and 205 of UMRA. EPA has determined that this proposal contains no regulatory requirements that might significantly or uniquely affect small governments. Thus, is not subject to the requirements of section 203 of the UMRA. The proposal, if promulgated, would not establish requirements that would apply to small governments.

D. Paperwork Reduction Act

The information collection requirements in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB) under the *Paperwork Reduction Act,* 44 U.S.C. 3501 *et seq.* An Information Collection Request (ICR) document has been prepared by EPA (ICR No.1944.01) and a copy may be obtained from Sandy Farmer by mail at Collection Strategies Division; U.S. Environmental Protection Agency (2822); 1200 Pennsylvania Ave., NW, Washington, DC 20460, by email at farmer.sandy@epamail.epa.gov, or by calling (202) 260–2740. A copy may also be downloaded off the internet at http://www.epa.gov/icr.

Today's proposed rule requires an applicant to submit baseline monitoring and a pollution abatement plan for coal mining operations involved in remediation of abandoned mine lands and the associated acid mine drainage during extraction of remaining coal resources. In addition, today's proposed rule requires an applicant involved in reclamation of coal mining areas in arid regions to submit a sediment control plan for sediment control activities. Information collection is needed to determine whether these plans will achieve the reclamation and environmental protection pursuant to the Surface Mining Control and Reclamation Act and the Clean Water Act. Without this information, Federal and State regulatory authorities cannot review and approve permit application requests. Data collection and reporting requirements associated with these activities are substantively covered by the "Surface Mining Permit Applications—Minimum Requirements for Reclamation and Operation Plan—30 CFR part 780" ICR, OMB Control Number 1029–0036. Data collection and reporting requirements from today's proposed rule that may not be included in the 30 CFR part 780 ICR are: some incremental baseline and annual monitoring and some sediment yield modeling.

The initial burden for coal mining and remining sites under the proposed rule is estimated at 74,478 hours and $2,614,538 for baseline determination monitoring at remining sites and additional sediment yield modeling at Western Alkaline mining sites. The initial burden associated with preparation of a site's pollution abatement plan or sediment control plan is already covered by an applicable SMCRA ICR. For the Western Alkaline Subcategory, EPA estimates that 46 sites per year will experience an initial reporting burden of 72,588 hours; or an average of 1,578 hours and $50,000 per facility. For the Remining Subcategory, EPA estimated that 78 sites per year will experience an initial reporting burden of 1,890 hours; or an average of 24 hours and $4,033 per facility. The annual burden for coal mining and remining sites under the proposed rule is estimated at 3,024 hours and $189,302 for annual monitoring at coal remining sites. There is no annual burden associated with the Western Alkaline Subcategory. For the Remining Subcategory, the duration of the ICR is three years. EPA estimated that 234 sites (78 sites × 3 years) will each experience an annual burden of 13 hours and $809. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15.

Comments are requested on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques. Send comments on the ICR to the Director, Collection Strategies Division; U.S. Environmental Protection Agency (2822); 1200 Pennsylvania Ave., NW, Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th St., NW, Washington, DC 20503, marked "Attention: Desk Officer for EPA." Include the ICR number in any correspondence. Since OMB is required to make a decision concerning the ICR between 30 and 60 days after April 11, 2000, a comment to OMB is best assured of having its full effect if OMB receives it by May 11, 2000. The final rule will respond to any OMB or public comments on the information collection requirements contained in this proposal.

E. National Technology Transfer and Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) of 1995, Pub L. No. 104–113 Sec. 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.,* materials specifications, test methods, sampling procedures, business

practices, etc.) that are developed or adopted by voluntary consensus standard bodies. The NTTAA directs EPA to provide Congress, through the Office of Management and Budget (OMB), explanations when the Agency decides not to use available and applicable voluntary consensus standards.

Today's proposed rule requires dischargers to monitor for TSS, magnesium, iron, and pH. All of these analytes are required to be measured using consensus standards that are specified in the tables at 40 CFR part 136.3.

EPA welcomes comments on this aspect of the proposed rulemaking and, specifically, invites the public to identify potentially-applicable voluntary consensus standards and to explain why such standards should be used in this regulation.

F. Executive Order 13132: Federalism

Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government."

Under Section 6 of Executive Order 13132, EPA may not issue a regulation that has federalism implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, or EPA consults with State and local officials early in the process of developing the proposed regulation. EPA also may not issue a regulation that has federalism implications and that preempts State law, unless the Agency consults with State and local officials early in the process of developing the proposed regulation.

This proposed rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. The rule will not impose substantial costs on States and localities. The rule establishes effluent limitations imposing requirements that apply to coal mining facilities when they discharge wastewater. The rule does not apply directly to States and localities and will only affect State and local governments when they are administering CWA permitting programs. The proposed rule, at most, imposes minimal administrative costs on States that have an authorized NPDES program. (These States must incorporate the new limitations and standards in new and reissued NPDES permits). Thus, the requirements of section 6 of the Executive Order do not apply to this rule. Although section 6 of Executive Order 13132 does not apply to this rule, EPA did consult extensively with State officials in developing this proposal, as discussed in Section V of this document.

In addition, in the spirit of this Executive Order and consistent with EPA policy to promote communications between EPA and State and local governments, EPA specifically solicits comment on this proposed rule from State and local officials.

G. Executive Order 13045: Protection of Children From Environmental Health and Safety Risks

The Executive Order "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997) applies to any rule that: (1) is determined to be "economically significant" as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children; and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency. This rule is not subject to E.O. 13045 because it is neither "economically significant" as defined under Executive Order 12866, nor does it concern an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children.

H. Executive Order 13084: Consultation and Coordination With Indian Tribal Governments

Under Executive Order 13084, EPA may not issue a regulation that is not required by statute, that significantly or uniquely affects the communities of Indian Tribal governments, and that imposes substantial direct compliance costs on those communities, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by the tribal governments, or EPA consults with those governments. If EPA complies by consulting, Executive Order 13084 requires EPA to provide to the Office of Management and Budget, in a separately identified section of the preamble to the rule, a description of the extent of EPA's prior consultation with representatives of affected tribal governments, a summary of the nature of their concerns, and a statement supporting the need to issue the regulation. In addition, Executive Order 13084 requires EPA to develop an effective process permitting elected officials and other representatives of Indian tribal governments "to provide meaningful and timely input in the development of regulatory policies on matters that significantly or uniquely affect their communities."

Today's rule does not significantly or uniquely affect the communities of Indian tribal governments. Although EPA has identified sites in the western United States with existing coal mining operations that are located on Tribal lands, EPA projects that this proposal will generate a net cost savings for these mine sites. Accordingly, the requirements of section 3(b) of Executive Order 13084 do not apply to this rule.

Nevertheless, EPA consulted with representatives of tribal governments. EPA has identified sites in the western United States with existing coal mining operations that are located on Tribal lands. With assistance from its American Indian Environmental Office, EPA has identified five Tribes as having lands in the western U.S. with, or having an interest in, coal mining activities. The Tribes are the Navajo Nation, the Hopi Tribe, the Crow Tribe, the Southern Ute Indian Tribe, and the Northern Cheyenne Tribe. EPA representatives met with Tribal officials from the Navajo Nation during coal mine site visits in New Mexico and Arizona in August 1998 to review environmental conditions and the applicability of the proposed regulation. In December 1999, EPA sent meeting invitations to Tribal Chairmen, Directors of Tribal Environmental Departments, and other representatives of the five Tribes with existing or potential interest in coal mining, and met with Tribal representatives from the Navajo Nation and Hopi Tribes in Albuquerque, NM on December 16, 1999 to consult on the proposed amendments to the existing effluent limitations guidelines, and to discuss plans for involvement at public

meetings in western locations. As a result of this consultation, EPA has agreed to a comment period on this Document of 90 days and has agreed to provide a copy of the relevant portions of the Rulemaking Record at the western location identified in the **ADDRESSES** section of this document. EPA has also agreed to hold public meetings in three locations that are convenient for attendance by Tribal representatives.

I. Plain Language Directive

Executive Order 12866 and the President's memorandum of June 1, 1998, require each agency to write all rules in plain language. We invite your comments on how to make this proposed rule easier to understand. For example, have we organized the material to suit your needs? Are the requirements in the rule clearly stated? Does the rule contain technical language or jargon that isn't clear? Would a different format (grouping and order of sections, use of headings, paragraphing) make the rule easier to understand? Would more (but shorter) sections be better? Could we improve clarity by adding tables, lists, or diagrams? What else could we do to make the rule easier to understand?

XII. Solicitation of Data and Comments

A. Specific Data and Comment Solicitation

EPA has solicited comments and data on many individual topics throughout this preamble. EPA incorporates each and every such solicitation here, and reiterates its interest in receiving data and comments on the issues addressed by those solicitations. In addition, EPA particularly requests comments and data on the following issues:

1. Regulatory Proposal

a. EPA solicits comments on the data and methods used to determine the benefit and cost impact values supporting this proposed regulation. (Refer to Section IX and Section X)

b. EPA solicits comment on the belief that this proposed rule will provide better environmental results than the current requirements. (Refer to Section III, Section IV, and Section VI)

c. EPA is soliciting comments on the potential impact of the proposed rule on small entities and on issues related to such impacts. (Refer to Section XI.B)

2. Coal Remining Subcategory Proposal

a. EPA believes that encouraging remining operations through the proposed subcategory has the potential for improving hazardous conditions and improving acid mine drainage from abandoned mine lands. EPA is soliciting comment on this conclusion and on potential options that may be environmentally preferable to the proposed Remining subcategory. EPA is also soliciting comments and additional data on the extent of abandoned mine land that may be affected by the proposed rule. (Refer to Section VI.A and Section IX.A)

b. EPA is soliciting comments on the proposed statistical procedures presented in Appendix B of the proposed regulation for calculating baseline limits and determining compliance with baseline limits and on the requirements for the number of samples, the sampling duration and frequency, and the plan of sampling over time. EPA is also soliciting comments and data on the feasibility of using acidity, net alkalinity, pH, and sulfate as parameters for assessment of pollution loading from pre-existing discharges. (Refer to Section VII.B and Section VII.C)

c. EPA is soliciting comments on the consistency of the proposed Remining subcategory with the Rahall Amendment and with existing State remining programs. (Refer to Section VI.A)

d. EPA is soliciting comments on the definition for pollution abatement area and on any additional requirements of pollution abatement plans that would ensure the proper use, design and implementation of BMPs for compliance with the proposed regulations. EPA also is soliciting comments on how the proposed regulations could better define a pollution abatement plan that would constitute BPT and on other treatment technologies that would be economically feasible and available for control of pre-existing discharges. (Section VI.A)

e. EPA is soliciting comments on the proposed applicability of the coal remining subcategory as it relates to commingling pre-existing discharges with active mining wastewater. (Refer to Section VI.A)

f. EPA is soliciting comments on the legal basis and technical support for alternative permits incorporating only BMP-based requirements with no numeric limits and for information on conditions to determine a site's eligibility. (Refer to Section VI.A)

g. EPA requests comment on how to describe and structure the requirement to design and implement a pollution abatement plan to reduce pollutant loadings from pre-existing discharges. (Refer to Section VI.A)

h. EPA requests comment on how the regulations could better define the type of plan that would constitute BPT and BAT. (Refer to Section VI.A)

i. EPA is soliciting comment on the applicability of the proposed Coal Remining Subcategory in regard to permit reissuance and Rahall-type permits. (Refer to Section VI.A)

3. Western Alkaline Coal Mining Subcategory Proposal

a. EPA is soliciting comments and data on the appropriateness of expanding the applicability of this proposed subcategory to include the control of non-process water drainage from active mining areas in the arid and semiarid region. (Refer to Section VI.B)

b. EPA is soliciting comments on the environmental impacts and benefits associated with operating sedimentation ponds in the arid and semiarid west and on the problems that are associated with disturbing the hydrologic balance in arid regions. (Refer to Section VI.B)

c. EPA also is soliciting comment on the appropriateness of establishing effluent limitations requiring only BMP plans rather than setting numeric limitations based on treatment technologies for drainage from reclamation areas in these regions. (Refer to Section VI.B)

d. EPA is soliciting comment on the appropriateness of BMP inspection to determine compliance with requirements of this subcategory. EPA also is soliciting comment on recommended procedures for and frequency of such inspections. (Refer to Section VI.B)

e. As applies to the Western Alkaline Coal Mining Subcategory, EPA defines "sediment yield" to mean the sum of the soil losses from a surface minus deposition in macro-topographic depressions, at the toe of the hillslope, along field boundaries, or in terraces and channels sculpted into the hillslope. EPA is soliciting comments on the definition of sediment yield and on the appropriateness of using this parameter as the basis for determining sediment loadings. (Refer to Section VI.B)

f. EPA is soliciting comments on the approach used to estimate reclamation cost savings that EPA expects will result from the proposed Western Alkaline Subcategory and on EPA's assumption that today's proposed subcategory would be cost neutral for underground operators. (Refer to Section X)

B. General Solicitation

EPA encourages public participation in this rulemaking. EPA asks that comments address any perceived deficiencies in the record supporting this proposal and that suggested revisions or corrections be supported by data. In addition, EPA requests

comments on the various methods of handling supporting data and information and on the applicability of these proposed guidelines, as they relate to the definitions for coal remining and western alkaline coal mining.

EPA invites all parties to coordinate their data collection activities with EPA to facilitate mutually beneficial and cost-effective data submissions. Please refer to the **FOR FURTHER INFORMATION** section at the beginning of this preamble for technical contacts at EPA.

To ensure that EPA can properly respond to comments, EPA prefers that commenters cite, where possible, the paragraph(s) or sections in the document or supporting documents to which each comment refers. Please submit an original and two copies of your comments and enclosures (including references).

Appendix A to the Preamble: Definitions, Acronyms, and Abbreviations Used in This Document

Act—Clean Water Act
Agency—U.S. Environmental Protection Agency
Alkaline mine drainage—mine drainage which, before any treatment, has a pH equal to or greater than 6.0 and total iron concentration of less than 10 mg/L
AML—Abandoned mine land
AMLIS—Abandoned Mine Land Inventory System
ASTM—American Society of Testing and Materials
BADCT—The best available demonstrated control technology, for new sources under section 306 of the Clean Water Act
Baseline—Pre-existing pollution loading. Baseline will be determined according to the protocol set forth by EPA in promulgation of this proposed rule
BAT—The best available technology economically achievable, under section 304(b)(2)(B) of the Clean Water Act
BCT—Best conventional pollutant control technology under section 304(b)(4)(B) of the Clean Water Act
BMP—Best management practices
BOD—Biochemical oxygen demand
BPJ—Best professional judgement
BPT—Best practicable control technology currently available, under section 304(b)(1) of the Clean Water Act
CBI—Confidential Business Information
CFR—Code of Federal Regulations
Clean Water Act—Federal Water Pollution Control Act Amendments (33 U.S.C. 1251 *et seq.*)
Conventional pollutants—Constituents of wastewater as determined by section 304(a)(4) of the Clean Water Act, including, but not limited to, pollutants classified as biochemical oxygen demanding, suspended solids, oil and grease, fecal coliform, and pH
CV—Coefficient of variation
CWA—Clean Water Act
CWAP—Clean Water Action Plan
Direct discharger—A facility that discharges or may discharge pollutants to waters of the United States
EPA—U.S. Environmental Protection Agency
FDF—Fundamentally different factors—Variance
FR—Federal Register
FTE—Full-time employees
ICR—Information Collection Request
IMCC—Interstate Mining Compact Commission
Indirect discharger—A facility that introduces wastewater into a publicly owned treatment works
IRFA—Initial Regulatory Flexibility Analysis
NAICS—North American Industry Classification System
NCA—National Coal Association
NMA—National Mining Association
NPDES—National Pollutant Discharge Elimination System
NRDC—Natural Resources Defense Council, Incorporated
NSPS—New source performance standards under section 306 of the Clean Water Act
NTTAA—National Technology Transfer and Advancement Act
OMB—Office of Management and Budget
OSM/OSMRE—Office of Surface Mining, Reclamation and Enforcement
PADEP—Pennsylvania Department of Environmental Protection
PRA—Paperwork Reduction Act
PHC—Probable Hydrologic Consequence
Pollution abatement area—The part of the permit area that is causing or contributing to the baseline pollution load, including areas that must be affected to bring about significant improvement of the baseline pollution load, and which may include the immediate location of the discharges.
POTW—Publicly-owned treatment works
PPA—Pollution Prevention Act of 1990
Pre-existing discharge—Any discharge resulting from mining activities conducted prior to August 3, 1977.
PSNS—Pretreatment standards for new sources
Reclamation area—the surface area of a coal mine that has been returned to required contour and on which revegetation (specifically, seeding or planting) work has been commenced.
Remining—Coal remining refers to a coal mining operation that began after February 4, 1987 at a site on which coal mining was conducted before August 3, 1977.
RFA—Regulatory Flexibility Act
RUSLE—Revised Universal Soil Loss Equation
SBA—Small Business Administration
SBREFA—Small Business Regulatory Enforcement Fairness Act
Sediment—All undissolved organic and inorganic material transported or deposited by water.
Sediment Yield—the sum of the soil losses from a surface minus deposition in macro-topographic depressions, at the toe of the hillslope, along field boundaries, or in terraces and channels sculpted into the hillslope.
SIC—Standard Industrial Classifications
SMCRA— Surface Mining Control and Reclamation Act
SS—Settleable Solids
TMDL—Total Maximum Daily Loads
Toxic Pollutants—The pollutants designated by EPA as toxic in 40 CFR 401.15.
TSS—Total Suspended Solids
UMRA—Unfunded Mandates Reform Act
U.S.C.—United States Code
WIEB—Western Interstate Energy Board
WTP—Willingness to pay

List of Subjects in 40 CFR Part 434

Environmental protection, Mines, Reporting and recordkeeping requirements, Water pollution control.

Dated: March 30, 2000.

Carol M. Browner,

Administrator.

For the reasons set forth in the preamble, 40 CFR part 434 is proposed to be amended as follows:

PART 434—[AMENDED]

1. The authority citation for part 434 continues to read as follows:

Authority: 33 U.S.C. 1311 1314(b), (c), (e), and (g), 1316(b) and (c), 1317(b) and (c), and 1361.

2. Amend § 434.11 by adding paragraphs (u), (v), (w), (x), (y), and (z) to read as follows:

§ 434.11 General definitions.

(u) The term "coal remining operation" means a coal mining operation at a site on which coal mining was conducted prior to August 3, 1977.

(v) The term "pollution abatement area" means the part of the permit area that is causing or contributing to the baseline pollution load, including areas that would need to be affected to reduce the pollution load.

(w) The term "pre-existing discharge" means any discharge resulting from mining activities conducted prior to August 3, 1977.

(x) The term "sediment" shall mean undissolved organic and inorganic material transported or deposited by water.

(y) The term "sediment yield" means the sum of the soil losses from a surface minus deposition in macro-topographic depressions, at the toe of the hillslope, along field boundaries, or in terraces and channels sculpted into the hillslope.

(z) The term "western coal mining operation" means a surface or underground coal mining operation located in the interior western United States, west of the 100th meridian west longitude, in an arid or semiarid environment with an average annual precipitation of 26.0 inches or less.

3. Revise § 434.50 to read as follows:

§ 434.50 Applicability.

The provisions of this subpart are applicable to discharges from post-mining areas, except as provided in § 434.80.

4. Add subpart G, consisting of §§ 434.70 through 434.74, to read as follows:

Subpart G—Coal Remining

Sec.
434.70 Applicability.
434.71 Effluent limitations attainable by the application of the best practicable control technology currently available (BPT).
434.72 Effluent limitations attainable by application of the best available technology economically achievable (BAT).
434.73 Effluent limitations attainable by application of the best conventional pollutant control technology (BCT).
434.74 New source performance standards (NSPS).

Subpart G—Coal Remining

§ 434.70 Applicability.

This subpart applies to pre-existing discharges that are located within pollution abatement areas of a coal remining operation and that are not commingled with waste streams from active mining areas. Pre-existing discharges that are commingled with waste streams from active mining areas are subject to the provisions of § 434.61. Pre-existing dischargers that have been, but are no longer commingled with waste streams from active mining areas, are subject to the provisions of this part. The effluent limitations in this subpart apply to pre-existing discharges until the appropriate SMCRA authority has authorized bond release.

§ 434.71 Effluent limitations attainable by the application of the best practicable control technology currently available (BPT).

(a) Except as provided in 40 CFR 125.30 through 125.32, the following effluent limits apply to pre-existing discharges:

EFFLUENT LIMITATIONS

Pollutant	Requirement
(1) Iron, total	May not exceed baseline loadings (as defined by Appendix B).
(2) Manganese, total	May not exceed baseline loadings (as defined by Appendix B).
(3) pH:	
(i) If all baseline observations are within the range of 6.0 to 9.0	Single observations must be in range of 6.0 to 9.0.
(ii) If any baseline observation is <6.0	Single observations must be ≥ lower limit (as defined by Appendix B) and ≤ 9.0.
(iii) If any baseline observation is > 9.0	Single observations must be ≤ upper limit (as defined in Appendix B) and ≥ 6.0.
(4) TSS	May not exceed 70.0 mg/L for any 1 day. Average of daily values for 30 consecutive days may not exceed 35.0 mg/L.[1]

[1] Except as provided in § 434.63

(b) Additionally, the operator must submit a pollution abatement plan for the pollution abatement area to the permit authority, that in the Best Professional Judgement (BPJ) of the permit writer, represents the Best Available Technology (BAT) currently available. The plan must be incorporated into the permit as an effluent limitation, and must be designed to reduce the pollution load from pre-existing discharges. The plan must identify characteristics of the pollution abatement area and the pre-existing discharges, and describe design specifications for selected best management practices (BMPs). The plan must include periodic inspection and maintenance schedules. The BMPs must be implemented as specified in the plan.

§ 434.72 Effluent limitations attainable by application of the best available technology economically achievable (BAT).

Except as provided in 40 CFR 125.30 through 125.32, pre-existing discharges must comply with the effluent limitations listed in § 434.71 for iron and manganese. The operator must also submit and implement a pollution abatement plan that, in the Best Professional Judgement (BPJ) of the permit writer, reflects BAT levels of control.

§ 434.73 Effluent limitations attainable by application of the best conventional pollutant control technology (BCT).

Except as provided in 40 CFR 125.30 through 125.32, pre-existing discharges must comply with the effluent limitations listed in § 434.71 for pH and total suspended solids. The operator must also submit and implement a pollution abatement plan as specified in § 434.71.

§ 434.74 New source performance standards (NSPS).

NSPS effluent limitations are not applicable to this subcategory. Pre-existing discharges that are located in pollution abatement areas of a coal remining operation and are not commingled with waste streams from active mining areas are considered existing sources and must meet BPT, BAT, and BCT effluent limitations at §§ 434.71 through 434.73.

5. Add subpart H, consisting of §§ 434.80 through 434.84, to read as follows:

Subpart H—Western Alkaline Coal Mining

Sec.
434.80 Applicability.
434.81 Effluent limitations attainable by the application of the best practicable control technology currently available (BPT).
434.82 Effluent limitations attainable by application of the best available technology economically achievable (BAT).
434.83 Effluent limitations attainable by application of the best conventional pollutant control technology (BCT). [Reserved]
434.84 New source performance standards (NSPS).

Subpart H—Western Alkaline Coal Mining

§ 434.80 Applicability.

This subpart applies to alkaline mine drainage from reclamation areas associated with western coal mining operations. Reclamation areas not associated with western coal mining operations or that produce acid mine drainage are subject to the provisions established in Subpart E-Post-Mining Areas. The effluent limitations in this subpart apply until the appropriate SMCRA authority has authorized bond release.

§ 434.81 Effluent limitations attainable by the application of the best practicable control technology currently available (BPT).

Except as provided in 40 CFR 125.30 through 125.32, the following effluent

limitations apply to alkaline mine drainage from reclamation areas of western coal mining operations:

(a) A western coal mining operator must submit a site-specific sediment control plan for surface reclamation areas to the permitting authority. The sediment control plan must be incorporated into the permit as an effluent limitation. The sediment control plan must identify best management practices. It also must describe design specifications, construction specifications, maintenance schedules, criteria for inspection, as well as expected performance and longevity of the best management practices.

(b) A western coal mining operator must run a watershed model and submit results demonstrating that implementation of the sediment control plan will result in average annual sediment yields that will not be greater than background levels from pre-mined, undisturbed conditions. The operator must use the same watershed model that was or will be used to acquire the SMCRA permit.

(c) A western coal mining operator must design, implement, and maintain sediment control measures in the manner specified in the sediment control plan.

§ 434.82 Effluent limitations attainable by application of the best available technology economically achievable (BAT).

Except as provided in 40 CFR 125.30 through 125.32, any existing western coal mining operation subject to this subpart must meet the effluent limitations listed in § 434.81.

§ 434.83 Effluent limitations attainable by application of the best conventional pollutant control technology (BCT). [Reserved]

§ 434.84 New source performance standards (NSPS).

Any new source western coal mining operation subject to this subpart must meet the effluent limitations listed in § 434.81.

6. Add appendix B to part 434 to read as follows:

Appendix B to Part 434—Baseline Determination and Compliance Monitoring for Pre-existing Discharges at Remining Operations

I. Summary

1. This appendix presents the procedures to be used for establishing effluent limitations for pre-existing discharges at coal remining operations, in accordance with the requirements set forth in this part, Coal Remining Subcategory. The requirements specify that pollutant levels of total iron, total manganese, and pH in pre-existing discharges shall not exceed baseline pollutant levels. The procedures described in this appendix shall be used for determining site-specific, baseline pollutant levels, and for determining discharge exceedances during coal remining operations. Procedures A and B are alternatives—either one may be selected by a permitting authority. Because pH data examined by EPA do not appear to be well-described by a log-normal distribution, EPA recommends the use of Procedure A for determining pH limits and exceedances.

2. Below are the steps for running Procedures A and B for determining baseline and compliance with baseline pollution loading. Examples of these procedures are provided in Appendix A of EPA's *Coal Remining Statistical Support Document*. In order to sufficiently characterize pollutant levels during baseline determination and during each annual monitoring period, it is required that at least one sample result be obtained per month for a period of 12 months.

3. In those cases where any baseline observation is above 9.0 standard pH units, an upper limit or trigger and compliance should be determined in the same way limits and compliance are determined for pollutant loadings. If the upper limit determined in this manner is less than 9.0, the limit may be set at 9.0. In cases where any baseline observation for pH is less than 6.0 standard pH units, lower limits or triggers and compliance determinations for pH should be determined using transformed data (Y = 14—pH). Once the lower limit or trigger is determined for Y, it should be transformed back (14—Limit for Y), to apply as standard pH units. If the lower limit determined in this manner is greater than 6.0, then the limit may be set at 6.0.

II. Procedure A for Comparing Baseline and Monitoring Loading Observations

Procedure A implements a single observation trigger, and a subtle trigger used for annual comparisons.

A. Calculation and Application of Single Observation Trigger (L)

Step 1. Count the number of baseline observations taken for the parameter of interest. Label this number n.

Step 2. Order all baseline loading observations from lowest to highest. Let the lowest number (minimum) be $x_{(1)}$, the next lowest be $x_{(2)}$, and so forth until the highest number (maximum) is $x_{(n)}$.

Step 3. If less than 17 baseline observations were obtained, then the single observation trigger (L) will equal the maximum of the baseline observations ($x_{(n)}$). Go to step 4.

If at least 17 baseline observations were obtained, calculate the median (M) of all baseline observations:

Instructions for calculation of M:

If n is odd, then M equals $x_{(n/2 + 1/2)}$.

For example, if there are 17 observations, then $M = X_{(17/2 + 1/2)} = x_{(9)}$, the 9th highest observation.

If n is even, then M equals $0.5 * (x_{(n/2)} + x_{(n/2 + 1)})$.

For example, if there are 18 observations, then M equals 0.5 multiplied by the sum of the 9th and 10th highest observations.

(a) Calculate M_1 as the median of the subset of observations that range from the calculated M to the maximum $x_{(n)}$

(b) Calculate M_2 as the median of the subset of observations that range from the calculated M_1 to $x_{(n)}$.

(c) Calculate M_3 as the median of the subset of observations that range from the calculated M_2 to $x_{(n)}$.

(d) Calculate the single observation trigger (L) as the median of the subset of observations that range from the calculated M_3 to $x_{(n)}$.

Note: When subsetting the data for each of steps 3a–3d, the subset should include all observations greater than or equal to the median calculated in the previous step. If the median calculated in the previous step is not an actual observation, it is not included in the new subset of observations. The new median value will then be calculated using the median procedure, based on whether the number of points in the subset is odd or even.

Step 4. If a monitoring observation exceeds L, immediately begin weekly monitoring for four weeks (four weekly samples).

Step 5. If any two observations exceed L during weekly monitoring, declare exceedance of the baseline pollution loading.

B. Calculation and Application of Subtle Trigger (T)

Step 1. Calculate M and M_1 of the baseline loading data as described in step 3 for the Single observation trigger above.

Step 2. Calculate M_{-1} as the median of the baseline data which are less than or equal to the sample median M.

Step 3. Calculate $R=(M_1-M_{-1})$.

Step 4. The subtle trigger (T) is calculated as:

$$T = M + \frac{1.58 * [(1.25 * R)]}{\left(1.35 * \sqrt{n}\right)}$$

where n is the number of baseline loading observations.

Step 5. To compare baseline loading data to observations from the annual

monitoring period, repeat steps 1–3 for the set of monitoring observations. Label the results of the calculations M' and R'. Let m be the number of monitoring observations.

Step 6. The subtle trigger (T') of the monitoring data is calculated as:

$$T' = M' - \frac{1.58 * [(1.25 * R')]}{\left(1.35 * \sqrt{m}\right)}$$

Step 7. If T' > T , conclude that the median loading of the monitoring observations has exceeded the median loading during the baseline period, and declare an exceedance of the baseline pollution loading.

III. Procedure B for Comparing Baseline and Monitoring Loading Observations

Procedure B implements a single observation limit and warning level, a Cumulative Sum limit and warning level, and the Wilcoxon-Mann-Whitney test for annual comparisons. The Cumulative Sum test is run each time a new observation is acquired during monitoring, to test for an increase in the mean of the loading observations.

A. Calculation and Application of Single Observation Limit

Step 1. Count the number of baseline loading observations taken for the parameter of interest. Label this number n.

Step 2. Take the natural logarithm of all baseline loading observations. Label the observations $y_1, y_2, y_{31}, \ldots, y_n$.

Step 3. Calculate the average of all the natural logarithms. Label the average E_y.

Step 4. Calculate A using the equation:

$$A = \frac{1}{1 - \left(\frac{2}{n} * 0.5\right)}$$

Step 5. Calculate s_y^2 using the equation:

$$s_y^2 = A * \sum \frac{\left[\left(y_i - E_y\right)^2\right]}{n-1}, \text{ with i ranging from 1 to n.}$$

Step 6. Calculate E_x using the equation:

$$E_x = \exp\left(E_y + 0.5\, s_y^2\right)$$

Step 7. Calculate the single observation limit as:

$$\exp\left[E_y + \left(2.3263 * \sqrt{s_y^2}\right)\right]$$

If the single observation limit is exceeded by any monitoring observation, then declare an exceedance of the baseline pollution loading.

B. Single Observation Warning Level

Step 1. Calculate the warning level as:

$$\exp\left[E_y + \left(1.6449 * \sqrt{s_y^2}\right)\right]$$

where E_y and s_y^2 are calculated in steps 3 and 5 of the single observation limit procedure. If the warning level, but not the single-observation limit, is reached, then an investigation and further action should be considered.

Step 2. Keep and report a graph showing the monitoring observations plotted against month or successive observation times, and also showing the single observation limit, warning level, and E_x.

C. Calculation and Application of Cumulative Sum (Cusum) Limit

This procedure is used to determine whether there is an increase in the mean of monitoring observations, and should be run after each new observation has been collected.

Step 1. Let n be the number of monitoring observations.

Step 2. Take the natural logarithm of all the monitoring loading observations.

Step 3. Order the log-transformed observations based on collection time, and label them so that Y_1 is the first observation taken, Y_2 is the second observation taken, and so forth. Y_n is the last observation taken.

Step 4. Calculate K using the equation:

$K = E_y + 0.25 * s_y$,

where E_y is the baseline mean calculated in step 3 of the single observation limit procedure, and s_y is the square root of the baseline variance calculated in step 5 of the single observation limit procedure.

Step 5. Calculate C_1 using the equation:

$C_1 = Y_1 - K$.

Step 6. Calculate C_2 using the equation:

$C_2 = C_1 + (Y_2 - K)$

If C_2 is negative, then let $C_2 = 0$.

Step 7. Calculate C_3 using the equation:

$C_3 = C_2 + (Y_3 - K)$

If C_3 is negative, then let $C_3 = 0$.

Step 8. Repeat step 7 for each of the remaining times, using the general equation (let t be some time between 3 and n):

$C_t = C_{t-1} + (Y_t - K)$

If C_t is negative, then let $C_t = 0$.

Step 9. Calculate H using the equation:

$H = 8.0 * s_y$

H is the Cusum limit, not to be exceeded by any C_t.

Step 10. If any C_t reaches or exceeds H, then declare an exceedance of the baseline pollution loading.

Step 11. Keep and report a graph showing C_t versus successive observation times and showing the Cusum limit H.

D. Cusum Warning Level

Step 1. Let W_1 be the Cumulative Sum warning level for the first observation collected, W_2 be the Cumulative Sum warning level for the second observation taken, and so forth.

Step 2. Calculate K_w and H_w using the equations:

$K_w = E_y + 0.5 * s_y$,

$H_w = 3.5 * s_y$

Step 3. Calculate W_t by using steps 5 through 8 of the Cusum limit procedure, replacing K with K_w.

Step 4. If any W_t reaches or exceeds H_w, then an investigation and further action should be considered.

Step 5. Keep and report a chart W_t vs. month or successive observation time, and showing the Cusum warning level H_w. Consider making an investigation and taking action when the warning level is reached.

E. Annual comparisons

Compare baseline year loadings with current annual loadings using the Wilcoxon-Mann-Whitney test. Instructions for running the test are below:

Step 1. Steps for running Wilcoxon-Mann-Whitney test:

(a) Let n be the number of baseline loading observations taken, and let m be the number of monitoring loading observations taken.

(b) Order the combined baseline and monitoring observations from smallest to largest (the observations do not need to be log-transformed for this test).

(c) Assign a rank to each observation based on the assigned order: the smallest observation will have rank 1, the next smallest will have rank 2, and

so forth, up to the highest observation, which will have rank n + m.

If two or more observations are tied (have the same value), then the average rank for those observations should be used. For example, suppose the following four values are being ranked: 3, 4, 6, 4.

Since 3 is the lowest of the four numbers, it would be assigned a rank of 1. The highest of the four numbers is 6, and would be assigned a rank of 4. The other two numbers are both 4. Rather than assign one a rank of 2 and the other a rank of 3, the average of 2 and 3 (i.e., 2.5) is given to both numbers.

(d) Sum all the assigned ranks of the n baseline observations, and let this sum be S_n.

(e) Obtain the critical value (C) from Table 1. For the case where 12 monthly samples were collected for both baseline and monitoring (i.e., n=12 and m=12), the critical value is 121.

(f) Compare C to S_n. If S_n is less than C, then the monitoring loadings have exceeded the baseline loadings. Alternatively, calculate S_m as the sum of ranks for the monitoring observations; if S_m exceeds $C' = [n(n+m+1) - C]$, then the monitoring loadings have exceeded the baseline loadings.

STEP 2.—EXAMPLE CALCULATIONS FOR WILCOXON-MANN-WHITNEY TEST

Baseline Data	8.0	9.0	9.0	10.0	12.0	15.0	17.0	18.0	21.0	23.0	28.0	30.0
Monitoring Data	9.0	10.0	11.0	12.0	13.0	14.0	16.0	18.0	20.0	24.0	29.0	31.0
Baseline Ranks	1.0	3.0	3.0	5.5	8.5	12.0	14.0	15.5	18.0	19.0	21.0	23.0
Monitoring Ranks	3.0	5.5	7.0	8.5	10.0	11.0	13.0	15.5	17.0	20.0	22.0	24.0

Note.—Sum of Ranks for Baseline is Sn = 143.5, critical value is Cn, m = 121.

TABLE 1 TO APPENDIX B.—CRITICAL VALUES (C) OF THE WILCOXON-MANN-WHITNEY TEST (FOR A ONE-SIDED TEST AT THE 95% LEVEL)

[In order to find the appropriate critical value, match column with correct n (number of baseline observations) to row with correct m (number of monitoring observations)]

m \ n	10	11	12	13	14	15	16	17	18	19	20
10	83	98	113	129	147	165	185	205	227	249	273
11	87	101	117	134	152	171	191	211	233	256	280

Part III

Department of Transportation

Office of the Secretary

Privacy Act of 1974: Systems of Records; Notice

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Privacy Act of 1974: Systems of Records

AGENCY: Operating Administrations, DOT.

ACTION: Notice to amend and delete systems of records.

SUMMARY: The United States Department of Transportation is publishing its Privacy Act System of Records notices subject to the Privacy Act of 1974 (5 USC 552a) in their entirety. This notice incorporates a Purpose statement and makes any other minor changes or deletions to existing notices.

EFFECTIVE DATE: April 11, 2000.

ADDRESSES: Send comments to the Privacy Act Officer, United States Department of Transportation, 400 7th St., SW., Washington DC 20590.

FOR FURTHER INFORMATION CONTACT: Vanester M. Williams at (202) 366–1771.

SUPPLEMENTARY INFORMATION: These minor changes are not within the purview of subsection (r) of the Privacy Act of 1974, as amended, which requires the submission of a new or altered systems report. In addition, several departmental systems of records are being deleted as they are either covered by another system of record or are no longer in use.

Table of Contents

Appendix Prefatory Statement of General Routine Uses
DOT/ALL 1—DOT Grievance Records Files.
DOT/ALL 5 Employee Counseling Services Program Records.
DOT/ALL 6 Workers' Compensation Information System.
DOT/ALL 7 Departmental Accounting and Financial Information System, DAFIS.
DOT/ALL 8 Employee Transportation Facilitation.
DOT/ALL 9 Identification Media Record System.
DOT/ALL 10 Debt Collection File.
DOT/ALL 11 Integrated Personnel and Payroll System, IPPS.
DOT/ALL 12 DOT Mentoring Program Records System.
DOT/CG 501 Auxiliary Management Information System, AUXMIS.
DOT/CG 503 Motorboat Registration.
DOT/CG 505 Recreational Boating Law Enforcement Case Files.
DOT/CG 507 Coast Guard Supplement to the Manual of Courts Martial Investigations.
DOT/CG 508 Claims and Litigation.
DOT/CG 509 Non-Judicial Punishment Report.
DOT/CG 510 Records of Trial: Special, General and Summary Courts-Martial.
DOT/CG 511 Legal Assistance Case File System.
DOT/CG 526 Adjudication and Settlement of Claims System.
DOT/CG 528 Centralized Reserve Pay and Retirement System.
DOT/CG 533 Retired Pay and Personnel System.

Notice of Systems of Records

The identification of the operating unit or units within the Department to which the particular system of records pertains appears as 'DOT' followed by a designating abbreviation. The abbreviations and their meanings are as follows:

OST—Office of the Secretary of Transportation.
CG—United States Coast Guard.
FAA—Federal Aviation Administration.
FHWA—Federal Highway Administration.
FRA—Federal Railroad Administration.
MARAD—Maritime Administration.
NHTSA—National Highway Traffic Safety Administration.
RSPA—Research and Special Programs Administration.
SLS—Saint Lawrence Seaway Development Corporation.
TSC—Transportation Systems Center.
FTA—Federal Transit Administration.

General Routine Uses Under the Privacy Act of 1974

The following routine uses apply, except where otherwise noted or where obviously not appropriate, to each system of records maintained by the Department of Transportation, DOT.

1. In the event that a system of records maintained by DOT to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto.

2. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a DOT decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

3. A record from this system of records may be disclosed, as a routine use, to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

4a. Routine Use for Disclosure for Use in Litigation. It shall be a routine use of the records in this system of records to disclose them to the Department of Justice or other Federal agency conducting litigation when

(a) DOT, or any agency thereof, or

(b) Any employee of DOT or any agency thereof (including a member of

the Coast Guard), in his/her official capacity, or

(c) Any employee of DOT or any agency thereof (including a member of the Coast Guard), in his/her individual capacity where the Department of Justice has agreed to represent the employee, or

(d) The United States or any agency thereof, where DOT determines that litigation is likely to affect the United States, is a party to litigation or has an interest in such litigation, and the use of such records by the Department of Justice or other Federal agency conducting the litigation is deemed by DOT to be relevant and necessary in the litigation, provided, however, that in each case, DOT determines that disclosure of the records in the litigation is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

4b. Routine Use for Agency Disclosure in Other Proceedings. It shall be a routine use of records in this system to disclose them in proceedings before any court or adjudicative or administrative body before which DOT or any agency thereof, appears, when

(a) DOT, or any agency thereof, or

(b) Any employee of DOT or any agency thereof (including a member of the Coast Guard) in his/her official capacity, or

(c) Any employee of DOT or any agency thereof (including a member of the Coast Guard) in his/her individual capacity where DOT has agreed to represent the employee, or (d) The United States or any agency thereof, where DOT determines that the proceeding is likely to affect the United States, is a party to the proceeding or has an interest in such proceeding, and DOT determines that use of such records is relevant and necessary in the proceeding, provided, however, that in each case, DOT determines that disclosure of the records in the proceeding is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

5. The information contained in this system of records will be disclosed to the Office of Management and Budget, OMB in connection with the review of private relief legislation as set forth in OMB Circular No. A–19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

6. Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual. In such cases, however, the Congressional office does not have greater rights to records than the individual. Thus, the disclosure may be withheld from delivery to the individual where the file contains investigative or actual information or other materials which are being used, or are expected to be used, to support prosecution or fines against the individual for violations of a statute, or of regulations of the Department based on statutory authority. No such limitations apply to records requested for Congressional oversight or legislative purposes; release is authorized under 49 CFR 10.35(9).

7. One or more records from a system of records may be disclosed routinely to the National Archives and Records Administration in records management inspections being conducted under the authority of 44 USC 2904 and 2906.

8. [Reserved]

9. DOT may make available to another agency or instrumentality of any government jurisdiction, including State and local governments, listings of names from any system of records in DOT for use in law enforcement activities, either civil or criminal, or to expose fraudulent claims, regardless of the stated purpose for the collection of the information in the system of records. These enforcement activities are generally referred to as matching programs because two lists of names are checked for match using automated assistance. This routine use is advisory in nature and does not offer unrestricted access to systems of records for such law enforcement and related antifraud activities. Each request will be considered on the basis of its purpose, merits, cost effectiveness and alternatives using Instructions on reporting computer matching programs to the Office of Management and Budget, OMB, Congress and the public, published by the Director, OMB, dated September 20, 1989.

10. It shall be a routine use of the information in any DOT system of records to provide to the Attorney General of the United States, or his/her designee, information indicating that a person meets any of the disqualifications for receipt, possession, shipment, or transport of a firearm under the Brady Handgun Violence Prevention Act. In case of a dispute concerning the validity of the information provided by DOT to the Attorney General, or his/her designee, it shall be a routine use of the information in any DOT system of records to make any disclosures of such information to the National Background Information Check System, established by the Brady Handgun Violence Prevention Act, as may be necessary to resolve such dispute.

Appendix I—Location of CG Districts and Headquarters Units

1. Commander, 1st Coast Guard District, 408 Atlantic Avenue, Boston, MA 02110–3350.

2. Commander, 5th Coast Guard District, Federal Building, 431 Crawford Street, Portsmouth, VA 23704–5004.

3. Commander, 7th Coast Guard District, 909 SE First Ave., Brickell Plaza Federal Bldg., Miami, FL 33131–3050.

4. Commander, 8th Coast Guard District, Hale Boggs Federal Building, 500 Camp Street, New Orleans, LA 70130–3396.

5. Commander, 9th Coast Guard District, 1240 East 9th St., Cleveland, OH 44199–2060.

6. Commander, 11th Coast Guard District, Coast Guard Island, Alameda, CA 94501–5100.

7. Commander, 13th Coast Guard District, Jackson Federal Bldg, 915 Second Ave., Seattle, WA 98174–1067.

8. Commander, 14th Coast Guard District, Prince Kalaniaaole, Federal Building, 300 Ala Moana Blvd., 9th Floor, Honolulu, HI 96580–4982.

9. Commander, 17th Coast Guard District, PO Box 25517, Juneau, Alaska 99802–5517.

10. Superintendent, United States Coast Guard Academy, 15 Mogehan Ave., New London, CT 06320–8100.

11. Commanding Officer, United States Coast Guard Yard, 2401 Hawkins Point Road, Bldg. 1, Baltimore, MD 21226–1797.

12. Commanding Officer, United States Coast Guard Training Center, 1 Munro Avenue, Cape May, NJ 08204.

13. Commanding Officer, United States Coast Guard Institute, 5900 SW 64th Street, Room 235, Oklahoma City, OK 73169–6990.

14. Commanding Officer, U.S Coast Guard, Aircraft Repair & Supply Center, Elizabeth City, NC 27909–5001.

15. Commanding Officer, United States Coast Guard Aviation, 8501 Tanner Williams Road, Mobile, AL 36608–8322.

16. Commanding Officer, United States Coast Guard, 7323 Telegraph Rd., Alexandria, VA 22315–3940.

17. Commanding Officer, United States Coast Guard Reserve, Training Center, Yorktown, VA 23690–5000.

18. Commanding Officer, United States Coast Guard, Training Center, 599 Tomales Road, Petaluma, CA 94952–5000.

19. Commanding Officer, United States Coast Guard Aviation, Technical Training Center, Elizabeth City, NC 27909–5003.

20. Commanding Officer, U.S. Coast Guard, Research and Development Center, 1082 Shennecossett Road, Groton, CT 06340–6096.

21. Commanding Officer, U.S. Coast Guard, Human Resources Services and Information Center, Federal Bldg., 444 SE Quincy St., Topeka, KS 66683–3591.

DOT/ALL 1

SYSTEM NAME:

DOT Grievance Records Files.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Records are maintained in the personnel office that services the aggrieved employee if the grievance was processed under Departmental Personnel Manual, DPM 771–1, Agency Administrative Grievance System, pursuant to 5 CFR part 771. If processed under a negotiated grievance procedure from an approved labor agreement on behalf of a member, of a group of members, of a recognized collective bargaining unit, or if processed by the union, the grievance record is maintained in the office of the official administering the labor agreement pertaining to the collective bargaining unit. Addresses of servicing personnel offices are as follows: USCG Civilian Personnel Office, CGPC–CPM, 2100 2nd Street SW., Room 6224, Washington, DC 20593–00001; Federal Highway Administration, Office of Human Resources, 400 7th Street, SW., Room 4317,Washington, DC 20590; Federal Railroad Administration, Office of Human Resources, 1120 Vermont Ave, NW, RAD–10, Stop 30, Washington, DC 20005; Federal Transit Administration, Office of Human Resources, TAD–30, Room 9113, Washington, DC 20590; Office of Inspector General, Office of Human Resources, JM–20, Room 7107, Washington, DC 20590; Maritime Administration, Office of Personnel, MAR–360, Room 8101, Washington, DC 20590; National Highway Traffic Safety Administration, Office of Human Resources, NAD–20, Room 5306, Washington, DC 20590; Departmental Office of Human Resource Management, Departmental Director, M–10, Room 7411,Washington, DC 20590; Transportation Administrative Service Center, Human Resource Services, SVC–190, Room 2225, Washington, DC 20590; Research and Special Programs Administration, Office of Human Resources Management, DMA–40, Room 7108, Washington, DC 20590; Research and Special Programs Administration, VOLPE National Transportation Systems Center, Human Resources Management Division, DTS–84, Room 2–122, 55 Broadway, Cambridge, MS 02142–1093; Saint Lawrence Seaway Development Corporation, Office of Administration, PO Box 520, 180 Andrews Street, Massena, NY 13662–0520; Surface Transportation Board, 1925 K Street, NW., Suite 880, Washington, DC 20423; Federal Aviation Administration, National Headquarters, Office of Personnel, AHP–1, Room 500E, 800 Independence Avenue, SW., Washington, DC 20591; Federal Aviation Administration, Alaskan Region, 222 West 7th Avenue, PO Box 14, Anchorage, AK 99513–7587; Federal Aviation Administration, Western Pacific Region, PO Box 92007, World Postal Center, Los Angeles, CA 90009; Federal Aviation Administration, Southern Region, PO Box 20636, Atlanta, GA 30320; Federal Aviation Administration, Great Lakes Region, O'Hare Lake Office Center, 2300 East Devon Avenue, Des Plaines, IL 60018; Federal Aviation Administration, New England Region; 12 New England Executive Park, Burlington, MA 01803; Federal Aviation Administration, Central Region, 601 East 12th Street, Kansas City, MO 64106; Federal Aviation Administration, Eastern Region, Fitzgerald Federal Building, JFK International Airport, Jamaica, NY 11430; Federal Aviation Administration, Southwest Region, 2601 Meacham Blvd., Fort Worth, TX 76137–4298; Federal Aviation Administration, Northwest Mountain Region, 1601 Lind Avenue SW., Renton, WA 98055–4056; Federal Aviation Administration, William J. Hughes, Technical Center, Atlantic City Intl Airport, Atlantic City, NJ 08405; Federal Aviation Administration; Mike Monroney Aeronautical Center, PO Box 25082, Oklahoma City, OK 73125.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former DOT employees who have submitted grievances with their respective administrations under OPM Letter 771–1, or grievances pertaining to members of DOT Collective Bargaining Units which were submitted in accordance with negotiated grievance procedures.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains records relating to grievances filed by or on behalf of DOT: statements of employees, witnesses, reports of interviews and hearings, fact-finders and/or arbitrator's findings and recommendations, copies of decisions and correspondence and exhibits.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 7121; 5 CFR part 771.

PURPOSE(S):

Determine validity of grievance.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Disclose information to officials of the Merit Systems Protection Board, including the Office of the Special Counsel; the Federal Labor Relations Authority and its General Counsel; or the Equal Employment Opportunity Commission when requested in performance of their authorized duties. Provide information to officials of labor organizations recognized under the Civil Service Reform Act when relevant and necessary to their duties of exclusive representation concerning personnel policies, practices, and matters affecting work conditions.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Names of the individuals on whom they are maintained, or by names and local identification of unions.

SAFEGUARDS:

These records are maintained in lockable metal filing cabinets to which only authorized personnel have access.

RETENTION AND DISPOSAL:

These records may be disposed of 3 years after closing of the case. Disposal is by shredding or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Human Resource Management, M–10, United States Department of Transportation, 400 7th Street, SW., Room 7411, Washington, DC 20590

NOTIFICATION PROCEDURE:

Same as "System Manager."

RECORD ACCESS PROCEDURES:

Same as "System Manager."

CONTESTING RECORD PROCEDURES:

Same as "System Manager."

RECORD SOURCE CATEGORIES:

Individual on whom the records is maintained. Testimony of witnesses. Agency officials. Related correspondence from organization or persons.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/ALL 5

SYSTEM NAME:

Employee Counseling Services Program Records.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Employee Counseling Service, which provides counseling to the employee.

Other Federal, state, or local government, or private sector agency or institution providing counseling services.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former DOT employees who have been counseled or otherwise treated regarding alcohol or drug abuse or for personal or emotional health problems.

CATEGORIES OF RECORDS IN THE SYSTEM:

Documentation of visits to employee counselors (Federal, state, local government, or private) and the diagnosis, recommended treatment, results of treatment, and other notes or records of discussions held with the employee made by the counselor. Documentation of treatment by a private therapist or a therapist at a Federal, state, local government, or private institution.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 3301 and 7901, 21 U.S.C. 1101, 42 U.S.C. 4541 and 4561, and 44 U.S.C. 3101.

PURPOSE(S):

Document the nature of the individual's problem and progress made and to record an individual's participation in and the results of community or private sector treatment or rehabilitation programs.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Disclose information to qualified personnel for the purpose of conducting scientific research, management audits, financial audits, or program evaluation, but such personnel may not identify, directly or indirectly, any individual patient in any report or otherwise disclose patient identities in any manner (when such records are provided to qualified researchers employed by DOT, all patient identifying information shall be removed). Disclose information, when an individual to whom a record pertains is mentally incompetent or under legal disability, to any person who is responsible for the care of the individual. DOT's General Routine Uses do not apply to this system. Whenever possible, a partial disclosure will be made or a summary of the contents of the record will be disclosed.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders.

RETRIEVABILITY:

These records are retrieved by the name or social security number of the individual on whom they are maintained or by a unique case file identifier.

SAFEGUARDS:

These records are maintained in locked file cabinets with regular access strictly limited to employees directly involved in the DOT's Employee Counseling Services Program.

RETENTION AND DISPOSAL:

Records are maintained for three to six years after the employee's last contact with DOT's Employee Counseling Services Program.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Personnel, Office of the Secretary, M–10, Department of Transportation, Room 7411, 400 7th Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Contact the DOT Employee Counseling Services Program coordinator who arranged for counseling or treatment.

RECORD ACCESS PROCEDURES:

Same as "Notification Procedure."

CONTESTING RECORD PROCEDURES:

Same as "Notification Procedure."

RECORD SOURCE CATEGORIES:

Individual to whom it applies, the supervisor of the individual if the individual was referred by the Supervisor, the Employee Counseling Service Program staff member who records the counseling session, and therapists or institutions providing treatment.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/ALL 6

SYSTEM NAME:

Workers' Compensation Information System.

SECURITY CLASSIFICATION:

Sensitive, unclassified.

SYSTEM LOCATION:

These records are maintained at the Departmental Office of Human Resource Management, Office of the Secretary, in Washington, DC; at the operating administration human resource management offices in Washington, DC, and in their in regional offices and centers; and at the Departmental Personnel and Policy Division at the Mike Monroney Aeronautical Center in Oklahoma City, Oklahoma.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All current and former DOT employees who file (d) claims for Federal Employees' Compensation, FEC, or report work-related injuries or occupational health-related illnesses.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system consists of information that is derived from DOT personnel and payroll records, and from Federal Employees' Compensation claims records maintained by the Department of Labor/Office of Workers' Compensation Programs, OWCP. OWCP records include information regarding claims filed by DOT employees, members of the US Coast Guard Auxiliary, and students at the US Merchant Marine Academy.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. Chapter 8101 *et seq.*, 20 CFR 1.1 *et seq.*, 5 U.S.C. 552a, and Department of Labor and DOT implementing regulations.

PURPOSE(S):

The purpose of this system of records is to establish and maintain an automated data/information base that is used to improve claims management of the Federal Employees Compensation program within the Department; develop policy guidance; and promote training programs.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records are maintained in accordance with law and regulation in order to ensure proper and efficient management of the Federal Employees Compensation program within DOT. These records are required to assure compliance with the law and regulations and for maintaining program cost analysis and comparison information. These records provide occupation-related data including personnel data for the purpose of determining patterns of injury or illness and determining case disposition information. They are a source of information for purposes of controverting claims when appropriate, monitoring recovery of injured employees and offering of light duty assignments. Records in this system

may also be integrated with other DOT program-related personnel information as required for the sound policy or fiscal management of the program and the agency's mission, or in response to legislative and/or administrative initiatives or requirements. These records may be used as a source of information for the development of policy guidance and/or training programs, for program review and evaluation purposes, and for the provision of management information on an as required or ad hoc basis. Users include DOT human resource management officials, safety and health officials, supervisors, and managers.

These records are to be held in confidence and no information shall be disclosed except:

a. To the Department of Labor, OWCP, OSHA, the DOT Office of Inspector General, and/or OPM for review of appropriate case and/or investigative actions in collaboration with them.

b. Also, see the Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Not applicable.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders, magnetic tape and disk. Storage is at the geographic location of the servicing human resource management offices, the Headquarters human resource management policy offices, and the Departmental Personnel and Payroll Division at the Mike Monroney Aeronautical Center in Oklahoma City, Oklahoma.

RETRIEVABILITY:

Records are maintained by employee name, social security and FEC case numbers, and regional/location identifiers.

SAFEGUARDS:

Access to and use of these records are limited to those persons whose official duties require such access. Direct access to the automated database must be authorized by the Departmental Manager, Department of Transportation Workers' Compensation Program.

RETENTION AND DISPOSAL:

These records are maintained and disposed of in accordance FPMR 101 0911.4, General Records Schedules.

SYSTEM MANAGER(S) AND ADDRESS:

Departmental Manager, Department of Transportation Workers' Compensation Program, Office of the Secretary, Departmental Office of Human Resource Management, 400 Seventh Street SW., Washington, DC 20590.

Office of Labor and Employee Relations, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591.

Chief, Office of Civilian Personnel, United States Coast Guard, 200 Second Street SW., Washington, DC 20593.

Director, Office of Human Resources, Federal Highway Administration, 400 Seventh Street SW., Washington, DC 20590.

Director, Office of Personnel, Federal Railroad Administration, 1120 Vermont Avenue NW, Washington, DC 20005.

Director, Office of Human Resources, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590.

Director, Office of Human Resources, Federal Transit Administration, 400 Seventh Street SW., Washington, DC 20590.

Director, Office of Personnel, Maritime Administration, 400 Seventh Street SW., Washington, DC 20590.

Director, Office of Human Resource Management, Research and Special Programs Administration, 400 Seventh Street SW., Washington, DC 20590.

Principal, Human Resource Services, Transportation Administrative Service Center, 400 Seventh Street SW., Washington, DC 20590.

Director, Office of Human Resources, Office of Inspector General, 400 Seventh Street SW., Washington, DC 20590.

Director, Office of Administration, Saint Lawrence Seaway Development Corporation, 180 Andrews Street, Massena, NY 13662–1763.

Department of Transportation, Regional Human Resource Management Officers.

NOTIFICATION PROCEDURE:

Individuals wishing to know if their records appear in this system of records may inquire in person or writing to the system manager.

RECORD ACCESS PROCEDURES:

Individuals who desire information about themselves contained in this system of records should contact or address their inquiries to the system manager.

CONTESTING RECORD PROCEDURES:

Individuals who desire to contest records about themselves contained in this system should contact or address their inquiries to the system manager.

RECORD SOURCE CATEGORIES:

Information contained in this system is received from DOT records or OWCP records received from and maintained on DOT and its employees, members of the US Coast Guard Auxiliary, and students at the US Merchant Marine Academy.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/ALL 7

SYSTEM NAME:

Departmental Accounting and Financial Information System, DAFIS.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

The system is located in Department of Transportation, DOT Accounting offices and selected program, policy, and budget Offices. These offices are located within the Office of the Secretary, OST, the Research and Special Programs Administration, RSPA, the Federal Aviation Administration, FAA, the United States Coast Guard, USCG, the Federal Highway Administration, FHWA, the National Highway Traffic Safety Administration, NHTSA, the Federal Transit Administration, FTA, the Maritime Administration, MARAD, and the Federal Railroad Administration, FRA. These offices exercise systems and operational control over applicable records within the system. The system software is centrally maintained by the Federal Aviation Administration's Mike Monroney Aeronautical Center, Oklahoma City, Oklahoma. Some centralized reporting functions are performed at Oklahoma City.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The system will cover: All civilian employees of the FAA, USCG, NHTSA, FHWA, OST, RSPA, FRA, FTA, and MARAD; and, the military employees of USCG as their Operating Administrations are implemented on the system.

CATEGORIES OF RECORDS IN THE SYSTEM:

Categories include payment records for non-payroll related expenses, payment records for payroll made off-line, collection records for payroll offsets, and labor cost records.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

PURPOSE(S):

The purpose for collecting the data in the DAFIS System of Records is to control and facilitate the accounting and reporting of financial transactions for DOT.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Accounting office personnel use these records to: Provide employees with off-line paychecks, travel advances, travel reimbursements, and other official reimbursements; Facilitate the distribution of labor charges for costing purposes; Track outstanding travel advances, receivables, and other non-payroll amounts paid to employees, etc; and, Clear advances that were made through the system in the form of off-line paychecks, payments for excess household goods made on behalf of the employee, garnishments, overdue travel advances, etc. See Prefatory Statement of General Routine Uses.

DISCLOSURES TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12): Disclosures may be made from this system to "consumer reporting agencies" as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on magnetic tape, magnetic disk, microforms, and in file folders. Storage of file folders and microforms is at the geographic location of the servicing accounting office. Magnetic tape and disk records are maintained at the central maintenance site in Oklahoma City.

RETRIEVABILITY:

Records are retrieved by employee social security number. Retrieval is accomplished by use of telecommunications.

SAFEGUARDS:

Access to magnetic tape and disk records is limited to authorized agency personnel through password security. Hardcopy files are accessible to authorized personnel and are kept in locked file cabinets during non-duty hours.

RETENTION AND DISPOSAL:

Original payment vouchers and supporting documentation are retained on site at the accounting office for a period of three years. Certain transportation documents are forwarded to the General Service Administration for audit during that period. After three years, records are sent to GSA's Records Centers for storage. Records are destroyed after ten years and three months.

SYSTEM MANAGER(S) AND ADDRESS:

DAFIS Accounting Manager (B–30), Office of the Secretary, Office of Financial Management, 400 Seventh Street SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Inquiries should be directed to the manager of the accounting Office supporting the employee's agency. Agency accounting Managers will contact the DAFIS System Managers listed above if any centralized support is required for responses.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure."

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure."

RECORD SOURCE CATEGORIES:

Information is provided by the employee directly or through the DOT Consolidated Uniform Payroll System.

EXEMPTION CLAIMED FOR THE SYSTEM:

None.

DOT/ALL 8

SYSTEM NAME:

Employee Transportation Facilitation.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, Transportation Administrative Service Center, TASC, Facilities Service Center, Parking Management Office, 400 Seventh Street, SW., Room P2–0327, Washington, DC 20590. Field installations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Holders of parking permits and members of carpools and vanpools. Applicants for ridesharing information. Recipients of match letters for carpooling. Applicants and recipients of fare subsidies issued by DOT.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of holders of parking permits and records of carpool and vanpool members. Records and reports of status of rideshare applications. Copies of applications and match letters received by rideshare applicants. Applications and certifications of fare subsidy recipients. Records and reports of disbursements to fare subsidy recipients. Information on local public mass transit facilities and fare subsidy programs.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 49 U.S.C. 322.

PURPOSE(S):

Parking management and fare subsidy management.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Carpool listing produced for use in creating or enlarging carpools or vanpools. Used for production of listings and reports. Used for periodic review or revalidation. Used as part of a program designed to ensure eligibility for, and receipt of, fare subsidy. See Prefatory Statement of General Routine Uses.

DISCLOSURES TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12). Disclosures may be made from this system to consumer reporting agencies (collecting on behalf of the United States Government) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored in hard copy or electronically, depending on the number of entries at each installation. Storage is at the geographic location of the servicing office.

RETRIEVABILITY:

Records can be retrieved by name or by ZIP code of residence.

SAFEGUARDS:

Except for carpool listings, access is accorded only to parking and fare subsidy management offices. Printout of carpool listing used in matching program has name, agency, DOT permit number, and work telephone number only and is available upon request.

RETENTION AND DISPOSAL:

Data are deleted and not retained on ADP once the individual leaves the system for any reason (*i.e.*, is no longer on the ridesharing listing, is no longer a member of a carpool or vanpool, or no longer receives a fare subsidy). Record copies of monthly reports and listings are retained at each installation, headquarters and field, for three years, forwarded to the Federal Records Center for two more years, and then destroyed. Consolidated reports of all installations are retained at headquarters for three years, forwarded to the Federal Records Center for two more years, and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Transportation Services Section, TASC Facilities Services Center, Department of Transportation, 400 Seventh Street, SW., Room P2–0327, Washington, DC 20590. Field installations.

NOTIFICATION PROCEDURES:

Same as System manager.

RECORD ACCESS PROCEDURES:

Same as System manager.

CONTESTING RECORD PROCEDURES:

Same as System manager.

RECORD SOURCE CATEGORIES:

Applications submitted by individuals for parking permits, carpool and vanpool membership, ridesharing information, and fare subsidies; from notifications from other Federal agencies in the program; and from periodic certifications and reports regarding fare subsidies.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/ALL 9

SYSTEM NAME:

Identification Media Record Systems.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Department of Transportation, DOT.

a. TASC Security Operations, SVC–150, 400 7th Street, SW., Washington, DC 20590; (for OST and all DOT Operating Administrations except those below).

b. Commandant, G–CAS, United States Coast Guard Headquarters, G–0, Washington, DC 20591 and District and Area Offices.

c. Federal Aviation Administration, Office of Civil Aviation Security, 800 Independence Avenue, SW., Washington, DC 20591; and each FAA Regional and Center Civil Aviation Security Divisions/Staff.

d. Federal Highway Administration, Operations and Services Divisions, 400 7th Street, SW., Washington, DC 20590, and all FHWA Regional Offices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Present and former employees and contractor employees in the Office of the Secretary, United States Coast Guard, Federal Aviation Administration, Federal Highway Administration, Federal Transit Administration, Federal Railroad Administration, National Highway Traffic Safety Administration, St. Lawrence Seaway Development Corporation, Research and Special Programs Administration, Bureau of Transportation Statistics, Maritime Administration, and Transportation Administrative Service Center.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications, photographs, receipts for DOT identification cards and official credentials, temporary building passes, security badges, and applications for other identification needed for official duties.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 49 U.S.C. 322.

PURPOSE(S):

To provide a ready concentration of employee personal data to facilitate issuance, accountability, and recovery of required identification media issued to employees and contractors.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records are maintained for control and accountability of DOT identification cards, credentials, and security badges issued to DOT employees, former employees, and contractors for identification purposes and admittance to the DOT facilities or for other official duties. See Preparatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The storage is on computer disks, magnetic tape, and paper forms in file folders.

RETRIEVABILITY:

Retrieval from the system is by name, social security number, date of birth, or identification card number and can be accessed by authorized individuals.

SAFEGUARDS:

Computers provide privacy and access limitations by requiring a user name and password match. Access to decentralized segments are similarly controlled. Only those personnel with a need to have access to the system are given user names and passwords. Data are manually and/or electronically stored in a locked room with limited access.

RETENTION AND DISPOSAL:

Information including applications, photographs and identification media, will be destroyed within one year of termination of employment.

SYSTEM MANAGER(S) AND ADDRESS:

a. Principal, TASC Security Operations, SVC–150, Department of Transportation, 400 7th Street, SW., Washington, DC 20590 (address for OST and all DOT operating administrations except those below).

b. For USCG: Commandant, G–0, United States Coast Guard, Washington, DC 20593.

c. For FAA: Director, Civil Aviation Security, Federal Aviation Administration, and 800 Independence Avenue, SW., Washington, DC 20591.

d. For FHWA: Chief, Operations and Services Division, Federal Highway Administration, 400 7th Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Same as System Manager, except that for USCG, notification should be given to Commandant, G–TIS.

RECORD ACCESS PROCEDURES:

Same as Notification procedure.

CONTESTING RECORD PROCEDURES:

Same as Notification procedure. Correspondence contesting records must include the full name and social security number of the individual concerned and documentation justifying the claim.

RECORDS SOURCE CATEGORIES:

Individuals on whom the record is maintained.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/ALL 10

SYSTEM NAME:

Debt Collection File.

SECURITY CLASSIFICATION:

Sensitive, unclassified.

SYSTEM LOCATION:

Federal Aviation Administration, General Ledger Branch, Mike Monroney Aeronautical Center, and 6500 S. MacArthur Blvd., Oklahoma City, OK 73125.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons currently or formerly associated with the Department of Transportation, DOT who are financially indebted to the United States Government under some particular service or program of the DOT other than under a contract. Individuals may include current, retired, or formerly employed DOT personnel or personnel from other Federal agencies.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information varies depending on the individual debtor, and includes the history of debt collection activity on the individual. Normally, the name, Social Security Number, SSN, address, amount of debt or delinquent amount, basis of the debt, date debt arose, office referring debt, collection efforts, credit reports, debt collection letters and correspondence to or from the debtor relating to the debt. Correspondence with employing agencies of debtors or Office of Personnel Management or Department of Defense, as appropriate, requesting that action begin to collect the delinquent debt through voluntary or involuntary offset procedures against the employee's salary or compensation due a retiree.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Federal Claims Collection Act of 1966 (Pub.L. 89–508), 31 U.S.C. Chapter 37, Subchapter I, General, and Subchapter II, Claims of the United States Government; Debt Collection Act of 1982, Pub.L. 97–365; 5 U.S.C. 5514, Installment Deduction for Indebtedness (salary offset); section 206 of Executive Order 11222; Executive Order 9397; and 49 CFR part 92, Salary Offset, DOT.

PURPOSE(S):

For the administrative management and collection of all delinquent debts, including past due loan payments, overpayments, fines, penalties, fees, damages, interest, leases, sales of real or personal property, etc., due to the DOT and debts due to other Federal departments and agencies that may be referred to the DOT for collection to the extent DOT controls funds due the debtor. This system provides for the implementation of the salary-offset provisions of 5 U.S.C. 5514, the administrative offset provisions of 31 U.S.C. 3716 and the provisions of the Federal Claims Collection Standards, FCCS. It applies to personal rather than contract debts. Guidance regarding contract debts is contained in the Federal Acquisition Regulation. Records in this record system are subject to use in authorized and approved computer matching programs regulated under the Privacy Act of 1974 (5 U.S.C. 552a), as amended, for debt collection purposes.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To the United States General Accounting Office, GAO, Department of Justice, United States Attorney, or other Federal agencies for further collection action on any delinquent account when circumstances warrant. To a debt collection agency for the purpose of collection administered by the DOT. Debtor's name, Social Security Number, the amount of debt, and the history of the debt may be disclosed to any Federal agency where the individual debtor is employed or receiving some form of remuneration for the purpose of enabling that agency to collect a debt owed the United States Government on DOT's behalf by counseling the debtor for voluntary repayment or by initiating administrative or salary offset procedures under the provisions services to recover monies owed to the United States Government under certain programs or services of the Debt Collection Act of 1982 (Pub.L. 97–365). To the Internal Revenue Service, IRS, by computer matching to obtain the mailing address of a taxpayer for the purpose of locating such taxpayer to collect or to compromise a Federal claim by DOT against the taxpayer pursuant to 26 U.S.C. 6103(m)(2) and in accordance with 31 U.S.C. 3711, 3217, and 3718. Note: Redisclosure of a mailing address from the IRS may be made only for the purpose of debt collection, including to a debt collection agency in order to facilitate the collection or compromise of a Federal claim under the Debt Collection Act of 1982, except that a mailing address to a consumer reporting agency is for the limited purpose of obtaining a commercial credit report on the particular taxpayer. Any such address information obtained from the IRS will not be used or shared for any other DOT purpose or disclosed to another Federal, state, or local agency which seeks to locate the same individual for its own debt collection purpose. Data base information consisting of debtor's name, Social Security Number, and amount owed may be disclosed to the Defense Manpower Data Center, DMDC, Department of Defense, the United States Postal Service or to any other Federal, state, or local agency for the purpose of conducting an authorized computer matching program in compliance with the Privacy Act of 1974 (5 U.S.C. 552a), as amended, so as to identify and locate delinquent debtors in order to start a recoupment process on an individual basis of any debt owed DOT by the debtor arising out of any administrative or program activities or services administered by DOT. Disclosure of personal and financial information from this system on current, retired, or former employees of DOT or United States Coast Guard members may be made to any creditor Federal agency seeking assistance for the purpose of that agency requesting voluntary repayment or implementing administrative or salary offset procedures in the collection of unpaid financial obligations owed the United States Government from an individual affiliated with the DOT. An exception to this routine use is an individual's mailing address obtained from the IRS pursuant to 26 U.S.C. 6103(m)(2).

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosure pursuant to 5 U.S.C. 552a(b)(12) may be made from this record system to consumer reporting agencies as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)). The disclosure, once determined to be valid and overdue, is limited to information necessary to establish the identity of the individual, including name, address, and taxpayer identification number, (Social Security Number; the amount, status, and history of the claim; and the agency or program under which the claim arose for the sole purpose of allowing the consumer reporting agency to prepare a commercial credit report.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The storage for records on personal computers is kept on floppy disks. Storage on microcomputers is first downloaded onto a floppy disk and then locked in a file cabinet. Data kept in paper file folders are locked in file cabinets.

RETRIEVABILITY:

Records are retrieved by name or Social Security Number.

SAFEGUARDS:

Computers provide privacy and access limitation by requiring a user name and password match. These records are available only to those persons whose official duties require such access. Records are kept in limited access areas during duty hours and in locked cabinets at all other times.

RETENTION AND DISPOSAL:

Records are disposed of when ten years old except documents needed for an ongoing investigation in which case the record will be retained until no longer needed for the investigation. Data tracks on floppy disks are overwritten a minimum of three times.

SYSTEM MANAGER(S) AND ADDRESS:

Department of Transportation, Director, Office of Financial

Management, B–30, 400 Seventh Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the particular DOT operating administration or component in care of the System location above. Individual should furnish full name, Social Security Number, current address and telephone number.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Information in this system of records is obtained from the individual, creditor agencies, Federal employing agency of debtor, collection agencies, Federal, state or local agencies furnishing identifying information and/or address of debtor, as well as other internal DOT records such as payroll information.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/ALL 11

SYSTEM NAME:

Integrated Personnel and Payroll System, IPPS.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

United States Department of Transportation, DOT, Office of the Secretary, OST, 400 7th Street, SW., Washington, DC 20590. Working copies of certain records are held by OST, all DOT Operating Administrations, Office of the Inspector General, OIG, and the National Transportation Safety Board, NTSB. DOT provides personnel and payroll services to NTSB on a reimbursable basis, although NTSB is not a DOT entity. This is done for economy and convenience since both organizations' missions are transportation oriented and located in the same geographic areas.).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Prospective, present, and former employees in the Office of the Secretary of Transportation, OST, Bureau of Transportation Statistics, BTS, Federal Aviation Administration, FAA, Federal Highway Administration, FHWA, Federal Railroad Administration, FRA, Federal Transit Administration, FTA, Maritime Administration, MARAD, National Highway Traffic Safety Administration, NHTSA, Office of the Inspector General, OIG, Research and Special Programs Administration, RSPA, St. Lawrence Seaway Development Corporation, SLSDC, Transportation Administrative Service Center, TASC, National Transportation Safety Board, NTSB, and civilian employees of the United States Coast Guard, USCG.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains those records required to insure that an employee receives his or her pay and personnel benefits as required by law. It includes, as appropriate: Service Record, Employee Record, Position Identification Strip, Claim for 10-Point Veteran Preference, Request for Referral Eligibles, Request and Justification for Selective Factors and Quality Ranking Factors, Certification of Insured Employee's Retired Status, Federal Employees' Group Life Insurance, FEGLI, Notification of Personnel Action, Notice of Short-Term Employment, Request for Insurance, FEGLI, Designation of Beneficiary, FEGLI, Notice of Conversion Privilege, Agency Certification of Insurance Status, FEGLI, Request for Approval of Non-Competitive Action, Appointment Affidavits, Declaration of Appointee, Agency Request to Pass Over a Preference Eligible or Object to an Eligible, Official Personnel Folder, Official Personnel Folder Tab Insert, Incentive Awards Program Annual Report, Application for Leave, Monthly Report of Federal Civilian Employment, Payroll Report of Federal Civilian Employment, Semi-annual Report of Federal Participation in Enrollee Programs, Request for Official Personnel Folder (Separated Employee), Statement of Prior Federal Civilian and Military Service, Personal Qualifications Statement, Continuation Sheet for Standard Form 171 "Personal Qualifications Statement", amendment to Personal Qualifications Statement, Job Qualifications Statement, Statement of Physical Ability for Light Duty Work, Request, Authorization, Agreement and Certification for Training, United States Government Payroll Savings Plan-Consolidated Quarterly Report, financial Disclosure Report, Information Sheet Financial Disclosure-Report, Payroll for Personal Services, Pay Receipt for Cash Payment to Transferable, Payroll Change Slip, Payroll for Personal Service payroll Certification and Summary—Memorandum, Record of Leave Data, Designation of Beneficiary—Unpaid Compensation of Deceased Civilian Employee, United States Savings Bond Issue File Action Request, Subscriber List for Issuance of United States Savings Bonds, Request for Payroll Deductions for Labor Organization Dues, Revocation of Voluntary Authorization for Allotment of Compensation for Payment of Labor Organization dues, Request by Employee for Payment of Salaries or Wages by Credit to Account at a Financial Organization, Designation of Beneficiary— Unpaid Compensation of Deceased Civilian Employee, United States Savings Bond Issue File Action Request, Authorization for Purchase and Request for Change: United States Series EE Savings Bond, Request by Employee for Allotment of Pay for Credit to Savings Accounts with a Financial Organization, Application for Death Benefits—Civil Service Retirement System, Application for Retirement—Civil Service Retirement System, Superior Officer's Statement in Connection with Disability Retirement, Physician's Statement for Employee Disability Retirement Purposes, Transmittal of Medical and Related Documents for Employee Disability Retirement, Request for Medical Records (To Hospital or Institution) in Connection with Disability Retirement, Application for Refund of Retirement Deductions, Application to Make Deposit or Redeposit, Application to Make Voluntary Contribution, Request for Recovery of Debt Due the United States (Civil Service Retirement System), Register of Separations and Transfers—Civil Service Retirement System, Register of Adjustments—Civil Service Retirement System, Annual Summary Retirement Fund Transactions, Designation of Beneficiary Civil Service Retirement System, Health Benefits Registration Form—Federal Employees Health Benefits Program, Notice of Change in Health Benefits Enrollment, Transmittal and Summary Report to Carrier Federal Employees Health Benefits Program, Report of Withholding and Contributions for Health Benefits, Group Life Insurance, and Civil Service Retirement, Report of Withholdings and Contributions, Employee Service Statement, Election of Coverage and Benefits, Designation of Beneficiary, Position Description, Inquiry for United States Government Use Only, Application for Retirement—Foreign Service Retire System, Designation of Beneficiary, Application for Refund of Retirement Contributions (Foreign Service Retirement System), Election to Receive Extra Service Credit Towards Retirement (or Revocation Thereof), Application for Service Credit,

Employee Suggestion Form, Meritorious Service Increase Certificate, Foreign Service Emergency Locator Information, Labor Distribution Data, Leave Record, Leave Summary, Individual Pay Card, Time and Attendance Report, Time and Attendance Report (For Use Abroad).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 322.

PURPOSE(S):

The purpose for collecting the data in the IPPS System of Records is to control and facilitate payment of salaries to DOT civilian employees.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. Records are maintained for control and accountability of: Pay and allowances; permanent and temporary pay changes; pay adjustments; travel advances and allowances; leave balances for employees; earnings and deductions by pay periods, and pay and earning statements for employees; management information as required on an ad hoc basis; payroll checks and bond history; union dues; withholdings to financial institutions, charitable organizations and professional associations; summary of earnings and deductions; claims for reimbursement sent to the General Accounting Office, GAO; federal, state, and local taxes withholdings; and list of FICA employees for management reporting. 2. To the Office of Child Support Enforcement, Administration for Children and Families, Department of Health and Human Services Federal Parent Locator System, FPLS and Federal Tax Offset System for use in locating individuals and identifying their income sources to establish paternity, establish and modify orders of support and for enforcement action. 3. To the Office of Child Support Enforcement for release to the Social Security Administration for verifying social security numbers in connection with the operation of the FPLS by the Office of Child Support Enforcement. 4. To Office of Child Support Enforcement for release to the Department of Treasury for purposes of administering the Earned Income Tax Credit Program (Section 32, Internal Revenue Code of 1986) and verifying a claim with respect to employment in a tax return.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12): Disclosures may be made from this system to "consumer reporting agencies" as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Storage is on magnetic disks, magnetic tape, microforms, and paper forms in file folders.

RETRIEVABILITY:

Retrieval from the system is by social security number, employee number, organization code, or home address; these can be accessed only by individuals authorized such access.

SAFEGUARDS:

Computers provide privacy and access limitations by requiring a user name and password match. Access to decentralized segments is similarly controlled. Only those personnel with a need to have access to the system are given user names and passwords. Data are manually and/or electronically stored in locked rooms with limited access.

RETENTION AND DISPOSAL:

The IPPS records are retained and disposed in compliance with the General Records Schedules, National Archives and Records Administration, Washington, DC 20408. The following schedules apply: General Records Schedule 1, Civilian Personnel Records, Pages 1 thru 22, Items 1 through 39; and General Records Schedule 2, Payrolling and Pay Administration Records, Pages 1 thru 6, Items 1 thru 28.

SYSTEM MANAGER(S) AND ADDRESS:

Contact Chief, Financial Management IT Deployment Staff (B–35) at the United States Department of Transportation, Office of the Secretary, 400 Seventh Street SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Individuals wishing to know if their records appear in this system of records may inquire in person or in writing to the system manager.

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager." Correspondence contesting records must include the full name and social security number of the individual concerned and documentation justifying the claims.

RECORD SOURCE CATEGORIES:

Data are collected from the individual employees, time and attendance clerks, supervisors, official personnel records, personal financial statements, correspondence with the debtor, records relating to hearings on the debt, and from the Departmental Accounting and Financial Information system of records.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/ALL 12

SYSTEM NAME:

DOT Mentoring Records System.

SECURITY CLASSIFICATION:

Sensitive.

System location:

Department of Transportation, DOT TASC Computer Center, 400 7th Street, SW., Washington, DC 20590–0001

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

a. All DOT personnel registering to become mentors.

b. All DOT personnel registering to be mentees.

CATEGORIES OF RECORDS IN THE SYSTEM:

All categories of records are electronic and/or paper, and may include identifying information, such as name, office routing symbol, office phone and fax numbers, e-mail address, last four digits of the social security number, grade, and employing administration. All records reflect:

a. Name.
b. Operating Administration.
c. Last four digits of social security number.
d. Routing Symbol.
e. State employed.
f. Age range.
g. Pay plan.
h. Series.
i. Civilian or Military grade.
j Work phone.
k. Work Fax.
l. Work e-mail address.
m. Work skills (Optional narrative).
n. Interests (Optional narrative).
o. Hobbies (Optional narrative).

Records for employees of the United States Coast Guard, both military and civilian may also include:

1. Collateral duties.
2. Coast Guard training Received.
3. Coast Guard qualification codes.
4. Commissioning source.
5. Education level/Type of degree.
6. Ethnicity.
7. Marital status.
8. Current OPFAC.

This information is optional for USCG employees only.

AUTHORITY FOR MAINTENANCE OF SYSTEM:

5 U.S.C. 4103.

PURPOSE(S):

This system will be used to match prospective DOT mentors with employees interested in becoming mentees. The system will also be used to monitor the number of employees participating in the DOT Mentoring Program, store participants pass words, contact participants for survey purposes, provide mentor names to senior departmental and human resource management officials, and measure the success of cross modal mentoring.

ROUTINE USE OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

a. To DOT HRM personnel to evaluate interest in the program.

b. To DOT HRM personnel to transmit survey instruments to participants.

c. To DOT HRM personnel to determine the amount of cross modal participation.

d. To Senior Management Officials for review.

Also, see the prefatory statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The storage is on a DOT server, with restricted access.

RETRIEVABILITY:

Retrieval from the system is by category (mentor/mentee), and can be accessed by the administrators of the DOT mentoring program database.

SAFEGUARDS:

Computers provide privacy and access limitations by requiring a user name and password match. Access to decentralized segments is similarly controlled. Only those personnel administering the DOT Mentoring Program database are given user names and passwords.

RETENTION AND DISPOSAL:

Records disposition schedule as developed by the National Archives and Records Administration.

SYSTEM MANAGER(S) AND ADDRESS:

Jan B. Karicher, Departmental Office of Human Resources Management, M–13, Department of Transportation 400 Seventh Street, SW., Washington, DC, 20590–0001.

NOTIFICATION PROCEDURE:

Inquiries should be directed to: United States Department of Transportation, Departmental Director of Human Resource Management (M–10), 400 7th Street, SW., Washington, DC 20590–001.

RECORD ACCESS PROCEDURES:

Individuals may access their own data through Internet, to the DOT HRM Home Page.

CONTESTING RECORD PROCEDURES:

NA.

RECORD SOURCE CATEGORIES:

Individual registrants.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 501

SYSTEM NAME:

Auxiliary Management Information System, AUXMIS.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

U.S. Coast Guard Operations System Center, G–OPB, 600 Coast Guard Dr., Kearneysville, WV 25430.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All present Coast Guard Auxiliarists. All Auxiliarists disenrolled since 1996.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personal information (name, address, birth date, Social Security Number, SSN, phone number). Auxiliary qualifications information (Instructor, Examiner, Specialty). Auxiliary activities information (patrols conducted, classes taught). Information on facilities—boats, radio stations or aircraft—owned by Auxiliarists.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 632, 830, 831; 49 CFR 1.45, 1.46; COMDTINST M16790.1E.

PURPOSE(S):

Primary management tool for the Coast Guard Auxiliary program.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Cumulative unit and individual activity summaries for use as a management tool by Coast Guard District, Area and Headquarters program managers, Coast Guard field units, Coast Guard District Directors of Auxiliary, DIRAUX all Auxiliary units. Identification of all Auxiliary members. Alphabetical nationwide cross-reference listing for use by headquarters and district office staffs. Mailing labels for national, district and program specific mailings to auxiliary membership. An annual summary of all member specific information is mailed directly to respective members. Used by: Chief, Office of Auxiliary and staff; Coast Guard Groups and commands; District Directors of Auxiliary, DIRAUX and staff; Various elected and appointed office holders of the Auxiliary. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

AUXMIS II master records contain personal and activity information concerning USCG Auxiliary members. The approximately 40,000 records presently in the system are stored in a Progress Relation Database Management System on DLT tapes using Net Backup and are stored off-site.

RETRIEVABILITY:

The current AUXMIS II master file resides on a HP–755 hardware suite with a Unix 10.2 operating system. Information is retrieved by number and name of the individual and can be accessed by those DIRAUX and other designated users with access to the database through CGDN or modem connection at anytime.

SAFEGUARDS:

The master files cannot be accessed without the proper user identification and password. Eight user access levels have delimiters to restrict the domains in which a user can view and/or change member information.

RETENTION AND DISPOSAL:

Retention of weekly tape files is 180 days, then erased. Retention of disk files is 1 week, and then updated. Retention of the year-end tape file is permanent.

SYSTEM MANAGER(S) AND ADDRESS:

United States Coast Guard, Office of Command and Control Architecture, Commandant, G–OCC, U.S. Coast Guard, 2100 2nd Street, SW., Washington, DC 20593–0001. U.S. Coast Guard, Office of Auxiliary, Commandant, G–OCX, U.S. Coast Guard, 2100 Second Street SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII–2, United States Coast Guard Headquarters, Office of Information Management, 2100 2nd

Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Individual Auxiliary members can view their AUXMIS II record through a designated person with restricted domain user access from their Flotilla or Division. At any time, members of the Auxiliary can request access to their personal, hardcopy "member jacket" file located at their respective DIRAUX office.

CONTESTING RECORD PROCEDURES:

Record content can be contested at any time and, if error is found, all DIRAUX level users have the access to correct individual records. Restricted domain user access provides members the means to correct their own address, name and phone numbers.

RECORD SOURCE CATEGORIES:

All records pertaining to Auxiliary members are derived from forms filled out by the individuals involved on a voluntary basis.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 503

SYSTEM NAME:

Motorboat Registration.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Department of Transportation, Commandant, G–OPB, United States Coast Guard, CG, 2100 2nd Street, SW., Washington, DC 20593–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Boat owner registering for the issuance of boat identification numbers for boats recorded in the State of Alaska.

CATEGORIES OF RECORDS IN THE SYSTEM:

Boat owner name, address, and boat information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 632, 46 U.S.C. 2301; 49 CFR 145, 146

PURPOSE(S):

Administer the Coast Guard's boating safety program.

ROUTINE USES OF RECORDS MAINTAINED THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

All records are maintained in file cabinets.

RETRIEVABILITY:

By name/number.

SAFEGUARDS:

Only authorized office personnel have access to subject files. All personnel screened prior to allowing access. Building secured and guarded after duty hours.

RETENTION AND DISPOSAL:

Records are retained permanently.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, United States Coast Guard, Office of Boating Safety, G–OPB, Department of Transportation, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Department of Transportation, United States Coast Guard Headquarters, Commandant, G–SII, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Department of Transportation, United States Coast Guard Headquarters, Commandant, G–SII–2, 2100 2nd Street, SW., Washington, DC 20593–0001.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures"

RECORD SOURCE CATEGORIES:

Individual applicant.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 505

SYSTEM NAME:

Recreational Boating Law Enforcement Case Files.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Department of Transportation, United States Coast Guard,CG, Coast Guard District Offices and Headquarters unit offices for records of incidents in their localities.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Owners/operators of vessels found in violation of Federal recreational boating laws or regulations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Case files containing names of violators, their addresses and social security numbers, together with descriptions of boats and notations of the alleged violations of Federal boating laws, and copies of correspondence relating to the disposition of any penalty involved.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

(5 U.S.C. 301; 14 U.S.C. 89a, 93(a)&(c), 632; 16 U.S.C. 1431; 49 CFR 1.45, 1.46)

PURPOSE(S):

Determine enforcement action to be taken by the Coast Guard.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552(b)(12). Disclosures may be made from this system to consumer reporting agencies (collecting on behalf of the U. S. Government) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Index cards, logbooks, and file folders.

RETRIEVABILITY:

Name of individual in alphabetical file, or by civil penalty case number.

SAFEGUARDS:

Information available only to authorized personnel. Files maintained in office in building that is secured during non-working hours and has a roving guard patrol.

RETENTION AND DISPOSAL:

Records in system maintained for three years before disposal by mutilation or burning. Records on reported warnings are destroyed after 1 year (paper files).

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–OPB, Chief, Office of Boating Safety, Department of Transportation, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Department of Transportation, Commandant,G–SII, United States Coast

Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting the local Coast Guard District or Unit where incident occurred. Proof of identity will be required prior to release of records. A military identification card, driver's license or similar document is considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure."

RECORD SOURCE CATEGORIES:

Reports of Coast Guard boarding officers and marine safety investigations as well as from reports by.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system may be exempt from disclosure under the provisions of 5 U.S.C. 552a (k)(2) which provide in part, that investigatory material complied for law enforcement purposes may be withheld from disclosure to the extent that the identity of the source of the information would be revealed by disclosing the investigatory record, and the source has received an express guarantee that his identity would be held in confidence, or prior to December 31, 1974, if the source received an implied promise that his identity would be held in confidence.

DOT/CG 507

SYSTEM NAME:

Coast Guard Supplement to the Manual of Courts Martial Investigations.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Department of Transportation, Commandant, G–L United States Coast, CG, Office of the Chief Counsel, 2100 2nd Street, SW., Washington, DC 20593–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Military and civilian employees of the Coast Guard and other individuals who may be involved in any Coast Guard investigation.

CATEGORIES OF RECORDS IN THE SYSTEM:

Investigations into injuries to Coast Guard personnel, mishaps involving vessels, aircraft and vehicles. Incidents involving, explosions, for loss or destruction of classified material. Circumstances involving equipment failures and property damage, loss or destruction. Circumstances involving violation of standards of conduct personnel.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

(5 U.S.C. 301; 14 U.S.C. 93(e), 632; 49 CFR 1.45, 1.46).

PURPOSE(S):

Resolution of claims against the Coast Guard as well as claims asserted by the government.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES

Reports are transmitted to the Veterans Administration to assist that agency in determining entitlement to benefits administered by it. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICY AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Storage cabinets.

RETRIEVABILITY:

Name of person, vessel or other facility involved in investigation.

SAFEGUARDS:

Authorized personnel are granted access to these records in connection with the performance of their official duties.

RETENTION AND DISPOSAL:

Records are maintained in division files for three years and then forwarded to Federal Records Depository.

SYSTEMS MANAGER(S) AND ADDRESS:

Department of Transportation, Commandant,G–L, U.S. Coast Guard, Office of the Chief Counsel, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

DOT/CG 508

SYSTEM NAME:

Claims and Litigation.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Department of Transportation, Commandant (G–L), United States Coast Guard (CG), 2100 2nd Street, SW., Washington, DC 20593–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons in litigation with the Coast Guard.

CATEGORIES OF RECORDS IN THE SYSTEM:

SUITS AND CLAIMS FOR AND AGAINST THE COAST GUARD.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

(5 U.S.C. 301; 5 U.S.C. 3301; 14 U.S.C. 1.45, 33 U.S.C. 2712(e); 33 CFR 133.21; 49 CFR 1.45, 1.46; E. O. 12777; COMDTINST M5890.9)

PURPOSE(S):

Determination of claims.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File cabinets.

RETRIEVABILITY:

Two card index files, one alphabetic and one numeric, maintained for cross reference.

SAFEGUARDS:

Access is regularly limited to Coast Guard and civilian employees of the Claims and Litigation Division granted in connection with official duties.

RETENTION AND DISPOSAL:

Maintained for five years and then forwarded to the Federal Records Center. Card index files retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–L, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Department of Transportation, Commandant, G-SII–2, United States

Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification Procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification Procedure".

RECORD SOURCE CATEGORIES:

Coast Guard military and civilian personnel, members of the public, and Coast Guard investigating officers.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 509

SYSTEM NAME:

Non-Judicial Punishment Report.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Department of Transportation, Commandant, G–L, United States Coast Guard, CG, 2100 2nd Street, SW., Washington, DC 20593–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Coast Guard military personnel who have been subject to non-judicial punishment proceedings under Article 15, Uniform Code of Military Justice.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of Proceedings under Article 15, Uniform Code of Military Justice.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

(5 U.S.C. 301, 10 U.S.C. 815; 14 U.S.C. 632; 49 CFR 1.45, 1.46.)

PURPOSE(S):

Military justice administration.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records provide statistical data concerning the number of proceedings held, units holding proceedings, offenses committed, punishments imposed, and background data of individuals concerned. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File cabinets.

RETRIEVABILITY:

By name.

SAFEGUARDS:

Records are made available to authorized personnel. Records are maintained in building with limited access during non-working hours and with roving security patrol.

RETENTION AND DISPOSAL:

Disposal procedures not as yet established. Back-up material disposed of after introduction into system.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–L, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Department of Transportation, Commandant, G–SII–2, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure".

RECORD SOURCE CATEGORIES:

Individual service records and from proceedings conducted.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 510

SYSTEM NAME:

Records of trial: Special, General and Summary Courts Martial.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Department of Transportation, Commandant, G–L, United States Coast Guard, CG, 2100 2nd Street, SW., Washington, DC 20593–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any individual who is tried by court martial in the Coast Guard.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of trial.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 10 U.S.C. 865; 14 U.S.C. 632; 49 CFR 1.45, 1.46; E.O. 11835 (January 27, 1975, paragraph 94b).

PURPOSE(S):

Documentation of Coast Guard courts martial.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file cabinets.

RETRIEVABILITY:

Alphabetically by name of individual.

SAFEGUARDS:

Maintained in file cabinets in building with limited access during non-working hours and with roving security patrol.

RETENTION AND DISPOSAL:

Retained permanently. Maintained for two years, reviewed by System Manager and then transferred to Federal Records Center.

SYSTEM MANAGER(S) AND ADDRESS:

Department of Transportation, Commandant, G–L, Office of the Chief Counsel, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Department of Transportation, United States Coast Guard Headquarters, Commandant, G–SII, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure".

RECORD SOURCE CATEGORIES:

Trial proceedings and subsequent statutory reviews—Court of Military Review, Court of Appeals for the Armed Services, and Chief Counsel of the Coast Guard.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 511

SYSTEM NAME:

Legal Assistance Case File System.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, Commandant, G–L, United States Coast Guard, CG, 2100 2nd Street, SW.,

Washington, DC 20593–0001. United States Coast Guard District Legal Offices and Legal Offices of Coast Guard Units.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Coast Guard military members seeking personal legal assistance.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information concerning the matters handled by these officers for clients.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 10 U.S.C. 1044, 1054; 14 U.S.C. 632, 44 U.S.C. 3101; 49 CFR 1.45, 1.46

PURPOSE(S):

Provide legal assistance.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records are also used to prepare statistical reports concerning a legal officer's time utilization.

The Prefatory Statement of Routine Uses applies to records in this system only to the extent that their disclosure would not constitute a violation of the judicially recognized privilege attaching to attorney-client communications and of the ethical and professional responsibilities of lawyers under the American Bar Association's Code of Professional Responsibility.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Normally, written records kept in file folders.

RETRIEVABILITY:

Alphabetical indexes by name of member.

SAFEGUARDS:

Kept in office space or filing cabinets, which are normally locked during non-working hours. Building patrolled by roving security guards after duty hours.

RETENTION AND DISPOSAL:

Records retained as long as needed to serve client or as long as deemed necessary by the legal officer. Disposal is by whatever means considered appropriate by the legal officer, depending on contents of the record involved.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–L, Office of the Chief Counsel, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. District or unit legal offices:

NOTIFICATION PROCEDURE:

Commandant, (G–SII–2, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Office of Chief Counsel at Coast Guard Headquarters or within the legal offices in the various Coast Guard districts or units, dependent on where legal assistance was rendered.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures".

RECORD SOURCE CATEGORIES:

Client involved and as a result of any subsequent investigation by the legal officer on behalf of the client.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 526

SYSTEM NAME:

Adjudication and Settlement of Claims System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WP, United States Coast Guard, 2100 2nd Street, SW., Washington, DC 20593–0001. Coast Guard Districts and Units.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active, Reserve, and Retired military members; civilian employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Claims arising out of disputes concerning amounts of pay received.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 5 U.S.C. 5514; 14 U.S.C. 632, 461; 37 U.S.C. 1007; 49 CFR 1.45, 1.46.

PURPOSE(S):

Determine entitlement of claimants.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To use as precedent setting data in the resolution of similar questions in the future. Used by authorized Coast Guard officials and officials of the IRS, GAO, and the Civil Service Commission, as required. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored manually in file folders.

RETRIEVABILITY:

Claimant name.

SAFEGUARDS:

Access is limited to authorized officials by screening of personnel. Maintained in Government building having roving security guards after duty hours.

RETENTION AND DISPOSAL:

After adjudication and settlement, most submissions are retained for precedent setting value, as required.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–WP, Director, Personnel Management Directorate, United States Coast Guard Headquarters, 2100 2nd Street, SW, Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure".

RECORD SOURCE CATEGORIES:

Individual, CG payroll offices, legal staff, investigators, Director of Personnel and Management, Comptroller General, GAO, and congressional correspondence.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 528

SYSTEM NAME:

Centralized Reserve Pay and Retirement System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

United States Coast Guard, Human Resources Service and Information Center, 444 SE Quincy St., Topeka, KS 66683–3591. District Offices and other Field Units.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Coast Guard Reservists.

CATEGORIES OF RECORDS IN THE SYSTEM:

Master Pay and Retirement Point Credits Record. Master Personnel Data Accounting Record.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 10 U.S.C. 1331; 10 U.S.C. 12731; 14 U.S.C. 632; 49 CFR 1.45, 1.46

PURPOSE(S):

Prepare monthly payroll and all associated listings.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Preparation of budgets. Accounting. Compute pay and points. Compilation of data. Report earnings to state and city taxing authorities. Used by authorized Coast Guard, IRS, GAO, and other Agency Officials as required. See Prefatory Statement of General Routine Uses; 3 through 5 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures may be made from this system to "Consumer reporting agencies" (collecting on behalf of the United States Government) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Microfilm of payroll retained in Reserve Pay Branches and Districts. Records are filed manually in filing cabinets.

RETRIEVABILITY:

Alphabetically by name of Reservist and CG Unit Number.

SAFEGUARDS:

Access is regularly limited to user staff members. Records are stored in secured building after duty hours.

RETENTION AND DISPOSAL:

Microfilm and records are retained until member is discharged or retired. Three years subsequent to retirement or discharge, records are transferred to a Federal Records Center.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–WT, Director, Reserve and Training Directorate, United States Coast Guard, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure".

RECORD SOURCE CATEGORIES:

District Commander and Office of Reserve, Individual Unit Commanding Officers.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 533

SYSTEM NAME:

Retired Pay and Personnel System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

United States Coast Guard, CG, Human Resources Service and Information Center, 444 SE. Quincy St., Topeka, KS 66683–3591.

CATEGORIES OF INDIVIDUALS:

Annuitants. Lighthouse Keeper Retirees. Honorary Retirees. USCG Retirees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Pay and Personnel data of military retirees, annuitants, lighthouse keepers and retirees. Personnel data of honorary retirees. Accounts receivable and accounts payable.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 10 U.S.C. 421–424, 1201, 1401; 14 U.S.C. 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

Make payments.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

W–2 wage and federal tax reporting to the Internal Revenue Service. Reports of earnings to State and city taxing authorities. Listing of currently retiring officers, home addresses and mailing labels used by authorized USCG and USCG affiliated organizations. Reports and information exchanged with the Veterans Administration, Office of Personnel Management, Social Security Administration, Department of Defense, and the Red Cross. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12). Disclosures may be made from this system to "consumer reporting agencies" (collecting on behalf of the United States Government) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are filed manually in file folders. Microfilm is stored in the retired pay branch. Check tapes are filed in tape library.

RETRIEVABILITY:

Records and microfilm are indexed alphabetically, check tapes are indexed by tape number. Retrieved by name/number.

SAFEGUARDS:

Access is regularly limited to user staff members under supervisory control. Stored in government building having roving security guard after duty hours.

RETENTION AND DISPOSAL:

Records are retained in the Retired Pay Branch for 3 years subsequent to retiree's or annuitant's death, and then forwarded to a Federal Records Center. Magnetic tapes are retained 18 months, microfilm for 6 years (required by GAO) then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Personnel Management Directorate, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. Notification procedure: Department of Transportation, Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedure may be obtained by writing to or visiting Commandant, G–SII at the address in "Notification Procedure" or the local Coast Guard District or unit office for the area in which an individual's duty station is located. Proof of identity will be required prior to affording an individual access to records. A military identification card, a driver's license, or similar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures".

RECORD SOURCE CATEGORIES:

Individuals, Coast Guard personnel and payroll offices.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 534

SYSTEM NAME:

Travel and Transportation of Household Effects.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WP, U.S. Coast Guard Headquarters, Director, Personnel Management Directorate, 2100 2nd Street, SW., Washington, DC 20593–0001. District Office and Headquarters' units.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty military members, retired military members, and civilian employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Travel claims, transportation claims, government bills of lading, applications for shipment of household effects.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 10 U.S.C. 1147; 14 U.S.C. 512, 632; 37 U.S.C. 406; 49 CFR 1.45, 1.46

PURPOSE(S):

Payment of household and transportation claims.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Vouchers submitted for payment of claims, for audit of claims for payment, to account for cost of moving household goods, advice of shipment of household goods for reporting of funds expended, and for payment of claims. Used by General Accounting Office in connection with the performance official duties. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICY AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Filed manually in file folders.

RETRIEVABILITY:

Schedule numbers and/or individual name.

SAFEGUARDS:

Access is regularly limited to user staff members. Stored in a building secured after duty hours.

RETENTION AND DISPOSAL:

Records are kept for 3 years, and then transferred to a Federal Records Center. Exception: Schedule 98–Ts (Freight and Transportation) are forwarded to General Accounting Office, GAO after 3 months.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–WP, Director, Personnel Management Directorate, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedure may be obtained by writing to or visiting Commandant, G-SII) at the address in "Notification procedure" or the local Coast Guard District or unit office for the area in which an individual's duty station is located. Proof of identity will be required prior to affording an individual access to records. A military identification card, a driver's license, or similar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedure".

RECORD SOURCE CATEGORIES:

Individual subject of the record. Ground freight and transportation carriers and agents. Airline companies. Personnel offices. Other responsible agencies.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 535

SYSTEM NAME:

Coast Guard Exchange System, CGES and Morale, Welfare and Recreation, MWR Program.

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WP, United States Coast Guard Headquarters, Director, Personnel Management Directorate, 2100 2nd Street, SW., Washington, DC 20593–0001. CG Districts, Maintenance and Logistics Commands and Headquarters Units.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Civilian employees. Active duty and retired military members. Military dependents.

CATEGORIES OF RECORDS IN THE SYSTEM:

Payroll records. Accounting records for CGES/MWR loans. Listing of bad checks. Job applications. Correspondence. Membership applications. Accounts receivable. Investigatory reports involving abuse of facilities. Accounting records for CGES/MWR.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 5 U.S.C. 2105; 10 U.S.C. 1059, 1146, 1587; 14 U.S.C. 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

Maintain financial and personnel records for Coast Guard non-appropriated fund entities.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Payroll for CGES/MWR employees. Personnel actions. Accounting purposes. Budget and inventory controls. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Automated records may be stored on tape, disc, drums and punched cards. Manual records may be stored in file folders and/or credit ledgers, card files, and notebooks.

RETRIEVABILITY:

Indexed alphabetically.

SAFEGUARDS:

Access is regularly limited to authorized personnel. Building is secured after duty hours.

RETENTION AND DISPOSAL:

Records are retained until usefulness has expired and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–WP, Director, Personnel Management Directorate, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd

Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure".

RECORD SOURCE CATEGORIES:

Individual record subject. Previous employees. Employment agencies. Civilian and military investigative reports. General correspondence.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 536

SYSTEM NAME:

Contract and Real Property File System.

SYSTEM CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–CFM, United States Coast Guard Headquarters, Chief of Staff, 2100 2nd Street, SW., Washington, DC 20593–0001. District and Headquarters Units.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals doing business with the Coast Guard. Employees of prime and sub-contractors. Individuals requiring use of CG property. Military members and civilian employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contracts and related files. Real property and leased family housing files. Bidders list. Minority compliance records. Payment schedule files relating to Admiralty and Tort claims. Personnel claims. Collection register. Open purchase order file. Correspondence files and vendor lists. Information on employees of contractors, job level and pay of these employees. Permits, licenses and easement.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 10 U.S.C. 2571; 14 U.S.C. 92(f), 93(o), 632, 666, 685; 49 CFR 1.45, 1.46; COMDTINST 5100.47.

PURPOSE(S):

Determine compliance of contractors with minimum wages for certain skills and trades on government contracts.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Recordkeeping of payments and collection. Determine potential for contracting with the government. Record issuance of personal property and maintain inventories. Determine contractor responsibilities and liability. Used by the General Accounting Office, GAO in performance of duties. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manually filed in file folders, maintained on tape/card three ring binders, and in hard cover books.

RETRIEVABILITY:

Retrieved by individual/company name, number, construction job, and/or location.

SAFEGUARDS:

Access restricted to authorized personnel only, some records in locked safe and/or filing cabinet. Maintained in building having roving security guard after duty hours.

RETENTION AND DISPOSAL:

Some records retained indefinitely; some retained 3, 4 or 6 years, then destroyed or forwarded to a Federal Records Center for an additional 7 years.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–CFM, United States Coast Guard Headquarters, Chief of Staff, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure".

RECORD SOURCE CATEGORIES:

Individuals. Contractors. Contract employees. Bidders. Financial institutions. Insurance Companies. Community associations. Other agencies.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 537

SYSTEM NAME:

FHA Mortgage Insurance for Servicemen.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WP, United States Coast Guard Headquarters, Director, Personnel Management Directorate, 2100 2nd Street, SW., Washington, DC 20593–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Coast Guard Military Personnel who have applied for Federal Housing Administration Mortgage Insurance.

CATEGORIES OF RECORDS IN THE SYSTEM:

Selected aspects of FHA Mortgage Insurance Records for military personnel, including copies of Form DD–802, "Request for and Certificate of Eligibility" and Form DD–803, "Certificate of Termination."

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 632, 680–689; 49 CFR 1.45, 1.46

PURPOSE(S):

Enroll, terminate, and verify eligibility of members in FHA 222 Program.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Verify that billings from HUD are correct, and payable from Coast Guard funds.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manually in closed file cases.

RETRIEVABILITY:

By named individual, alphabetically.

SAFEGUARDS:

Access is regularly limited to user staff members. After duty hours, the building is patrolled by roving security guards.

RETENTION AND DISPOSAL:

Files are maintained as long as a member is covered by an insured mortgage loan; 3 years after, files are forwarded to Federal Records Center. Destroyed 4 years after case files are closed.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–WP, Director, Personnel Management Directorate, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street SW., Washington, DC 20593–0001. The written request should include the requester's name in full and signature.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing Commandant, G–SII, at the address above, or by visiting the Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. A military identification card, a driver's license, or similar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures".

RECORD SOURCE CATEGORIES:

Individual concerned and the Federal Housing Administration.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 571

SYSTEM NAME:

Physical Disability Separation System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commander, U.S. Coast Guard Personnel Command, 2100 2nd St., SW., Rm. 1504, Washington, DC 20593–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

USCG active duty personnel, USCG Reserve personnel on active duty orders for periods greater than 29 days, and USCG personnel separated or retired for physical disability.

CATEGORIES OF RECORDS IN THE SYSTEM:

Central Physical Evaluation Board files. Formal Physical Evaluation Board files. Physical Review Council files. Physical Disability Appeal Board files.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 10 U.S.C. 1216, 14 U.S.C. 366, 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

Physical disability separation and retirement proceedings.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Department of Veteran Affairs for assistance in determining the eligibility of individuals for benefits administered by that agency and available to USPHS or DOD medical personnel in connection with the performance of their official duties. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders, microfilm, magnetic tape, punched cards, machine lists, discs, and other computerized or machine readable media.

RETRIEVABILITY:

Name, social security number, and the diagnosis or International Classification of Diseases, ICD code.

SAFEGUARDS:

Records are maintained in locked filing equipment in controlled access rooms. Records are accessible only to authorized personnel. Computer terminals are located in supervised areas, with access controlled by password or other user code system.

RETENTION AND DISPOSAL:

Retained two years after disposition then transferred to Federal Records Center, St. Louis, MO.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, U.S. Coast Guard, Personnel Command, 2100 2nd St., SW., Rm. 1504, Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Notarized written requests should contain the full name and social security number of the member and be addressed to: Commandant, G–SII–2, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure".

RECORD SOURCE CATEGORIES:

Information in records developed through proceedings of administrative bodies listed in "Categories of records" above.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 572

SYSTEM NAME:

USCG Military Personnel Health Record System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Member's unit or the Coast Guard health care facilities at which the member or dependents receive treatment.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty, reserve, and retired members of the uniformed services and their dependents.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of medical and dental treatment, including x-rays. Physical Examinations. ADP Records containing due date for physical/dental and eye examinations, inoculations, screening tests and results of actions required by Coast "Guard or other federal state or local government or agency. Records concerning line of duty determination and eligibility for disability benefits.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 10 U.S.C. 1071–1107; 14 U.S.C. 632; 49 CFR 1.45, 1.46

PURPOSE(S):

Determine suitability of members for overseas assignments and to develop automated information relating to medical readiness in wartime and contingence operations.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

a. Provided to federal, state, or local governments and agencies to compile statistical data for research and auditing; to provide quality assurance; to report medical conditions and other data required by law; to aid in preventive health and communicable disease control programs.

b. Provided to the Joint Commission on Accreditation of Healthcare Organizations to evaluate health care provided, personnel and facilities for professional certification and hospital accreditation; to provide quality services.

c. Records of communicable disease are provided to the Department of Defense to analyze the results, to ensure uniformity of record keeping, and to centralize production of reports for all uniformed services.

d. Provided to the Department of Defense or other federal, state, or local governments and agencies for casualty identification purposes.

e. Provided to the Social Security Administration and Veterans Administration for use in determining an individual's entitlement to benefits administered by those agencies.

f. Provided to the Public Health Service, Department of Defense, or Veterans Administration medical personnel or to personnel or facilities providing care to eligible beneficiaries under contract in connection with medical treatment of individuals.

Records are provided to the Department of Health and Human Services for purposes of the Federal Medical Care recovery set. Records are available to the Public Health Service or DOD medical personnel in connection with medical treatment of individuals at USPHS or DOD facilities. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Individual files are in folders. Portions of records are automated at some units.

RETRIEVABILITY:

Name or social security number of member or dependents.

SAFEGUARDS:

Room or cabinets in which records are located are locked when unattended. Access limited to these records at all times by personnel screening.

RETENTION AND DISPOSAL:

a. Active Duty Personnel: Individual medical files are retained at the members' unit or medical administration office for so long as individual is assigned to the particular area. When the member is reassigned, the individual medical file is transferred to the new duty station upon reassignment of member. Upon separation or retirement, the individual medical file is incorporated into the Official Officer Service Records System, DOT/CG 626, or Enlisted Personnel Records System, DOT/CG 629, as appropriate.

b. Retired Personnel: Individual medical files are retained at the medical facility for a period of 4 years from date of last activity. Transferred to National Personnel Records Center (Military Personnel Records). 9700 Page Blvd, St. Louis, MO 63132, 4 years after last report.

c. Dependents: Individual medical files are retained at the medical treatment facility for period of 4 years from date of last activity. Transferred to new duty station of sponsor upon written request of dependent. Records not transferred are forwarded to National Personnel Records Center, CPR, 111 Winnebago Street, St. Louis, MO 63118, and 4 years after last activity.

d. Reserve Personnel: Individual medical files are retained in custody of the reserve group or unit, or district commander(s) for so long as the reservist is assigned to the particular area. When the member is reassigned, the individual medical file is transferred to the new reserve group or unit or district commander as appropriate. Upon separation or retirement, the individual medical file is incorporated into Official Coast Guard Reserve Service Record System, DOT/CG 676

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–WK, United States Coast Guard Headquarters, Director, Health and Safety Directorate, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII–2, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

a. Active Duty personnel: Health care facility where the record is located, or see "Notification Procedure".

b. Retired Personnel and all Dependents: Health care facility where the record is/was located, or: (Retired) National Personnel Records Center, (Military Personnel Records) 9700 Page Blvd., St. Louis, MO 63132; (Dependents) National Personnel Records Center, CPR, 111 Winnebago Street, St. Louis, MO 63118

Reserve Personnel: Reserve group or unit or district commander of the district where command is located, or see "Notification Procedure".

The decision to release medical records directly to the individual shall be made by medical practitioner per 49 CFR 10.35(c).

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure."

RECORD SOURCE CATEGORIES:

Medical facilities where beneficiaries treated or examined. Investigations resulting from illness or injury. The individual.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 573

SYSTEM NAME:

United States Public Health Services, PHS Commissioned Officer Corps Staffing and Recruitment Files.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WK, United States Coast Guard Headquarters, Director, Health and Safety Directorate, 2100 2nd Street, SW., Washington, DC 20593–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

PHS commissioned officers assigned to duty with the Coast Guard.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personnel records, assignment preference, reference questionnaires, background information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 10 U.S.C. 1043, 14 U.S.C. 93(r), 632, 645; 42 U.S.C. 213, 253; 49 CFR 1.45, 1.46.

PURPOSE(S):

Assist administrators in assigning personnel to area requiring their specific skills.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Monitor career development of personnel assigned to program. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

By name of individuals.

SAFEGUARDS:

During working hours access is controlled by office personnel, during non-working hours building is patrolled by roving security patrol.

RETENTION AND DISPOSAL:

Records are retained during period of an individual's assignment to the Coast Guard. Thereafter, records are destroyed by shredding.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–WK, Director, Health and Safety Directorate, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII–2, United States Coast Guard Headquarters, 2100 2nd

Street, SW., Washington, DC 20593–0001. Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant, G-SII–2 at the address in "Notification procedures". Proof of identity will be required prior to release of records. A military identification card, driver's license or similar document will be considered suitable identification

CONTESTING RECORD PROCEDURES:

See "Record access procedures".

RECORD SOURCE CATEGORIES:

Previous employers, educational institutions, references, Coast Guard Medical Administrators and the individual.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 576

SYSTEM NAME:

USCG Non-Federal Invoice Processing System, NIPS.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WK, United States Coast Guard, 2100 Second Street, SW., Washington, DC 20593–0001. Commander, Maintenance and Logistics Command Atlantic, Health Services Division, Governor's Island Building 400, New York, NY 10004–5100. Commander, Maintenance and Logistics Command Pacific, Health Services Division, Coast Guard Island, Alameda, CA 94501–5100.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty, reserve, and retired members of the uniformed services and their eligible dependents, and non-Federal health care providers that have rendered services to eligible beneficiaries.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence, memoranda, and related documents concerning potential and actual health care invoices for processing by NIPS. Medical and dental treatment records provided to the individual that are the subject of an invoice for non-federal health care provided to an eligible beneficiary. Automated data processing, ADP records containing identifying data on individuals including: Units of assignment and address, home address, and information necessary to process and monitor bills for payment.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 10 U.S.C. 1091, 14 U.S.C. 93(r), 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

Review of cost data and appropriateness of care.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Medical information, including records of health care and medical invoices may be disclosed to health care professionals, auditing, utilization and peer review organizations to support a government claim. See Prefatory Statement of General routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Storage of individual files is in folders. Portions of records are extracted in an ADP data base. ADP data is maintained in hard disk and magnetic tape storage.

RETRIEVABILITY:

Name or Social Security Number of member or dependents sponsor. Name of Member's Unit. Name or tax identification number of non-Federal health care providers.

SAFEGUARDS:

Room and cabinets in which records are located are locked when unattended. There are roving guard patrols during non-duty hours. Access to records is regularly limited to those directly involved in managing claims. Records in the ADP database are retrievable only by those with authorized access to ADP equipment and the database is protected by standard ADP security measures including the use of passwords.

RETENTION AND DISPOSAL:

Retained for 1 year; transferred to a Federal Record Storage Facility and retained for an additional 5 years 3 months, and destroyed thereafter.

SYSTEM MANAGER:

Commandant, G–WK, Director, Health and Safety Directorate, United States Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Send a written request with patient's name, sponsor's name and social security number, to the System Location for the MLC where care was rendered. The request must be signed by the individual, or if a minor dependent, by the parent or guardian. Commander, Maintenance and Logistics Command Atlantic, Health Services Division, Governor's Island, New York, NY 10004–5100, or Commander, Maintenance and Logistics Command Pacific, Health Services Division, Coast Guard Island, Alameda, CA 94501–5100, as appropriate.

RECORD ACCESS PROCEDURES:

Write or visit the appropriate Commander, MLC at the address given in "Notification procedure." Responsible for where the care was received.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

From the individual, individual's spouse, parent or guardian. Medical facilities (United States Coast Guard, Department of Defense, uniformed Services Treatment Facility, or non-Federal, provider) where beneficiaries are treated. For Active Duty personnel—the Official Officer Service Records System, DOT/CG 626, and the Enlisted Personnel Record System; DOT/CG 629. For Reserve personnel—the Official Coast Guard Reserve Service Record System, DOT/CG 676. Investigations resulting from illness or injury.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 577

SYSTEM NAME:

USCG Federal Medical Care Recovery Act, FMCRA Record System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

U.S. Coast Guard, Health and Safety Directorate, 2100 2nd Street, SW., Washington, DC 20593–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty, reserve, and retired members of the uniformed services and their eligible dependents.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence, memoranda, and related documents concerning potential ad actual FMCRA claims, and copies of medical and dental treatment provided to the individual subject of the claim, and copies of medical bills associated with civilian care provided at government expense. Automated data

processing, ADP records containing identifying data on individuals, unit of assignment and address, home address, the amount of the claim, the amount paid to the government on the claim, dates of correspondence sent, due dates of reply, claim number, date claim opened, and date claim closed.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 632; 42 U.S.C. 2651–2653; 49 CFR 1.45, 1.46.

PURPOSE(S):

Managing, processing, and collecting claims for the government.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information may be disclosed to attorneys and insurance companies involved in settling and litigating claims. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Storage of individual files is in folders. Portions of records are extracted in ADP database. ADP database will be maintained in hard disk and magnetic tape storage.

RETRIEVABILITY:

Name or social security number of member, retiree or dependent.

SAFEGUARDS:

Room and cabinets in which records are located are locked when unattended. Roving guard patrol during non-duty hours. Access to records limited to those directly involved in managing claims with a need to know. Records in ADP database retrievable only to those with authorized access to ADP equipment and database is protected by standard ADP.

RETENTION AND DISPOSAL:

Records are retained at USCG Headquarters for 1 year; transferred to a Federal Records Storage Facility and retained for an additional 5 years, 3 months for a total of 6 years, 3 months and destroyed thereafter.

SYSTEM MANAGER(S) AND ADDRESS:

Health and Safety Directorate, United States Coast Guard, Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Send a written request with the client's name, sponsor's name and social security number to the system manager. The request must be signed by the individual, or if a minor dependent, by the parent or guardian.

RECORD ACCESS PROCEDURES:

Write or visit: Commandant, G–WK, U.S. Coast Guard, Attn: FMCRA Section, 2100 Second Street, SW., Washington, DC 20593–0001.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

From the individual, or if a minor, the parent or guardian. Medical facilities (U.S. Coast Guard, Department of Defense, Uniformed Services Treatment Facility, or Civilian Facility) where beneficiaries are treated. Injury investigations. Attorneys and insurance companies involved in the claim. For Active Duty personnel—the Official Officer Service Records System; DOT/CG 626, and the Enlisted Personnel Records System; DOT/CG 629. For reserve personnel—the Official Coast Guard Reserve Service Record System, DOT/CG 676.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 586

SYSTEM NAME:

Chemical Transportation Industry Advisory Committee.

SECURITY CLASSIFICATION:

Unclassified-sensitive.

SYSTEM LOCATION:

Commandant, G–M, United States Coast Guard, 2100 2nd Street, SW., Washington, DC 20593–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Committee members.

CATEGORIES OF RECORDS IN THE SYSTEM:

Address, phone number. Biographical sketch. Committee information. Minutes of meetings.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

Arranging meetings, keeping records of committee business, determine committee membership.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

By committee name/individual name.

SAFEGUARDS:

Personnel screening prior to granting access. Building has roving security after hours.

RETENTION AND DISPOSAL:

Permanently retained.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant (G–M), United States Coast Guard Headquarters, Chief, Marine Safety and Environmental Protection, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII–2, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant, G–SII–2, at the address in "Notification Procedure." Proof of identity will be required prior to granting access. A military identification card, driver's license or similar document is considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures'.

RECORD SOURCE CATEGORIES:

From the individual of record.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 588

SYSTEM NAME:

Marine Safety Information System, MSIS.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

United States Coast Guard (USCG), Operations Systems Center, 175 Murall Drive, Martinsburg, WV 25401.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals with established relationship(s) associates to maritime vessels that are included in the Marine Safety Information System, MSIS. Specifically, information on vessel owners, operators, masters, crew and/or agents can be stored in MSIS.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information on maritime vessels and vessel characteristics including: Vessel identification data, registration data, port visits, inspection data, documentation data, port safety boardings, casualties, pollution incidents, and civil violations if applicable and associated information (data pertaining to people or organizations associated with vessels) for owners, operators, agents, and possibly crew members. Statements submitted by Coast Guard relating to boardings, investigations as a result of a pollution and/or casualty incident, as well as any violations of United States law, along with civil penalty actions taken as a result of such violations. Such reports could contain names of passengers on vessels, as well as witnesses to such violations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 632; 33 U.S.C. 1228; 46 U.S.C. 2102, 3301, 3714, 3717, 6101, 6102, 6307(c)", 6301, 7101, 7309; 49 CFR 1.45, 1.46.

PURPOSE(S):

Build a safety performance history of vessels, their owners, operators and facilities, thereby enhancing safety.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

MSIS primarily supports operational decision making in implementing and enforcing marine safety and environmental programs. In addition, the system is used by field units for the issuance of Certificates of Documentation, Certificates of Inspections, port safety boardings, monitoring cargo transfers, capturing data on pollution incidents and casualties, and for reporting of violations resulting from these incidents. MSIS Records may be disclosed to the following United States Government entities.

(1) United States Department of Commerce, National Technical Information Service, NTIS: Characteristics of vessels documented by the USCG and owner information. This information is the same as that published in the annual publication "Merchant Vessels of the United States," CG–408 (also known as "the blue book"). This information is distributed on tape and is sold to the public.

(2) United States Customs Service, USCS: Characteristics of vessel, United States ports visited and owner information. USCG information is compared to USCS vessel and/or owner information.

(3) Military Sealift Command (MSC): Characteristics of vessels. USCG information is compared to MSC vessel information.

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Storage of all records is in an ADP data base operated and maintained by the United States Coast Guard. All data is retained indefinitely.

RETRIEVABILITY:

Records are retrieved by:

a. Vessel name or vessel identification number, VIN.

b. Facility name or facility identifying number, FIN.

c. Involved parties name, IPN, (owner, operators, agent, etc.).

d. Casualty case number.

e. Pollution incident case number.

SAFEGUARDS:

The MSIS falls under the guidelines of the Operations System Center in Martinsburg, WV. This computer facility has its own approved System Security Plan which provides that:

a. The system be maintained in a secure computer room with access restricted to authorized personnel only.

b. Access to the building must be authorized and is limited. A Sensitive Application Certification (SAC) has been approved for the MSIS.

The United States Coast Guard will operate the MSIS in consonance with Federal security regulations, policy, procedures, standards and guidance for implementing the Automated Information Systems Security Program.

c. Only authorized Department of Transportation personnel, and authorized United States Government contractors conducting system maintenance may access MSIS records.

d. Access to records password protected and the scope of access for each password is limited to the official need of each individual authorized access.

e. Additional protection is afforded by the use of two password security.

RETENTION AND DISPOSAL:

Record retention is indefinite.

SYSTEM MANAGER(S) AND ADDRESS:

United States Coast Guard, Information Management Division, G–MIR–2, 2100 2nd Street, SW, Washington, DC 20593–0001. Notification Procedure: Submit a written request noting the information desired and for what purpose the information will be used. A first party request should be specifically noted. The request must be signed by the individual, or his/her legal representative. Send the request to: Commandant, G–SII, United States Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593–0001

RECORD ACCESS PROCEDURES:

Same as Notification procedures.

CONTESTING RECORD PROCEDURES:

Same as Notification procedures.

RECORD SOURCE CATEGORIES:

All information entered into the MSIS is gathered from boardings, inspections, and Documentation offices in the course of normal routine business. This information is gathered from the owners, operators, crew members, agents, passengers, witnesses, United States Coast Guard personnel.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system of records may be exempt from disclosure under the provisions of 5 U.S.C. 552a (k)(2). However, in specific cases where maintenance of information results in the denial of a right, privileges or benefits to which the individual is entitled, the information will be released in accordance with section (k)(2). This provides in part that investigatory material compiled for law enforcement purposes may be withheld from disclosure to the extent the identity of the source of the information would be revealed by disclosing the investigatory record, and the source has received an express promise that his/her identity would be held in confidence.

DOT/CG 589

SYSTEM NAME:

United States Merchant Seamen's Records.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–M, United States Coast Guard, CG, 2100 2nd Street, SW.,

Washington, DC. 20593–0001. Marine Inspection Office or the Marine Safety Office where the seaman was documented.

CATEGORIES OF INDIVIDUALS:

United States Merchant Seamen.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personnel File. Shipping Articles. Locator List. Log Books. Seamen's License Records. Fingerprint Records. Disciplinary Records. Security Records.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C 301; 14 U.S.C. 632; 46 U.S.C. 2103, 7319, 7701, 8701; 14 CFR 12.02–25; 49 CFR 1.45, 1.46.

PURPOSE(S):

Administering the Commercial Vessel Safety Program to determine domestic and international qualifications for the issuance of licenses, documents and staff officer certifications.

ROUTINE USES OF THE RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Provide information to other Federal Agencies, such as the Veterans' Administration, the Social Security Administration, etc. in connection with benefits and services administered by those agencies; to provide information to private organizations when considered beneficial to the seaman. See Prefatory Statement of General Routine Use.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12). Disclosures may be made from this system to "consumer reporting agencies" (collecting on behalf of the United States Govt.) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper files are stored at a secure, controlled access site managed by contract personnel; on-site government oversight is provided by the Coast Guard's National Maritime Center. Electronic records are stored on a secure database server at the Coast Guard Operations Systems Center.

RETRIEVABILITY:

Alphabetical order by last name, first name, middle name. Retrieval is made by name and cross-indexed by identifying number (*e.g.* Social Security Number, "Z" number, or Continuous Discharge Book number).

SAFEGUARDS:

The active personnel records are stored in a locked room at a contractor's site. Access to the room is regularly limited to trained employees of the contractor and to National Maritime Center personnel. National Maritime Center personnel provide full time oversight. Computer records are retrievable only by approved Coast Guard and contractor personnel. Passwords are required by all personnel who access the system and the system records the name of the user each time a record is accessed. Each user's access is limited to only that portion of the overall file that has previously been determined to the user's needs.

RETENTION AND DISPOSAL:

Paper personnel files are held at the contractor's site for five years past the last activity with the file. They are then transferred to the Federal Records Center in Suitland, MD. Disciplinary Records are maintained in paper form. Administrative Law Judge's Decisions and Orders and Appeal File are transferred to a Federal Records Center after 5 years. Commandant's Decision on Appeal and National Transportation Safety Board Decisions and Orders are retained. Disciplinary Record Cards are destroyed upon notice of death.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Commandant, G–M, United States Coast Guard Headquarters, Marine Safety and Environmental Protection, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

United States Coast Guard Headquarters, Commandant, G–SII, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure" or the Marine Inspection Office or Marine Safety Office where the document was issued locally.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

Personnel File—seamen, United States Coast Guard officials, other Federal Agencies and employer. Shipping Articles Vessels' operators, seamen, masters of vessels, State Department, and Coast Guard officials. Disciplinary Records—Investigating Officers at the various Marine Inspection and Marine Safety Offices.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a (k)(2).

DOT/CG 590

SYSTEM NAME:

Vessel Identification System, VIS.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

United States Coast Guard, USCG, Operations Systems Center, 600 Coast Guard Drive, Kearneysville, WV 25430–3000.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals with established relationship(s)/association to vessels that are state-numbered and/or titled and United States Coast Guard-documented, and that are included in the Vessel Identification System, VIS. Specifically, owners, or agents of such vessels, as well as lienholders.

CATEGORIES OF RECORDS IN THE SYSTEM:

Vessel identification information and vessel characteristics on state-numbered and/or titled vessels or Coast Guard-documented vessels. Personal information including: Name of each owner, address of principal place of residence of at least one owner, mailing address if different than the principal place of residence, and either an owner's social security number, date of birth and driver's license number, or other identifier. Records containing lienholder and insurance information including: Name of lienholder, and city and state of principal place of residence or business of each lienholder. Law enforcement status code (stolen, recovered, lost, destroyed, or abandoned), law enforcement hold, reporting agency, originating case number, National Crime Information Center, NCIC, number, VIS user identification, incident location, last sighted date/time/location, law enforcement contact and phone number, and hours of operations. Records containing vessel registration information including: registration and, if applicable title number including effective and expiration date, issuing authority, and, for Coast Guard documented vessels, the official number.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 632; 46 U.S.C. 12501–12507; 49 CFR 1.45, 1.46

PURPOSE(S):

Provide a nationwide pool of state-numbered and/or titled and United States Coast Guard-documented vessels that will assist in identification and recovery of stolen vessels, deter vessel theft and fraud, and other purposes relating to the ownership of vessels.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Federal and state numbering and titling officials for the purposes of tracking, registering and titling vessels. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Automated data processing (ADP) database operated and maintained by the United States Coast Guard.

RETRIEVABILITY:

Vessel owner or business name; Vessel owner's social security number or alternate identifier (*e.g.* DOB, driver's license number, or taxpayer identification number); vessel hull identification number, HIN; State certificate of number; title number.; United States Coast Guard official number; USCG vessel name and hailing port.

SAFEGUARDS:

The VIS falls under the guidelines of the United States Coast Guard Operations System Center, OSC in Martinsburg, WV. This computer facility has its own approved System Security Plan.

RETENTION AND DISPOSAL:

Records of active cases are retained until they become inactive; inactive cases are archived and retained for 50 years. Records will be selected to be archived into an off-line file for any vessel that has been inactive for a period of 10 years. Copies of backups are stored at an off-site location.

SYSTEM MANAGER (S) AND ADDRESS:

Information Resource Division, System Development Division, G–MRI–3; United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, USCG Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure".

RECORD SOURCE CATEGORIES:

Participating States and the National Crime Information Center, NCIC.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system of records may be exempt from disclosure under the provisions of 5 U.S.C. 552a (k)(2).

DOT/CG 591

SYSTEM NAME:

Merchant Vessel Documentation System, Manual.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Automated: United States Coast Guard, USCG, Operations Systems Center, 600 Coast Guard Drive, Kearneysville, WV 25430–3000. Manual: United States Coast Guard, USCG, National Vessel Documentation Center, 2039 Stonewall Jackson Drive, Falling Waters, WV 25419–9502.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Vessel owners. Mortgagees. Vessel buyers and sellers. Lien claimants. Vessel builders.

CATEGORIES OF RECORDS IN THE SYSTEM:

Vessel owner information. Vessel information. Instruments of record (bills of sale, mortgages, etc.).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 632; 46 U.S.C. 12119, 12502, 46 CFR part 67; 49 CFR 1.45, 1.46

PURPOSE(S):

Establish the eligibility of vessels for documentation, record and track documented vessels, issue marine documents and record instruments of record (bills of sale, mortgages, etc.).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Publication of the annual MERCHANT VESSELS OF THE UNITED STATES. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Index of owners maintained by Commandant, G–MVD. All other records maintained at home port of vessel by vessel name.

RETRIEVABILITY:

Name of vessel owner.

SAFEGUARDS:

Personnel screening.

RETENTION AND DISPOSAL:

Listings of vessel owners constantly updated by additions and deletions (automated). Field office vessel folders transferred to FRC two years after change of vessel's home port or 2 years after removal of vessel from documentation (manual).

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–M, Chief, Marine Safety and Environmental Protection, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure" or the local Coast Guard District Office.

CONTESTING RECORD PROCEDURES:

Same as "Record Access Procedures."

RECORD SOURCE CATEGORIES:

Vessel owners, Mortgagees, lien claimants, vessel sellers and buyers, Coast Guard admeasures, and vessel builders.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 592

SYSTEM NAME:

Registered/Applicant Pilot Eligibility Folder.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commander, Ninth Coast Guard District, Great Lakes Pilotage Staff, 1240 East Ninth St., Cleveland, OH 44199–2060.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

United States registered pilots and applicant pilots suitable registered to

perform pilotage duties aboard foreign vessels on the Great Lakes.

CATEGORIES OF RECORDS IN THE SYSTEM:

Application for registration, renewal of registration, annual report of physical examination, Coast Guard license data, and examination for registration.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 632, 709; 49 CFR 1.45, 1.46.

PURPOSE(S):

Document pilot registration.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Training program needs, retirements, statistical compilations, and negotiations with Canadian authorities to assure equitable participation by U.S. registered pilots with Canadian registered pilots. See Prefatory Statement of General Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Stored in file folders.

RETRIEVABILITY:

Name and pilot registration number.

SAFEGUARDS:

Screened by office personnel prior to use. Locked in cabinets during non-working hours.

RETENTION AND DISPOSAL:

Records are maintained permanently.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, Ninth Coast Guard District, Great Lakes Pilotage Staff, 1240 East Ninth Street, Cleveland, OH 44199–2060.

NOTIFICATION PROCEDURE:

Same as "System manager".

RECORD ACCESS PROCEDURES:

Same as "System manager".

CONTESTING RECORD PROCEDURES:

Same as "System manager".

RECORD SOURCE CATEGORIES:

Individual's original application for U.S. Pilot's registration and individual's yearly report of medical examination.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 611

SYSTEM NAME:

Investigative Case System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–O–CGIS, United States Coast Guard, CG, 2100 2nd Street, SW., Washington, DC 20593–0001. Coast Guard District Offices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

United States Coast Guard military personnel, merchant marine personnel, port and dock workers, and persons under investigation for violations of laws and regulations administered by the Coast Guard.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personnel security investigations, national agency check results, criminal investigation, counterintelligence investigations, computerized case control system.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 2, 89a, 93(e), 632; 33 U.S.C. 1221; 14 U.S.C. 632; COMDTINST 5830.1

PURPOSE(S):

Security clearances.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Actions by commanders under the Uniform Code of Military Justice. Career advancement of United States Coast Guard military personnel. Approval of merchant seamen documents. Access of individuals to port facilities. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Investigative dossiers and 3x5 card retrieval system.

RETRIEVABILITY:

By name and/or case number.

SAFEGUARDS:

Alarm controlled spaces, locked and/or limited access file cabinets and office spaces. Using receipt control, automatic data processing, ADP system cannot be penetrated for data through terminals, or otherwise, located outside the United States Coast Guard computer center without use of proper administrative controls. Release of dossiers to accredited personnel on "need-to-know' basis only.

RETENTION AND DISPOSAL:

Dossiers retained 50 years from date of birth. Deceased, retirees and others separated are held one year from separation. Dossiers are retired to the Washington National Federal Records Center for further retention of 30 years. 3x5 Cards are annotated to recall retired dossiers if necessary. Computer printouts are retained for 10 years then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Operations, G–O, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure" or the local Coast Guard District Office.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

National Agency Checks, background investigations, criminal investigations, interviews, records checks, observations, statements.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system of records may be exempt from disclosure under the provisions of 5 U.S.C. 552a (k)(2), (5), and (7).

DOT/CG 612

SYSTEM NAME:

Port Security Card System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–O–CGIS, United States Coast Guard Headquarters, CG, 2100 2nd Street, SW., Washington, DC 20593–0001. District Offices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons regularly employed on vessels and water front facilities, or persons having regular public or private business with the operation, maintenance, or administration of vessels and cargoes or waterfront facilities.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications for port security cards awaiting processing. Processed applications indicating those granted or denied port security cards.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 2, 91, 632; 33 CFR 125; 49 CFR 1.45, 1.46.

PURPOSE(S):

Determine eligibility for issuance of Port Security Cards.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper files, 3x5 cards.

RETRIEVABILITY:

By name.

SAFEGUARDS:

Maintained in file cabinets in secure areas. Personnel are screened prior to granting access.

RETENTION AND DISPOSAL:

Retained for 8 years, then destroyed by mutilating, shredding or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–O, Chief, Operations, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as 'Notification Procedure' or the local Coast Guard District or unit office.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

Individual applications. National Agency checks. Other records already at Coast Guard Headquarters, if any.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system of records may be exempt from disclosure under the provisions of 5 U.S.C. 552a(k)(2).

DOT/CG 622

SYSTEM NAME:

Military Training and Education Records.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Director, Reserve and Training Directorate, G–WT, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. District and Headquarters Units.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Coast Guard Military Personnel (Commissioned Officers, Commissioned Warrant Officers, Cadets, and Enlisted Personnel).

CATEGORIES OF RECORDS IN THE SYSTEM:

General Service Correspondence Course. Off-Duty Education Records. Professional Training Records. Non-traditional Educational Support Records. Achievement and Aptitude Test Results. Academic Performance Records. Correspondence Course Rate Advancement Records. Military Performance Records. Admissions Processing Records. Grade Reporting Records. Cadet Academic Status Records. Transcript Maintenance Records. Cadet Discipline Status Records. Military Personnel Records. Military Training Schedules Records.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 93(g), 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

Evaluation and measurement of training performance.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Statistical summaries. Input to personnel records. Partial criteria for selection and admission to service/professional schools. Partial criteria for selection to postgraduate education programs. Criteria for admission to the Coast Guard. Criteria for retention in service Schools. Criteria for promotion. See Prefatory Statement of General Routine Uses, 3 through 5 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders stored in file cabinets. Portions are stored on ADP equipment.

RETRIEVABILITY:

Name, rate, class number, cadet code number, and Social Security Number.

SAFEGUARDS:

Records are kept in file cabinets in offices that are locked during off-duty hours. Those records stored in ADP equipment may only be accessed through use of a user access code.

RETENTION AND DISPOSAL:

Personal History, Service History and School Conduct and Military Performance records are kept for one year. Academic and Correspondence Course records are kept for five years. Aptitude and Achievement Test results, as a part of Training and Education records, are kept for five years. Records are destroyed by mutilating, shredding or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Reserve and Training Directorate, G–WT, United States Coast Guard Headquarters, 2100 2nd Street, SW,, Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

United States Coast Guard, Headquarters, Commandant, G–SII, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as 'Notification Procedure' or the local Coast Guard activity where assigned for training.

CONTESTING RECORD PROCEDURES:

Same as "Record Access Procedures."

RECORD SOURCE CATEGORIES:

Official military personnel records, test results, instructors and supervisors.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system of records may be exempt under 5 U.S.C. 552a(k)(5), (6), and (7).

DOT/CG 623

SYSTEM NAME:

Military Pay and Personnel System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

United States Coast Guard, CG, Department of Transportation Computer Center, 400 7th Street, SW., Washington, DC 20590–0001. United States Coast Guard Human Resources Service and Information Center, 444 SE. Quincy Street, Topeka, KS 66683–3591. United States Coast Guard, 2100 2nd Street, SW., Washington, DC 20593–0001. Unit maintaining the individual's

pay and personnel record and permanent duty unit.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Coast Guard military personnel, active duty and reserve. Retired reserve Coast Guard military personnel waiting for pay at age 60. Active duty National Oceanic and Atmospheric Administration, NOAA officers. Personnel separated from service in all the preceding categories.

CATEGORIES OF RECORDS IN THE SYSTEM:

Identifying information, such as name(s), date of birth, home residence, mailing address, social security number, payroll information, and home telephone number. Work experience, educational level achieved, and specialized education or training obtained in and outside of military service. Military duty assignments, ranks held, pay and allowances, personnel actions such as promotions, demotions, or separations. Enrollment or declination of enrollment in insurance programs. Performance evaluation. Individual's desires for future assignments, training requested, and notations by assignment officers. Information for determinations of waivers and remissions of indebtedness to the United States Government. Information for the purpose of validating legal requirements for garnishment of wages.

AUTHORITY FOR MAINTENANCE OF SYSTEM:

5 U.S.C. 301; 14 U.S.C. 92(l), 632; 5 U.S.C. 5501–5597; 49 CFR 1.45, 1.46.

PURPOSE(S):

Administer the Coast Guard pay and personnel system.

ROUTINE USE OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To the Department of Treasury for the purpose of disbursement of salary, United States Savings Bonds, allotments, or travel claim payments. To government agencies to disclose earnings and tax information. To the Department of Defense and Veterans Administration for determinations of benefit eligibility for military members and their dependents. To contractors to manage payment and collection of benefit claims. To the Department of Defense for manpower and readiness planning. To the Comptroller General for the purpose of processing waivers and remissions. To contractors for the purpose of system enhancement, maintenance, and operations. To federal, state, and local agencies for determination of eligibility for benefits connected with the Federal Housing Administration programs. To provide an official of another federal agency information needed in the performance of official duties to reconcile or reconstruct data files in support of functions for which the records were collected and maintained. To an individual's spouse, or person responsible for the care of the individual concerned when the individual to whom the record pertains is mentally incompetent, critically ill or under other legal disability for the purpose of assuring the individual is receiving benefits or compensation they are entitled to receive. To a requesting government agency, organization, or individual the home address and other relevant information on those individuals who, it is reasonably believed, might have contracted an illness, been exposed to, or suffered from a health hazard while a member of government service. To businesses for the purpose of electronic fund transfers or allotted pay transactions authorized by the individual concerned. To credit agencies and financial institutions for the purpose of processing credit arrangements authorized by the individual concerned. To other government agencies for the purpose of earnings garnishment. To prepare the Officer Register and Reserve Officer Register which is provided to all Coast Guard officers and the Department of Defense. To other federal agencies and collection agencies for the collection of indebtedness and outstanding travel advances to the federal government. The home mailing addresses and telephone numbers of members and their dependent/s to duly appointed Family Ombudsman and personnel within the Coast Guard for the purpose of providing entitlement information to members or their dependents.

See Prefatory Statement of General Routine Uses, 3 and 5 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Computer disks, magnetic tape microfilm, and paper forms in file folders.

RETRIEVABILITY:

Name or social security number.

SAFEGUARDS:

Computers provide privacy and access limitations by requiring a user name and password match. Access to decentralized segments are similarly controlled. Only those personnel with a need to have access to the system are given user names and passwords. The magnetic tape backups have limited access in that users must justify the need and obtain tape numbers and volume identifiers from a central source before they are provided data tapes. Paper record and microfilm records are in limited access areas in locking storage cabinets.

RETENTION AND DISPOSAL:

Leave and Earnings Statements, and pay records are microfilmed and retained on site four years, then archived at the Federal Record Center, and destroyed when 50 years old. The official copy of the personnel record is maintained in the Official Officer Service Records, DOT/CG 626 for active duty officers, the Enlisted Personnel Record System, DOT/CG 629 for active duty enlisted personnel or the Official Coast Guard Reserve Service Record, DOT/CG 576 for inactive duty reservists. Duplicate magnetic copies of the pay and personnel record are retained at an off site facility for a useful life of seven years. Paper records for waivers and remissions are retained on site six years three months after the determination and then destroyed. Paper records to determine legal sufficiency for garnishment are retained on site six years three months after the member separates from the service or the garnishment is terminated and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

For active duty members of the Coast Guard: Chief, Office of Personnel, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. For Coast Guard inactive duty reserve members and retired Coast Guard reservists awaiting pay at age 60: Chief, Office of Reserve Affairs, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. For Coast Guard Waivers and Remissions: Chief, Personnel Services Division, G–PMP, Office of Personnel, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20590–0001. For records used to determine legal sufficiency for garnishment of wages and pay records: Commanding Officer, LGL, United States Coast Guard Human Resources Service and Information Center, 444 SE. Quincy Street, Topeka, KS 66683–3591. For data added to the decentralized data segment the commanding officer, officer-in-charge of the unit handling the

individual's pay and personnel record, or Chief, Administrative Services Division for individuals whose records are handled by Coast Guard Headquarters. For NOAA members: National Oceanic and Atmospheric Administration, Commissioned Personnel Division, 11400 Rockville Pike, Rockville, MD 20852.

NOTIFICATION PROCEDURE:

For all information on Coast Guard members other than below: United States Coast Guard Headquarters, G-SII, 2100 2nd Street, SW., Washington, DC 20593–0001. For records used to determine legal sufficiency for garnishment of wages and pay records: Commanding Officer, United States Coast Guard Human Resources Service and Information Center, 444 S.E. Quincy Street, Topeka, KS 66683–3591. For data added to the decentralized data segment the commanding officer, officer-in-charge of the unit handling the individual's pay and personnel record, or Chief, Administrative Services Division for individuals whose records are handled by Coast Guard Headquarters. Addresses for the units handling the individual's pay and personnel record are available from the individual's commanding officer. For all information on NOAA members: National Oceanic and Atmospheric Administration, Commissioned Personnel Division, 11400 Rockville Pike, Rockville, MD 20852.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure".

RECORD SOURCE CATEGORIES:

Official Officer Service Records, DOT/CG 626. Enlisted Personnel Record System, DOT/CG 629. Official Coast Guard Reserve Service Record, DOT/CG 676. Individual, Coast Guard personnel officials, National Oceanic and Atmospheric Administration personnel officials, and the Department of Defense.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 624

SYSTEM NAME:

Personnel Management Information System, PMIS.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

United States Coast Guard, Commanding Officer Human Resources Service and Information Center, 444 SE Quincy St., Topeka, KS 66683–3591.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All regular Coast Guard personnel on active duty. All reserve Coast Guard personnel on extended active duty and Reserve personnel on initial active duty for training.

CATEGORIES OF RECORDS IN THE SYSTEM:

A single computer record that currently contains about 450 data elements on each member. Some data elements are used only for enlisted, others only for officers. The file contains personal information such as name, place of birth, rank, location, etc. The file also contains pay date elements which will form the basis for deriving pay entitlements for Coast Guard military personnel under the Joint Uniform Military Pay System, JUMPS.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 92(I), 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

Produce a number of personnel reports used throughout the Coast Guard.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses, 3 through 5 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12): Disclosures may be made from this systems to 'consumer reporting agencies' (collecting on behalf of the United States Govt.) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The storage is on computer disks with tape backups. The file is updated once a week. Once a month the file is dumped to a tape file for historical purposes.

RETRIEVABILITY:

Name or Social Security Number or a combination of personal and non-personal characteristics.

SAFEGUARDS:

The computer provides privacy and access limitations by requiring a user name and password match. In addition each element of the file has its own level of accessibility which must be held by the user. Only those staff components at Headquarters with a need to have access to the file are given user names and passwords. Access to the "Time Share" extract is similarly controlled. The backup tapes and monthly dumps also have limited access in that users must justify the need before they are provided the tape numbers.

RETENTION AND DISPOSAL:

End-of-Year system backup tapes and day-to-day transaction tapes are retained indefinitely. Statistical and other report extract tapes are recycled into the system and consequently destroyed. Paper working files are disposed of in accordance with current record disposal instructions.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–WP, United States Coast Guard Headquarters, Director, Personnel Management Directorate, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure".

RECORD SOURCE CATEGORIES:

Official service record entries prepared by field units.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 625

SYSTEM NAME:

Officer Selection and Appointment System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Commander, United States Coast Guard, Personnel Command, 2100 2nd St., SW., Rm. 1422, Washington, DC 20593–0001.

Records are also located at Director, Coast Guard Recruiting Center, 4200 Wilson Blvd., Suite 450, Arlington, VA 22203 and individual recruiting offices.

Use Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Applicants for Coast Guard Officer Candidate School or direct commission programs of the Coast Guard.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information in the system is supplied by applicants and also by persons, other than the applicants, who submit information pertinent to the suitability of the applicants for commissioned service in the Coast Guard.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 10 U.S.C. 591, 12201, 14 U.S.C. 211–295, 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

The primary purpose is to aid officials and employees of the Coast Guard in the performance of their duties in managing and contributing to the recruitment and appointment of men and women for officer programs in the regular and reserve components of the Coast Guard.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Attorney General of the United States or his authorized representatives in connection with litigation, fraudulent enlistment or other matters under the jurisdiction of such agencies. Official employees of the Veterans Administration and Selective Service Administration in the performance of their official duties related to enlistment and reenlistment eligibility and related benefits. The Senate or the House of Representatives of the United States or any committee or subcommittee on matters within their jurisdiction requiring disclosure of files or records of personnel covered by this system.

See Prefatory Statement of General Routine Uses, 3 through 5 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

N/A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records are stored in file folders.

RETRIEVABILITY:

The system is indexed alphabetically by name of applicant and is retrieved by name.

SAFEGUARDS:

Records kept in file cabinets locked after working hours. Buildings have 24-hour security guards and limited access.

RETENTION AND DISPOSAL:

Application files for non-selected officer candidate applicants are destroyed after six months and non-selected applicants for direct commission are destroyed after one year. Files for all selected applicants are placed in the selectee's officer personnel folder.

SYSTEM MANAGER(S) AND ADDRESS:

Department of Transportation , Commander, U. S. Coast Guard Personnel Command, 2100 2nd St., SW., Rm. 1422, Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Department of Transportation, United States Coast Guard Headquarters, Commandant, G–SII, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Procedure may be obtained by writing to or visiting Commandant, G–SII at the address in "Notification Procedure" or to the applicable Coast Guard District Office. A letter request should contain full name, address, social security number, approximate date of application, and signature. Proof of identification will consist of military identification card, driver's license or other official identification.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

Coast Guard recruiting personnel and employee processing application. Medical personnel conducting physical examination and private physicians providing consultations or patient history. Character and employer references named by applicants. Educational institutions, staff and faculty members. Selective Service Commission. Local state and Federal law enforcement agencies. Prior or current military service record. Commanding officer of Coast Guard unit, if active duty. Coast Guard offices charged with personnel security clearance functions.

Other Coast Guard officials and employees in the performance of their official duties and as specified by current instructions and regulations promulgated by competent authority.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system of records may be exempt from disclosure under the provisions of 5 U.S.C. 552a(k)(5), which provide, in part, that investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified information may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to December 31, 1974, under an implied promise that the identity of the source would be held in confidence. Portions of this system of records may be exempt from disclosure under the provisions of 5 U.S.C. 552a(k)(7), which provide, in part, that evaluation material used to determine potential for promotion in the armed services may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of a source would be held in confidence, or, prior to December 31, 1974, under an implied promise that the identity of the source would be held in confidence.

SYSTEM LOCATION:

Commander, U.S. Coast Guard Personnel Command, 2100 2nd St., SW., Rm. 1422, Washington, DC 20593–0001. National Personnel Records Center, 9700 Page Boulevard, St. Louis, MO 63112. Individual officer's unit.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Commissioned officers of the Coast Guard on active duty, permanent or disability retired lists. Regular officers who resign and do not accept a Reserve commission.

CATEGORIES OF RECORDS IN THE SYSTEM:

General file & service record card. Fitness File & Officer Summary Records. Medical File. Medical History for officers on the Temporary Disability Retired List.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 93®, 632; 10 U.S.C. 1071–1107, 1475–1480, 14 U.S.C. 251–295; 49 CFR 1.45, 1.46.

PURPOSE(S):

Normal administrative procedures, including assignment, promotion, training, special recognition, etc.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Physical Evaluation Boards. Board for Correction of Military Records. Answering of Congressional and personal inquiries initiated by the individual whose record is concerned. Preparation of forms, statements compilations, and computations necessary in the daily personnel administration of each individual entering reentering or leaving the Coast Guard. (Routine personnel administration requires copies of this and other service record material to be included in administrative files physically separated from the record; however, the original of this material will be included in the official service record maintained at Coast Guard Headquarters). Furnishing of information (authorized and specified by the individual concerned) normally concerned with employment, educational or veteran benefits, claims or applications. Furnishing specified material in an officer's service record pursuant to the order of a court of competent jurisdiction. Personnel from other Federal Agencies in the conduct of official business, as authorized by the Chief, Officer Personnel Management Division or Chief, Reserve Personnel Management Division, or their designated representative. See Prefatory Statement of General Routine Uses, 3 through 5 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures may be made from this systems to "consumer reporting agencies" (collecting on behalf of the United States Government) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on paper and in digitized form. The paper records are stored in files in a controlled access area. The digitized records are stored on hard drives accessed via password by designated Coast Guard personnel.

RETRIEVABILITY:

Individual records are indexed and retrievable by name and/or last four digits of member's service number.

SAFEGUARDS:

During working hours physical access to records is controlled by the Personnel Command, CGPC. Records are maintained in a central storage area locked behind two separate doors during non-working hours in the building, which has roving and static security patrols.

RETENTION AND DISPOSAL:

Each individual record is maintained at Coast Guard Headquarters until three months after retirement/resignation, after which is shipped to the National Personnel Records Center (Military Personnel Records), 9700 Page Boulevard, St. Louis, MO 63132. After the separation documents are received, records of Reserve Officers released from active duty and Regular Officers who resign and accept Reserve Commissions are sent to the United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, U.S. Coast Guard, Personnel Command, 2100 2nd St., SW., Rm. 1422, Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure".

RECORD SOURCE CATEGORIES:

Personal interview and voluntary submissions by individuals. Training/Educational Reports. Fitness Reports. USCG District Offices and other operating units of the Coast Guard.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system of records may be exempt from disclosure under the provisions of 5 U.S.C. 552a(k)(5), which provide, in part, that investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified information may be withheld from disclosure, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to December 31, 1974, under an implied promise that the identity of the source would be held in confidence. Portions of this system of records may be exempt from disclosure under the provisions of 5 U.S.C. 552a(k)(7), which provide, in part, that evaluation material used to determine potential for promotion in the armed services may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the government under an express promise that the identity of the source would be held in confidence, or, prior to December 31, 1974, under an implied promise that the identity of the source would be held in confidence.

DOT/CG 627

SYSTEM NAME:

Enlisted Recruiting Selection Record System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commander, U. S. Coast Guard Personnel Command, 2100 2nd St., SW., Rm. 1422, Washington, DC 20593–0001. Director, Coast Guard Recruiting Center, 4200 Wilson Blvd., Suite 450, Arlington, VA 22203 and Coast Guard recruiting offices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Records and correspondence pertaining to prospective applicants, applicants for regular and reserve enlisted programs, and any other individuals who have initiated correspondence pertaining to enlistment in the United States Coast Guard.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records and correspondence in both automated and non-automated forms concerning personal history, education, professional qualifications, mental aptitude, physical qualifications, character and interview appraisals, National Agency Checks and certifications, service performance and congressional or special interests.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 10 U.S.C. 503, 504, 1168, 1169, 1475–1480; 14 U.S.C. 350–373, 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

The primary purpose is to serve for officials and employees of the United States Coast Guard, in the performance of their duties in managing and contributing to the recruitment program of the Coast Guard and Coast Guard Reserves.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Comptroller General or any of his authorized representatives, upon request, in the course of the performance of duties of the General Accounting Office relating to the management or quality of military recruitment. Officials and employees of other Departments and agencies of the Executive Branch of government, upon request, in the performance of their official duties related to the management or quality of military recruitment. Officials and employees of the Veterans Administration and Selective Service System in the performance of their official duties related to enlistment and reenlistment eligibility and related benefits. Such contractors and their employees as are or may be operating in accordance with an approved official contract with the United States Government. See Prefatory Statement of General Routine Uses; 3 through 5 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Automated records are stored on magnetic tape. Paper records are stored in file folders.

RETRIEVABILITY:

Alphabetically by name of subject and social security number.

SAFEGUARDS:

Records are accessible only to authorized personnel within the Coast Guard recruiting organization and are handled with security procedures appropriate for documents marked "For Official Use Only."

RETENTION AND DISPOSAL:

Records are normally maintained for two years and then disposed of by mutilating, shredding, or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, U. S. Coast Guard, Personnel Command, 2100 2nd St., SW., Rm. 1422, Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant,G–SII–2, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure".

RECORD SOURCE CATEGORIES:

Coast Guard recruiting personnel and administrative staff. Medical personnel or private physicians providing consultations or patient history. Character and employer references. Educational institutions, staff and faculty members. Selective Service System. Local, State, and Federal law enforcement agencies. Prior or current military service records. Members of Congress. Other officials and employees of the Coast Guard, Department of Defense and components thereof, in the performance of their duties and as specified by current instructions and regulations promulgated by competent authority.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system of records may be exempt from disclosure under the provisions of 5 U.S.C. 552a(k)(5), which provide, in part, that investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualification of Federal civilian employment, military service, Federal contracts, or access to classified information may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence or, prior to December 31, 1974, under an implied promise that the identity of the source would be held in confidence. Portions of this system of records may be exempt from disclosure under the provisions of 5 U.S.C. 552a(k)(7), which provide, in part, that evaluation material used to determine for promotion in the armed services may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of a source would be held in confidence, or, prior to December 31, 1974, under an implied promise that the identity of the source would be held in confidence.

DOT/CG 628

SYSTEM NAME:

Officer, Enlisted, and Recruiter Selection System File.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commander, U.S. Coast Guard, Personnel Command, 2100 2nd St., SW., Rm. 1422, Washington, DC 20593–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Civilian or military personnel who have taken the following tests: United States Navy Officer Qualification Test, OQT; United States Navy and United States Marine Corps Aviation Selection Test (AST); United States Navy Basic Test Battery, BTB (retests); the Cooperative Tests for Advanced Electronic Training, AET TESTS; the 16 Personality Factor Test used for screening of enlisted personnel for recruiting duty; Professional Examination for Merchant Mariners.

CATEGORIES OF RECORDS IN THE SYSTEM:

Answer sheets, electronic files.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 632; 46 U.S.C. 7306, 7313, 7316; 49 CFR 1.45, 1.46.

PURPOSE(S):

Provide test results if an applicant (military or civilian) applies for an officer program or is already in the military and interested in a certain training program.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses: 3 through 5 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders, case files, and electronic media.

RETRIEVABILITY:

By name or electronically by social security number.

SAFEGUARDS:

Combination-type safe, locked files. Test results are given only on a need to know basis to authorized personnel. Only custodian of safes and alternate custodian have access.

RETENTION AND DISPOSAL:

Test answer sheets are destroyed after 2 years. Card file—destroyed after 4 years.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, U.S. Coast Guard, Personnel Command, 2100 2nd St., SW., Rm. 1422, Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure."

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure."

RECORD SOURCE CATEGORIES:

Individuals concerned and United States Coast Guard recruiting officials. United States Marine Corps officials. United States Navy Recruiting officials, United States Navy Bureau of Medicine Surgery officials.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system are exempt under the provisions of 5 U.S.C. 552a(k)(5), (6), and (7).

DOT/CG 629

SYSTEM NAME:

Enlisted Personnel Record System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commander, U.S. Coast Guard Personnel Command, 2100 2nd St., SW., Rm. 1422, Washington, DC 20593–0001. District offices and Headquarters Units.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All enlisted members of the Coast Guard now serving on active duty (including enlisted members of the Reserve on extended active duty), and members who have been temporarily or permanently retired or discharged.

CATEGORIES OF RECORDS IN THE SYSTEM:

Enlisted contract package, record of emergency, data, leave records, performance ratings, administrative remarks, medical records. All other requisite Coast Guard personnel forms, and pertinent miscellaneous correspondence.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 10 U.S.C. 1071–1107, 12201, 14 U.S.C. 350–373, 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

Normal administrative procedures, including assignment, promotion, training, special recognition, etc.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Data are provided to the Veterans Administration for determination of an individual's eligibility for benefits administered by that agency, and to medical facilities maintained by the Department of Health, Education and Welfare in conjunction with medical treatment afforded an individual. See Prefatory Statement of General Routine Uses: 3 through 5 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures may be made from this systems to "consumer reporting agencies" (collecting on behalf of the United States Government) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records are stored in files in a room with controlled access. Digitized records are stored on hard drives accessed via password by designated Coast Guard personnel.

RETRIEVABILITY:

Name of individual or the last three digits of individual's social security number.

SAFEGUARDS:

Records maintained at Coast Guard Headquarters are located in a central storage area, locked behind two separate doors during non-working hours, in a building with a roving security patrol. Records at field units are maintained in Government office buildings with off-duty hours security. During working hours, access to records is controlled by office personnel.

RETENTION AND DISPOSAL:

Maintained at CGPC until three months after an enlisted member is discharged, permanently retired for physical disability, or retired for years of service, after which records are transmitted for permanent storage to National Personnel Records Center, (Military Personnel Records), GSA, 9700 Page Boulevard, St. Louis, MO. 63132. In the case of members transferred to the Reserve, their records are sent to Commandant (G-WT) after separation documents are received.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, U.S. Coast Guard, Personnel Command, 2100 2nd St., SW., Rm. 1422, Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure" or the local Coast Guard District or unit administrative officer for the area in which an individual's duty station is located.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

Information is obtained from the individual, and Coast Guard Officials.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system may be exempt under the provisions of 5 U.S.C. 552a(k)(5) and (7).

DOT/CG 630

SYSTEM NAME:

Coast Guard Family Housing.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WP, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. Each Integrated Support Command and Headquarters Unit.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Military and civilian personnel of all pay grades who made application for government and/or government leased housing. Military personnel who make applications in locating community housing. Certain government employees occupying government housing. Military or civilian personnel who have corresponded with the President, a Congressman, or the Commandant concerning family housing.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applicants name, pay grade, marital status, current address and dependent information maintained for the Coast Guard Housing System. Includes housing survey; computer data summaries are maintained for the family housing survey. Copies of correspondence from individual to the President, a Congressman or the Commandant, inquiry sheets, and replies maintained for Congressional correspondence files.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 475, 620, 632, 681, 687; 49 CFR 1.45, 1.46.

PURPOSE(S):

Placing the applicant in government owned or leased housing or community housing.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Assessing housing needs of District and Headquarters Units. Answering inquiries from individuals, Congressmen or the Commandant concerning family housing. Preparing Budgets. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File Folder.

RETRIEVABILITY:

Name of individual, Coast Guard command, and date received.

SAFEGUARDS:

Maintained in locked file cabinets and desk file drawers.

RETENTION AND DISPOSAL:

Maintained until applicant is placed in housing, then destroyed. Records concerning Congressional correspondence are maintained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–WP, Director, Personnel Management Directorate, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure" or the local Coast Guard District Office.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

Applicant, individuals who complete family housing survey forms, initiate correspondence concerning family housing, and Coast Guard Officials.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 631

SYSTEM NAME:

Family Advocacy Case Record System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WP, U.S. Coast Guard Headquarters, 2100 2nd St. SW., Washington, DC 20593–0001. District, Maintenance and Logistics Command, MLC, or Headquarters Unit Social Worker's office, at the duty station of the sponsor, and at selected medical facilities. District, MLC, or Headquarters Unit Family Advocacy Representative, FAR under whose jurisdiction an incident occurred.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty, reserve and retired personnel and dependents entitled to care at Coast Guard or any other military medical and dental facility whose abuse or neglect is brought to the attention of appropriate authorities, and persons suspected of abusing or neglecting such beneficiaries.

CATEGORIES OF RECORDS IN THE SYSTEM:

Medical records of suspected and confirmed cases of family member abuse or neglect, investigative reports, correspondence, family advocacy committee reports, follow up and evaluation reports, and any other supportive data assembled relevant to individual family advocacy program files.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 632, 42 U.S.C. 5101, 5102; 49 CFR 1.45, 1.46.

PURPOSE(S):

Coordination of the Coast Guard's Family Advocacy program.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To Federal, State and Local government or private agencies for coordination of family advocacy programs, medical care, mental health treatment, civil or criminal law enforcement, and research into the causes and prevention of family domestic violence. To individuals or organizations providing family support program care under contract to the Federal Government. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders, microfilm, magnetic tape, punched cards, machine lists, discs, and other computerized or machine readable media.

RETRIEVABILITY:

Name, social security number, types of incidents, etc.

SAFEGUARDS:

Maintained in various kinds of locked filing equipment in specified monitored or controlled access rooms or areas. Records are accessible only to authorized personnel. Computer terminals are located in supervised areas, with access controlled by password or other user code system.

RETENTION AND DISPOSAL:

Records will be maintained at a decentralized location until the case is closed or the sponsor is separated. Upon case closure or separation of the sponsor, the record will be transferred to Commandant, G–WPW. The record will be retained for 5 years from case closure or date of last action. At the end of 5 years the record will be destroyed, except for information concerning certain minor Coast Guard dependents who were victims or suspected victims of child abuse, neglect or sexual abuse will be retained until the dependent attains majority.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–WP, Director, Personnel Management Directorate, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. MLC, district, or unit where the individual is assigned.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure."

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure."

RECORD SOURCE CATEGORIES:

Reports from medical personnel, educational institutions, law enforcement agencies, public and private health and welfare agencies, Coast Guard personnel and private individuals.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Part of this system may be exempt under 5 U.S.C. 552a(k)(2) and (5).

DOT/CG 632

SYSTEM NAME:

Uniformed Services Identification and Privilege Card Record System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WP, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Dependents of United States Coast Guard personnel (active, retired, reserve and deceased). Former Coast Guard personnel who have been rated by the Veterans Administration as one-hundred percent disabled and their eligible dependents.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications for Uniformed Service Identification and Privilege Card, DD–1172. Verification for eligibility to possess the Identification and Privilege Card, DD–1173. Pertinent miscellaneous correspondence.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 632, 49 CFR 1.45, 1.46; E.O. 9397; COMDTINST 5512.1.

PURPOSE(S):

Verify that an applicant is entitled to be issued an Identification and Privilege Card.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Verification provided to other Armed Forces authorized personnel as required. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file folders.

RETRIEVABILITY:

Alphabetical by name.

SAFEGUARDS:

Maintained in file cabinets. During working hours access to records is controlled by office personnel. During non-working hours building is patrolled by roving security guards.

RETENTION AND DISPOSAL:

Retained for 10 years, then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Personnel Management Directorate, G–WP, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure."

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure."

RECORD SOURCE CATEGORIES:

Sponsor and/or dependents.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 633

SYSTEM NAME:

Coast Guard Civilian Personnel Security Program.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WP, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. Each District Office and Headquarters Unit.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Coast Guard Civilian Personnel. Applicants for civilian positions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of civilian security clearance granted. Correspondence and requests concerning civilian personnel security actions.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 5102, 14 U.S.C. 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

Determine eligibility for access to classified information under Executive Order 11652.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Suitability for sensitive positions. See Prefatory Statement of General Routine Uses; 3 through 5 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folder—3x5 Index cards.

RETRIEVABILITY:

By name of individual.

SAFEGUARDS:

Kept in locked cabinets and safes. Individual identification is required for users of records.

RETENTION AND DISPOSAL:

Upon termination of employment investigative files for civilians, which serve as a basis for security clearances, are returned to the Office of Personnel Management. A name record of type of investigation is kept for 5 years and then destroyed by burning.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Personnel Management Directorate, G–WP, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard, Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure" or the local office or unit.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

Civil Service Investigative Reports, Personnel Security Clearance requests and forms SF–85, SF–86 and SF–171.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system of records may be exempt from disclosure under the provisions of 5 U.S.C. 552a(k)(5) and (7).

DOT/CG 634

SYSTEM NAME:

Child Care Program Record System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

At the facility where the care was provided or is being provided.

CATEGORIES OF INDIVIDUALS COVERED BY SYSTEM:

Children enrolled in a U.S. Coast Guard child care program. Children being cared for in U.S. Coast Guard family quarters. Eligible children of active duty members of the Uniformed Services and children of Federal employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information about the family; medical history of child; authorization for emergency medical care; permission for field trips; authorization to release child to someone other than parent;

establishment of eligibility for participation in State or Federally sponsored programs; communication between the care provider and parents about child; and other necessary records to protect health and safety of children.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 515, 632; 49 CFR 1.45, 1.46; COMDTINST 1754.15.

PURPOSE(S):

Administer the Coast Guard's Child Care Program.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Provided to Federal, State, or local governments and agencies to report medical conditions and other data required by law; to aid in preventive health and communicable disease control problems. Provided to Department of Agriculture for use in determining eligibility to participate in the Child Care Food Program. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained on forms in file folders or in computer file.

RETRIEVABILITY:

Name of child.

SAFEGUARDS:

Files are maintained in a secured filing cabinet. Access is regularly limited to authorized center staff. Files for child care in U.S. Coast Guard family quarters are maintained in a cabinet or drawer in the quarters.

RETENTION AND DISPOSAL:

Child's record file is destroyed 3 years after date of last action. Registration/medical forms may be sent to another facility if child transfers. CCFP eligibility records are transferred to an audit file at the end of each year where they are not retrieved by child's name. Audit records are destroyed after 3 years or after audited, whichever is sooner.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Personnel Management Directorate, G–WP, United States Coast Guard Headquarters, Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. Child care facility that provided care.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure."

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure."

RECORD SOURCE CATEGORIES:

Parents or medical personnel familiar with the child's medical history.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 636

SYSTEM NAME:

Personal Affairs Record System Coast Guard Military Personnel.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WK, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. Each District and Headquarters Unit. See Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty and retired Coast Guard military personnel who have been subject to damage arising out of domestic relations disputes, alleged personal indebtedness, and claims of alleged paternity.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Case files containing complaint concerning alleged personal indebtedness, complaints arising out of domestic relations disputes, claims of alleged paternity. Files contain correspondence including investigative steps, response to complaints and follow up correspondence on recurring complaints. Index card files contain summary of material contained in case file for each reference.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 10 U.S.C. 1058; 14 U.S.C. 632; 42 U.S.C. 666; 49 CFR 1.45, 1.46.

PURPOSE(S):

Resolve complaints in an expeditious manner.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

For reference in development of future policy. See Prefatory Statement of General Routine Uses; 3 through 5 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Case file and card index file.

RETRIEVABILITY:

Alphabetical listing.

SAFEGUARDS:

Kept in locked filing cabinet. Personnel are screened prior to granting access.

RETENTION AND DISPOSAL:

Maintained for 5 years after action completed and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Personnel Management Directorate, G–WK, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure" or the local Coast Guard District Office or unit for the area in which an individual's duty station is located.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

Complainants, their legal representatives, and Coast Guard officials.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 637

SYSTEM NAME:

Appointment of Trustee or Guardian for Mentally Incompetent Personnel.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WP, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. Each District and Headquarters Unit.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty and retired Coast Guard military personnel.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information relating to the mental incompetency of certain Coast Guard personnel. Records used to assist Coast Guard Officials in appointing trustees for mentally incompetent Coast Guard persons.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 10 U.S.C. 1443, 1448, 1449; 14 U.S.C. 632; 37 U.S.C. 601–604; 33 CFR 49.05; 49 CFR 1.45, 1.46.

PURPOSE(S):

Maintain information to determine eligibility for VA benefits.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information to prospective appointees, including but not limited to relatives, lawyers, physicians or other designated representatives; and Department of Veterans Affairs upon request for the determination of eligibility for benefits administered by that agency. See Prefatory Statement of General Routine Uses; 3 through 5 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Locked file cabinet.

RETRIEVABILITY:

Alphabetical listing.

SAFEGUARDS:

Stored in locked file cabinets. Access restricted to representatives of incompetent.

RETENTION AND DISPOSAL:

Maintained for 5 years after action is complete then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Personnel Management Directorate, G–WP, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure" or the local Coast Guard District office or unit having custody of the records.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

Coast Guard officials, legal representatives of individuals and/or individuals concerned and complainants.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 638

SYSTEM NAME:

U.S.C.G Alcohol Abuse Prevention Program Record System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commander, Atlantic Area, United States Coast Guard, 431 Crawford Street, Portsmouth, VA 23704. Commander, Pacific Area, United States Coast Guard, Coast Guard Island, Alameda, CA 94501–5100.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty Coast Guard personnel receiving alcohol rehabilitation treatment.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, Social Security Number, Prior Service, Rate/Rank, Date of Birth, History of Alcohol Abuse, Treatment Center, Dates of Treatment, Notes on Aftercare, and Final Disposition and Type.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 5 U.S.C. 7901; 14 U.S.C. 632; 42 U.S.C. 4541; 49 CFR 1.45, 1.46; COMDTINST M6330.1.

PURPOSE(S):

Administer the Coast Guard Alcohol Abuse Prevention program.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses; 3 through 5 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained on file cards (3″ × 5″) and/or a computer data base.

RETRIEVABILITY:

By the name of the individual.

SAFEGUARDS:

Maintained in locked filing cabinets. The computer database is protected by password access limited to Alcohol Program Managers.

RETENTION AND DISPOSAL:

Destroyed three years after last activity.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–WK, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001–0001.

Same as "Notification procedure", or the local Coast Guard District or unit for the area in which an individual's duty station is located.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

Individual, and Coast Guard Officials.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 640

SYSTEM NAME:

Outside Employment of Active Duty Coast Guard Personnel.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant (G–WP), United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. Each District Office and Headquarters Unit.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active Duty and Reserve Coast Guard Personnel.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence relating to individual's request for part time employment.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 92(I), 632; 49 CFR 1.45, 1.46; COMDTINST 1000.6A

PURPOSE(S):

Determine suitability for off duty employment for Coast Guard members.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses; 3 through 5 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Locked filing cabinets.

RETRIEVABILITY:

Alphabetical listing.

SAFEGUARDS:

Kept in locked filing cabinet. Access restricted to individuals who request outside employment, and authorized Coast Guard officials. Proper identification required.

RETENTION AND DISPOSAL:

Retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Personnel Management Directorate (G–WP), United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure" or the local Coast Guard District Office or unit for the area in which an individual's duty station is located.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures.

RECORD SOURCE CATEGORIES:

Individual, and Coast Guard officials.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 641

SYSTEM NAME:

Coast Guard Special Needs Program.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WP, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. District, Maintenance and Logistics Command (MLC), or Headquarters Unit Social Worker's Office, Headquarters Unit Family Advocacy Representative, FAR, at the duty station of the sponsor, and at selected medical facilities.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty and retired Coast Guard personnel and their dependents who have diagnosed medical, physical, psychological, or educational need which constitutes a developmental disability or handicapped condition. Active duty Coast Guard personnel and their dependents considered for overseas assignment.

CATEGORIES OF RECORDS IN THE SYSTEM:

Extracts or copies of medical, educational and psychological records of member and/or dependents with special needs, follow-up and evaluation reports, and any other data relevant to individual special needs program files or overseas screening.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 14 U.S.C. 335, 632; 49 CFR 1.45, 1.46; COMDTINST 1754.7A.

PURPOSE(S):

Provide for Federal Government agency coordination of special needs programs, medical care, mental health treatment, and monitoring and tracking special needs families.

ROUTINE USE OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folder, microfilm, magnetic tape, punched cards, machine lists, discs, and other computerized or machine readable media.

RETRIEVABILITY:

Name, social security number and the diagnosis or International Classification of Diseases, ICD, code of the special needs condition.

SAFEGUARDS:

Various kinds of locked filing equipment in specified monitored or controlled access rooms or areas. Records are accessible only to authorized personnel. Computer terminals are located in supervised areas, with access controlled by password or other user code system.

RETENTION AND DISPOSAL:

Maintained at a decentralized location until the sponsor is separated or the dependent is no longer diagnosed as

having special needs. Upon separation of the sponsor or when the dependent is no longer diagnosed as having special needs, the record will be transferred to Commandant, G–WPW. After a 3-year retention, the record is destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Personnel and Training, G–WP, United States Coast Guard, Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard, Washington, DC 20593–0001. MLC, district, or unit where the individual is assigned.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure".

RECORD SOURCE CATEGORIES:

Medical personnel, mental health and educational institutions, public and private health and welfare agencies and Coast Guard personnel and private individuals.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 642

SYSTEM NAME:

Joint Maritime Information Element, JMIE, Support System, JSS.

SECURITY CLASSIFICATION:

Classified.

SYSTEM LOCATION:

United States Coast Guard, Operations Systems Center, Martinsburg, WV 25401.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals with established relationship(s)/association(s) to maritime vessels that are included in the Joint Maritime Information Element, JMIE, Support System, JSS: Ship owners, passengers and crew.

CATEGORIES OF RECORDS IN THE SYSTEM:

Maritime vessels and vessel characteristics including: Performance data, vessel identification data, registration data, movements, reported locations, activity and associate information (data pertaining to people or organizations associated with vessels) for owners, passengers, and crew members. Reports submitted by Coast Guard crews relating to boardings and/or overflights, as well as any violations of United States law, along with enforcement actions taken during boarding. Such reports could contain names of passengers on vessels, as well as owners and crew members. Vessels and associates known, suspected or alleged to be involved in contraband trafficking. Within the JMIE Support System, contraband is meant to refer to any item that is illegally imported/exported to/from the United States via maritime activity.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

United States Coast Guard, 14 U.S.C. 89. United States Customs Service, 19 U.S.C. 1589A(2). Drug Enforcement Administration, 21 U.S.C. 800—900. Immigration and Naturalization Service, 8 U.S.C. 1551.

PURPOSE(S):

Maintaining suspect lists, enforcing United States laws dealing with items such as counter narcotics, fisheries, and boating safety.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Ship location and associated information such as declared cargo, ownership, crew members, passengers, reported historical profiles relating to travel, cargo and ports of call may be reported to federal, state, and/or local law enforcement officials for purposes of intercepting ships and inspecting cargo and ship structures. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Storage of all records is in an ADP database operated and maintained by the United States Coast Guard. Privacy Act data are stored and controlled separately from other information in the database. Classified and non-classified information from consortium members and other sources is merged into a classified database. Dynamic information on vessel location and movements is obtained daily and stored on-line (disk resident) for a period of two (2) years. Other information such as characteristics, identification status and associate records is updated at prescribed intervals of three (3) months to one year to remain current and is retained indefinitely. Classified information, downloaded from the host and then extracted from the PC workstations and recorded on paper (or magnetic media), may be stored at user sites in classified storage containers or on secured magnetic media. Unclassified information is stored in accordance with each user sites' handling procedures. All records provided to a JSS subscriber in response to a "specific name" query, will be kept in an audit record and retained for a minimum of five (5) years or the life of the system, whichever is longer.

RETRIEVABILITY:

Matching individual name, Social Security Number, passport number, or the individual's relationship to the vessel (*e.g.*, owner, shipper, consignee, crew member, passenger, etc.). Controls have been installed to ensure information on individuals is not retrievable or accessed by members of the intelligence community.

SAFEGUARDS:

JMIE has its own approved System Security Plan.

RETENTION AND DISPOSAL:

Records relating to ship characteristics are retained indefinitely. Records of a transitory nature (relative to ship locations, and individuals identified as passengers or crew, etc.) are maintained on line for a minimum of two (2) years, then purged per General Records Schedule 23. Audit records, maintained to document JSS user access to information relating to specific individuals, are maintained for five (5) years, or the life of the system, whichever is longer. Access to audit records will only be granted to authorized personnel approved by the Executive Agent. Information retrieved from the host and stored at user sites will be disposed of in accordance with the requirements for classified and sensitive information.

SYSTEM MANAGER AND ADDRESS:

Chief, Office of Law Enforcement and Defense Operations, United States Coast Guard, 2100 Second Street, SW., Washington, DC 20593–0001 ATTN: JMIE Program Manager.

NOTIFICATION PROCEDURE:

Commanding Officer, United States Coast Guard Operations Systems Center, Martinsburg, WV 25401.

RECORD ACCESS PROCEDURE:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as record access procedure.

RECORD SOURCE CATEGORIES:

Federal, State and local law enforcement agencies, other Federal agencies.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Under subsections (j)(2) and (k)(1) and (2) of the Privacy Act (5 U.S.C. 552a), portions of this system of records are exempt.

DOT/CG 671

SYSTEM NAME:

Biographical Statement.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–CP, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Key DOT officials, USCG flag officers.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual biographical data.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 302; 14 U.S.C. 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

For Public Affairs Staff to use as records for publicity.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Personnel Office—uses records for promotion. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper forms and correspondence are stored in filing cabinets.

RETRIEVABILITY:

By name.

SAFEGUARDS:

Stored in building having roving security guards during non-working hours. Personnel are screened prior to granting access.

RETENTION AND DISPOSAL:

Transferred to historical file upon termination of active duty.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–CP, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure."

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure."

RECORD SOURCE CATEGORIES:

Individual named in file.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 676

SYSTEM NAME:

Official Coast Guard Reserve Service Record.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

United States Coast Guard, CG, Commandant, G–WT, 2100 2nd Street, SW., Washington, DC 20593–0001. Each Coast Guard District Reserve office (for District records). For official records on discharged, retired, and separated former members: General Services Administration (GSA), National Personnel Records Center (Military Personnel Records), 9700 Page Boulevard, St. Louis, MO 63132.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Reserve officer and enlisted personnel (not on extended active duty) in an active, inactive, retired, discharged, separated or former member status; including those Reservists released from extended active duty to fulfill a specified term of obligated inactive reserve service. Enrolled and disenrolled members of the Temporary Coast Guard Reserve.

CATEGORIES OF RECORDS IN THE SYSTEM:

Official career history of each Reservist.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 10 U.S.C. 1209, 10147, 12102, 12735, 14 U.S.C. 251–295, 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

Ensure fulfillment of normal administrative personnel procedures, including examining and screening for completeness and accuracy of records correspondence.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Screening of service records for advancement, promotion, or retention of individual Reservists by various Reserve. Furnishing of information (authorized and specified by the individual concerned) to other agencies or individuals (specified by the individual concerned) normally concerned with employment, educational or Veteran's benefits, claims, or applications. Furnishing specified material in a Reservist's service record pursuant to the order of a court of competent jurisdiction. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures may be made from this systems to "consumer reporting agencies" (collecting on behalf of the United States govt.) as defined in the Fair Credit Reporting Act (15 (U.S.C. 1681a(f)) or the Federal Claims Collecting Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records maintained on paper assembled and filed in one official service record per member.

RETRIEVABILITY:

Name and/or triple terminal digit of member's service number.

SAFEGUARDS:

Service records are maintained in a central storage area locked behind two separate doors. During non-working hours the building security consists of roving and static security patrols. During working hours physical access to records is controlled by Records control Branch personnel.

RETENTION AND DISPOSAL:

Individual records are maintained at CG Headquarters until six months after an enlisted member's separation from the service (three months for officers), after which it is transmitted for permanent storage to the Military Personnel Record Center, MPRC, National Personnel Records Center, NPRC, 9700 Page Boulevard, St. Louis, MO 63132. For retired members, the service record is shipped to NPRC upon retirement.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–WT, Director, Reserve and Training Directorate,

United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW, Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure", or the District Office in which an individual's duty station is located.

CONTESTING RECORD PROCEDURES:

Same as "Record Access Procedures."

RECORD SOURCE CATEGORIES:

The individual concerned, CG Headquarters, District offices, and other CG units.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system of records may be exempt from disclosure under the provisions of 5 U.S.C 552a(k)(5), and (6).

DOT/CG 677

SYSTEM NAME:

Coast Guard Reserve Personnel Mobilization System

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WT, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. Commander, Reserve in each Coast Guard District Office (except 17th). Each District and Headquarters Unit.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Reserve officer and enlisted personnel (not on extended active duty) in an Active or Retired status, including those Reservists released from extended active duty to fulfill a specified term of obligated inactive Reserve service.

CATEGORIES OF RECORDS IN THE SYSTEM:

Mobilization and qualification cards and orders. Initial, Annual, and Retired Screening and Qualification Questionnaires.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C 301; 10 U.S.C 10207, 12301, 12321; 14 U.S.C 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

Fulfillment of normal administrative procedures including the examining and screening for completeness and accuracy of records, correspondence pertaining thereto as a basis for assignment to active duty for training, special active duty for training or extended active duty and mobilization billets.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records maintained on paper, punched cards and magnetic tape.

RETRIEVABILITY:

Name and/or social security account number.

SAFEGUARDS:

Safeguards and controls afforded this system of records are similar to those normally employed "For Official Use Only" material, both at Headquarters and District Offices. Records are maintained in locked secure areas when not in use and personnel screening is employed prior to granting access.

RETENTION AND DISPOSAL:

The majority of records in this system (in any form) are generally destroyed immediately after the expiration of their useful life, except those retained in the aforementioned "dead files" (which are subsequently destroyed one year after placement in the file). The major exceptions to this policy are the Screening and Qualification Questionnaires, which are filed in the Reservists District Service Record. Records are destroyed by mutilating, shredding or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–WT, United States Coast Guard Headquarters, Director, Reserve and Training Directorate, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURES:

Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORDS ACCESS PROCEDURES:

Same as "Notification procedure."

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure."

RECORD SOURCE CATEGORIES:

The individual, CG Headquarters and CG District Offices.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/CG 678

SYSTEM NAME:

Reserve Personnel Management Information System, Automated.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Commandant, G–WT, Director, Reserve and Training Directorate, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Reserve officers and enlisted personnel in an active or inactive status, including retired reservist, and those reservists released from extended active duty to fulfill a specific term of inactive obligated service.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, social security number, present and last five grades or rates, educational background, civilian and military, foreign language and proficiency, history of unit assignments and dates assigned, duty status, date of birth, date of enlistment, appointment or extension, AFQT scores, source of entry, date of commission, prior service, date of expiration of obligation, anniversary data on pay base date, aviation pay and administrative pay, training rate, reserve category and class, training/pay category, data on ADT for last five years, number of dependents, Federal withholding exemptions, Selective Service induction certification, date of completion of Ready obligation, officer experience indicator, last screening date and result, civilian occupation, date of last National Agency Check, Background Investigation and security clearance, domestic emergency volunteer, date of last physical and immunization, data on special active duty for training and extended active duty, annual training date, total retirement points and satisfactory years of service for retirement purpose, current year retirement point accounting data, including inactive duty training participation, correspondence course activity, taxable wages paid and withholdings, uniform allowances, Servicemen's Group Life Insurance, SGLI information, mailing address, and work and home phone number.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 10 U.S.C. 12301–12321; 14 U.S.C. 632; 49 CFR 1.45, 1.46.

PURPOSE(S):

Personnel administration of individual reservists and the overall management of the reserve program.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To the Treasury Department to complete payroll checks. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures may be made from this system to "consumer reporting agencies" collecting on behalf of the United States Govt. as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The storage is on computer disks with magnetic tape backups. The file is updated weekly.

RETRIEVABILITY:

By Social Security Number.

SAFEGUARDS:

Magnetic tapes are stored in locked storage areas when not in use and are accounted for at all times during actual use. Personnel screening prior to granting access.

RETENTION AND DISPOSAL:

Magnetic tapes are used, corrected and updated until the tapes become physically deteriorated after which they are destroyed. A reservist's address is maintained on file for approximately one year after discharge, to allow for processing of annual point statements and W–2 forms. Audit trails are maintained indefinitely and the Master Personnel file and Pay and Points file are continually updated.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant, G–WT, Director, Reserve and Training Directorate, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

NOTIFICATION PROCEDURE:

Requests to determine if this system contains information on any individual should be made in person or in writing to: Commandant, G–SII, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure."

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure."

RECORD SOURCE CATEGORIES:

The individual, Coast Guard Headquarters and district offices, and the various operating units of the Coast Guard.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FAA 801

SYSTEM NAME:

Aircraft Registration System.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Aircraft Registration Branch, Federal Aviation Administration, Mike Monroney Aeronautical Center, Oklahoma City, OK 73125.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Aircraft owners, lien holders, and lessees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Aircraft types. Current registration status and ownership of aircraft. Aircraft to be registered, or aircraft that have been registered and are now temporarily de-registered. United States Registration Number assignment. Airworthiness of aircraft. Aircraft Registration. Major repair and alteration maintenance inspection forms. Revalidation and use forms. Lien and collateral documents.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 40101, 44103, 44107.

PURPOSE(S):

Provide a register of United States civil aircraft to aid in the national defense and to support a safe and economically strong civil aviation system. To determine that aircraft are registered in accordance with the provisions of 49 U.S.C. 44103. To serve as a data source for management information for production of summary descriptive statistics and analytical studies in support of agency functions for which the records are collected and maintained. To provide data for internal FAA safety program purposes. To provide data for development of the aircraft registration statistical system.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(a) Support investigative efforts of investigation and law enforcement agencies of Federal, State, and foreign governments. (b) Serve as a repository of legal documents used by individuals and title search companies to determine the legal ownership of an aircraft. (c) Provide aircraft owners and operators information about potential mechanical defects or unsafe conditions of their aircraft in the form of airworthiness directives. (d) Provide supporting information in court cases concerning liability of individuals in lawsuits. (e) Locate specific individuals or specific aircraft for accident investigation, violation, or other safety related requirements. (f) Prepare an Aircraft Registry in magnetic tape and microfiche form as required by ICAO agreement, containing information on aircraft owners by name, address, United States Registration Number, and type of aircraft. Make aircraft registration data available to the public, (g) See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders, and on digital read-write disks, magnetic tape, microfilm, and microfiche.

RETRIEVABILITY:

Records are filed by registration number, but may be retrieved by name of the current registered owner.

SAFEGUARDS:

Records are stored in areas open only to authorized employees and by special permission.

RETENTION AND DISPOSAL:

If records are microfiched: (1) Original Records. Destroy original records after microfiche is determined to be an adequate substitute for paper records; (2) Microfiche of Original Records. Destroy when it is determined that the aircraft is no longer in existence. If records are not microfiched: Destroy when it is determined that the aircraft is no longer in existence.

SYSTEM MANAGER(S) AND ADDRESS:

Manager, Aircraft Registration Branch, AFS–750, Federal Aviation Administration, Mike Monroney Aeronautical Center, P.O. Box 25082, Oklahoma City, OK 73125.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Individuals, manufacturers of aircraft, maintenance inspectors, mechanics, and FAA officials.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FAA 807

SYSTEM NAME:

Traffic Control at the Mike Monroney Aeronautical Center (formerly named Law Enforcement Records and Central Files).

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Office of Facility Management, AMP–1, Mike Monroney Aeronautical Center (MMAC), Oklahoma City, OK 73125.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

MMAC employees, tenants, and visitors, with registered vehicles. Individuals cited for parking and/or traffic violations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Vehicle registration and traffic violations files.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 3101.

PURPOSE:

To carry out such functions as vehicle registration and traffic control; to control access and maintain an orderly traffic flow on a government facility.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in files and containers and in password protected electronic databases located in rooms secured with the FAA locking system.

RETRIEVABILITY:

Individual name, other personal identifier, and/or registration number.

SAFEGUARDS:

Files are retained in a secured work area accessible only by consent of an on duty guard or by Office of Facility Management personnel.

RETENTION AND DISPOSAL:

Identification credentials including parking permits: Destroy credentials three months after return to issuing office. Related identification credential papers such as vehicle registrations: Destroy after all listed credentials are accounted for. Reports, statements of witnesses, warning notices, and other papers relating to arrests and traffic violations: Destroy when 2 years old.

SYSTEM MANAGER(S) AND ADDRESS:

Manager, Office of Facility Management, AMP–1, Federal Aviation Administration, Mike Monroney Aeronautical Center, P.O. Box 25082, Oklahoma City, OK 73125.

NOTIFICATION PROCEDURES:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Individuals registering/operating vehicles.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FAA 811

SYSTEM NAME:

Employee Health Record System.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

FAA Washington, regional, and center medical facilities.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FAA employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Basic medical record of an FAA employee, including medical examination reports, laboratory findings, correspondence, health awareness program participation records, and related papers.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Pub. L. 79–658, Title 5 U.S.C. Section 7901.

PURPOSE(S):

Document employee health unit visits and nature of complaint or physical examination findings, treatment rendered and case disposition. Prepare analytical and statistical studies and reports.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

In approved security files and containers, and in computer databases.

RETRIEVABILITY:

By name and social security number.

SAFEGUARDS:

Access to and use of these records in manual or automated form is protected by being physically located behind locked doors and computer access is password protected. Adding or deleting information to the file is limited to the medical staff, physician, nurse, or occupational health specialists.

RETENTION AND DISPOSAL:

These records are destroyed 6 years after the date of last entry.

SYSTEM MANAGER(S) AND ADDRESS:

Regional Flight Surgeon within region where the clinic is located. Manager, Clinical Specialties Division, AAM–200, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Information contained in this system comes from the employee and from attending physicians, nurses, and occupational health specialists, and from associated medical reports.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FAA 813

SYSTEM NAME:

Civil Aviation Security.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Office of Associate Administrator for Civil Aviation Security, in Washington,

DC; the FAA Regional Civil Aviation Security Divisions; the Civil Aviation Security Division at the Mike Monroney Aeronautical Center in Oklahoma City, Oklahoma; and the Civil Aviation Security Staff at the FAA Technical Center, Atlantic City, New Jersey; and various Federal records Centers located throughout the country.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who have been involved or might be involved in crimes against civil aviation or air piracy/sabotage threats, data regarding K–9 handlers, and information regarding Federal Air Marshals, FAM.

CATEGORIES OF RECORDS IN THE SYSTEM:

Hijacking or attempted hijacking incidents at airports or aboard civil aviation aircraft; other civil aviation criminal acts; information of K–9 assignments to airports, K–9 handler evaluations; and information necessary to manage the FAM program.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title 49 U.S.C., Chapter 449, Air Transportation Security, enacted as Pub. L. 103–272 on July 5, 1994; authority for funding FAA K–9 program is the Omnibus Consolidated Appropriations Act of 1997, Pub. L. 104–208.

PURPOSE(S):

Prepare alerts, bulletins, summaries, reports, and policy statements of incidents affecting civil aviation security.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Inform airport and air carrier security officials and officers regarding air piracy/civil aviation sabotage threats. Preparation of alerts, bulletins, and summaries of incidents regarding threats to civil aviation for distribution to authorized government and aviation recipients for use in affecting appropriate changes/modifications to civil aviation security. Prepare summaries, reports, and policy statements for development and change of security procedures in civil aviation, which will be distributed to appropriate government, and aviation-oriented organizations, which have direct civil aviation security responsibilities. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Not applicable.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Approved security files and containers, in file folders, on lists and forms, and in computer processable storage media.

RETRIEVABILITY:

By name or other personal identifying symbols.

SAFEGUARDS:

Access to and use of these records are limited to those persons whose official duties require such access and use. Appropriate physical, technical, and administrative safeguards as prescribed by FAA security directives applicable to both manual and automated record systems reinforce this record management principle.

RETENTION AND DISPOSAL:

These records are destroyed or retired to the area Federal Records Center, FRC, and then destroyed in accordance with current version of FAA Order 1350.15, Records Organization, Transfer and Destruction Standards. The retention and destruction period for each record varies depending on the type of record, category of investigation, or significance of the information contained in the record. All records are destroyed by approved methods.

SYSTEM MANAGER(S) AND ADDRESS:

For the Washington Metropolitan area, excluding Eastern Region jurisdiction:

Office of the Associate Administrator for Civil Aviation Security, 800 Independence Avenue, SW., Washington, DC 20591. Manager, Civil Aviation Security Division, of the appropriate region. For the jurisdiction of the FAA Technical Center:

Manager, Civil Aviation Security Staff, FAA Technical Center, Atlantic City International Airport, Atlantic City, NJ 08405. For the jurisdiction of the Mike Monroney Aeronautical Center:

Manager, Civil Aviation Security Division, Mike Monroney Aeronautical Center, PO Box 25082, Oklahoma City, OK, 73125.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

FAA records; Federal, State, or local agencies; foreign sources; public record sources; first party; and third parties.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system are exempt under 5 U.S.C. 552a(k)(1) and (k)(2).

DOT/FAA 815

SYSTEM NAME:

Investigative Record System.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Office of the Associate Administrator for Civil Aviation Security in Washington, DC; the FAA regional Civil Aviation Security Divisions; the Civil Aviation Security Division at the Mike Monroney Aeronautical Center in Oklahoma City, Oklahoma; the Civil Aviation Security Staff at the FAA Technical Center, Atlantic City, New Jersey; and the various Federal Records Centers located throughout the country.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former applicants for FAA employment. Current and former FAA employees. Individuals considered for access to classified information or restricted areas and/or security determinations such as current and former contractors, employees of contractors, experts, instructors, and consultants to federal programs. Aircraft owners. Flight instructors. Airport operators. Pilots, mechanics, designated FAA representatives. Other individuals certified by the FAA. Individuals involved in tort claims against the FAA. Employees, grantees, subgrantees, contractors, subcontractors, and applicants for FAA-funded programs. Other individuals who are of investigative interest to the FAA, law enforcement, or investigative agencies.

CATEGORIES OF RECORDS IN THE SYSTEM:

Results of investigations and inquiries conducted by the Office of the Associate Administrator for Civil Aviation Security, the FAA regional Civil Aviation Security Divisions, the Mike Monroney Aeronautical Center Civil Aviation Security Division, and the FAA Technical Center, Civil Aviation Security Staff; information received in various formats as the result of investigations conducted by federal, state, local, and foreign investigative or law enforcement agencies, which relate to the mission and function of the Associate Administrator for the Office of Civil Aviation Security and field

elements; and information received in various formats as the result of investigations conducted by authorized personnel of the FAA, other federal agencies, state and local drug enforcement agencies regarding the actual or probable violation by pilots, aircraft owners, or aircraft mechanics of civil and criminal laws regulating controlled substances.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title 49 U.S.C., chapter 449, Air Transportation Security, enacted as Pub. L. 103–272 on July 5, 1994; Transportation Safety Act of 1974; FAA Drug Enforcement Assistance Act of 1988; Executive Order, E.O., 10450, Security Requirements for government Employment; E.O. 12968, Access to Classified Information; and E.O. 12829, National Industrial Security Program.

PURPOSE(S):

To maintain in an orderly fashion the categories of records listed above, in order that the FAA may conduct its investigations and personnel security programs in an efficient manner and document official actions taken on the basis of information contained in these records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) To the Department of Justice when: (a) The agency, or any component thereof; or (b) any employee of the agency in his or her official capacity; or (c) any employee of the agency in his or her individual capacity where the Department of Justice has agreed to represent the employee; or, (d) the United States, where the agency determines that litigation is likely to affect the agency or any of its components, is a party to litigation or has an interest in such litigation, and the use of such records by the Department of Justice is deemed by the agency to be relevant and necessary to the litigation, provided, however, that in each case, the agency determines that disclosure of the records to the Department of Justice is a use of the information contained in the records that is compatible with the purpose for which the records were collected. (2) To disclose the records in a proceeding before a court or adjudicative body, including an administrative tribunal or hearing, before which the agency is authorized to appear, when:

(a) The agency, or any component thereof; or (b) any employee of the agency in his or her official capacity; or (c) any employee of the agency in his or her individual capacity where the agency has agreed to represent the employee; or, (d) the United States, where the agency determines the litigation is likely to affect the agency or any of its components, is a party to litigation or has an interest in such litigation, and the agency determines that use of such records to be relevant and necessary to the litigation, provided, however, that in each case, the agency determines that disclosure of the records to the Department of Justice is a use of the information contained in the records that is compatible with the purpose for which the records were collected. (3) To authorized representatives of United States air carriers where air safety might be affected. (4) To authorized representatives of federal, state, local agencies and departments, including the District of Columbia, and foreign governments, who require access to the file pursuant to an investigation or inquiry conducted for use in law enforcement activities, either civil or criminal, or to expose fraudulent claims. (5) See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are stored in approved security file cabinets and containers, in file folders, on lists and forms, and in computer processable storage media.

RETRIEVABILITY:

These records are retrieved by name or other identifying symbols.

SAFEGUARDS:

Access to and use of these records are limited to those persons whose official duties require such access and use. Computer processing of information is conducted within established FAA computer security regulations. A risk assessment of the FAA computer facility used to process this system of records has been accomplished.

RETENTION AND DISPOSAL:

These records are destroyed or retired to the area Federal Records Center and then destroyed in accordance with the current version of FAA Order 1350.15, Records Organization, Transfer and Destruction Standards. The retention and destruction period for each record varies depending on the type of record, category of investigation, or significance of the information contained in the record. All records are destroyed by approved methods.

SYSTEM MANAGER(S) AND ADDRESS:

For the Washington Metropolitan area, excluding Eastern Region jurisdiction: Office of the Associate Administrator for Civil Aviation Security, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591. For the geographical area under the jurisdiction of the various regions: Manager, Civil Aviation Security Division, of the appropriate region. (See the FAA Directory for addresses). For the jurisdiction of the FAA Technical Center: Manager, Civil Aviation Security Staff, FAA Technical Center, Atlantic City International Airport, Atlantic City, NJ 08405.

For the jurisdiction of the Mike Monroney Aeronautical Center:

Manager, Civil Aviation Security Division, FAA Aeronautical Center, P.O. Box 25082, Oklahoma City, OK 73125.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Subject individual, interviews, review of records, and other authorized applicable investigative techniques.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system are exempt under 5 U.S.C. 552a(j)(2) and 5 U.S.C. 552a(k)(1), (2) and (5).

DOT/FAA 816

SYSTEM NAME:

Tort Claims and Personal Property Claims Record System.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Office of the Chief Counsel, Litigation Division, AGC–400, Federal Aviation Administration, 400 7th Street, SW., Washington, DC 20590, and in the Office of the Assistant Chief Counsels and the Logistics Divisions in the regions and centers.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Tort and property claimants who have filed claims against the Government/FAA.

CATEGORIES OF RECORDS IN THE SYSTEM:

Reports, vouchers, witness statements, legal decisions, and related

material pertaining to claims by or against the Government resulting from FAA transactions, other than litigation cases.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Federal Tort Claims Act, 28 U.S.C. 2671, *et seq.*; Military Personnel and Civilian Employees Claims Act of 1964, 31 U.S.C. 3701, 3721.

PURPOSE(S):

Permit the administrative settlement of tort and Federal employees personal property claims against the government.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Investigation. Reference. Court action. Doubtful claims are sent by Accounting Division to GAO for adjudication. Some larger claims go to Department of Justice for approval or disapproval. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are stored in approved file cabinets and containers.

RETRIEVABILITY:

These records are indexed by name.

SAFEGUARDS:

Access to and use of these records are limited to those persons whose official duties require such access. Records are maintained on a computer system. The computer system is password protected.

RETENTION AND DISPOSAL:

These records are destroyed 3 years after the final decision is rendered.

SYSTEM MANAGER(S) AND ADDRESS:

Office of the Assistant Chief Counsel, Litigation Division, Federal Aviation Administration, 400 Seventh Street, SW., Washington, DC, 20590. Regional and center counsels and regional and center Logistics Division Managers.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Claimant, investigation reports, and courts.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FAA 821

SYSTEM NAME:

Litigation Information Management Systems.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

This system of records is maintained within the Office of the Assistant Chief Counsel for Litigation, FAA, 400 Seventh Street, SW., Washington, DC 20590, and at the Office of Assistant Chief Counsel for each Region and Center.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

This file contains information on Litigants, Claimants, Decedents, Plaintiff's Attorney, FAA Attorney and Department of Justice Attorney.

CATEGORIES OF RECORDS IN THE SYSTEM:

Litigation and claim pleadings, discovery material, related documents (including background data on individual, or decedent involved), memoranda, correspondence, and other material necessary to respond to claims or prepare for litigation or hearings. Types of claims or litigation:

Aircraft accidents, auto accidents, personnel and general litigation.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Federal Tort Claims Act, 28 U.S.C. 2671, *et seq.*; Military Personnel and civilian Employees claims Act of 1964, 31 U.S.C. 3701, 3721.

PURPOSE(S):

Case management/record management.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

On computer database and password protected. Also, data are stored in lockable and unlockable file cabinets, individuals' attorneys' offices, binders, index files and in computers.

RETRIEVABILITY:

Access is by name, location of accident, and/or docket number.

SAFEGUARDS:

Data from these files are retrievable only by persons within the Office of the Assistant Chief Counsel for Litigation or Regional Counsels. Access to offices is limited to agency employees and those accompanied by agency employees.

RETENTION AND DISPOSAL:

Litigation files are kept for 2 years after case is closed, then sent to the Federal Records Center. All other records in this system are retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Chief Counsel, Litigation Division, AGC-400, Office of Chief Counsel, Federal Aviation Administration, 400 Seventh Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Employees of the Office of Chief Counsel, Federal courts, individuals and their attorney, FAA records, litigation files, etc.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FAA 822

SYSTEM NAME:

Aviation Medical Examiner System.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Aeromedical Education Division, AAM–400, FAA Civil Aeromedical Institute, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 S. MacArthur Blvd. P.O. Box 25082, Oklahoma City, OK 73125. Regional Flight Surgeons in all regional headquarters.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Private civilian physicians (United States and foreign) designated as AMEs. Selected United States military flight surgeons designated as AMEs. Selected United States Federal medical officers designated as AMEs.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system includes records necessary to: Determine professional qualifications of physicians designated

(initially and subsequently) as AMEs; identify the type and location of AMEs within the AME program; monitor AMEs performance in support of the Medical Certification Program; and monitor AMEs compliance with mandatory training (initial and periodic) and other AME designation requirements.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C 44702.

PURPOSE(S):

Determine professional qualifications and designation authorization (initial and subsequent) of AMEs.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Document the necessary information on AMEs whose designation has been revoked or retired. Support effective and efficient communications between the FAA and its designated AMEs. Maintain a database to support the management of the AME program. Provide the public with the names and addresses of AMEs who provide FAA medical certification services. Policy determination regarding the AME program. Locating and obtaining support of qualified AMEs. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Computer processable storage media and hard copy files.

RETRIEVABILITY:

By AME name, AME number, region, state, county, and city.

SAFEGUARDS:

File rooms with restricted access by authorized personnel only. Computer processing of AME information is conducted within established FAA computer security regulations.

RETENTION AND DISPOSAL:

Hard copy files are retained by the Aeromedical Education Division on all active AMEs (civilian, military, and Federal), and on AMEs who have been inactive for less than 10 years. Hard copy files of AMEs who have been inactive for 10 years or more, but less than 25 years, are stored by the Federal Records Center. Hard copy files of AMEs who have been inactive for 25 or more years are destroyed by the Federal Records Center. Computerized AME records are updated continuously for all active AMEs. Computerized records of AMEs who have been inactive for less than 25 years are maintained in the system; and those AMEs inactive for 25 or more years are deleted. Hard copy files of United States civilian AMEs (excluding foreign civilian, military, and Federal AMEs) are also retained by the Regional Flight Surgeon Offices. When these regional AME files become inactive, they are immediately transferred to the Aeromedical Education Division.

SYSTEM MANAGER(S) AND ADDRESS:

Manager, Aeromedical Education Division, AAM–400, FAA Civil Aeromedical Institute, Federal Aviation Administration Mike Monroney Aeronautical Center, P.O. Box 25082, Oklahoma City, OK 73125. Regional Flight Surgeons within Region where the AME is designated.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Aviation Medical Examiners. Additional background information on civilian AMEs may be obtained directly from the Federation of State Medical Boards of the United States.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

Environmental Litigation Files.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Office of the Chief Counsel, FAA, Washington, DC, and Regional Counsel and airport divisions.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Litigants, witnesses, plaintiff's attorney, FAA attorney, Department of Justice Attorney, etc.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information on litigation, pleadings, discovery material, related documents, (including background data on individual involved), memoranda, correspondence, and other material necessary to respond to claim or prepare for litigation or hearings.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

National Environmental Policy Act of 1969, 42 U.S.C. 4321, Airport Environmental requirements, 49 U.S.C. 47106(c), Section 4(f) of the Department of Transportation Act, 49 U.S.C. 303, and other applicable environmental laws, regulations, and Executive Orders.

PURPOSE(S):

Litigation.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders stored in locked and unlocked file cabinets and individual attorney's offices.

RETRIEVABILITY:

Caption of the particular litigation, which may include an individual's name or corporation or trade association name.

SAFEGUARDS:

Access regularly by Office of Chief Counsel personnel only; material is accessible only in facilities with building access controls and in storage retrieval regularly only by Office of the Chief Counsel personnel.

RETENTION AND DISPOSAL:

Files are kept for 2 years after case has been closed and then sent to Records Center.

SYSTEM MANAGER(S) AND ADDRESS:

Manager, Airports/Environmental Law Division, AGC–600, Office of the Chief Counsel, FAA, 800 Independence Avenue, SW., Washington, DC 20591.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Federal courts, individuals and their attorneys, FAA records, litigation files, etc.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FAA 828

SYSTEM NAME:

Physiological Training System.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Aeromedical Education Division, AAM–400, FAA Civil Aeromedical Institute, Mike Monroney Aeronautical Center, 6500 S. MacArthur Blvd., P.O. Box 25082, Oklahoma City, OK 73125.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Certificated Airmen.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records necessary to establish qualifications of eligibility to receive physiological training, maintain accountability of funds required for training and transfer of funds to involved agencies, and to provide proper evidence of training.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 44703, and 14 CFR 61.31.

PURPOSE(S):

Maintain appropriate documentation on individuals who apply for and complete physiological training conducted by, or coordinated through the FAA Aeromedical Education Division.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Determine individual training qualifications. Receipt and transfer of training funds. Maintain individual records of training completion. See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Hard copy files and computer processable storage media.

RETRIEVABILITY:

By name and location of training.

SAFEGUARDS:

File access is regularly restricted to Aeromedical Education Division personnel. The information is password protected. Passwords are changed every 30 days. The screen automatically closes if the computer is not used within 15 minutes, and would require a password to reopen the file.

RETENTION AND DISPOSAL:

Records are destroyed when 5 years old. (Applications, Hold Harmless Statements, Chamber Flight Records)

SYSTEM MANAGER(S) AND ADDRESS:

Manager, Aeromedical Education Division, AAM–400, FAA Civil Aeromedical Institute, Mike Monroney Aeronautical Center, PO Box 25082, Oklahoma City, OK 73125.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Covered individuals.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FAA 830

SYSTEM NAME:

Representatives of the Administrator.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Federal Aviation Administration. Mike Monroney Aeronautical Center, Regulatory Support Division, AFS–600, and Civil Aviation Registry, AFS–700, Oklahoma City, Oklahoma 73125. Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591. Flight Standards District Offices, FSDO. Manufacturing Inspection District Offices, MIDO. Aircraft Certification Divisions. Flight Standards Divisions. Aircraft Certification Offices, ACO. Air Traffic Headquarters. Regional or field offices that designate Air Traffic control Tower Operator Examiners. International Field Offices, IFO.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Designated Pilot Examiners, DPE. Designated Mechanic Examiners, DME. Designated Parachute Rigger Examiners, DPRE. Applicants for the technical personnel examiners for DPEs, DMEs, DPREs. Designated Engineering Representatives. Designated Manufacturing Inspection Representatives. Designated Airworthiness Representatives. Organizational Designated Airworthiness Representatives.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, date of birth, place of residence, company name (when delegated as an organization), mailing address, social security number (if applicable), certificate number, and work and/or home telephone number. Applications for designee. Records of qualification. Certification. Appointment authorization. Training. Dates of renewal and termination. Employment history. Reasons for termination (if applicable).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 40101, 40113, 44701, 44702, and 44703.

PURPOSE(S):

Required in connection with applications for and issuance of authorizations to be Representatives of the Administrator. Used to identify and maintain a list of applicants for future appointment, as necessary. Used to record validation and approval of new designees. To promote the standardization of designees by tracking training, accomplishments, and the limitations of current designees.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Provide the public with the names and addresses of certain categories of representatives who may provide service to them. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders, on lists, on forms, and on computer-accessible storage media. Records are also stored in microfiche, microfilm, and electronic optical storage.

RETRIEVABILITY:

Name, birth date, social security number, or any other identification number of the individual on whom the records are maintained.

SAFEGUARDS:

Manual records: Strict information handling procedures have been developed to cover the use, transmission, storage, and destruction of personal data in hard copy form. These procedures are periodically reviewed for compliance. Automated processing Computer processing of personal information is conducted within the guidelines of established FAA computer security regulations. A risk assessment of the FAA computer facility used to process this system of records has been accomplished.

RETENTION AND DISPOSAL:

Records destroyed 5 years after designation becomes inactive, or when no longer needed, whichever is sooner.

SYSTEM MANAGER(S) AND ADDRESS:

Federal Aviation Administration, Manager, Designee Standardization Branch, AFS–640, Mike Monroney Aeronautical Center, P.O. Box 25082, Oklahoma City, Oklahoma 73125. Aircraft Certification Divisions. Aircraft Certification Offices. Manufacturing Inspection District Offices. Flight Standards District Offices. Air Traffic Control Offices.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Individual to whom it applies.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FAA 833

SYSTEM NAME:

Quarters Management Information System.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Federal Aviation Administration, Alaskan Region, 222 W. 7th Ave., #14, Anchorage, AK 99513–7587.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees occupying FAA owned or leased housing. Employees and agencies that lease FAA housing in Alaska.

CATEGORIES OF RECORDS IN THE SYSTEM:

Housing records, leases.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 5911(f), OMB Circular A–45.

PURPOSE(S):

Establish regional rental rates for quarters; maintain status of housing; maintain up-to-date list of persons occupying FAA units.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Establish and terminate payroll deductions for collection of housing rent through request to the appropriate payroll office. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Filing cabinet, Real Estate and Utilities Branch AAL–54.

RETRIEVABILITY:

Station location, unit numbers, name of employee, number of dependents, pay period rental rate.

SAFEGUARDS:

Retrieved only by agency personnel and used only in the conduct of official business. Paper copy kept in a locked file cabinet with two people having access to the key. Quarters Management Information System, QMIS, is on only one person's computer and it requires a password to access this computer.

RETENTION AND DISPOSAL:

End of year reports are retained for 5 years.

SYSTEM MANAGER(S) AND ADDRESS:

Federal Aviation Administration, Housing Manager, AAL–50, 222 W. 7th Ave., #14, Anchorage, AK 99513–7587.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

FAA Employees. Employees of other agencies that lease housing from FAA.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FAA 837

SYSTEM NAME:

Newsletter Photographs and Biographical Information.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Office of Public Affairs, FAA, 800 Independence Avenue, SW., Washington, DC, 20591. Public Affairs Offices at: Aeronautical Center, P.O. Box 25082, Oklahoma City, OK 73125. Eastern Region, Federal Bldg., JFK International Airport, Jamaica, NY 11430. Great Lakes Region, 2300 E. Devon Avenue, Des Plaines, IL 60018. Northwest Mountain Region, 1601 Lind Ave., SW., Renton, WA 98055. Southern Region, P.O. Box 20636, Atlanta, GA 30320. Biographies of key FAA officials are on the FAA web page at HTTP://WWW.FAA.GOV/APA/BIOS.HTM

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FAA employees and other individuals who may appear with them in candid photographs.

CATEGORIES OF RECORDS IN THE SYSTEM:

Biographical data; portrait and candid photographs.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 106(f).

PURPOSE(S):

Provide information to the public—particularly the news media—and for use in employee publications.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Stored in file cabinets.

RETRIEVABILITY:

Alphabetically by name, or publication date.

SAFEGUARDS:

These records are stored in filing drawers that remain locked at all times. There are two keyholders in the office; therefore, access to these drawers is limited to these employees only on an as-needed basis.

RETENTION AND DISPOSAL:

Retained as long as individual or event is newsworthy, following which they are destroyed. In certain cases, material is transferred to the Office of the Historian.

SYSTEM MANAGER(S) AND ADDRESS:

Same as "System Location."

NOTIFICATION PROCEDURE:

Same as "System Manager."

RECORD ACCESS PROCEDURES:

Same as "System Manager."

CONTESTING RECORD PROCEDURES:

Same as "System Manager."

RECORD SOURCE CATEGORIES:

FAA employees and other individuals who may appear with them in candid photographs.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FAA 845

SYSTEM NAME:

Administrators Correspondence Control and Hotline Information System, ACCIS, Administrator's Hotline Information System, AHIS, and Consumer Hotline Information System, CHIS, Formerly Administrators Correspondence Control and Hotline Information System."

SYSTEM LOCATION:

Correspondence files are located in the Office of the Executive Secretariat, AOA–3, and Hotline files are located in the Hotline Operations Program Office, AOA–20. Both categories of records in the Washington headquarters offices of the Federal Aviation Administration, 800 Independence Ave., SW., Washington, DC 20591.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who write, call (including HOTLINE calls), or are referred in writing by a second party, to the Administrator, to the Deputy Administrator, and their immediate offices; individuals who write, call, or are referred in writing by a second party to the Secretary, to the Deputy Secretary, and their immediate offices and the correspondence which has been referred to the Federal Aviation Administration; individuals who are the subject of an action requiring approval or action by one of the forenamed, such as appeals, actions, training, awards, foreign travel, promotions, selections,

grievances, delegations, application of waivers from the Federal Aviation Administration, etc.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence files contain correspondence submitted by, or on behalf of, an individual including resumes, letters of reference, etc; responses to such correspondence and calls, staff recommendations on actions requiring approval or action by the Administrator, the Deputy Administrator, the Secretary, and the Deputy Secretary. Hotlines files contain call records, correspondence, reports, and related documents accumulated by the staff in the course of operation.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 3101.

PURPOSE(S):

Correspondence files: Documentation of the organization, functions, policies, decisions, procedures, and essential transactions of the agency and designed to furnish the information necessary to protect the legal and financial rights of the Government and of persons directly affected by the agency's activities. Hotlines files: Documentation of calls made by agency employees and consumers.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Referral to the appropriate action office within or outside the Department or agency for preparation of a response. Referral, to the appropriate agency for actions involving matters or law, of regulations beyond the responsibility of the agency or Department, such as the Department of Justice in matters of law enforcement. As a data source for management information, such as briefing material on hearings, trend analysis, responsiveness, etc. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Computer processable media, microfilm, and hardcopy access to the records will be by means of identification numbers and passwords known only to the user and the system managers.

RETRIEVABILITY:

Retrieved by control number, suspense date, correspondence date, subject matter, last name and location of originator and addressee, constituent's name, action office, and type.

SAFEGUARDS:

Terminal access through the system's software for ACCIS is limited to the Office of the Administrator. Access to the records of the AHIS and CHIS is limited to the staff of the Hotline Operations Program Office. Information is retrieved by means of a user ID and password known only to each user.

RETENTION AND DISPOSAL:

The Administrators Correspondence Control and Information System hard copies are destroyed after the material is microfilmed. Microfilm is retained permanently. The Administrator's Hotline hard copies and magnetic records are destroyed after 5 years. The Consumer Hotline hard copies and magnetic records are destroyed after 2 years.

SYSTEM MANAGER(S) AND ADDRESS:

Administrator's Correspondence control and Information System: Director, Executive Secretariat, Office of the Administrator, AOA–3, Administrator's and Consumer Hotline Systems: Manager, Hotline Operations Program Office, AOA–20, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Correspondence, records of calls from individuals, including HOTLINE calls, their representatives, or sponsors. Responses to incoming correspondence and records of calls. Related material for background as appropriate.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FAA 847

SYSTEM NAME:

Aviation Records on Individuals (Formerly, General Air Transportation Records on Individuals).

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Federal Aviation Administration, FAA, Mike Monroney Aeronautical Center, MMAC, Oklahoma City, Oklahoma 73125: Civil Aeromedical Institute, Aeromedical Certification Division, AAM–300; Regulatory Support Division, AFS–600; Civil Aviation Registry, Airmen Certification Branch, AFS–760. Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591. Flight Standards District Offices, FSDOs. Certificate Management Offices, CMOs. Certificate Management Field Offices, CMFOs. International Field Offices. Civil Aviation Security Field Offices, CASFO's. FAA regional offices. Electronic enforcement litigation tracking system records are located in the offices of the Regional Counsel, Directorate Counsel and Chief Counsel.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current certificated airmen, airmen whose certificates have expired, airmen who are deceased, airmen rejected for medical certification, airmen with special certification, and others requiring medical certification. Air traffic controllers in air route traffic control centers, terminals, and flight service stations and applicants for these positions. Holders of and applicants for airmen certificates, airmen seeking additional certifications or additional ratings, individuals denied certification, airmen holding inactive certificates, airmen who have had certificates revoked. Persons who are involved in aircraft accidents or incidents; pilots, crewmembers, passengers, persons on the ground, and witnesses. Individuals against whom the Federal Aviation Administration has initiated administrative action or legal enforcement action for violation of certain Federal Aviation Regulations, FAR, or Department of Transportation Hazardous Materials Regulations, HMR.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name(s), date of birth, place of residence, mailing address, social security number, and airman certificate number Records that are required to determine the physical condition of an individual with respect to the medical standards established by FAA. Records concerning applications for certification, applications for written examinations, results of written tests, applications for inspection authority, certificates held, ratings, stop orders, and requests for duplicate certificates. Reports of fatal accidents, autopsies, toxicological studies, aviation medical examiner reports, medical record printouts, nonfatal reports, injury reports, accident name cards, magnetic tape records of fatal accidents,

physiological autopsy, and consulting pathologist's summary of findings. Records of accident investigations, preliminary notices of accident injury reports, engineering analyses, witness statements, investigators' analyses, pictures of accident scenes. Records concerning safety compliance notices, letters of warning, letters of correction, letters of investigation, letters of proposed legal enforcement action, final action legal documents in enforcement actions, correspondence of Regional Counsels, Office of Chief Counsel, and others in enforcement cases. Also included are electronic enforcement litigation tracking system records located in the Offices of the Regional Counsel, Directorate Counsel and Chief Counsel.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 40101, 40113, 44701, 44703.

PURPOSE(S):

Issuance of airmen certificates by the Federal Aviation Administration.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(a) Provide basic airmen certification and qualification information to the public upon request. (b) Disclose information to the National Transportation Safety Board, NTSB, in connection with its investigation responsibilities. (c) Provide information about airmen to Federal, state, and local law enforcement agencies when engaged in the investigation and apprehension of drug-law violators. (d) Provide information about enforcement actions arising out of violations of the Federal Aviation Regulations to government agencies, the aviation industry, and the public upon request. (e) Disclose information to another Federal agency, or to a court or an administrative tribunal, when the Government or one of its agencies is a party to a judicial proceeding before the court or involved in administrative proceedings before the tribunal. (f) See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12): Disclosures may be made from these systems to "consumer reporting agencies" (collecting on behalf of the United States Government) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)) and to debt collection agencies as defined by inference in the Federal Collection Act of 1966 (31 U.S.C. 3711(f)(1)) as amended.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file folders, on lists and forms, and in computer processable storage media. Records are also stored on microfiche and roll microfilm.

RETRIEVABILITY:

Name, birth date, social security account number, airman certificate number, or other identification number of the individual on whom the records are maintained. Sex. Accident number and/or incident number, and administrative action or legal enforcement numbers.

SAFEGUARDS:

Manual records: Strict information handling procedures have been developed to cover the use, transmission, storage, and destination of personal data in hard copy form. These are periodically reviewed for compliance. Automated Processing (FAA Systems): Computer processing of personal information is conducted within established FAA computer security regulations. A risk assessment of the FAA computer facility used to process this system of records has been accomplished. Automated Processing (Commercial Computer Contractor): Computer programs operated on commercial security levels and record element restrictions to prevent release of data to unauthorized parties.

RETENTION AND DISPOSAL:

These records are destroyed or retired to the area Federal Records Center and then destroyed in accordance with current version of FAA Order 1350.15, Records Organization, Transfer and Destruction Standards. The retention and destruction period for each record varies depending on the type of record.

SYSTEM MANAGER(S) AND ADDRESS:

The address for the system managers listed below is: Federal Aviation Administration, Mike Monroney Aeronautical Center, PO Box 25082, 6500 South MacArthur Blvd., Oklahoma City, Oklahoma 73125.

RECORDS CONCERNING AVIATION MEDICAL CERTIFICATION:

Manager, Aeromedical Certification Division, AAM–300, FAA certification records and general airman records: Manager, Airmen Certification Branch, AFS–760, Records concerning aircraft accidents and incidents, Manager, Operational Systems Branch, AFS–620, Records concerning administrative and legal enforcement action: FAA enforcement information system data bases for administrative and legal enforcement actions: Manager, Operational Systems Branch, AFS–620, Official FAA enforcement files: The Office of Chief Counsel, the Office of Regional Counsel, or the investigating FAA field office, as appropriate. The address of the appropriate FAA legal or field office maintaining the official agency enforcement file may be obtained from AFS–620.

ELECTRONIC ENFORCEMENT LITIGATION TRACKING SYSTEM RECORDS:

Offices of the Regional Flight Counsel, Directorate counsel, and Chief Counsel. Aviation medical certification records from regional files: Regional Flight Surgeon within the region where examination was conducted. Visit or call the local FAA office in the area in which you reside for any proper regional address.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Medical Information: Information is obtained from Aviation Medical Examiners, individuals themselves, consultants, hospitals, treating or examining physicians, and other Government agencies. Airmen Certification Records: Information is obtained from the individual to whom the records pertain, FAA aviation safety inspectors, and FAA designated representatives. Written test scores are derived from answers given by individuals. Actions filed by FAA personnel. General Aviation Accident/Incident Records and Air Carrier Incident Records: Information is obtained from Aviation Medical Examiners, pathologists, accident investigations, medical laboratories, law enforcement officials, and FAA employees. Data are also collected from manufacturers of aircraft, and involved passengers. Administrative Action and Legal Enforcement Records: Information is obtained from witnesses, Regional Counsels, the National Transportation Safety Board, Civil Aviation Security personnel, Flight Standards personnel, Aeronautical Center personnel, and the Office of Chief Counsel.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system are exempt under 5 U.S.C. 552a(k)(2).

DOT/FAA 851

SYSTEM NAME:

Administration and Compliance Tracking in an Integrated Office Network.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Federal Aviation Administration, FAA, Office of Aviation Medicine, Drug Abatement Division, 800 Independence Avenue, SW., Washington, DC 20591.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Medical review officers, company anti-drug program managers, other contact names, and individuals who call the FAA to self-disclose, who are directly involved in the implementation and maintenance of drug and alcohol testing programs in conjunction with the aviation industry.

CATEGORIES OF RECORDS IN THE SYSTEM:

Names, company and office telephone numbers of program managers who are in charge of the everyday operation of drug and alcohol testing programs for aviation companies, other persons who are contacts for facilities directly involved in drug and alcohol testing for the aviation industry, medical review officers (physicians) who review test results for the aviation companies, and individuals with company name and telephone numbers who call the FAA to self-disclose non-compliance.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Omnibus Transportation Employee Testing Act of 1991 (49 U.S.C. 45101–45106), 14 CFR part 61, *et al.*

PURPOSE(S):

Support the information resource, reporting and archival needs of the Drug Abatement Division.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in an automated information system.

RETRIEVABILITY:

Name of an individual or by a unique case file identifier.

SAFEGUARDS:

Computer processing of information would be conducted within established FAA computer security regulations. A risk assessment of the FAA computer facility used to process this system of records has been accomplished.

RETENTION AND DISPOSAL:

The FAA has requested a retention and disposal schedule to destroy 5 years from creation date. That request is pending approval from the National Archives and Records Administration, NARA.

SYSTEM MANAGER(S) AND ADDRESS:

Manager, Drug Abatement Division, AAM–800, Office of Aviation Medicine, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

FAA records.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FHWA 204

SYSTEM NAME:

Federal Highway Administration, FHWA, Motor Carrier Safety Proposed Civil and Criminal Enforcement Cases, DOT/FHWA.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Office of Motor Carrier Enforcement, HMCE, 400 7th Street, SW., Room 4432A, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Officers, agents or employees of motor carriers, including drivers who have been the subject of investigation for Motor Carrier Safety regulation violations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Motor Carrier safety regulation violations and identifying features.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Motor Carrier Safety Act of 1984, 49 U.S.C. 521(b).

PURPOSE(S):

Decide enforcement action, and for use as historical documents in case of appeal.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses. Routine use number 5 does not apply to this system of records.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders in the Field Legal Services' offices.

RETRIEVABILITY:

Names of individuals.

SAFEGUARDS:

Only Office of Chief Counsel or Field Legal Services employees and Office of Motor Carrier and Highway Safety, OMCHS, employees have regular access to the files.

RETENTION AND DISPOSAL:

The records are retained for one year and then are generally sent to the local Federal Records Centers for an additional three-year period.

SYSTEM MANAGER(S) AND ADDRESS:

FHWA, Office of Chief Counsel, 400 Seventh Street, SW., Room 4224, Washington, DC 20590; FHWA Resource Centers, Field Legal Services.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Individuals, motor carrier files, OMCHS file information as gathered by OMCHS investigators, etc.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

5 U.S.C. 552 (c)(3), (d), (e)(4)(G), (H), and (I), (f) to the extent they contain investigative material compiled for law enforcement purposes in accordance with 5 U.S.C. 552a(k)(2).

DOT/FHWA 213

SYSTEM NAME:

Driver Waiver/Exemption File.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Department of Transportation, Federal Highway Administration, FHWA, Office

of Motor Carrier Research and Standards, HMCS, 400 7th Street, SW., Washington, DC 20590; FHWA Resource Centers.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Operators of interstate commercial motor vehicles that transport certain commodities.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications for waiver (usually involving physical disability); final disposition of request for waiver; and waiver renewal.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Motor Carrier Safety Act of 1984 (49 U.S.C. 31136(e) and TEA–21 (49 U.S.C. 31315).

PURPOSE(S):

Monitor drivers of commercial motor vehicles who operate in interstate commerce and have been identified as physically impaired.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses. Routine use number 5 is not applicable to this system of records.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The records are maintained in file folders in file cabinets.

RETRIEVABILITY:

The records are filed by driver's name.

SAFEGUARDS:

Files are classified as sensitive and are regularly accessible only by designated employees within the Resource Centers and Office of Motor Carrier and Highway Safety.

RETENTION AND DISPOSAL:

The files are retained while the driver waivers are active. The inactive driver waiver files are purged every 3 years.

SYSTEM MANAGER(S) AND ADDRESS:

Department of Transportation, Federal Highway Administration, Office of Motor Carrier Research and Standards, HMCS, 400 Seventh Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Application for Waiver or Waiver Renewal.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FHWA 215

SYSTEM NAME:

Travel Advance File.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Department of Transportation, Federal Highway Administration, FHWA, Office of Budget and Finance, 400 Seventh Street, SW., Washington, DC 20590; Federal Aviation Administration, Southern Region, Travel and Transportation Section, ASO–22A, Campus Building, Room C–210E, 1701 Columbia Avenue, College Park, GA 30337; and the FHWA Federal Lands Division Offices (Eastern, Central, and Western).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees who are not eligible for the contractor-issued credit card and other groups of employees, and first-duty hires.

CATEGORIES OF RECORDS IN THE SYSTEM:

Record of travel advances and repayments.

AUTHORITY FOR MAINTENANCE OF SYSTEM:

5 U.S.C. 5707; 41 CFR part 301.

PURPOSE(S):

Controlling the repayments of travel advances to FHWA personnel.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12): Disclosures may be made from this system to "consumer reporting agencies" (collecting on behalf of the United States Govt.) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Open advances are maintained on a 5 x 8 inch form. In an automated travel management system, no advance is required (*i.e.*, paperless).

RETRIEVABILITY:

Indexed by name.

SAFEGUARDS:

Locked file cabinet.

RETENTION AND DISPOSAL:

The files are retained for 6 years and 3 months after period covered by account, pursuant to General Records Schedule 6.

SYSTEM MANAGER(S) AND ADDRESS:

Department of Transportation, Federal Highway Administration, Office of Budget and Finance, HABF, Team Leader, Travel Policy and Operations, 400 Seventh Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Individuals on whom the records are maintained.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FHWA 216

SYSTEM NAME:

Travel Authorization and Voucher—Relocation Allowances (First Duty or Permanent Change of Station).

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Department of Transportation, Federal Highway Administration, FHWA, Office of Budget and Finance, HABF, 400 Seventh Street, SW., Washington, DC 20590; Federal Aviation Administration, MMAC Travel and Transportation Branch, AMZ–130, 6500 So. MacArthur Blvd., Oklahoma City, OK 73169.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

First duty and permanent change of station employees within the FHWA.

CATEGORIES OF RECORDS IN THE SYSTEM:

Travel voucher(s), copies of third party payments (*i.e.*, Government Bill of

Lading, GBL, carrier bills, contractor invoice(s) for services, Administrative Notices (*i.e.*, adjustment(s) to vouchered claim, taxable and non-taxable income, withholding tax allowance(s), if applicable, taxes withheld), and IRS 4782's (Summary of Calendar Year of All Reimbursements, including taxes withheld).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 5707; 41 CFR part 302.

PURPOSE(S):

Support the payments to employees and serves as support for updated employee earnings records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12): Disclosures may be made from this systems to " consumer reporting agencies" (collecting on behalf of the United States Govt.) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained on an 8 x 10 inch form in file folders.

RETRIEVABILITY:

The files are indexed by name.

SAFEGUARDS:

Supervised by the Team Leader, Travel Policy and Operations in FHWA and the Division Manager, Financial Operations in FAA.

RETENTION AND DISPOSAL:

Destroy after 6 years, pursuant to General Records Schedule 9.

SYSTEM MANAGER(S) AND ADDRESS:

Department of Transportation, Federal Highway Administration, Office of Budget and Finance, HABF, Team Leader, Travel Policy and Operations, 400 Seventh Street, SW., Washington, DC 20590; and Division Manager, MMAC Travel and Transportation Branch, AMZ–130, 6500 MacArthur Blvd., Oklahoma City, OK 73169.

DOT/FRA 106

SYSTEM NAME:

Occupational Safety and Health Reporting System.

SECURITY CLASSIFICATION:

Unclassified, Sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Federal Railroad Administration, FRA, Office of Administration, Office of Safety, Office of Safety Assurance and Compliance, RRS–12, 1120 Vermont Avenue, NW., Stop 25 Washington DC 20590–0001

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FRA employees (injuries and illnesses) FRA employees involved in government property accidents.

CATEGORIES OF RECORDS IN THE SYSTEM:

Federal Occupation Injuries and Illnesses Survey (Standard Form OSHA–102) Departmental Accident/ Injury Reports DOT Forms 3902 1.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Occupational Safety and Health Act of Employees, (Executive Order 12196); Basic Program Elements for Federal Employee Occupational Safety and Health Programs and Related Matters, (Title 29 CFR part 1960); Management of Building and Grounds, (Title 41 CFR parts 101–20); and Occupational Safety and Management Program (DOT Order 3902.7A).

PURPOSE(S):

To track employees injuries, illnesses, and accidents involved in government

property to develop causative trends, accident prevention policies, and correct safety items.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Maintain accident records per departmental orders. Provide data to Office of the Secretary. Develop causative trends Use for corrective accident prevention. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12): Disclosures may be made from this System to Aconsumer reporting agencies (collecting on behalf of the United States Government) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f) or the Federal Claims Collection Act of 1982(31 U.S.C. 3701(a)(3).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained on copies of basic documents.

RETRIEVABILITY:

By name.

SAFEGUARDS:

Physical security consists of file drawer with data; records provide to authorized individuals by FRA Safety Manager after physical Screening.

RETENTION AND DISPOSAL:

FRA Safety Manager, Department of Transportation Federal Railroad Administration, Office of Administration, Office of Safety Assurance and Compliance, RRS–12, 1120 Vermont Avenue, NW., Stop 25, Washington DC 20590–0001.

NOTIFICATION PROCEDURE:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCES CATEGORIES:

Documents provided by the individual.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/FRA 130

SYSTEM NAME:

Enforcement Case System.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Federal Railroad Administration, Office of the Chief Counsel, Safety Law Division, RCC–10, 1120 Vermont Avenue, NW., Stop 10, Washington, DC 20590–0001. Each Regional Office and Department of Transportation, DOT, Federal Railroad Administration, Office of Safety Assurance and Compliance, RRS–10, 1120 Vermont Avenue, NW., Stop 25, Washington, DC 20590–0001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals that have allegedly failed to comply with certain railroad safety statutes and regulations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Facts and circumstances surrounding alleged rail safety violations by individuals; recommendations for enforcement actions; and enforcement cases.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Hazardous Materials Transportation Act (49 App. U.S.C. 1801 et seq.); Safety Appliance Acts, (45 U.S.C. 1–16); Locomotive Inspection Act, (45 U.S.C. 22–34); Accident Reports Act, (45 U.S.C. 38–43); Hours of Service Act, (45 U.S.C. 61–64a); Signal Inspection Act, (49 App. U.S.C. 26); Federal Railroad Safety Act of 1970 (45 U.S.C. 421 *et seq.*); 18 U.S.C. 1001; and Rail Safety Improvement Act of 1988 (Pub. L. 100–342).

PURPOSE(S):

To provide information concerning enforcement actions for violations of safety statutes and regulations to government agencies and the regulated industry in order to provide them with information necessary to carry out their responsibilities, and to the public in order to increase the deterrent effect of the actions and keep the public apprised of how the laws are being enforced. Determine whether cases should be forwarded to the Office of Chief Counsel for prosecution and to otherwise accomplish the mission of the Office of Safety.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Disclose pertinent information to any source from which additional information is requested in the course of conducting an investigation to the extent necessary to identify the purpose(s) of the request and identify the information requested. Provide notice of the investigation and its outcome to the individual's employing railroad or shipper, or other railroad related to the case through joint facilities or trackage rights in order to give those entities information they may need to assist in preventing a recurrence of noncompliance. To be reviewed by the Safety Division and to form the basis, or support for, civil and/or criminal enforcement actions against the individuals involved. The general routine uses in the prefatory statement apply to all of these files.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12): Disclosures may be made from this systems to A consumer reporting agencies (collecting on behalf of the United States Government) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders, file cabinets and an automated tracking system.

RETRIEVABILITY:

Records are retrievable by name of individual and/or his or her employer.

SAFEGUARDS:

Access limited to authorized officials. Manual records are maintained in file cabinets that are locked after working hours. Automated records are password protected.

RETENTION AND DISPOSAL:

Appropriate records retention schedules will be applied and disposal will be by shredding. Certain automated records will be retained indefinitely to provide complete compliance histories.

SYSTEM MANAGER(S) AND ADDRESS:

Enforcement Case System Manager, Department of Transportation, Federal Railroad Administration, Office of the Chief Counsel, Safety Law Division, RCC–10, 1120 Vermont Avenue, NW., Stop 10, Washington, DC 20590–0001.

NOTIFICATION PROCEDURE:

Inquiries should be directed to: Federal Railroad Administration, Assistant Chief Counsel, Safety Law Division, Office of the Chief Counsel, 1120 Vermont Avenue, NW., Stop 10, Washington, DC 20590–0001.

RECORD ACCESS PROCEDURES:

Contact (202) 493–6053 or write to the System Manager for information on procedures for gaining access to records.

CONTESTING RECORD PROCEDURES:

Same as "record access procedure."

RECORD SOURCE CATEGORIES:

Information is obtained directly from the individual or from other persons with personal knowledge of the facts and circumstances involved.

EXEMPTIONS:

None.

DOT/MARAD 1

SYSTEM NAME:

Attendance, Leave and Payroll Records of Employees and Certain Other Persons.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Maritime Administration, Division of Accounting Operations, MAR–330, 400 7th Street, SW., Room 7325, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Maritime Administration employees and certain other employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, date of birth, social security number and employee number, service computation date, grade, step, and salary; organization (code), retirement or FICA data, as applicable; federal, state, and local tax deductions, as appropriate; optional Government life insurance deduction(s), health insurance deduction and plan or code; cash award data; jury duty data; military leave data; pay differentials; union dues deductions; allotments, by type and amount; financial institution code and employee account number; leave status and leave data of all types (including annual, compensatory, jury duty, maternity, military retirement advisability, sick, transferred, absence without leave, and without pay); time and attendance records including number of regular, overtime, holiday, Sunday, and other hours worked; pay period number and ending date; cost of living allowances; mailing address; co-owner and/or beneficiary of bonds, marital status and number of dependents; and "Notification of Personnel Action." The individual records listed herein are included only as pertinent or applicable to the individual employee.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 5101–5115, 31 U.S.C. 3512.

PURPOSE(S):

Transmittal of data to United States Treasury and employee-designated financial institutions to effect issuance of paycheck to employees and distribution of pay according to employee directions for saving bonds, allotments, and other authorized purposes.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Reporting: Tax withholding to Internal Revenue Service and appropriate state and local taxing authorities; FICA deductions to the Social Security Administration; dues deduction to labor unions; withholding for health and life insurance to the insurance carriers and the United States Office of Personnel Management; charity contribution deductions to agents of charitable institutions; annual W–2 statements to taxing authorities and the individual; wage, employment, and separation information to state unemployment compensation agencies, to the Department of Labor to determine eligibility for unemployment compensation, and to housing authorities for low-cost housing applications; injury compensation claims to Office of Workers Compensation Program at the Department of Labor. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12): Disclosures may be made from this systems to 'consumer reporting agencies' (collecting on behalf of the United States Govt.) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manual and automated.

RETRIEVABILITY:

By name or social security number.

SAFEGUARDS:

Physical, technical, and administrative security is maintained, with all storage equipment and/or rooms locked when not in use. Admittance, when open, is restricted to authorized personnel only. All payroll personnel and computer operators and programmers are instructed and cautioned on the confidentiality of the records.

RETENTION AND DISPOSAL:

Retained on site until after GAO audit, then disposed of, or transferred to Federal Records Storage Center in accordance with the fiscal record programs approved by GAO, as appropriate, or General Record Schedules of GSA. Dispose of when 3 years old

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Division of Accounting Operations, MAR–330, Maritime Administration, 400 7th Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored in paper copy in file folders and on magnetic tape.

RETRIEVABILITY:

Files are maintained alphabetically by name of seaman.

SAFEGUARDS:

Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Paper records containing letters of commendation, name of seamen, address, name of vessel and mariner's document number are transferred to the Federal Records Center immediately, where they are retained for 75 years.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Maritime Labor and Training, MAR–250, Maritime Administration, 400 7th Street, SW, Washington, DC 20590.

NOTIFICATION PROCEDURE:

Division of General and International Law, Office of the Chief Counsel, MAR–221, Maritime Administration, 400 7th Street, SW, Washington, DC 20590.

RECORD ACCESS PROCEDURES:

Same as Notification procedure.

CONTESTING RECORD PROCEDURES:

Same as Notification procedure.

RECORD SOURCE CATEGORIES:

Subject individual. The individual's co-workers. Witnesses to incidents. Those authorized by the individual to furnish information.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/MARAD 21

SYSTEM NAME:

Seaman's Employment Analysis Records.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation Computer Center, SVC–172, 400 7th Street, SW, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Merchant seamen who sailed the previous calendar year.

CATEGORIES OF RECORDS IN THE SYSTEM:

Social security number; date of birth; records of United States Coast Guard issued documents; voyage employment information (*e.g.*, ship and date signed on); and maritime schools attended.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

46 app U.S.C. 1295g.

PURPOSE(S):

To ensure an adequate supply of American mariners.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on computer disks.

RETRIEVABILITY:

Filed by social security number.

SAFEGUARDS:

In addition to technical securities, the records are located in secured rooms or premises with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Refreshed and maintained only for current available calendar year.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Maritime Labor and Training, Maritime Administration, MAR–250, 400 7th Street, SW, Washington, DC 20590.

NOTIFICATION PROCEDURE:

RECORD ACCESS PROCEDURES:

Same as "Notification procedure."

CONTESTING RECORD PROCEDURES:

Same as "Notification Procedure."

RECORD SOURCE CATEGORIES:

Subject employee. Those authorized by the employee to furnish information. Past employers and references. The employee's supervisor.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Pursuant to 5 U.S.C. 552a(k)(5), this system is exempt from portions of the act.

DOT/MARAD 25

SYSTEM NAME:

USMMA Graduates.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Office of External Affairs, United States Merchant Marine Academy, Kings Point, NY 11024.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All graduates of USMMA, since 1942, and some parents of graduates.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name; address (home and business); vocation; class year; social security number; employee's name and address; years of maritime service, at sea and ashore; military service; maritime licenses; post-graduate education; honors and awards; and union affiliation. Graduate registration for job-placement also contains graduate's preferred salary and job location.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

46 app U.S.C. 1295g.

PURPOSE(S):

Make employment referrals, to compile statistical reports for Congress on the professional progress of the graduates, and to mail alumni publications, notices, and announcements. The users are the Director, Office of External Affairs and his immediate administrative staff, prospective employers, Congress and its Members, the United States Merchant Marine Academy Alumni Association, Inc., the United States Merchant Marine Academy Foundation, Inc. and the commercial contractor providing automated services for the United States Merchant Marine Academy Foundation, Inc.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The database is used for communication with alumni (*e.g.*, magazine, homecoming, etc), placement opportunities for alumni, fundraising records, and congressional districts. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders and basic information are on magnetic tape.

RETRIEVABILITY:

Alphabetically by name, and by social security number.

SAFEGUARDS:

Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises with access limited to those whose official duties require access. Records on tape also are subject to physical securities, including those maintained by contract.

RETENTION AND DISPOSAL:

The records are kept indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of External Affairs, United States Merchant Marine Academy, Kings Point, N.Y. 10024.

NOTIFICATION PROCEDURE:

DOT/NHTSA 413

SYSTEM NAME:

Odometer Fraud Data Base Files.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, National Highway Traffic Safety Adm., NHTSA, Safety Assurance (NSA–01), Odometer Fraud Staff (NSA–20), 400 Seventh Street, SW., Room 5321, Washington, DC 20590

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Suspects, defendants, witnesses, informants, automobile dealers, and victims of odometer fraud.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information on suspects, defendants, witnesses, informants, motor vehicles, automobile dealers, victims and other related data obtained through Federal grand jury subpoenas. Information may contain addresses, dates of birth, financial data, criminal history records, business records, and numerous other data obtained through Federal grand jury subpoenas.

PURPOSES(S):

To gather information to be used in allegations of odometer fraud.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Files are maintained for use in criminal investigations and to support criminal prosecutions by the United States Department of Justice. Data are released also to authorized State and Federal law enforcement agencies and personnel and to victims under 42 U.S.C. 10606(b)(7). See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folder storage and in an electronic database.

RETRIEVABILITY:

By individual name, dealer name, complainant name, case number and vehicle identification number.

SAFEGUARDS:

Locked files and restricted electronic access. Files are regularly used only by members of the Odometer Fraud Staff.

RETENTION AND DISPOSAL:

Retained for five years after case is closed, then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Department of Transportation, National Highway Traffic Safety Administration, Attn: Chief, Odometer Fraud Staff, 400 Seventh Street, SW., Room 6208, Washington, DC 20590.

None.

DOT/NHTSA 415

SYSTEM NAME:

Office of Defects Investigation/Defects Information System, ODI/DIMS.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, National Highway Traffic Safety Administration, NHTSA, Office of Defects Investigation, NSA–01, 400 7th Street, SW., Room 2403, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Vehicle owners.

CATEGORIES OF RECORDS IN THE SYSTEM:

Vehicle identification, vehicle problem.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

PURPOSE(S):

To gather information/evidence in the conduct of alleged defective vehicles or vehicle equipment.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Check complaints about vehicle defects to spot trends, resulting in investigations of the vehicle model. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Disc pack and paper file.

RETRIEVABILITY:

Identification number for each vehicle owner.

SAFEGUARDS:

Coded entry numbers.

RETENTION AND DISPOSAL:

Eight years or indefinite.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Special Projects Staff, Department of Transportation, National Highway Traffic Safety Administration, NHTSA, Office of Defects Investigation, NSA–10, 400 7th Street, SW., Room 5326, Washington, DC 20590.

NOTIFICATION PROCEDURE:

Department of Transportation, National Highway Traffic Safety Administration, NHTSA, Director, Office of Information Resource Management, Technical Information Services, NAD–40, 400 7th St., SW., Room 5111, Washington, DC 20590.

RECORD ACCESS PROCEDURES:

Same as "Notification procedure".

CONTESTING RECORD PROCEDURES:

Same as "Notification procedure".

RECORD SOURCE CATEGORIES:

General public, State highway offices, insurance companies, vehicle manufacturers.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/NHTSA 417

SYSTEM NAME:

National Driver Register, NDR.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, National Highway Traffic Safety Administration, NHTSA. Office of Research and Traffic Records, Driver and Traffic Records Division, NTS–24, 400 7th Street, SW., Room 6124, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who have had their driver's license denied, withdrawn, revoked or suspended for cause, or who have been convicted of certain services traffic violations as reported by State/Territorial driver licensing authorities.

CATEGORIES OF RECORDS IN THE SYSTEM:

NDR records include: The reporting jurisdiction, the subject's full name, other names used, date of birth, driver license number and/or social security number (if used by the reporting jurisdiction), sex, height, weight, eye color, the reason for withdrawal, the date of the withdrawal, and the date eligible for restoration of driving privilege or the date license was actually restored. Frequently the physical data are not provided by the reporting agency.

PURPOSE(S):

To provide information regarding individuals who have had their driver licenses revoked, suspended or otherwise denied for cause, or who have been convicted of certain traffic violations, etc.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Provide identification of drivers who have had their licenses withdrawn, suspended, revoked or otherwise denied for cause, or who have been convicted of certain traffic violations, in response to inquiries from State or Federal driver licensing officials. See Prefatory Statement of General routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The NDR master file is maintained on disk storage. Source data received as manual input (i.e. forms, letters) are converted to disk storage. Source data received on magnetic tape are converted into printed listings. All source data are batch filed.

RETRIEVABILITY:

The master file is indexed by surname and refined by program application using screening criteria such as given names, date of birth and physical characteristics.

SAFEGUARDS:

The data files are maintained in a building under surveillance by a 24-hour guard force. In addition, the spaces in which the files are maintained are equipped with lockable doors, which are locked when vacated. All NDR employees are briefed on NDR security requirements and their responsibilities.

RETENTION AND DISPOSAL:

Records of actions that have been canceled or rescinded are purged from the file upon receipt of notification from the reporting jurisdiction. Other records are retained for seven or five years depending on the reason for withdrawal of the individual's license. Withdrawals for drunk driving, hit and run, fatal accident, felony and misrepresentation are retained for seven years. Records of "habitual offenders" as stipulated by certain states are retained indefinitely, unless otherwise requested by the reporting state. All other master file records are retained for five years. Magnetic tape records are erased by degaussing, using 86db degaussing equipment, prior to disposing of the tapes. Shredding destroys paper source data reports of withdrawal.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, National Driver Register, National Highway Traffic Safety Administration, NTS–24, Department of Transportation, Room 6124, Washington, DC 20590.

NOTIFICATION PROCEDURE: SAME AS "SYSTEM MANAGER."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES;

Same as "System manager."

RECORD SOURCE CATEGORIES:

Driver licensing administrators of the States, and the District of Columbia, or the agencies within the jurisdictions responsible for such records.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/NHTSA 422

SYSTEM NAME:

Temporary Exemption Petitions.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, National Highway Traffic Safety Administration, NHTSA, Office of Chief Counsel, NCC–01, 400 7th Street, SW., Room 5219, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Petitioners (commercial entities) seeking exemption from Federal motor vehicle safety standards.

CATEGORIES OF RECORDS IN THE SYSTEM:

Income statement and balance sheets, production information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 30113.

PURPOSE(S):

Gather information regarding exemptions and possible penalties on Federal motor vehicle safety standards.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

For consultation by attorneys while file is active; copies in public docket. See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Office files.

RETRIEVABILITY:

Temporary exemptions; filed by corporation's names.

SAFEGUARDS:

Available only to the System manager and his secretary.

RETENTION AND DISPOSAL:

Permanent retention.

SYSTEM MANAGER(S) AND ADDRESS:

Senior Staff Attorney, Department of Transportation, National Highway Traffic Safety Administration, Office of Chief Counsel, NCC–01, 400 7th Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Department of Transportation, National Highway Traffic Safety Administration, Office of Chief Counsel, NCC–01, 400 7th Street, SW., Room 5219, Washington, DC 20590.

SYSTEM NAME:

Contract Grievance Records.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, National Highway Traffic Safety Administration, NHTSA, Office of Human Resources, NAD–20, 400 7th Street, SW., Room 5306, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees in the non-professional exclusive unit covered by the NHTSA/AFGE contract of March 5, 1974.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information or documents relating to a decision by the Administration or an arbitrator affecting an individual.

PURPOSE(S):

To substantiate or deny allegations relating to employee grievances.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To respond to the Federal Labor Relation Authority in connection with an Unfair Labor Practice Procedure or to respond to the appeal of an arbitration award. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file folders and index cards.

RETRIEVABILITY:

Retrieved by names of grievant(s).

SAFEGUARDS:

Access limited to those with official "need to know." Personnel screening is employed to prevent unauthorized disclosure.

RETENTION AND DISPOSAL:

The records are maintained up to 3 years and then retired to the Washington National Records Center.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Human Resources, Department of Transportation, National Highway Traffic Safety Administration, NAD–20, 400 7th Street, SW., Room 5306, Washington, DC 20590.

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Individual to who record pertains and/or representative; agency officials; employees; witnesses; official documents; etc.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/NHTSA 463

SYSTEM NAME:

Motor Vehicle Importation Information, MVII.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, National Highway Traffic Safety Administration, Office of Vehicle Safety Compliance, NSA–32, 400 7th Street, SW., Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Importers or declarants of imported motor vehicles and motor vehicles equipment, both private and commercial.

CATEGORIES OF RECORDS IN THE SYSTEM:

Forms HS–7, declaration on motor vehicles and motor vehicle equipment subject to Federal Motor Vehicle Safety Standards. Customs reports of declarations and inspections. Records relating to refusal of entry or penalties, and in some instances law enforcement and court records in alleged fraud cases.

PURPOSE(S):

Gather information on importation compliance of motor vehicle and motor vehicle equipment.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records may be released to the Environmental Protection Agency for compliance with the Clean Air Act and to the United States Customs Service for import requirements. Released to State divisions of motor vehicles for state purposes and to law enforcement agencies in alleged fraud cases. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper forms and computer disc tapes.

RETRIEVABILITY:

By name of importer or declarant, addressee(s) vehicle or vehicle identification, customs district and entry number, and port of entry.

SAFEGUARDS:

Disc or tape may be accessed only by discrete identification code known to the System Manager and staff. Hard paper copies are maintained in locked cabinets.

RETENTION AND DISPOSAL:

Hard paper copy is retained one year if no official claims are lodged against importer or declarant. Disc and tapes retained for period of United States Customs Service statute of limitations before erasure.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Verification Division, Office of Vehicle Safety Compliance, National Highway Traffic Safety Administration, NSA–32, Department of Transportation, 400 7th Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Forms executed by importers or declarants for the NHTSA, United States Customs Service, and the Environmental Protection Agency.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/OST 003

SYSTEM NAME:

Allegations of Infringement of United States Patents.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Office of the Secretary of Transportation, Office of the General Counsel, 400 7th Street, SW., Room 10102, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who believe that an agency of the Department of Transportation is infringing a United States patent owned by the individual. Categories of records in the system: Copies of correspondence alleging that agencies of the Department of Transportation have infringed, or are infringing, United States patents owned by the originators of the correspondence. Copies of replies by the Department Patent Counsel to the originator of the allegation. Copies of correspondence forwarding the allegation to the particular Department agency accused for their comment; their replies to Patent Counsel. Copies of correspondence between the Department of Transportation and the Department of Justice concerning the allegations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Copies of correspondence alleging that agencies of the Department of Transportation have infringed, or are infringing, United States patents owned by the originators of the correspondence. Copies of replies by the Department Patent Counsel to the originator of the allegation. Copies of correspondence forwarding the allegation to the particular Department agency accused for their comment; their replies to Patent Counsel. Copies of correspondence between the Department of Transportation and the Department of Justice concerning the allegations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

28 U.S.C. 1498.

PURPOSE(S):

Document allegations that agencies of the Department of Transportation have infringed, or are infringing, United States patents.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used as a record of allegations and Patent Counsel's actions thereon. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders stored in file cabinets.

RETRIEVABILITY:

Indexed individually by name in alphabetical sequence.

SAFEGUARDS:

Records are disclosed only to individuals with established legal interest or legal "need to know."

RETENTION AND DISPOSAL:

Transfer to Federal Records Center two years after close of file; destroy 25 years after close of file.

SYSTEM MANAGER(S) AND ADDRESS:

Mailing address: Patent Counsel, C–15, United States Department of Transportation, and Washington, DC 20590. Office Location: 400 7th Street, SW., Room 10102.

DOT/OST 004

SYSTEM NAME:

Board for Correction of Military Records, BCMR.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Office of the Secretary, OST, Office of the General Counsel, 400 7th Street, SW., Room 4100, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Military personnel requesting the Board for Correction of Military Records to correct their military records.

CATEGORIES OF RECORDS IN THE SYSTEM:

Copies of actions of the General Counsel acting under delegated

authority approving or disapproving BCMR cases.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 1552.

PURPOSE(S):

Used as a record of the General Counsel's action in individual BCMR cases.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders stored in file cabinets (Conserv-a-File).

RETRIEVABILITY:

Indexed individually by name in alphabetical sequence.

SAFEGUARDS:

Files are kept in the office of the Assistant General Counsel. Requests are referred to the Executive Secretary, BCMR.

RETENTION AND DISPOSAL:

Retained indefinitely for precedential purposes.

SYSTEM MANAGER(S) AND ADDRESS:

Mailing Address: Assistant General Counsel for Environmental, Civil Rights and General Law, C–10, United States Department of Transportation, Washington, DC 20590. Office Location: 400 7th Street, SW., Room 10102.

NOTIFICATION PROCEDURE:

Contact "System manager."

RECORD ACCESS PROCEDURES:

Contact "System manager."

CONTESTING RECORD PROCEDURES:

Same as "Record access procedure."

RECORD SOURCE CATEGORIES:

Official agency records; hearings, documentary material from outside the agency.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/OST 012

SYSTEM NAME:

Files Relating to Personnel Hearings.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Office of the Secretary, OST, Office of the General Counsel, 400 7th Street, SW., Room 10102, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Certain employees of the Office of the Secretary who have availed themselves of the opportunity for a hearing in certain personnel matters.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Certain employees of the Office of the Secretary who have availed themselves of the opportunity for a hearing in certain personnel matters.

CATEGORIES OF RECORDS IN THE SYSTEM:

Notices of proposed adverse actions, answers of employees, notices of decisions, and supporting material.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 1215, 1216, 7503(c), 7513(e), 7521, and 7543(e).

PURPOSE(S):

A record of the legal services performed and reference material for future cases.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by agency management in the preparation and conduct of administrative hearings. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders stored in file cabinets (Conserv-a-File).

RETRIEVABILITY:

Indexed individually by name in alphabetical sequence.

SAFEGUARDS:

Files are kept in the office of the Assistant General Counsel.

RETENTION AND DISPOSAL:

Retire in 3 years; destroy in 6 years.

SYSTEM MANAGER(S) AND ADDRESS:

Mailing Address: Assistant General Counsel for Environmental, Civil Rights and General Law, C–10, United States Department of Transportation, Washington, DC 20590. Office Location: 400 7th Street, SW., Room 10102.

NOTIFICATION PROCEDURE:

Apply to System manager.

Apply to System manager.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedure."

RECORD SOURCE CATEGORIES:

Official agency records; hearings; documentary material from outside the agency.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/OST 016

SYSTEM NAME:

General Investigations Record System

SECURITY CLASSIFICATION:

Unclassified (law enforcement sensitive).

SYSTEM LOCATION:

TASC Security Operations, SVC–150, Department of Transportation, DOT, 400 7th Street, SW. Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

DOT employees and contractors.

CATEGORIES OF RECORDS IN THE SYSTEM:

Incident reports covering occurrences relating to the security of DOT personnel and headquarters buildings.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 49 U.S.C. 322.

PURPOSE(S):

To maintain computerized records covering the security of DOT personnel and headquarters buildings. To develop proper responses to patterns of incidents.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses; 5 and 9 do not apply.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12): Disclosures may be made from this systems to "consumer reporting agencies" (collecting on behalf of the United States Govt.) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored in file folders. Paper records in case folders in manual filing system.

RETRIEVABILITY:

By name or incident title.

SAFEGUARDS:

Files are maintained in a locked room with appropriate access controls. Access to the files is restricted to authorized personnel on a "need-to-know" basis. With appropriate access controls.

RETENTION AND DISPOSAL:

Records older than 5 years are deleted.

SYSTEM MANAGER(S) AND ADDRESS:

Principal, TASC Security Operations, SVC–150, 400 7th Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "Record access procedure."

RECORD SOURCE CATEGORIES:

These records contain information obtained from interviews; review of records and other authorized techniques.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Investigative data compiled for law enforcement purposes may be exempt from the access provisions pursuant to 5 U.S.C. 552a (j)(2), (k)(1) or (2).

DOT/OST 019

SYSTEM NAME:

Individual Personal Interests in Intellectual Property.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Office of the Secretary, OST, Office of the General Counsel, 400 7th Street, SW., Room 10102, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Inventors employed by or having contractual relationships with the Department of Transportation and other Government agencies.

CATEGORIES OF RECORDS IN THE SYSTEM:

Invention disclosures, Government Patents Branch cases, patent applications, issued patents, and license agreement files.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 322.

PURPOSE(S):

Used by Patent Counsel and staff as a record of determination of rights in inventions, determination of novelty and patent ability, determination of patent coverage, and allocation of rights in issued patents.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders stored in file cabinets.

RETRIEVABILITY:

Indexed individually by name in alphabetical sequence.

SAFEGUARDS:

Records are disclosed only to individuals who have legal interest in the records or legal "need to know."

RETENTION AND DISPOSAL:

Transfer to Federal Records Center two years after close of file; destroy 25 years after close of file.

SYSTEM MANAGER(S) AND ADDRESS:

Mailing Address: Patent Counsel, C–15, United States Department of Transportation, and Washington, DC 20590. Office Location: 400 7th Street, SW., Room 10102.

NOTIFICATION PROCEDURE:

RECORD ACCESS PROCEDURES:

Apply to "System manager."

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures"

RECORD SOURCE CATEGORIES:

Individual inventors, technical evaluators, and United States Patent and Trademark Office.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/OST 035

SYSTEM NAME:

Personnel Security Record System.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, Transportation Administrative Service Center, Security Operations, SVC–150, 400 7th Street, SW., Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

DOT applicants, employees, former employees, contractors, and detailees to DOT from other Federal agencies.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of personnel security processing, personal data on investigative and employment forms completed by the individual, reports of investigations, records of security and suitability determinations, records of access authorizations granted, documentation of security briefings/debriefings received, record of security violations by the individual.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 49 U.S.C. 322.

PURPOSE(S):

To make suitability determinations for employment or retention in government service, assignment to sensitive duty positions and access to classified information.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by Departmental personnel security representatives, including contractor personnel, for making security determinations and granting access authorizations, by Departmental personnel management officials for making suitability determinations, by representatives of other Federal agencies with which the individual is seeking employment, and by Federal agencies conducting official inquiries to the extent that the information is relevant and necessary to the requesting agency's inquiry, and by Departmental officials, to the extent necessary, to identify the individual to sources from whom information is requested for any of the foregoing purposes to inform the source of the nature and purpose of the request and to indicate the type of information requested. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12):

Disclosures may be made from this systems to "consumer reporting agencies" (collecting on behalf of the United States Govt.) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Completed forms and typed pages in individual folders in a manual filing system, and on a manual system control cards.

RETRIEVABILITY:

By name.

SAFEGUARDS:

Stored in locked room with proprietary lock or in approved security safe. Access limited to authorized staff members.

RETENTION AND DISPOSAL:

Retained in accordance with General Records Schedule 18. Authorized destruction done by secure means used for classified materials.

SYSTEM MANAGER(S) AND ADDRESS:

Principal, TASC Security Operations, SVC–150, Department of Transportation, 400 7th Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Same as System manager.

RECORD ACCESS PROCEDURES:

Same as System manager. However, information compiled solely for the purpose of determining suitability, eligibility, or qualification for Federal civilian employment or access to classified information may be exempted from the access provisions pursuant to 5 U.S.C. 552a(k)(5).

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Investigative sources contacted in personnel security investigations, National Agency Check and Written Inquiry and similar investigations; investigative reports reviewed at other Government agencies; personal history statements, employment applications and other data provided by the individual and/or other agencies.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Information compiled solely for the purpose of determining suitability, eligibility, or qualification for federal civilian employment or access to classified information may be exempted from the access provisions pursuant to 5 U.S.C. 552a(k)(1) and/or (5).

DOT/OST 037

SYSTEM NAME:

Records relating to Applications for Senate Confirmation of Proposed Executive Appointments to the Department of Transportation.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Office of the Secretary, OST, Office of the Assistant General Counsel for Environmental, Civil Rights and General Law, 400 7th Street, SW., Room 10102, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals nominated for top executive positions of the Department of Transportation.

CATEGORIES OF RECORDS IN THE SYSTEM:

Financial data and biographical data.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. App. 101, Executive Order 12731, and regulations of the Office of Government Ethics.

PURPOSE(S):

Data submitted to the General Counsel as reviewing official by subject individual for use by the Senate Commerce Committee to determine if there would be a conflict of interest, or the appearance of a conflict of interest, in subject's appointment to the Department of Transportation.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Legal sized documents located in locked safe.

RETRIEVABILITY:

Individual names filed alphabetically.

SAFEGUARDS:

Physical security consists of filing records in safe; data released to Senate Commerce Committee and authorized officials only of the Department.

RETENTION AND DISPOSAL:

Records are retained for 6 years then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Mailing Address: Deputy General Counsel, C–2, United States Department of Transportation, and Washington, DC 20590. Office Location: 400 7th Street, SW., Room 10428.

NOTIFICATION PROCEDURE:

Inquiries may be addressed to the Deputy General Counsel at the address above, either in person or in writing. If written the individual must provide a notarized signature.

RECORD ACCESS PROCEDURES:

Access to records requires the individual to contact in person or write the Deputy General Counsel.

CONTESTING RECORD PROCEDURES:

Contest of a record is also through the Deputy General Counsel.

RECORD SOURCE CATEGORIES:

Subject individual provides Documents.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/OST 041

SYSTEM NAME:

Correspondence Control Mail, CCM.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, Office of the Secretary, OST, Executive Secretariat, 400 7th Street, SW., Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who write, or are referred in writing by a second party, to the Secretary, Deputy Secretary, Deputy Under Secretary, and their immediate offices. Individuals who are the subject of an action requiring approval or action by one of the forenamed, such as appeal actions, training, awards, foreign travel, promotions, selections, grievances, and discipline.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence submitted by, or on behalf of, an individual, including resumes, letters of reference, etc. Responses to such correspondence. Staff recommendations on actions requiring approval or action by one of the forenamed.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 CFR 1.23(j).

PURPOSE(S):

The purpose of the system is to provide history of correspondence addressed to and signed by the Secretary and Deputy Secretary of Transportation.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Referral to the appropriate action office within or outside the Department for preparation of a response. Referral to the appropriate agency for actions involving matters of law or regulation beyond the responsibility of the Department, such as the Civil Service Commission for employee appeals, the Department of Justice in matters of law enforcement, etc. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Computer disc and—selectively—on microfilm for all records since 1/1/74. In hard copy for all records prior to 1/1/74.

RETRIEVABILITY:

Indexed by name of correspondent, referring individual, and subject category (*e.g.*, "employment" for applicants) from 1/1/74 on. Indexed by name of correspondent prior to 1/1/74.

SAFEGUARDS:

Computer microfilm records, and remote reader terminals, which permit random access to the system records, are locked after office hours. During office hours computer is accessible only through terminals operated by, and under the surveillance of, authorized employees of the Executive Secretary.

RETENTION AND DISPOSAL:

Hard-copy records for 1967–1969 and duplicate microfilms for 1974–1989 are in the custody of National Archives and Records Administration, NARA. Microfilm Records from 1990 and following are retained in the Departmental headquarters building. Records are retired to NARA on a space-needed basis.

SYSTEM MANAGER(S) AND ADDRESS:

Department of Transportation, DOT, Office of the Secretary, OST, Executive Secretariat, 400 7th Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Inquiries should be directed to the System Manager. Helpful information, in addition to the individual's name, includes date(s), subject matter, and addressee(s) of the incoming correspondence, and date(s) and author(s) of the response(s).

RECORD ACCESS PROCEDURES:

Contact System Manager for information on procedures for gaining access to records.

CONTESTING RECORD PROCEDURES:

Contact System Manager for information on procedures for contesting records. Appeals should be directed to the Secretary of Transportation, if request for Modification or deletion is denied.

RECORD SOURCE CATEGORIES:

Correspondence from individual, his representative or sponsor. Responses to incoming correspondence. Related material provided for background as appropriate.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/OST 045

SYSTEM NAME:

Unsolicited Contract or Research and Development Proposals Embodying Claims of Proprietary Rights.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Office of the Secretary, OST, Office of the General Counsel, 400 7th Street, SW., Room 10102, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who believe they have original and innovative ideas in the field of transportation.

CATEGORIES OF RECORDS IN THE SYSTEM:

Copies of descriptions of proposed innovations or inventions and methods of carrying out the proposal. Evaluations by Patent Counsel of the adequacy and propriety of restrictive markings on the proposals and correspondence of the Patent Counsel pertaining thereto.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 322.

PURPOSE(S):

Used as a record of Patent Counsel's action in individual unsolicited proposal cases.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders stored in file cabinets (Conserv-a-File).

RETRIEVABILITY:

Indexed individually by name and subject in alphabetical sequence.

SAFEGUARDS:

Records are disclosed only in accordance with the terms of restrictive markings agreed upon between submitter and DOT.

RETENTION AND DISPOSAL:

Transfer to storage when three years old; Destroy after six years.

SYSTEM MANAGER(S) AND ADDRESS:

Mailing Address: Patent Counsel, C–15, United States Department of Transportation, Washington, DC 20590. Office Location: 400 7th Street, SW., Room 10102.

NOTIFICATION PROCEDURE:

Apply to "System manager."

RECORD ACCESS PROCEDURES:

Apply to "System manager."

CONTESTING RECORD PROCEDURES:

Same as "Record access procedure."

RECORD SOURCE CATEGORIES:

Forwarded by individual or by the DOT office to whom unsolicited proposal was addressed.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/OST 046

SYSTEM NAME:

Visit Control Records System.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, Transportation Administrative Service Center (TASC), Security Operations, SVC–150, 400 7th Street, SW., Room 10401, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

DOT employees, Industrial Security contractor employees, non-employee visitors to DOT facilities during security hours.

CATEGORIES OF RECORDS IN THE SYSTEM:

Record of clearance certification (level, date granted and basis) on employees to visit facilities or attend meetings involving classified

information. Record of security clearance data for visitors to DOT facility from other agencies and from contractors. Record of individuals other than employees who are authorized access to DOT facilities during security hours.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 49 U.S.C. 322.

PURPOSE(S):

Maintain a record of clearances for individuals attending classified meetings.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Confirming to the proper authorities the security clearance for individuals requiring access to classified information; identifying individuals authorized to be present in DOT facilities. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Stored in an alarm-secured area in a locked Lek-Triever file.

RETRIEVABILITY:

By name.

SAFEGUARDS:

Stored in locked room with proprietary lock, available only to authorized staff members.

RETENTION AND DISPOSAL:

Maintained until expiration of visit, then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Principal, TASC Security Operations, SVC–150, Department of Transportation, 400 7th Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

Security clearance information furnished by personnel security officers. Visit data furnished by individual.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/OST 056

SYSTEM NAME:

Garnishment Files.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Office of the Secretary, OST, Office of the General Counsel, Office of the Assistant General Counsel for Environmental, Civil Rights and General Law, 400 7th Street, SW., Room 10102, Washington, DC 20590 and Office of the Chief Counsel of employing DOT agency.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees of the, DOT, including members of the Coast Guard, whose pay is sought to be attached under section 459 of the Social Security Act, 42 U.S.C. 659, for alimony or child support, or under 5 U.S.C. 5520a, for commercial debt.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence and court orders, and copies thereof, concerning attachment of employees' pay.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 659; 5 U.S.C. 5520a.

PURPOSE(S):

Used as record of garnishments and Garnishment Attorney's action thereon.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

DOT/OST 059

SYSTEM NAME:

Files of the Board for Correction of Military Records, BCMR, for the Coast Guard.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Office of the Secretary, OST, Office of the General Counsel, Board for Correction of Military Records, 400 7th Street, SW., Room 4100, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have filed applications for relief before the Board.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications and related documents, Board decisions, and official military records of applicants.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 1552.

PURPOSE:

Used by the Chairman, the Board, the Executive Secretary, and Staff in determining whether to grant relief to applicants.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by the Coast Guard in presenting its views to the Board concerning pending cases. Also used by applicant and his representative. Used by the General Counsel and his/her staff in determining whether to approve decisions of the Board. See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders stored in file cabinets.

RETRIEVABILITY:

Indexed individually by name in one of two alphabetical sequences representing pending and closed cases. Also indexed by docket number. Pending cases filed by docket number; closed cases filed alphabetically.

SAFEGUARDS:

Records are disclosed only to the applicant, his representative, interested members of Congress, and the Coast Guard.

RETENTION AND DISPOSAL:

Transfer of official military record of individual separated from service to Federal Records Center when case closed; transfer of official military record of Active or Reserve member to Coast Guard Headquarters when case closed; retention of application file in all cases.

SYSTEM MANAGER(S) AND ADDRESS:

Mailing Address: Executive Secretary, Board for the Correction of Military Records, C–60, United States Department of Transportation, Washington, DC 20590. Office Location: 400 7th Street, SW., Room 4100.

NOTIFICATION PROCEDURE:

Apply to "System manager."

RECORD ACCESS PROCEDURES:

Apply to "System manager."

CONTESTING RECORD PROCEDURES:

Same as "Record access procedure."

RECORD SOURCE CATEGORIES:

United States Coast Guard, Veterans Administration, individual applicants.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/OST 100

SYSTEM NAME:

Investigative Record System.

SECURITY CLASSIFICATION:

Unclassified—sensitive.

SYSTEM LOCATION:

Office of Inspector General, DOT/OST, 400 Seventh Street, SW., Washington, DC 20590. OIG Regional Offices in Baltimore, MD; Atlanta, GA; Chicago, IL; Fort Worth, TX; San Francisco, CA; and New York, NY; and Federal Records Center (FRC), Washington, DC.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Present and former DOT employees, DOT contractors and employees as well as grantees, sub-grantees, contractors, subcontractors and their employees and recipients of DOT monies, and other individuals or incidents subject to investigation within the purview of the Inspector General Act.

CATEGORIES OF RECORDS IN THE SYSTEM:

Results of investigations and inquiries conducted by Inspector General, OST; reports of investigations conducted by other departmental, Federal, state, and local investigative agencies which relate to the mission and function of the Inspector General; reports and indices relating to "hotline" complaints; and investigative case index card files.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Inspector General Act of 1978, 5 U.S.C. App.

PURPOSE(S):

Document the administration of investigations and inquiries conducted under of the Inspector General Act of 1978.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in the Investigative Records System is collected and maintained in the administration of the Inspector General Act of 1978 (Pub. L. 95–452) to investigate, prevent, and detect fraud and abuse in departmental programs and operations. Material gathered is used for prosecutive, civil, or administrative actions. These records may be disseminated, depending on jurisdiction to: DOT Officials in the administration of their responsibilities; other Federal, State, local, or foreign agencies or administrations, having interest or jurisdiction in the matter. See also Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

STORAGE:

Paper records in case folders in manual filing system and on index cards.

RETRIEVABILITY:

By name or incident title.

SAFEGUARDS:

Investigative files and case index files are maintained in several spaces with appropriate access controls. Access to investigative files is restricted to authorized personnel on a "need to know" basis.

RETENTION AND DISPOSAL:

Investigative material is destroyed by secure means used for classified materials. Central OIG investigative files are maintained in OIG Headquarters, from where the files are transferred to the FRC Washington, DC, at prescribed intervals and destroyed in accordance with the following schedule:

Lead Cases. Case files and temporary contents are destroyed 180 days after transmittal of the investigative report and permanent case documents to the case control office.

Official Case Folders. Official Investigative Case Folders are maintained for a period of 2 years in OIG Headquarters upon completion of legal or administrative action and transferred to the FRC Washington, DC, where they are held and destroyed 10 years from the date of receipt by FRC Washington, DC.

Investigative and Hotline Indices. Destroyed 20 years after date of creation.

OIG Hotline Files. Transferred to FRC Washington, DC, 2 years after completion of legal or administrative action. Destroyed 10 years from date of receipt by FRC Washington, DC.

General Investigative and Hotline Files. Retained in OIG Headquarters and Field Offices. Destroyed when 5 years old.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Inspector General for Investigations, JI–1, Office of Inspector General, Department of Transportation, 400 Seventh Street, SW., Room 9210, Washington, DC 20590.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

These records contain information obtained from interviews, review of records and other authorized investigative techniques.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Investigative data compiled for law enforcement purposes may be exempt from the access provisions pursuant to 5 U.S.C. 552a (j)(2), (k)(1), or (k)(2).

DOT/OST 101

SYSTEM NAME:

Transportation Inspector General Reporting System, TIGR.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Office of Inspector General, DOT/OST, 400 Seventh Street, SW., Washington, DC 20590

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All active employees of the OIG, with history data on previous employees maintained for 2 years. Present and former DOT employees, DOT contractors and employees as well as grantees, subgrantees, contractors, subcontractors and their employees and recipients of DOT monies, and other individuals or incidents subject to investigation within the purview of the Inspector General Act.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual's current position and employment status, assignments, travel, experience, training, with the following personal data: Name, social security account number, date of birth, service computation date, career status, address, assigned station, job series, education, grade, minority status, and personnel transaction date. Investigative information consists of investigation targets' name and social security account number, organization name, type of investigation, offense data, source of referral data and action taken.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Inspector General Act of 1978, 5 U.S.C. App.

PURPOSE(S):

The purpose of the system is to provide individuals with a need to know with specific information related to (1) time and attendance of employees; (2) workload status reports; (3) security clearance alerts; (4) travel information, etc.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Security clearance notification alerts may be provided to an examined activity in advance of visits by OIG personnel if information to be examined requires a secret clearance or above; (2) time and attendance reports will be used to track temporary duty travel frequency and duration, to categorize indirect time for periodic reports, and to accrue staff hour data on assigned projects; (3) planned annual leave reporting will be used by various managers for workload planning and travel scheduling; (4) assignments information and workload status information will be used by managers to control audits and investigations, and to maximize effectiveness of staff resources; (5) miscellaneous personnel information will be used by staff managers to determine training needs, promotional eligibility, education and background, and professional organization participation; (6) information will be used to produce resource management reports; (7) travel information will be used by managers to control temporary duty travel, travel costs and issuances of travel orders; and (8) investigative information is collected and maintained in the administration of the Inspector General Act of 1978 (Pub. L. 95–452) to investigate, prevent, and detect fraud and abuse in departmental programs and operations. Material gathered is used for investigative case management. See also Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Active reports on magnetic disk, with backup active records and inactive records maintained on magnetic tape.

RETRIEVABILITY:

Records will be retrievable through employee social security number, by name, or incident title, with selected records having certain secondary keys consisting of certain other data elements, listed in the "Categories of Records in the System."

SAFEGUARDS:

(1) Records will be maintained in a private library not accessible by any unauthorized user; (2) authorized user identification codes will be tied to multiple password system to afford additional protection; (3) any attempt to bypass the password protection system will result in "Log-Off" from the system or denial of access to data if access to system is authorized; (4) physical access

to system documentation, hardcopy printouts, personal data files, and terminals will be restricted to authorized personnel by maintaining a secure environment in the headquarters office; (5) access to data will be restricted to those who require it in the performance of their official duties and the individual who is the subject of the record (or authorized representative); and (6) tape files will be maintained in an environmentally secure vault area when not in use.

RETENTION AND DISPOSAL:

Records will be maintained for 2 years after they become inactive. All inactive records will be maintained on magnetic tape within the computer center and will be afforded the same safeguards as active records. Machine-resident records will be destroyed at the end of the 2-year period. Hard copy records will be retained until the records are replaced or become obsolete.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Information Resource Management, JM–10, Office of Inspector General, Department of Transportation, 400 7th Street, SW., Room 7117, Washington, DC 20590.

NOTIFICATION PROCEDURE:

Same as "System manager."

RECORD ACCESS PROCEDURES:

Same as "System manager."

CONTESTING RECORD PROCEDURES:

Same as "System manager."

RECORD SOURCE CATEGORIES:

(1) Official personnel folder; (2) other personnel documents; (3) activity supervisors; (4) individual applications and forms; and (5) information obtained from interviews, review of records and other authorized investigative techniques.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Investigative data compiled for law enforcement purposes may be exempt from the access provisions pursuant to 5 U.S.C. 552a(j)(2), (k)(l), or (k)(2).

DOT/RSPA 02

SYSTEM NAME:

National Defense Executive Reserve, NDER, File.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Some records are held only in the Office of Emergency Transportation while others are held at various locations in the custody of officials in the several regions, as indicated in the paragraph labeled "Categories of records" below. Holdings of the Regional Directors-designate and Deputy Directors-designate are partial duplications of the Regional Emergency Transportation Coordinator, RETCO, files and may be accessed through the applicable RETCO. The RETCO and the Regional Emergency Transportation Representative, RETREP, for each region may be contacted directly at the addresses shown below. The Regional Director-designate and Deputy Director-designate for each region may be contacted by addressing mail in care of the RETCO for that region at the address shown in the following list: Regions 1 and 2, First Coast Guard District, 408 Atlantic Avenue, Boston, MA 02110. Region 3, Federal Highway Administration, 10 South Harvard Street, Suite 4000, Baltimore, MD 21201. Region 4, Federal Aviation Administration Southern Region, PO Box 20636, Atlanta, GA 30320. Region 5, Federal Highway Administration, 19900 Governors Drive, Suite 301 Olympia fields, IL 60461 Region 6, Federal Aviation Administration Southwest Region, 2601 Meacham Blvd., Ft. Worth, TX 76137–4298. Region 7, Federal Highway Administration, P.O. Box 419715, Kansas City, MO 64141. Region 8, Federal Highway Administration, 555 Zang Street, Room 400, Denver, CO 80225. Region 9, Pacific Area United States Coast Guard, Coast Guard Island, Alameda, CA 94501. Region 10, 13th Coast Guard District, Federal Bldg., Rm. 3590, 915 Second Ave., Seattle, WA 98174Alaska Region, Federal Aviation Administration Alaskan Region, 222 W 7th Ave., #14, Anchorage, AK 99513. Emergency Facilities Liaison Officer, FAA Records Center, West King Street and South Maple Avenue, Martinsburg, WV 25401.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Upper, middle, and lower management members of the transportation industry, university professors, lawyers, labor leaders, and businessmen who are candidates for membership in NDER, active members of NDER, or who are former members whose membership has been terminated by death, resignation or involuntary release, and emeritus members.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personnel and security forms completed by individuals consisting of applications, statements of understanding by employers, security and identification data from individuals, certificates of appointment and reappointment and a personal data sheet for each Reservist which presents a summary of pertinent data including a photograph.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Defense Production Act of 1950 and Executive Order 11179.

PURPOSE(S):

This is a government-wide program to recruit and train a cadre of volunteer executives from the private sector to serve in key Federal management positions during periods of national defense emergencies.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Internal personnel management of the NDER for the Department of Transportation, which includes staff action and exchange of data with the Office of the Director, Federal Emergency Management Agency, who is responsible for the entire National Defense Executive Reserve Program. These records are available to the Secretary, any Secretarial Officer, Head of an Operating Administration, or their designated subordinates who require access in the pursuit of their duties, to the Director and staff of OET, and the RETCOs and their staff.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Individual records are maintained in a manual system in a locked file room consisting of a filing jacket with the individual's name tabbed and containing all papers pertaining to him or her, except the following, which are maintained as stated. Mailing lists are maintained using a personal computer.

RETRIEVABILITY:

Indexed alphabetically by name. Retrieved manually.

SAFEGUARDS:

Maintained in metal file containers or other standard office equipment.

RETENTION AND DISPOSAL:

Held for five years from date of separation and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Research and Special Programs Administration (DPB–30), Director of Emergency Transportation, Department of Transportation (Room 8330), Washington, DC 20590.

NOTIFICATION PROCEDURE:

Inquiries may be addressed to any of the offices and officials listed under "System locations". Individuals requesting such information must sign the request personally and include in the text of the request suitable identification. Alternatively, personal visits to the above locations with presentation of suitable identification will enable individual to learn of and have access to his or her record.

RECORD ACCESS PROCEDURES:

Individual may secure or obtain information on procedures for gaining access to records by (1) referral to the information sheet issued to him or (2) addressing a written query to the offices cited under 'System location' above (except the Emergency Facilities Liaison Officer, FAA Records Center, West King Street and South Maple Avenue, Martinsburg, WV 25401, which maintains duplicate files in storage only) or (3) presenting himself or herself in person to those offices.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

Personal data submitted by the individual; data from his or her employer; recommendations for the system: Investigative data compiled for law enforcement purposes may be exempt from access pursuant to 5 U.S.C. 552a (j)(2), (k)(1), or (k)(2). From colleagues; mailing data from existing distribution system.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/RSPA 04

SYSTEM NAME:

Transportation Research Activities Information Service, TRAIS.

SECURITY CLASSIFICATION:

Unclassified, Sensitive

SYSTEM LOCATION:

Department of Transportation, DOT, Research & Special Programs Administration, RSPA, Transportation Systems Center, TSC, Kendall Square, Cambridge, MA 02142.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Program/Project Managers and research investigators.

CATEGORIES OF RECORDS IN THE SYSTEM:

Notification of Technical Research and Development.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 112(d)(3).

PURPOSE(S):

To maintain information concerning on-going and completed research and development accomplishments.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information on on-going and completed research and development accomplishments. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Computer disc storage and magnetic tape.

RETRIEVABILITY:

Retrievable by keywords and unique accession number assigned by Data Base Administrator; batch process or on-line interaction.

SAFEGUARDS:

Physical security—user identification and passwords.

RETENTION AND DISPOSAL:

Up to three-year retention and then tape is reused which destroys previous data.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Transportation Research Activity Information Services Branch, TST–25.1, Department of Transportation, Office of the Secretary, 400 7th Street, SW., Washington, DC 20590.

None.

DOT/RSPA 06

SYSTEM NAME:

Emergency Alerting Schedules.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

These records are located in the national headquarters of the Offices of the Secretary; the heads of operating administrations, regional offices of the Regional Emergency Transportation Coordinators, the Regional Administrators, Directors and Commanders of the operating administrations and in headquarters of operating administrations divisions, district commands, and other field offices of the Department.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Professional and clerical employees and military members of the United States Government, Directors—designate and Deputy Directors—designate and members of the National Defense Executive Reserve who have been given emergency billet assignments within the Department of Transportation Emergency Structure.

CATEGORIES OF RECORDS IN THE SYSTEM:

The Alerting Charts and Schedules show names and office and home telephone numbers of individuals in calling sequence and are listed by national headquarters and by regional offices; also contain similar listings designed for management convenience within DOT and the operating elements.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

DOT Order 1910.2C, dated May 1980.

PURPOSE(S):

A team of individuals who can carry out the essential functions of the Department of Transportation if the need arises.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

For identification of individuals required to ensure viability of DOT in the immediate preattack—transattack—postattack period of a national defense emergency. Available to the Secretarial Officers, heads of operating administrations or designated subordinates (national and regional) and to individuals listed. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Publication is maintained in stock, in listings in each office of record, and in standard filing equipment in locked file rooms.

RETRIEVABILITY:

Manually by position listing.

SAFEGUARDS:

Metal file containers or other standard office equipment secured in a locked file room during office duty hours.

RETENTION AND DISPOSAL:

Retained until republished then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Emergency Transportation, DET–1, Department of Transportation, Research and Special Programs Administration, 400 7th Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Inquiries may be addressed to any of the offices listed under "System Locations." Individuals requesting such information must sign the request and include suitable identification. Alternatively, personal visits to the above locations with presentation of the above credentials will enable individual to learn of and have access to his or her record.

RECORD ACCESS PROCEDURES:

Individual may secure or obtain information on procedures for gaining access to records by (1) referral to the information sheet issued to him or (2) addressing a written query to the offices cited under System Location, (except the Facility Manager, FAA Records Center, West King Street and South Maple Avenue, Martinsburg, WV 25401, who maintains duplicate files in storage only) or (3) presenting himself to those offices.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

Office or Agency of employment.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/RSPA 08

SYSTEM NAME:

Technical Pipeline Safety Committees for Natural Gas and Hazardous Liquid.

SECURITY CLASSIFICATION:

Unclassfied, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Research and Special Programs Administration, Office of Pipeline Safety, 400 7th Street, SW., Room 2335, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Members of Technical Pipeline Safety Standards Committee. Members of Technical Hazardous Liquid Pipeline Safety Standards Committee. Intermittent consultants.

CATEGORIES OF RECORDS IN THE SYSTEM:

Biographical data in support of member's nomination.

Letters announcing member's appointment/reappointment. Personnel Actions.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 CFR Parts 190 through 195

PURPOSE(S):

To provide a guiding group to ensure that the interests of all pipeline stakeholders are represented, for providing a forum for discussing program plans and activities of the Office of Pipeline Safety.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

General reference purposes for support functions.

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

In file folders.

RETRIEVABILITY:

Alphabetically by name within subject area.

SAFEGUARDS:

Room locked after hours, most information is public knowledge.

RETENTION AND DISPOSAL:

Kept indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Advisory Committee Executive Director, Department of Transportation,

Office of Pipeline Safety, 400 7th Street, SW., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Address inquiries to System manager including individual's name.

RECORD ACCESS PROCEDURES:

Information may be obtained from the System manager.

CONTESTING RECORD PROCEDURES:

Same as for Access above.

RECORD SOURCE CATEGORIES:

Biographical Information (DOT Form F 1120.1) Travel Vouchers (SF 1012). Certificate of Consultant's Services. Press Releases. Administrative Correspondence/Memorandums.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/RSPA 09

SYSTEM NAME:

Hazardous Materials Incident Telephonic Report System.

SECURITY CLASSIFICATION:

Sensitive.

SYSTEM LOCATION:

United States Department of Transportation, The John A. Volpe National Transportation Systems Center Kendall Square, Cambridge, MA 02142

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals included in the system are those making telephonic reports, either as a private citizen or as a representative of the company involved, to the National Response Center, NRC, operated by the USCG or to the EPA or to the USCG Office of Marine Safety, Security & Environmental Protection, OMSSEP, of certain releases of hazardous materials. The system may also contain information on individuals affected by reported incidents.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of telephonic reports of incidents involving the release of hazardous materials or environmental pollutants received by the NRC acting on behalf of the Research and Special Programs Administration, RSPA, the USCG, and/or the EPA, or made by or to the EPA or the OMSSEP USCG.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 CFR 191.5 and 195.52.

PURPOSE(S):

To provide early notification of hazardous liquid and natural gas pipeline releases.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To disclose pertinent information to Federal, state, and local governmental agencies responsible for responding to incidents involving the release of hazardous materials to assist in efforts to protect life, health, safety, and environmental conditions; to enforce related Federal, state, and local regulations; or to evaluate or develop regulatory programs. To disseminate information on the transportation of hazardous materials to industrial, commercial, educational, scientific, research, or private entities to assess trends, risks, consequences, or other potentialities associated with the release of hazardous materials during transportation, or to analyze factors affecting hazardous materials incidents. To disseminate information to the public media for use in informing the public of issues related to the transportation of hazardous materials. The general routine uses in the prefatory statement apply to these records.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained on magnetic media.

RETRIEVABILITY:

Records are retrievable by all entered fields including the names of individuals included in the record.

SAFEGUARDS:

Access to all computer files is controlled through user-name/password access procedures. The computer on which data is recorded is maintained in an access-controlled room in an access-controlled building.

RETENTION AND DISPOSAL:

Records are retained permanently on magnetic disk or tape.

SYSTEM MANAGER(S) AND ADDRESS:

For records collected by the Office of Hazardous Materials Transportation, RSPA, pursuant to 49 CFR 171.15: Information Systems Manager, Office of Hazardous Materials Transportation, DHM–63, Research and Special Programs Administration, United States Department of Transportation, Washington, DC 20590.

For records collected by the Office of Pipeline Safety, RSPA, pursuant to 49 CFR 191.5, 49 CFR 195.52, 49 CFR 192.612, and 49 CFR 195.413: Information Resources Manager, Office of Pipeline Safety, DPS–21, Research and Special Programs Administration, United States Department of Transportation, Washington, DC 20590.

NOTIFICATION PROCEDURE:

Inquiries should be directed to the appropriate system manager at the given address.

RECORD ACCESS PROCEDURES:

Contact the appropriate system manager at the given address for information on procedures for gaining access to records.

CONTESTING RECORD PROCEDURES:

Same as record access procedures.

RECORD SOURCE CATEGORIES:

Information in this system of records is provided by the individuals covered by this system; companies; Federal, state, and local governmental agencies; and other entities reporting releases of hazardous materials that occurred during transportation or that affect the environment.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/RSPA 10

SYSTEM NAME:

Hazardous Materials Incident Written Report System.

SECURITY CLASSIFICATION:

Unclassified, Sensitive.

SYSTEM LOCATION:

United States Department of Transportation, Research and Special Programs Administration, 400 Seventh Street, SW., Washington, DC, 20590, United States Department of Transportation, The John A. Volpe National Transportation Systems Center, Kendall Square, Cambridge, MA 02142.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals included in the system are those affected by releases of hazardous materials during transportation (including transportation by pipeline) whose names and other personal information may have been included in narrative descriptions of the incident.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of incidents involving the release of hazardous materials during transportation (including transportation by pipeline) submitted by the carrier pursuant to 49 CFR 171.16, 191.9, 191.15, 195.54, and 195.58.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 CFR 191.9 through 191.27 and 195.54, 195.55.

PURPOSE(S):

To provide written reports for hazardous liquid and natural gas pipeline releases, and annual reports for natural gas pipeline operator total mileage and description of operator's system.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To disclose pertinent information to Federal, state, and local governmental agencies responsible for oversight of incidents involving the release of hazardous materials to assist in efforts to protect life, health, and safety; to enforce related Federal, state, and local regulations; or to evaluate or develop regulatory programs. To disseminate information on the transportation of hazardous materials to industrial, commercial, educational, scientific, research, or private entities to assess trends, risks, consequences, or other potentialities associated with the release of hazardous materials during transportation, or to analyze factors affecting hazardous materials incidents. To disseminate information to the public media for use in informing the public of issues related to the transportation of hazardous materials. The general routine uses in the prefatory statement apply to these records.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained on magnetic disk. Duplicate paper, microfilm or electronic image copies are also retained by RSPA in file cabinets.

RETRIEVABILITY:

Computer records are retrievable by all entered fields including the name of individuals included in the record. Paper, microfilm, and electronic image copies are not retrievable by individual name or other personal identifier except through use of the search capabilities of the computer records.

SAFEGUARDS:

Access to all computer and electronic images are controlled through user-name/password access procedures. The computer on which data is recorded is maintained in an access-controlled room in an access-controlled building. Paper and microfilm copies are stored in a room locked during non-duty hours.

RETENTION AND DISPOSAL:

Records are retained permanently on magnetic disk or tape. Paper or microfilm copies are also retained permanently.

SYSTEM MANAGER(S) AND ADDRESS:

For records collected by the Office of Hazardous Materials Transportation, RSPA, pursuant to 49 CFR 171.16: Information Systems Manager, Office of Hazardous Materials Transportation, DHM–63, Research and Special Programs Administration, United States Department of Transportation, Washington, DC 20590. For records collected by the Office of Pipeline Safety, RSPA, pursuant to 49 CFR 191.9, 191.15, 195.54, or 195.58: Information Resources Manager, Office of Pipeline Safety, DPS–21, Research and Special Programs Administration, United States Department of Transportation, Washington, DC 20590.

NOTIFICATION PROCEDURE:

Inquiries should be directed to the appropriate system manager at the given address.

RECORD ACCESS PROCEDURES:

Contact the appropriate system manager at the given address for information on procedures for gaining access to records.

CONTESTING RECORD PROCEDURES:

Same as "Record access procedures."

RECORD SOURCE CATEGORIES:

Information in this system of records is provided by individuals acting on behalf of the carriers that experience releases of hazardous materials during transportation (including transportation by pipeline).

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/RSPA 11

SYSTEM NAME:

Hazardous Materials Information Requests System.

SECURITY CLASSIFICATION:

Unclassified, Sensitive.

SYSTEM LOCATION:

United States Department of Transportation, Research and Special Programs Administration, 400 Seventh Street, SW., Washington, DC 20590; United States Department of Transportation, The John A. Volpe National Transportation Systems Center, Kendall Square, Cambridge, MA 02142.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals included in the system are those requesting information from the Hazardous Materials Information Systems, HMIS, or requesting the Research and Special Programs Administration, RSPA, publication, North American Emergency Response Guidebook.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of requests for information from governmental, commercial, or public media entities, or from private citizens.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 CFR Parts 191.9 through 191.27 and 195.54, 195.55.

PURPOSE(S):

To provide written reports for hazardous liquid and natural gas pipeline releases, and annual reports for natural gas pipeline operator total mileage and description of operator's system.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To respond to requests for information maintained on the hazardous Materials Information System; to control the handling of such responses; and to provide statistical information on the offices' responsibility for responding to such requests. To disseminate information concerning the availability of the North American Emergency Response Guidebook or revisions to it to interested parties in order to ensure that users of the Guidebook have the most current available guidance information. The general routine uses in the prefatory statement apply to these records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained on magnetic disk. Duplicate paper copies of recent reports are retained by RSPA offices in file folders.

RETRIEVABILITY:

Computer records are retrievable by all entered fields including the names of individuals included in the record. Paper copies are not retrievable by individual name or other personal identifier except through use of the search capabilities of the computer records.

SAFEGUARDS:

Access to all computer files is controlled through user-name/password

access procedures, which limit access to the files to authorized agency personnel and to contract personnel whose duties directly involve the creation and use of these files. The computer on which data is recorded is maintained in an access-controlled room in an access-controlled building. Paper copies are stored in a room locked during non-duty hours.

RETENTION AND DISPOSAL:

Records are retained permanently on magnetic disk or tape. Paper copies are retained according to need in a room locked during non-duty hours, and disposed of as appropriate.

SYSTEM MANAGER(S) AND ADDRESS:

For records maintained by the Office of Hazardous Materials Transportation, RSPA: Information Systems Manager, Office of Hazardous Materials Transportation, DHM–63, Research and Special Programs Administration, United States Department of Transportation, Washington, DC 20590.

For records maintained by the Office of Pipeline Safety, RSPA: Information Resources Manager, Office of Pipeline Safety, DPS–21, Research and Special Programs Administration, United States Department of Transportation, Washington, DC 20590.

NOTIFICATION PROCEDURE:

Inquiries should be directed to the appropriate system manager at the given address.

RECORD ACCESS PROCEDURES:

Contact the appropriate system manager at the given address for information on procedures for gaining access to records.

CONTESTING RECORD PROCEDURES:

Same as record access procedures.

RECORD SOURCE CATEGORIES:

Information in this system of records is provided by individuals, companies, and other entities requesting information from the HMIS or copies of the Emergency Response Guidebook.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/SLS 151

SYSTEM NAME:

Claimants Under Federal Tort Claims Act.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Office of the Chief Counsel, Saint Lawrence Seaway Development Corporation, 400 Seventh Street, SW., Room 5424, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All individuals presenting claims for damages to personal property, or personal injuries, or death resulting in connection with Corporation activities, other than claims by Federal Government employees under Federal Employees' Compensation Act (5 U.S.C. 8102).

CATEGORIES OF RECORDS IN THE SYSTEM:

Claim documents on which are recorded name, address, age and marital status of claimants and details of claims, documented evidence relevant to the claims provided by claimants, and relevant, internal Corporation investigation documents.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 28 U.S.C. 2675 and 33 U.S.C. 5984(a)(4).

PURPOSE(S):

Information will be used in evaluating claims. Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Used by Chief Counsel and other Federal government officials to determine allowability of claims. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Records are retrieved by name.

SAFEGUARDS:

Records are kept in locked file cabinets and are accessible only to the Chief Counsel and persons authorized by him.

RETENTION AND DISPOSAL:

Records are retained indefinitely since they are not extensive and are used for reference.

SYSTEM MANAGER(S) AND ADDRESS:

Chief Counsel, Saint Lawrence Seaway Development Corporation, 400 Seventh Street, SW., Room 5424, Washington, DC 20590.

NOTIFICATION PROCEDURES:

An individual may inquire, in writing, to the system manager.

RECORD ACCESS PROCEDURES:

An individual may gain access to his/her records by written request to:

Chief Counsel, Saint Lawrence Seaway Development Corporation, PO Box 44090, Washington, DC 20026–4090.

CONTESTING RECORD PROCEDURES:

Contest of these records will be directed to the following: Director, Office of Finance, Saint Lawrence Seaway Development Corporation, PO Box 520, Massena, NY 13662–0520.

RECORD SOURCE CATEGORIES:

Information is obtained directly from claimants on Standard Form 95 and supporting documentation provided by claimants and relevant, internal Corporation investigation documents.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/SLS 152

SYSTEM NAME:

Data Automation Program Records.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Saint Lawrence Seaway Development Corporation, Office of Finance, PO Box 520, 180 Andrews Street, Massena, N.Y. 13662–0520.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees and consultants.

CATEGORIES OF RECORDS IN THE SYSTEM:

Payroll and leave records, work measurement records, and travel vouchers.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 44 U.S.C. 3101, 33 U.S.C. 984(a)(4)

PURPOSE(S):

This system integrates leave, payroll, work measurement, and travel Voucher records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

1. Payroll and voucher disbursement: GAO audits. 2. To the Office of Child Support Enforcement, Administration for Children and Families, Department of Health and Human Services Federal Parent Locator System, FPLS, and Federal Tax Offset System for use in locating individuals and identifying their income sources to establish paternity, Establish and modify orders of support and for enforcement action.

3. To the Office of Child Support Enforcement for release to the Social Security Administration for verifying social security Numbers in connection with the operation of the FPLS by the Office of Child Support Enforcement. 4. To Office of Child Support Enforcement for release to the Department of the Treasury for purposes of administering the Earned Income Tax Credit Program (Section 32, Internal Revenue Code of 1986) and verifying a claim with respect to employment in a tax return. 5. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12). Disclosures may be made from this system to 'consumer reporting agencies' (collecting on Behalf of the United States Government) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic tape reels, diskettes, microfilm cassettes and supporting documents.

RETRIEVABILITY:

Records are retrieved by name and social security number.

SAFEGUARDS:

Records are kept in locked file cabinets or locked rooms accessible to Appropriate supervisor, his/her immediate assistants and secretary.

RETENTION AND DISPOSAL:

Records are retained in accordance with General Accounting Office and National Archives and Records Administration requirements. System manager(s) and address: Director of Finance, Saint Lawrence Seaway Development Corporation, PO Box 520, 180 Andrews Street, Massena, N.Y. 13662–0520.

NOTIFICATION PROCEDURE:

Individuals may inquire, in writing, to the System manager.

RECORD ACCESS PROCEDURES:

Individuals may gain access to his/her records by submitting a written request to the system manager.

CONTESTING RECORD PROCEDURES:

Contest of these records should be directed to the system manager.

RECORD SOURCE CATEGORIES:

Information contained in this system would come from Saint Lawrence Seaway Development Corporation records.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/TSC 700

SYSTEM NAME:

Automated Management Information System.

SYSTEM LOCATION:

Department of Transportation, DOT, Volpe National Transportation Systems Center, Volpe, Computer Center, DTS–23, 55 Broadway, Cambridge, MA 02142–1093.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Volpe employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains job related information associated with the following applications: ADP services, property management, rocurement requests, contract information, travel information, program and related job plans, space utilization, and other pertinent management information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C 328, Volpe Center Working Capital Fund; 5 U.S.C 301.

PURPOSE(S):

For computer facility planning; budget analysis; procurement tracking; contract administration; property control.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The general purposes of this system are intended for internal management and control, including: Computer facility planning. ADP cost distribution. Budget and planning analysis. Procurement tracking. Procurement statistics and analysis. Information of travel incurred. Contract administration. Control of property. Control of building space. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic tape and disk.

RETRIEVABILITY:

Indexed by employees name, project number, procurement number, contract number, travel number, work plan budget number.

SAFEGUARDS:

Access to the systems and their associated data bank is available through the utilization of the unique project and programmer numbers, and the passwords known only by the authorized custodians. Access to reports is controlled by the Reports Distribution function of the Administrative Directorate on a need-to-know basis. For normal working requirements, the reports are distributed to the functional areas responsible for the data generation. Access to the computer room and its associated areas where data and reports are stored is delineated in the Volpe ADP Facility Document on Safeguards and Controls.

RETENTION AND DISPOSAL:

The systems are permanent unless replaced. The data banks, for the most part, are related to fiscal year activity.

Subsequent to the fiscal year, the data banks become either part of the history file of the system or are maintained by themselves for historical reasons.

Data records are deleted from the data banks on an as-required basis, and subsequently are eliminated from associated reports.

Reports used as daily working papers are retained only until updated reports are produced and then the old reports are discarded. Official closing reports corresponding to month-end and fiscal-year-end periods are retained for longer periods and are not subject to any disposal procedure.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Computer Center, DTS–23, Department of Transportation, Volpe National Transportation Systems Center, 55 Broadway, Cambridge, MA 02142–1093.

NOTIFICATION PROCEDURES:

Information may be obtained from the System manager.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the System manager. An individual may gain access to his/her data by written request.

CONTESTING RECORD PROCEDURES:

Contest of this data will be made to the System Manager. If administrative resolvement is not satisfactory to the individual, appeals may be filed in writing with the Secretary of Transportation addressed to the General

Counsel as follows: Department of Transportation, Office of the Secretary, Office of the General Counsel, 400 7th Street, SW., Washington, DC 20590.

RECORD SOURCE CATEGORIES:

Employee, Personnel Office, Communications Office, Security Office.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/TSC 702

SYSTEM NAME:

Legal Counsel Information Files.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Volpe National Transportation Systems Center, Volpe, Office of Chief Counsel, DTS–14, 55 Broadway, Cambridge, MA 02142–1093.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Present and former Volpe employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Counseling records relating to Standards of Conduct, post-employment restrictions, or other legal matters involving individual employee(s); individual claims; grievances, personnel actions and related litigation; and employee confidential financial disclosure reports.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 328, Volpe Center Working Capital Fund; 28 U.S.C. 1346; 28 U.S.C. ch. 171; 5 U.S.C. ch. 77, 5 U.S.C. ch. 71; 42 U.S.C. 2000e–16; 29 CFR part 1614; 5 U.S.C. App. 4.

PURPOSE(S):

To promote compliance with Standards of Conduct, conflict of interest, and other laws, and to enable legal counsel render consistent legal advice.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records and the information they contain may be used for internal management and control, to promote compliance with Standards of Conduct, conflict of interest, and other laws, and to enable legal counsel to render consistent advice in legal matters.

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in paper record folders.

RETRIEVABILITY:

Indexed by employee's name and/or by subject matter.

SAFEGUARDS:

Records are maintained in locked file cabinets and secure safe.

RETENTION AND DISPOSAL:

As prescribed in applicable record retention schedules.

SYSTEM MANAGER AND ADDRESS:

Chief Counsel, DTS–14, Volpe National Transportation Systems Center, Research and Special Programs Administration, United States Department of Transportation, 55 Broadway, Cambridge, MA 02142–1093.

NOTIFICATION PROCEDURES:

Information may be obtained from the System manager.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the System manager.

An individual may gain access to his/her records by written request.

CONTESTING RECORD PROCEDURES:

An individual may seek to contest information contained in his/her records by written request made to the System Manager. If administrative resolution is not satisfactory to the individual, appeals may be filed in writing with the Secretary of Transportation addressed to the General Counsel as follows: Department of Transportation, Office of the Secretary, Office of the General Counsel, 400 7th Street, SW., Washington, DC 20590.

RECORD SOURCE CATEGORIES:

Information contained in this system of records is provided by employees, Supervisors, Legal Office, Personnel Office and various Federal administrative agencies.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/TSC 703

SYSTEM NAME:

Occupational Safety and Health Reporting System.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Volpe National Transportation Systems Center, Volpe, Human Resources Management Division, DTS–84, 55 Broadway, Cambridge, MA 02142–1093.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Volpe employees, in-house contractor personnel and visitors who have suffered work-related occupational illnesses, injuries or are involved in Government property accidents.

CATEGORIES OF RECORDS IN THE SYSTEM:

Federal Occupational Injuries and Illnesses Survey form. DOT Accident/Injury Reports, DOT forms 3902.1 through 8. Department of Labor, Office of Workers Compensation Programs, OWCP, for payment of medical bills and worker compensation, as applicable.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 328, Volpe Center Working Capital Fund; Executive Order 12196, Occupational Safety and Health Program for Federal Employees, dated 2/27/80; 5 U.S.C. 7902.

PURPOSE(S):

For accident prevention.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The general purposes of these records are intended for internal management and control, and also for accident prevention.

The routine uses of the Department of Labor forms are for (1) submission to doctors and medical institutions rendering services to individuals and (2) to the Office of Workers Compensation Programs, Department of Labor, for payment of medical bills and worker compensation, applicable. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Forms, computerized database, and other paper records.

RETRIEVABILITY:

Indexed by individual's name.

SAFEGUARDS:

Records are maintained in locked file cabinets and folders are stamped For Official Accident Prevention Use Only.

RETENTION AND DISPOSAL:

Records are retained for five years and then destroyed by shredding.

SYSTEM MANAGER AND ADDRESS:

Chief, Engineering and Operations Branch, DTS–874, Department of Transportation, Volpe National Transportation Systems Center, 55 Broadway, Cambridge, MA 02142–1093.

NOTIFICATION PROCEDURES:

Information may be obtained from the System manager.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the System manager. An individual may gain access to his/her records by written request.

CONTESTING RECORD PROCEDURES:

Contest of this data will be made to the System Manager. If administrative resolution is not satisfactory to the individual, appeals may be filed in writing with the Secretary of Transportation addressed to the General Counsel as follows: Department of Transportation, Office of the Secretary, Office of the General Counsel, 400 7th Street, SW., Washington, DC 20590.

RECORD SOURCE CATEGORIES:

Documents provided by the individual concerned and immediate supervisor.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/TSC 704

SYSTEM NAME:

Stand-By Personnel Information.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Volpe National Transportation Systems Center, Volpe, Financial Management Division, Budget Branch, DTS–821, 55 Broadway, Cambridge, MA 02142–1093.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Volpe technical directorate personnel currently not fully assigned to authorized projects.

CATEGORIES OF RECORDS IN THE SYSTEM:

Employee work project status.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 328, Volpe Center Working Capital Fund; 5 U.S.C. 301.

PURPOSE(S):

For administrative reference and scheduling of projects, budgeting, and overhead classification.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The general purposes of these files are intended for internal management and control, including administrative reference and scheduling of work projects, budgeting and overhead classification. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Electronic Files in Excel format.

RETRIEVABILITY:

Stored as spreadsheet identified by pay period ending date.

SAFEGUARDS:

Records are maintained in password protected files with access limited to Budget Branch PCs.

RETENTION AND DISPOSAL:

Files are maintained for one (1) additional year following completion of current fiscal year. Files are then deleted.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Budget Branch, DTS–821, Department of Transportation, Volpe National Transportation Systems Center, 55 Broadway, Cambridge, MA 02142–1093.

NOTIFICATION PROCEDURES:

Information may be obtained from the System manager.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the System manager. An individual may gain access to his/her records by written request.

CONTESTING RECORD PROCEDURES:

Contest of this data will be made to the System manager. If administrative resolution is not satisfactory to the individual, appeals may be filed in writing with the Secretary of Transportation addressed to the General Counsel as follows: Department of Transportation, Office of the Secretary, Office of the General Counsel, 400 7th Street, SW., Washington, DC 20590.

RECORD SOURCE CATEGORIES:

Supervisor.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/TSC 707

SYSTEM NAME:

Labor Distribution System.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Volpe National Transportation Systems Center (Volpe), Financial Management Division, Accounting Branch, DTS–823, 55 Broadway, Cambridge, MA 02142–1093.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Volpe employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains information delineating the time and charges, including fringe and project overhead, that Volpe employees worked. The main association of the time and charges is with employee job assignment.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 328, Volpe Center Working Capital Fund; 5 U.S.C. 301.

PURPOSE(S):

For administrative reference, cost management, and labor assignments and expenditures.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The general purposes of this system are intended for internal management and control, including:

Administrative reference.

Cost management.

Labor assignments and expenditures as they relate to both the project and the employee.

Reconciliation of Payroll and Labor system data.

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b) (12): Disclosures may be made from this system to consumer reporting agencies (collecting on behalf of the United States Govt.) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 USC 3701 (a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Excel spreadsheets, magnetic tape and disk.

RETRIEVABILITY:

System data is indexed by employee's number (Social Security Number) and Work Plan Budget, WPB, number within Project Plan Agreement, PPA, number.

Labor Distribution Forms (Excel spreadsheets) are indexed by Volpe Center organization code (DTS #) and SSN.

SAFEGUARDS:

Access to the system and its associated database is available through the utilization of the unique project and programmer numbers, and the passwords known only by the authorized custodians. Access to reports is controlled by the Reports Distribution function of the Administrative Directorate on a need-to-know basis. For normal working requirements, the reports are distributed to the functional areas responsible for the data generation. Month-end management reports do not contain SSN data.

Access to the computer room and its associated areas where data and reports are stored is delineated in the Volpe ADP Facility Document on Safeguards and Controls.

RETENTION AND DISPOSAL:

The system is permanent unless replaced. The database is related to fiscal year activity. Subsequent to the fiscal year, the database becomes part of the system's history file. Data records are deleted from the database on an as required basis, and subsequently are eliminated from associated reports. Any record deleted from database must have zero dollars associated with it and must be authorized by System Manager, with the reason documented in writing. Reports used as daily working papers are retained only until updated reports are produced and then the old reports are discarded. All reports containing SSN data are shredded. Official record copy reports are subject to retirement in accordance with General Records Schedules, GRS.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Accounting Branch, DTS–823, Department of Transportation, Volpe National Transportation Systems Center, 55 Broadway, Cambridge, MA 02142–1093.

NOTIFICATION PROCEDURES:

Information may be obtained through the Chief, Accounting Branch, DTS–823 at the address under System Location.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the System manager.

CONTESTING RECORD PROCEDURES:

An individual may gain access to his/her data by written request. Contest of this data will be made to the System manager. If administrative resolution is not satisfactory to the individual, appeals may be filed in writing with the Secretary of Transportation addressed to the General Counsel as follows:

Department of Transportation, Office of the Secretary, Office of the General Counsel, 400 7th Street, SW., Washington, DC 20590.

RECORD SOURCE CATEGORIES:

Volpe form entitled Labor Distribution Form.

EXEMPTIONS CLAIMED FOR THIS SYSTEM:

None.

DOT/TSC 712

SYSTEM NAME:

Automated Personnel/Communications/Security System.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Volpe National Transportation Systems Center (Volpe), Computer Center, DTS–23, 55 Broadway, Cambridge, MA 02142–1093

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Volpe employees and tenants from other government agencies and on-site contractors.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains the pertinent information for activities involved with Personnel, Communications, and Security. Contains photographs of Volpe Center employees.

Contains information about an individual relating to:

Social security number.
Salary.
Birth date.
Veteran preference.
Tenure.
Handicap.
Grade.
Marital status.
Service computation date.
Home address and telephone number.
Volpe location including building and telephone number.
Security clearance level and date granted.
CSC title and classification code.
Competitive level.
Parking info—vehicle registration and description.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 328, Volpe Center Working Capital Fund; 5 U.S.C. 301.

PURPOSE(S):

For administrative reference, and as a source for management information for producing summary statistics and registers in support of personnel, communications, and security functions.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The general purposes of this system are intended for internal management and control, including:

Administrative reference.

Source for management information for producing summary statistics and registers in support of the Personnel, Communications and Security functions.

Source for Volpe Center Intranet information.

See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b) (12): Disclosures may be made from this systems to consumer reporting agencies (collecting on behalf of the United States Govt.) as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1982 (31 U.S.C. 3701 (a) (3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic tape and disk.

Hard copy files (letter size and 5 x 8 cards).

Volpe Center Intranet.

RETRIEVABILITY:

Indexed by employee's number, employee's name.

SAFEGUARDS:

Access to the systems and their associated databases and files is available through the utilization of the unique project and programmer numbers, and the passwords known only by the authorized custodians.

Access to reports is controlled by the Reports Distribution function of the Administrative Directorate on a need-to-know basis. For normal working requirements, the reports are distributed to the functional areas responsible for the data generation. Access to the computer room and its associated areas where data and reports are stored is delineated in the Volpe ADP Facility Document on Safeguards and Controls.

RETENTION AND DISPOSAL:

The systems are permanent unless replaced. The databases are related to both fiscal year and calendar year activity. Subsequent to the appropriate period, the databases become either part of the history file of the system or are maintained by themselves for historical reasons. Data records are deleted from the databases on an as-required basis, and subsequently are eliminated from associated reports. Reports used as daily working papers are retained only until updated reports are produced and then the old reports are discarded. Official closing reports corresponding to month-end, fiscal-year-end and calendar year-end periods are retained for longer periods and are not subject to any rigid disposal procedure.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Administrative Services Branch, DTS–872, Department of Transportation, Volpe National Transportation Systems Center, 55 Broadway, Cambridge, MA 02142–1093.

NOTIFICATION PROCEDURES:

Information may be obtained through the Chief, Administrative Services Branch from the: Department of Transportation, Volpe National Transportation Systems Center, Chief, Computer Center, DTS–23, 55 Broadway, Cambridge, MA 02142–1093.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the System manager.

CONTESTING RECORD PROCEDURES:

An individual may gain access to his/her records by written request. Contest of this data will be made to the System Manager. If administrative resolution is not satisfactory to the individual, appeals may be filed in writing with the Secretary of Transportation addressed to the General Counsel as follows: Department of Transportation, Office of the Secretary, Office of the General Counsel, 400 7th Street, SW., Washington, DC 20590.

RECORD SOURCE CATEGORIES:

Employee, Personnel Office, Communications Office, Security Office.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DOT/TSC 714

SYSTEM NAME:

Health Unit Employee Medical Records.

SECURITY CLASSIFICATION:

Unclassified, sensitive.

SYSTEM LOCATION:

Department of Transportation, DOT, Volpe National Transportation Systems Center, Volpe, Human Resources Management Division, DTS–84, Health Unit/Building 1, 9th Floor, 55 Broadway, Cambridge, MA 02142–1093.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Volpe employees, tenant organization employees, and support service contractor personnel.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual Health Record Cards.
Individual Health Record Case Files.
Register of Visits.
Laser Eye Tests.
Pre-employment Physical Examinations, Health Justification Placement Records.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 328, Volpe Center Working Capital Fund; Executive Order 12196, Occupational Safety and Health Program for Federal Employees, dated 2/27/80; 5 U.S.C. 7901.

PURPOSE(S):

To maintain a medical history of any person who receives services from the Health Unit.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The general purposes of these Federal and tenant records are to maintain a medical history of any Volpe employee, including contractor personnel, who receives services from the Health Unit; ensure applicants for licenses to drive Government vehicles meet physical requirements; and lasers are not adversely affecting employee's eyes. The routine uses of these records are to respond to requests from other Doctors, Universities and Insurance Companies, and to submit medical reports to the Department of Labor, Office of Employees Compensation, to meet requirements of the Occupational Safety and Health Act of 1970 and DOT/Volpe Safety Program. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Cards, forms, logs and other paper records.

RETRIEVABILITY:

Indexed by employee's name and social security number.

SAFEGUARDS:

Records are maintained in locked file cabinets and room secured when no one is there. Information from records is provided only with consent of employee.

RETENTION AND DISPOSAL:

In accordance with GRS No.1: Individual Health Record Cards are maintained until separation and sent to St. Louis. Individual Health Record Case Files are maintained until separation. They are then sent to St. Louis. Registers of visits maintained until 2 years after last date in log or register. Upon termination of employment with Volpe, latest Laser Eye Tests and Government Driver's Tests records are combined with Health Record Case Files and disposed of as part of these files. Pre-employment Physical Examinations, Health Justification Placement Records, and Disability Retirement Examination become part of the official personnel folder, OPF, upon separation, and are transferred to the NPRS, St. Louis, MO, 30 days after separation, where they are disposed of in accordance with GRS. No. 1, Item 1.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Human Resources Management Division, DTS–84, Department of Transportation, Volpe National Transportation Systems Center, 55 Broadway, Cambridge, MA 02142–1093.

NOTIFICATION PROCEDURES:

Information may be obtained through the Chief, Human Resources Management Division, from the resident physician or nurse, Volpe Health Unit.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the System Manager.

CONTESTING RECORD PROCEDURES:

An individual may gain access to his/her records by written request. Contest of this data will be made to the System Manager. If administrative resolution is not satisfactory to the individual, appeals may be filed in writing with the Secretary of Transportation addressed to the General Counsel as follows: Department of Transportation, Office of the Secretary, Office of the General Counsel, 400 7th Street, SW., Washington, DC 20590.

RECORD SOURCE CATEGORIES:

Employee; Health Unit Doctor/Nurse; Volpe Safety Officer.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

Part IV

Department of Education

National Awards Program for Effective Teacher Preparation; Inviting Applications for New Awards for Fiscal Year 2000 and Eligibility and Selection Criteria; Notices

DEPARTMENT OF EDUCATION

National Awards Program for Effective Teacher Preparation; Notice Inviting Applications for New Awards for Fiscal Year (FY) 2000

Purpose of Program: The National Awards Program for Effective Teacher Preparation recognizes entities with effective preparation programs for elementary school teachers or secondary school mathematics teachers that lead to improved student learning. The FY 2000 competition, the first competition under this new awards program, focuses on entities that meet the eligibility and selection criteria for this program, as published elsewhere in this issue of the **Federal Register**.

Eligible Applicants: Institutions of higher education and other entities in the States (including the District of Columbia, Puerto Rico, and the outlying areas) that prepare elementary teachers, or middle or high school mathematics teachers, for initial certification, including alternative certification.

Applications Available: April 7, 2000.

Deadline for Transmittal of Applications: July 3, 2000.

Deadline for Intergovernmental Review: September 1, 2000.

Funds Available: None, although the Department intends to pay the cost of having successful applicants attend a national ceremony at which the awardees will be publicly honored and recognized. The Department also intends to pay some of the costs associated with having successful applicants make presentations on their teacher preparation programs at regional or national conferences.

Estimated Number of Awards: Up to 5.

Note: The Department is not bound by any estimates in this notice.

Page Limit: Applicants are to address the selection criteria that apply to this competition in the application narrative of the application. The application narrative must be limited to the equivalent of no more than 30 pages, plus a one-page abstract, using the following standards:

- A page is 8.5″ x 11″, one-sided only, with 1″ margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12-point or larger.

Our reviewers will not read any pages of your application that—

- Exceed the page limit if you apply these standards; or
- Exceed the equivalent of the page limit if you apply other standards.

Eligibility, Application, and Selection Criteria: The eligibility, application, and selection criteria, and selection procedures, in the notice of eligibility and selection criteria for this program, as published elsewhere in this issue of the **Federal Register**, apply to this competition.

For Applications and Further Information Contact: Sharon Horn, Office of Educational Research and Improvement, U.S. Department of Education, 555 New Jersey Avenue, NW., room 506E, Washington, DC 20208–5644. Telephone: (202) 219–2203 or FAX to (202) 219–2198. Inquiries also may be sent by e-mail to: sharon__horn@ed.gov

If you use a telecommunications device for the deaf (TDD), you may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

Individuals with disabilities may obtain this document in an alternate format (*e.g.*, Braille, large print, audiotape, or computer diskette) on request to the contact person listed in this section.

Electronic Access to This Document

You may review this document, as well as all other Department of Education documents published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at either of the following sites:

BILLING CODE 4000–01–U

DEPARTMENT OF EDUCATION

National Awards Program for Effective Teacher Preparation

AGENCY: Office of Educational Research and Improvement (OERI), Department of Education.

ACTION: Notice of Eligibility And Selection Criteria.

SUMMARY: The Assistant Secretary for OERI announces eligibility and selection criteria to govern competitions under the National Awards Program for Effective Teacher Preparation for fiscal year (FY) 2000 and future years. Using these criteria, the awards program will recognize programs that effectively prepare elementary school teachers or secondary school mathematics teachers and that lead to improved student learning.

EFFECTIVE DATE: These eligibility and selection criteria are effective May 11, 2000.

FOR FURTHER INFORMATION CONTACT: Sharon Horn, Office of Educational Research and Improvement, U.S. Department of Education, 555 New Jersey Avenue, NW., room 506E, Washington, DC 20208–5644. Telephone: (202) 219–2203 or FAX to (202) 219–2198. Inquiries also may be sent by e-mail to: sharon__horn@ed.gov If you use a telecommunications device for the deaf (TDD), you may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

Individuals with disabilities may obtain this document in an alternate format (*e.g.*, Braille, large print, audiotape, or computer diskette) on request to the contact person listed in the preceding paragraph.

SUPPLEMENTARY INFORMATION: This notice announces eligibility and selection criteria to govern applications for recognition that are submitted under the National Awards Program for Effective Teacher Preparation. The criteria established in this notice would be used to select award recipients in the program's initial year, FY 2000, and in subsequent fiscal years.

This new program, which is part of a continuing effort to honor excellence in education, is the result of an increased emphasis across the country on teacher quality and the well-established principle that high-quality K–12 teachers are critical to the ability of children in our nation's schools to achieve to high standards. The program represents the first systematic approach for identifying entities that have successfully linked their programs for preparing teachers to improved student

achievement at the K–12 level. We believe that the current emphasis on heightened academic standards for elementary and secondary students and the need for teachers to gain the knowledge and skills necessary to teach to those standards makes this program, which focuses attention on those teacher preparation programs that are particularly effective in preparing teachers who, in turn, are effective in helping students improve their learning, all the more timely.

The Assistant Secretary for OERI published a Notice of Proposed Eligibility and Selection Criteria for this program in the **Federal Register** on January 21, 2000 (65 FR 3427). As stated in that notice, we recognize that demonstrating the link between teacher preparation programs and the ability of program graduates to improve student learning is not an easy task. Nevertheless, the difficulty involved makes that link no less critical. We intend to select for awards no more than five pre-service teacher preparation programs that are on the leading edge in this effort. Our chief goal in recognizing these programs is to foster an understanding of how these noteworthy programs design their teacher preparation activities to increase K–12 student achievement and how their approaches can be replicated or built upon by other institutions that prepare teachers. For that reason, the criteria for selecting award recipients, as described in this notice, focus significantly on the ability of applicants to provide compelling evidence of effectiveness in preparing teachers who positively impact student learning.

The timeliness of this new awards program is also supported by the fact that institutions producing teachers, and the states that certify them, are increasingly coming under scrutiny as the public seeks higher standards and greater accountability for public schools and school teachers. The Department, as well as many States, is currently implementing new accountability measures and reporting requirements for States and for colleges and universities receiving Federal grants to support teacher training programs. Some institutions have already implemented accountability measures, while others have started to take steps to improve and to become accountable for the teachers they train. We hope that bringing attention to those teacher preparation programs that are effective in this area will serve to assist other programs in their efforts to improve their level of accountability.

In order to align the program with nation-wide efforts to improve achievement levels in math and reading, this awards program will focus, in its initial year, on programs that prepare elementary teachers (since elementary school teachers often teach both math and reading) and programs that prepare middle or high school mathematics teachers or both. Thus, to be selected for an award, applicants must be able to show that their graduates are effective in helping all students improve their learning in reading and mathematics at the elementary level or mathematics at the middle and high school level or both. By "all students," we mean the diverse population of students that graduates of teacher education programs may encounter in the classroom or other educational setting, including regular and special education students, students from diverse backgrounds, and students with limited English proficiency. The selection process will also depend on the ability of applicants to demonstrate that their graduates have a depth of content knowledge in mathematics and reading or both, acquire general and content-specific pedagogical knowledge and skills, and develop skills to examine attitudes and beliefs about learners and the teaching profession.

Note: This notice does not solicit applications. A notice inviting applications under this competition is published elsewhere in this edition of the **Federal Register**.

Analysis of Comments and Changes

In response to the Assistant Secretary's invitation in the notice of proposed eligibility and selection criteria, two parties submitted comments. An analysis of the comments and of the changes in the eligibility and selection criteria since publication of the notice of proposed criteria follows.

Generally, we do not discuss technical and other minor changes; nor do we discuss comments that are unrelated to the content of the eligibility or selection criteria. Substantive issues are addressed below under the appropriate section to which they pertain.

Eligible Applicants

Comments: One commenter questioned whether the proposed eligibility (and selection) criteria placed greater emphasis on achievement in reading, as opposed to mathematics, at the elementary school level.

Discussion: As noted in the preamble discussion above, and in the notice of proposed eligibility and selection criteria, the National Awards Program for Effective Teacher Preparation is focused, in this first year, on the preparation of both reading and mathematics teachers at the K–12 level. It is anticipated that an entity that prepares elementary school teachers will focus its application on increased student learning in reading and mathematics since program graduates teaching in elementary schools typically teach both subjects. Each discipline—reading and math—is given equal emphasis in this awards program. On the other hand, entities that prepare middle school teachers or high school teachers (or both) must focus their applications on increased student learning in mathematics, a discipline routinely taught in middle and high schools.

Changes: None.

Background and Program Description

Comment: One commenter suggested that applicants be required to consider addressing, as part of the background description of their program, any applicable State or district policies affecting their efforts in preparing teachers.

Discussion: In addition to requiring applicants to provide the mission statement, goals and objectives, and components of their teacher preparation program, the Background section of the proposed selection criteria instructed applicants to consider including certain types of information (*e.g.*, recruitment policies, program structure, resources, etc.) as part of a full description of their program. We agree that teacher preparation programs also may be affected by State or local policies regarding, for example, academic course requirements for teachers, or other factors that relate to the training of teachers in a certain geographic region. Thus, we have amended the proposed criteria to include applicable State or district policies among the list of items applicants can consider addressing in their applications. We also note, however, that the list of items to be considered, other than the mission, goals and objectives, and program components, are provided only as examples. Applicants are advised to address any one or more of the identified factors, or other factors, that are most pertinent to their teacher preparation program.

Changes: This section of the proposed selection criteria has been amended to refer to State or district policies as an area that applicants may address as part of the description of their program.

Program's Criteria for Effectiveness

Comment: One commenter suggested that the proposed criteria under this section be modified to require an explanation of the specific standards on

which the applicant's program is based. The commenter indicated that requiring applicants to explain the standards they follow—whether they be State licensure, higher education, K–12, or other applicable standards—will draw attention to the criteria used by award recipients in their efforts to prepare effective teachers.

Discussion: In this section of the proposed selection criteria, the question is posed to applicants, "What are the criteria the program uses to evaluate [the effectiveness of its teacher preparation program]?" This question is designed to ensure that each applicant describes the relevant standards that it uses to evaluate its program and guide improvements and modifications. Nevertheless, we agree that referring to specific examples of standards that might be used in this regard (*e.g.*, the standards issued by the National Council for Accreditation of Teacher Education (NCATE) as identified by the commenter, state teacher licensure standards, or other criteria) will further guide applicants in addressing this question.

Changes: This section of the proposed selection criteria has been amended to identify some examples of the types of standards that entities use for purposes of evaluating the effectiveness of their teacher preparation program.

Evidence of Effectiveness

Comment: One commenter asked that applicants be required to demonstrate the impact that their teacher preparation program has on learning for *all* students and not just on certain populations of students.

This commenter also pointed out that applicants may face certain obstacles in collecting data on teachers, or on K–12 students, that is needed to demonstrate the effectiveness of their program. For instance, the commenter noted that it may be difficult for entities preparing teachers to track graduates who teach in other geographic regions, while data on reading or math achievement by K–12 students, if used by an applicant, will vary by State depending upon how often, and the extent to which, students in the State are tested. For these reasons, the commenter suggested that applicants be asked to discuss in the application any intervening factors that impact the evaluation of their teacher preparation program.

Discussion: We fully agree with the concern expressed by the commenter that applicants focus on improved learning for all students and believe that the proposed criteria made clear that selection for an award will be based significantly on the extent to which an applicant can demonstrate that their program for preparing teachers leads to improved student achievement for all students taught by program graduates. As noted above, and in the preamble guidance to the notice of proposed criteria, "all students" refers to the diverse population of students that teachers may work with in the classroom (or other appropriate educational setting). Thus, applicants should provide evidence of their program's effectiveness on learning for regular education students, students receiving special education, students from diverse ethnic backgrounds, students with limited English proficiency, students in urban and rural areas, and any other identified population of students, to the extent that program graduates teach such populations and to the extent that such evidence is available.

In addition, we agree with the commenter that applicants are likely to encounter different challenges in collecting data and compiling their evidence of effectiveness. Consequently, this section of the final selection criteria will invite applicants to discuss those challenges and how they have overcome any such obstacles in order to evaluate their program.

Changes: This section of the proposed selection criteria has been amended to include a note inviting applicants to discuss factors affecting their data collection efforts and their success in dealing with these factors in the course of evaluating the effectiveness of their graduates.

Eligibility, Application, and Selection Criteria

Eligible Applicants

Eligible applicants are institutions in the States (including the District of Columbia, Puerto Rico, and the outlying areas) that prepare elementary teachers, or middle or high school mathematics teachers, for initial certification. Institutions of higher education as well as institutions that are not part of a college or university are eligible to apply. Since this program focuses on initial preparation of teachers, alternative certification programs are eligible, while in-service programs are not.

For purposes of this notice, a "teacher preparation program" refers to a defined set of experiences that, taken as a whole, prepares participants for initial (or alternative) certification to teach. Detailed instructions for applying for this award, including formatting instructions, are provided within the application package and must be followed to receive an award.

Application Content Requirements

Applicants are free to develop their application in any way they choose as long as they comply with the requirements set out in the application package. In evaluating applications for the National Awards Program for Effective Teacher Preparation, reviewers will look to see whether the application, taken as a whole, demonstrates that the applicant's teacher preparation program leads to improved teacher effectiveness and increased student achievement at the K–12 level. In doing so, reviewers will be guided by the extent to which and how well applicants address the following components of the application, the most important of which concern objective evidence of effectiveness under Section C of the application.

Sections A, B, and D of the application provide reviewers with information describing the teacher preparation program and its potential as an example for others. Reviewers will use the information in these three sections to determine the extent to which there is a logical connection between the various aspects of the program and the results achieved. In other words, they will check for consistency between the information provided in these sections and the applicant's claims of effectiveness under section C.

In section C, applicants provide formative, summative, and confirming evidence that their program is effective in preparing graduates who are able to help all K–12 students improve their learning in reading and mathematics at the elementary level or mathematics at the middle or high school level.

Where appropriate, the following sections of the application include one or more questions that are designed to help applicants formulate their responses.

A. Background and Program Description

In this section, applicants must provide the mission statement, goals and objectives, and the components of their teacher preparation program and explain how these items relate to the effective preparation of elementary teachers or middle and/or high school mathematics teachers.

In responding to this section, applicants are encouraged to provide information about:

1. Recruitment policies for faculty and candidates.

2. Selection procedures for faculty and candidates.

3. Program structure (*e.g.*, course and field experiences, support for preservice and novice teachers, mechanisms for monitoring participants' progress).

4. State or district policies or mandates that affect the components of the teacher preparation program.

5. Resources that support the program.

6. Methods for collaboration between the program and K–12 schools.

7. Graduation or completion criteria and rates.

8. Job placement and retention rates of graduates.

B. Program's Criteria for Effectiveness

In this section, applicants must describe the principles, standards, or other criteria that the applicant uses to judge the effectiveness of its teacher preparation program.

Note: Applications are not being evaluated against a given set of principles for all programs, but are expected to include relevant criteria for guiding program improvement and modifications).

In responding to this section, applicants should consider the following questions:

1. What are the criteria or standards (*e.g.*, NCATE, INTASC, NBPTS, NCTM, state teacher licensure requirements and other appropriate standards) the program uses to evaluate its effectiveness?

2. How does the program ensure that program components such as courses and instructional practices are consistent with the evaluation criteria or standards under Question 1?

C. Evidence of Effectiveness

In this section, applicants must provide three separate types of evidence that demonstrates the effectiveness of their teacher preparation program: formative, summative, and confirming evidence.

"Formative evidence" refers to the use of data to make adjustments to the program throughout its various stages. These data are collected as participants (*i.e.*, preservice teachers) move through the program.

"Summative evidence" demonstrates that the program is effective in helping graduates acquire the necessary knowledge and skills to improve student learning. Summative evidence is collected as preservice teachers complete the program.

"Confirming evidence" links teacher preparation and K–12 student learning by demonstrating that program graduates are effective in helping all K–12 students improve their learning. Confirming evidence is collected on graduates who are employed by schools or districts.

Applicants would supply a brief description for each evidence item submitted. This description must include information about the nature of the data, the methods used to collect the data, and a summary of the data analysis.

In responding to this section, applicants must consider the following questions:

1. What evidence is there that the program, described in section A, gathers data about the effectiveness of the various stages of the program and uses that data to make improvements to the program? (Formative evidence)

2. What evidence is there that the program is effective in helping graduates acquire the knowledge and skills needed to improve student learning in reading and mathematics for all elementary school students or in mathematics for all middle or high school students? (Summative evidence)

Note: Summative evidence in this section should address graduates' content knowledge, pedagogical knowledge and skills, and skills to examine beliefs about learners and teaching as a profession.

3. What evidence is there that the program's graduates are effective in helping all K–12 students improve their learning in reading and mathematics at the elementary level or mathematics at the middle or high school level? (Confirming evidence)

Note: If there are obstacles that affect data collection (*e.g.*, local or State regulations prohibit the release of student data), applicants may describe these factors and explain how they have overcome any obstacles to collecting data for purposes of evaluating the effectiveness of their program.

D. Implications for the Field

A primary goal of this awards program is to share with the public effective examples that might be adopted or otherwise used by others to improve teacher preparation programs throughout the country. In this section, applicants must discuss the challenges they have faced and overcome in administering their teacher preparation program, as well as the resulting lessons they have learned.

In responding to this section, applicants should consider the following:

1. What is at least one significant challenge that the program encountered within the last five years and how was it overcome? (Note: Since demonstrating the link between teacher preparation and K–12 student learning is a primary focus of the awards program, applicants should consider describing challenges related to this issue.)

2. What lessons that would benefit others have been learned about designing, implementing, or evaluating a program that prepares graduates who are effective in helping improve student learning for all K–12 students?

3. What program materials (*e.g.*, videos, Web sites, course outlines, manuals, strategies, processes) are available that could benefit others?

4. How have or could you help others adapt the aspects of your program that contribute most to graduates' effectiveness with K–12 students?

Selection Criteria

Reviewers will evaluate the information provided in each application based on three criteria: rigor, sufficiency, and consistency. These criteria, and the performance levels applicable to each, are identified in the rubric shown in Figure 1. Reviewers will use this rubric as the review instrument to judge the quality of each application.

The Evidence of Effectiveness provided by an applicant under section C, the most critical portion of the application, will be evaluated on the basis of its rigor and sufficiency. The level of "rigor" applied to the evidence submitted will be determined by the extent to which the qualitative or quantitative data presented is found to be valid and reliable. The level of "sufficiency" applied to the evidence submitted will be determined by the adequacy and the extent of the data provided.

The application as a whole will be evaluated on the basis of its consistency. The level of "consistency" of the application will be based on the extent to which there is a logical link between various aspects of the program as described in Sections A, B, and D of the application and the evidence of effectiveness provided under Section C. For example, if an applicant indicates in sections A, B, or D of its application that field experiences are important to the preparation of teachers, then the application should describe the variety of field experiences that are spread over the duration of the program and also include, for purposes of "consistency," documentation of the effectiveness of these experiences.

The rubric in Figure 1 identifies a range of performance levels, from 1 to 4, that reviewers will use to judge the quality of an application with regard to the three criteria—rigor, sufficiency, and consistency. Reviewers will assign a level of the rubric, 1 to 4, for each criterion based on their judgment of how well the information provided in the application matches the descriptions in the rubric of the relevant performance levels. Prior to reviewing applications,

reviewers will receive extensive training in using the rubric to ensure inter-rater reliability.

FIGURE 1.—RUBRIC FOR EVALUATING EVIDENCE OF EFFECTIVENESS

Performance levels	Selection criteria		
	Rigor	Sufficiency	Consistency
4	The evidence is highly credible. The data are valid and indicators are free of bias. Reliability is supported by multi-year data from several sources.	There are extensive data that support claims of effectiveness. The evidence includes data from multiple sources with multiple indicators.	Components of the program are consistent with the vision of the program. Program components are monitored to determine if they are being instituted as designed. Evidence supports an intended, logical link between the program components and the outcomes. The evidence supports the link between program components and program success. The consistencies support the credibility of the evidence.
3	The evidence is credible. Validity has been addressed for most of the data. There may be some questions of bias. Reliability is supported by two or more years of data from at least one data source.	There are adequate data to support the claims of effectiveness. There are multiple sources of evidence and multiple indicators for at least one source.	There are minor inconsistencies between the vision of the program and program components. Some components of program may not be monitored or there may be some inconsistencies between the evidence provided and the identified successful components of the program. The inconsistencies do not weaken the credibility of the evidence.
2	The evidence has limited credibility. The rigor is compromised by issues of bias or validity/reliability. There are no multiyear data from any source.	There are limited data to support the claims of effectiveness. The data are collected from only one or two sources. There are no multiple indicators for the data source(s).	There are several inconsistencies between the vision of the program and program components. There are significant inconsistencies between the evidence provided and the identified successful components of the program. The inconsistencies raise questions about the credibility of the evidence.
1	The evidence has little or no credibility. The rigor is significantly compromised by issues of bias, or there is not enough information to determine rigor. The data lack validity/ Reliability. There is no multi-year data.	There are not enough data to support claims of effectiveness. There is only a single source of data.	There are numerous inconsistencies between the vision of the program and its components. The evidence provided is not linked to the components of the program that have been identified as contributing to the program's success. The inconsistencies raise significant questions about the credibility of the evidence.

Selection Procedures

Award recipients will be selected through a five-stage process.

Stage 1. During the first stage, applications will be initially screened by Department staff to determine whether the submitting party meets the eligibility requirements and whether the application contains all necessary information (including the three types of evidence required under section C) and meets the formatting requirements.

Stage 2. The second stage of review, to determine up to 10 semi-finalists, will be conducted by non-Departmental teams representing a broad range of teacher educators, practitioners (*e.g.*, mathematicians, mathematics educators, K–12 teachers, reading specialists), and policymakers (*e.g.*, superintendents, school board members, principals) who will evaluate the quality of the applications against the selection criteria and applicable performance levels.

Stage 3. In the third stage, non-Department expert teams (team members would differ from the reviewers involved in Stages 2) will conduct site visits to verify information presented in the semi-finalists' applications and, to the extent available, to collect additional information. These teams will draft site-visit reports of their findings.

Stage 4. During the fourth stage, a non-Departmental national awards panel (panel members will differ from the reviewers involved Stages 2 and 3) will review the semi-finalist applications and site visit reports. Panel members will then present final recommendations to the Department on which teacher preparation programs merit national recognition.

Stage 5. In the fifth and final stage, the Department will review data collected throughout the review process and select for national recognition no more than 5 applications of the highest quality. The Secretary intends to publicly honor and recognize these awardees at a national ceremony in Washington, DC.

Goals 2000: Educate America Act

The Goals 2000: Educate America Act (Goals 2000) focuses the Nation's education reform efforts on the eight National Education Goals and provides a framework for meeting them. Goals 2000 promotes new partnerships to strengthen schools and expands the Department's capacities for helping communities to exchange ideas and

obtain information needed to achieve the goals.

These eligibility and selection criteria address the National Education Goal that the Nation's teaching force will have the content knowledge and teaching skills needed to instruct all American students for the next century.

Intergovernmental Review

This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. One of the objectives of the Executive order is to foster an intergovernmental partnership and a strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

This document is intended to provide early notification of our specific plans and actions for this program.

Program Authority: 20 U.S.C. 8001.

Assessment and Collection of Regulatory Fees for Fiscal Year 2000; Proposed Rule

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[MD Docket No. 00–58; FCC 00–117]

Assessment and Collection of Regulatory Fees for Fiscal Year 2000

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission is proposing to revise its Schedule of Regulatory Fees in order to recover the amount of regulatory fees that Congress has required it to collect for fiscal year 2000. Section 9 of the Communications Act of 1934, as amended, provides for the annual assessment and collection of regulatory fees. For fiscal year 2000 sections 9(b)(2) and (3) provide for annual "Mandatory Adjustments" and "Permitted Amendments" to the Schedule of Regulatory Fees. These revisions will further the National Performance Review goals of reinventing Government by requiring beneficiaries of Commission services to pay for such services.

DATES: Comments are due on or before April 24, 2000, and reply comments are due on or before May 5, 2000.

FOR FURTHER INFORMATION CONTACT: Terry Johnson, Office of Managing Director at (202) 418–0445 or Roland Helvajian, Office of Managing Director at (202) 418–0444.

SUPPLEMENTARY INFORMATION:
Adopted: March 29, 2000; Released: April 3, 2000.

By the Commission:

I. Introduction

1. By this *Notice of Proposed Rulemaking*, the Commission commences a proceeding to revise its Schedule of Regulatory Fees in order to collect the amount of regulatory fees that Congress, pursuant to section 9(a) of the Communications Act, as amended, has required it to collect for Fiscal Year (FY) 2000.[1]

2. Congress has required that we collect $185,754,000 through regulatory fees in order to recover the costs of our enforcement, policy and rulemaking, international and user information activities for FY 2000.[2] This amount is $13,231,000 or approximately 7.67% more than the amount that Congress designated for recovery through regulatory fees for FY 1999.[3] Thus, we are proposing to revise our fees in order to collect the increased amount that Congress has specified. Additionally, we propose to amend the Schedule in order to simplify and streamline it.[4]

3. In proposing to revise our fees, we adjusted the payment units and revenue requirement for each service subject to a fee, consistent with sections 159(b)(2) and (3). In addition, we are proposing changes to the fees pursuant to public interest considerations. The current Schedule of Regulatory Fees is set forth in §§ 1.1152 through 1.1156 of the Commission's rules.[5]

II. Background

4. Section 9(a) of the Communications Act of 1934, as amended, authorizes the Commission to assess and collect

[1] 47 U.S.C. 159(a).

[2] Public Law 105–277 and 47 U.S.C. 159(a)(2).

[3] *Assessment and Collection of Regulatory Fees for Fiscal Year 1999*, FCC 98–200, released June 18, 1999, 64 FR 35831 (Jul. 1, 1999).

[4] 47 U.S.C. 159(b)(3).

[5] 47 CFR 1.1152 through 1.1156.

annual regulatory fees to recover the costs, as determined annually by Congress, that it incurs in carrying out enforcement, policy and rulemaking, international, and user information activities.[6] See Attachment G for a description of these activities. In our *FY 1994 Fee Order*,[7] we adopted the Schedule of Regulatory Fees that Congress established, and we prescribed rules to govern payment of the fees, as required by Congress.[8] Subsequently, we modified the fee Schedule to increase the fees in accordance with the amounts Congress required us to collect in each succeeding fiscal year. We also amended the rules governing our regulatory fee program based upon our experience administering the program in prior years.[9]

5. As noted, for FY 1994 we adopted the Schedule of Regulatory Fees established in section 9(g) of the Act. For fiscal years after FY 1994, however, sections 9(b)(2) and (3), respectively, provide for "Mandatory Adjustments" and "Permitted Amendments" to the Schedule of Regulatory Fees.[10] Section 9(b)(2), entitled "Mandatory Adjustments," requires that we revise the Schedule of Regulatory Fees to reflect the amount that Congress requires us to recover through regulatory fees.[11]

6. Section 9(b)(3), entitled "Permitted Amendments," requires that we determine annually whether additional adjustments to the fees are warranted, taking into account factors that are in the public interest, as well as issues that are reasonably related to the payer of the fee. These amendments permit us to "add, delete, or reclassify services in the Schedule to reflect additions, deletions or changes in the nature of its services."[12]

7. Section 9(i) requires that we develop accounting systems necessary to adjust our fees pursuant to changes in the costs of regulation of various services that are subject to a fee, and for other purposes.[13] For FY 1997, we relied for the first time on cost accounting data to identify our regulatory costs and to develop our FY 1997 fees based upon these costs. Also, for FY 1997, we limited the increase in the amount of the fee for any service in order to phase in our reliance on cost-based fees for those services whose revenue requirement would be more than 25 percent above the revenue requirement which would have resulted from the "mandatory adjustments" to the FY 1997 fees without incorporation of costs. This methodology, which we continued to use for FY 1998, enabled us to develop regulatory fees which we believed would be more reflective of our costs of regulation, and allowed us to make revisions to our fees based on the fullest extent possible, while still consistent with the public interest, on the actual costs of regulating those services that are subject to a fee. However, we found that developing a regulatory fee structure based on cost information did not produce the desired results. We were anticipating that our regulatory costs would level off or, perhaps, decline causing these adjustments to decrease from the 25 percent towards zero. Since our regulatory costs have continued to rise, this methodology was discontinued. Therefore, we chose to base the FY 1999 fees only on the basis of "Mandatory Adjustments". Finally, section 9(b)(4)(B) requires us to notify Congress of any permitted amendments 90 days before those amendments go into effect.[14]

[13] 47 U.S.C. 159(i).

III. Discussion

A. Summary of FY 2000 Fee Methodology

8. As noted, Congress has required that the Commission recover $185,754,000 for FY 2000 through the collection of regulatory fees, representing the costs applicable to our enforcement, policy and rulemaking, international, and user information activities.[15]

9. In developing our proposed FY 2000 fee schedule, we determined that we should continue to use the same general methodology for "Mandatory Adjustments" to the Fee Schedule that we used in developing the FY 1999 fee schedule because our regulatory costs continue to rise, and using cost information to determine a regulatory fee schedule does not produce the desired result of collecting the amount required by Congress. Therefore, we estimated the number of payment units[16] for FY 2000 in order to determine the aggregate amount of revenue we would collect without any revision to our FY 1999 fees. Then we compared this revenue amount to the $185,754,000 that Congress has required us to collect in FY 2000 and pro-rated the difference among all the existing fee categories.

10. Once we established our tentative FY 2000 fees, we evaluated proposals made by Commission staff concerning "Permitted Amendments" to the Fee Schedule and to our collection procedures. These proposals are discussed in paragraphs 15–19 and are factored into our proposed FY 2000 Schedule of Regulatory Fees, set forth in Attachment D.

11. Finally, we have incorporated, as Attachment F, proposed Guidance containing detailed descriptions of each fee category, information on the individual or entity responsible for paying a particular fee and other critical information designed to assist potential fee payers in determining the extent of their fee liability, if any, for FY 2000.[17] In the following paragraphs, we describe in greater detail our proposed methodology for establishing our FY 2000 regulatory fees.

B. Development of FY 2000 Fees

i. Adjustment of Payment Units

12. In calculating FY 2000 regulatory fees for each service, we adjusted the estimated payment units for each service because payment units for many services have changed substantially since we adopted our FY 1999 fees. We obtained our estimated payment units through a variety of means, including our licensee data bases, actual prior year payment records, and industry and trade group projections. Whenever possible, we verified these estimates from multiple sources to ensure the accuracy of these estimates. Attachment B provides a summary of how revised payment units were determined for each fee category.[18]

ii. Calculation of Revenue Requirements

13. We next multiplied the revised payment units for each service by the FY 1999 fees for each category to determine how much revenue we would collect without any change to the FY 1999 Schedule of Regulatory Fees. The

[14] 47 U.S.C. 159(b)(4)(B).
[15] 47 U.S.C. 159(a).
[16] Payment units are the number of subscribers, mobile units, pagers, cellular telephones, licenses, call signs, adjusted gross revenue dollars, etc. which represent the base volumes against which fee amounts are calculated.

[17] We also will incorporate a similar Attachment in the *Report and Order* concluding this rulemaking. That Attachment will contain updated information concerning any changes made to the proposed fees adopted by the *Report and Order*.
[18] It is important to also note that Congress' required revenue increase in regulatory fee payments of approximately 7.67 percent in FY 2000 will not fall equally on all payers because payment units have changed in several services. When the number of payment units in a service increase from one year to another, fees do not have to rise as much as they would if payment units had decreased or remained stable. Declining payment units have the opposite effect on fees.

amount of revenue which we would collect without changes to the Fee Schedule is approximately $191.6 million. This amount is approximately $5.9 million more than the amount the Commission is required to collect in FY 2000. We then adjusted the revenue requirements for each category on a proportional basis, consistent with section 9(b)(2) of the Act, to obtain an estimate of the revenue requirements for each fee category so that the Commission could collect $185,754,000 as required by Congress. Attachment C provides detailed calculations showing how we determined the revised revenue amounts to be raised for each service.

iii. Recalculation of Fees

14. Once we determined the revenue requirement for each service and class of licensee, we divided the revenue requirement by the number of estimated payment units (and by the license term, if applicable, for "small" fees) to obtain actual fee amounts for each fee category. These calculated fee amounts were then rounded in accordance with section 9(b)(3) of the Act. See Attachment C.

iv. Proposed Changes to Fee Schedule

15. We examined the results of our calculations to determine if further adjustments of the fees and/or changes to payment procedures were warranted based upon the public interest and other criteria established in 47 U.S.C. 159(b)(3).[19] As a result of this review, we are proposing the following "Permitted Amendments" to our Fee Schedule:

a. INTELSAT Satellites

16. The Commission, relying on portions of the legislative history of section 9, previously concluded that Comsat was exempt from section 9 fees for its INTELSAT space stations. Assessment and Collection of Regulatory Fees for Fiscal Year 1998, 13 FCC Rcd 19820 (1998), 63 FR 35847 (July 1, 1998); Assessment and Collection of Regulatory Fees for Fiscal Year 1997, 12 FCC Rcd 17161 (1997), 62 FR 37408 (July 11, 1997). In *PanAmSat Corp.* v. *FCC*, 198 F.3d 890 (D.C.Cir.1999), the court found that neither the statute itself nor the legislative history relied upon by the Commission was conclusive on the question of Comsat's liability for section 9 fees in these circumstances. It remanded the issue to the Commission for reconsideration of Comsat's exemption.[20]

17. On March 17, 2000 Congress enacted the Open Market Reorganization for the Betterment of International Telecommunications Act (the ORBIT Act).[21] Section 641[c] of the ORBIT Act provides:

"[c] PARITY of TREATMENT—Notwithstanding any other law or executive agreement, the Commission shall have the authority to impose similar regulatory fees on the United States signatory which it imposes on other entities providing similar services."[22]

In light of this statutory language, it is clear that, for FY 2000, Comsat as the United States signatory to INTELSAT is subject to regulatory fees.[23] We request comment on how we should implement this provision to achieve parity of treatment between Comsat and satellite operators that are subject to regulatory fees. Specifically, we request comment on whether for the year 2000 we should assess regulatory fees for all space stations in geostationary orbit, including satellites that are the subject of Comsat's activities, in the amount of $94,650 per satellite. Such comments also may address how the nature of Comsat services via INTELSAT may provide a basis for a different fee and state what type of fee would be appropriate to achieve parity of treatment.[24]

b. Interstate Telephone Service Providers

18. The Commission is required under the Communications Act of 1934, as amended,[25] to establish procedures that will finance interstate telecommunications relay services (TRS), universal service support mechanisms, administration of the North American Numbering Plan (NANPA), and shared costs of the local number portability (LNPA) program. In a series of separate proceedings, the Commission has already established procedures that permits the administrators of these programs to collect contributions from all providers of telecommunications services in support of the above mandates.[26] In 1999, as part of its paperwork streamlining efforts, the Commission amended its rules and required contributors to file only a single form FCC Form 499–A, Telecommunications Reporting Worksheet, and eliminated FCC Form 431, TRS Fund Worksheet.[27] Previously, Form 431, TRS Fund Worksheet, was used to obtain base revenue data from which telephone services regulatory fees were calculated. Because of this form change, it is no longer feasible to obtain base telephone services revenue data using adjusted gross interstate revenues as derived from data previously provided on FCC Form 431, TRS Fund Worksheet. Therefore, beginning in FY 2000, we are proposing that the interstate telephone services regulatory fee be derived from interstate and international end-user revenues data submitted on FCC Form 499–A, Telecommunications Reporting Worksheet, rather than from data provided on Form 431, TRS Fund Worksheet. A copy of the form and instructions can be downloaded at: <*http://www.fcc.gov/formpage.html*>.

19. All providers of telecommunications services within the United States, with very limited exceptions, must file an FCC Form 499–A, Telecommunications Reporting Worksheet. For this filing, the United States is defined as the contiguous United States, Alaska, Hawaii, American Samoa, Baker Island, Guam, Howland Island, Jarvis Island, Johnston Atoll, Kingman Reef, Midway Island, Navassa Island, the Northern Mariana Islands, Palmyra, Puerto Rico, the U.S. Virgin Islands, and Wake Island. Each legal entity that provides interstate telecommunications service for a fee, including each affiliate or subsidiary of an entity, must complete and file separately a copy of the Telecommunications Reporting Worksheet.

20. For purposes of determining who must file Form 499–A, the term "telecommunications" means the transmission, between or among points specified by the user, of information of the user's choosing, without change in the form or content of the information as sent and received. For the purpose of

[19] In FY 1997 and FY 1998 we limited increases to 25%. For FY 1999 and FY 2000, none of the proposed fee increases exceed 25%.

[20] As directed by the court, the Commission will consider the section 9 satellite fees for FY 1998; however, that consideration will be separate from this proceeding.

[21] Public Law 106–180, 114 Stat. 48 (2000).

[22] Comsat is the United States Signatory to INTELSAT.

[23] As directed by the court, the Commission will also consider the Section 9 fees for FY 1998; however, that consideration will be separate from this proceeding.

[24] Note that without the INTELSAT satellites, the fee per satellite would be $126,525.

[25] 47 U.S.C. 151, 225, 251, 254.

[26] These contributions are separate and apart from regulatory fees collected to fund the Commission's operations.

[27] *1998 Biennial Regulatory Review—Streamlined Contributor Reporting Requirements Associated with Administration of Telecommunications Relay Services, North American Numbering Plan, Local Number Portability, and Universal Service Support Mechanisms*, Report and Order, FCC 99–175, CC Docket No. 98–171 (rel. July 14, 1999), 64 FR 41320 (July 30, 1999)(*Contributor Reporting Requirements Order*).

filing the Telecommunication Reporting Worksheet, the term "interstate telecommunications" includes, but is not limited to, the following types of services: wireless telephony including cellular and personal communications services (PCS); paging and messaging services; dispatch services; mobile radio services; operator services; access to interexchange service; special access; wide area telecommunications services (WATS); subscriber toll-free services; 900 services; message telephone services (MTS); private line; telex; telegraph; video services; satellite services; and resale services. For example, all local exchange carriers provide access services and, therefore, provide interstate telecommunications. Included are entities that offer interstate telecommunications services for a fee to the public, even if only a narrow or limited class of users could use the services. Also included are entities that provide interstate telecommunications services to entities other than themselves for a fee on a private, contractual basis. In addition, owners of pay telephones, sometimes referred to as "pay telephone aggregators," must file the worksheet. Most telecommunications carriers must file the worksheet even if they qualify for the *de minimis* exemption under the commission's rules for universal service.[28]

21. With the introduction of a new form, FCC Form 499–A, it is no longer feasible to base the interstate telephone services regulatory fee on the adjusted gross interstate revenues because this data was derived from a previously used form (FCC 431) to contribute to the Telecommunication Relay Services Fund. Therefore, beginning in FY 2000, we are proposing that the interstate and international telephone services regulatory fee be derived from interstate and international end-user revenues as submitted by providers on FCC Form 499–A, Telecommunications Reporting Worksheet, as part of the telecommunications provider reporting requirements. The following providers are exempt from paying the interstate telephone service provider regulatory fees: interstate service providers that have mobile service or satellite service revenue, but no local or toll service;[29] government entities within the meaning of the term 47 CFR 1.1162; and carriers whose payment obligation would be less than $10.[30] Note, the interstate telephone service provider fee is based on interstate and international end-user revenues for local and most toll services only. Filers are not allowed to deduct any expenses from subject interstate and international end-user revenues.

C. Procedures for Payment of Regulatory Fees

22. Generally, we propose to retain the procedures that we have established for the payment of regulatory fees. Section 9(f) requires that we permit "payment by installments in the case of fees in large amounts, and in the case of small amounts, shall require the payment of the fee in advance for a number of years not to exceed the term of the license held by the payer." See 47 U.S.C. 159(f)(1). Consistent with section 9(f), we are again proposing to establish three categories of fee payments, based upon the category of service for which the fee payment is due and the amount of the fee to be paid. The fee categories are (1) "standard" fees, (2) "large" fees, and (3) "small" fees.

i. Annual Payments of Standard Fees

23. As we have in the past, we are proposing to treat regulatory fee payments by certain licensees as "standard fees" which are those regulatory fees that are payable in full on an annual basis. Payers of standard fees are not required to make advance payments for their full license term and are not eligible for installment payments. All standard fees are payable in full on the date we establish for payment of fees in their regulatory fee category. The payment dates for each regulatory fee category will be announced either in the *Report and Order* terminating this proceeding or by public notice in the **Federal Register** pursuant to authority delegated to the Managing Director.

ii. Installment Payments for Large Fees

24. While we are mindful that time constraints may preclude an opportunity for installment payments, we propose that regulatees in any category of service with a liability of $12,000 or more be eligible to make installment payments and that eligibility for installment payments be based upon the amount of either a single regulatory fee payment or combination of fee payments by the same licensee or regulatee. We propose that regulatees eligible to make installment payments may submit their required fees in two equal payments (on dates to be announced) or, in the alternative, in a single payment on the date that their final installment payment is due. Due to statutory constraints concerning notification to Congress prior to actual collection of the fees, however, it is unlikely that there will be sufficient time for installment payments, and that regulatees eligible to make installment payments will be required to pay these fees on the last date that fee payments may be submitted. The dates for installment payments, or a single payment, will be announced either in the *Report and Order* terminating this proceeding or by public notice published in the **Federal Register** pursuant to authority delegated to the Managing Director.

iii. Advance Payments of Small Fees

25. As we have in the past, we are proposing to treat regulatory fee payments by certain licensees as "small" fees subject to advance payment consistent with the requirements of section 9(f)(2). We propose that advance payments will be required from licensees of those services that we decided would be subject to advance payments in our FY 1994 *Report and Order*, and to those additional payers set forth herein.[31] We are also proposing that payers of advance fees will submit the entire fee due for the full term of their licenses when filing their initial, renewal, or reinstatement application. Regulatees subject to a payment of small fees shall pay the amount due for the current fiscal year multiplied by the number of years in the term of their requested license. In the event that the required fee is adjusted following their payment of the fee, the payer would not be subject to the payment of a new fee until filing an application for renewal or reinstatement of the license. Thus, payment for the full license term would be made based upon the regulatory fee applicable at the time the application is filed. The effective date for payment of small fees established in this proceeding will be announced in our *Report and Order* terminating this proceeding or by public notice published in the **Federal Register** pursuant to authority delegated to the Managing Director.

iv. Minimum Fee Payment Liability

26. As we have in the past, we are proposing that regulatees whose total regulatory fee liability, including all categories of fees for which payment is due by an entity, amounts to less than

[28] 47 CFR 54.708.

[29] However, these service providers may be subject to payment of regulatory fees under other categories, *e.g.* space stations.

[30] See 47 U.S.C. 159(h); *see also* para 29, *infra*.

[31] Applicants for new, renewal and reinstatement licenses in the following services will be required to pay their regulatory fees in advance: Land Mobile Services, Microwave Services, Marine (Ship) Service, Marine (Coast) Service, Private Land Mobile (Other) Services, Aviation (Aircraft) Service, Aviation (Ground) Service, General Mobile Radio Service (GMRS), 218–219 MHz Service (if any applications should be filed), Rural Radio Service, and Amateur Vanity Call Signs.

$10 will be exempted from fee payment in FY 2000.

v. Standard Fee Calculations and Payment Dates

27. As noted, the time for payment of standard fees and any installment payments will be announced in our *Report and Order* terminating this proceeding or will be published in the **Federal Register** pursuant to authority delegated to the Managing Director. For licensees, permittees and holders of other authorizations in the Common Carrier, Mass Media, and Cable Services whose fees are not based on a subscriber, unit, or circuit count, we are proposing that fees be paid for any authorization issued on or before *October 1, 1999*. Regulatory fees are due and payable by the holder of record of the license or permit of the service as of October 1, 1999. A pending change in the status of a license or permit that is not granted as of that date is not effective, and the fee is based on the classification that existed on that date. Where a license or authorization is transferred or assigned after October 1, 1999, the fee shall be paid by the licensee or holder of the authorization on the date that the payment is due.

28. In the case of regulatees whose fees are based upon a subscriber, unit or circuit count, the number of a regulatee's' subscribers, units or circuits on *December 31, 1999*, will be used to calculate the fee payment. [32] Regulatory fees are due and payable by the holder of record of the license or permit of the service as of December 31, 1999. A pending change in the status of a license or permit that is not granted as of that date is not effective, and the fee is based on the classification that existed on that date. Where a license or authorization is transferred or assigned after December 31, 1999, the fee shall be paid by the licensee or holder of the authorization on the date that the payment is due.

D. Schedule of Regulatory Fees

29. The Commission's proposed Schedule of Regulatory Fees for FY 2000 is contained in Attachment D of this *NPRM*.

[32] Cable system operators are to compute their subscribers as follows: Number of single family dwellings + number of individual households in multiple dwelling unit (apartments, condominiums, mobile home parks, etc.) paying at the basic subscriber rate + bulk rate customers + courtesy and free service. **Note:** Bulk-Rate Customers = Total annual bulk-rate charge divided by basic annual subscription rate for individual households. Cable system operators may base their count on "a typical day in the last full week" of December 1999, rather than on a count as of December 31, 1999.

IV. Procedural Matters

A. Comment Period and Procedures

30. Pursuant to §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments on or before April 24, 2000, and reply comments on or before May 5, 2000. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS) or by filing paper copies.[33]

31. Comments filed through the ECFS can be sent as an electronic file via the Internet to <http://www.fcc.gov/e-file/ecfs.html>. Generally, only one copy of an electronic submission must be filed. However, if multiple docket or rulemaking numbers appear in the caption of this proceeding, commenters must transmit one electronic copy of the comments for each docket or rulemaking number referenced in the caption. In completing the transmittal screen, commenters should include their full name, Postal Service mailing address, and the applicable docket or rulemaking number. Parties may also submit an electronic comment by e-mail via Internet. To get filing instructions for e-mail comments, commenters should send an e-mail to ecfs@fcc.gov, and should include the following words in the body of the message, "get form <your e-mail address.>" A sample form and directions will be sent in reply.

32. Parties who choose to file by paper must file an original and four copies of each filing. If more than one docket or rulemaking number appear in the caption of this proceeding, commenters must submit two additional copies for each additional docket or rulemaking number. All filings must be sent to the Commission's Secretary, Magalie Roman Salas, Office of the Secretary, Federal Communications Commission, 445 12th Street SW., TW–A325, Washington, DC 20554.

33. Parties who choose to file by paper should also submit their comments on diskette. These diskettes should be submitted to: Terry Johnson, Office of Managing Director, Federal Communications Commission, 445 12th Street, SW., 1–C807, Washington, DC 20554. Such a submission should be on a 3.5 inch diskette formatted in an IBM compatible format using Microsoft ™ Word 97 for Windows or compatible software. The diskette should be accompanied by a cover letter and should be submitted in "read only" mode. The diskette should be clearly labeled with the commenter's name, proceeding (including the lead docket number in this case MD Docket No. 00–58, type of pleading (comment or reply comment), date of submission, and the name of the electronic file on the diskette. The label should also include the following phrase "Disk Copy—Not an Original." Each diskette should contain only one party's pleadings, preferably in a single electronic file. In addition, commenters must send diskette copies to the Commission's copy contractor, International Transcription Service, Inc., 1231 20th Street NW., Washington, DC 20036.

Documents filed in this proceeding will be available for public inspection during regular business hours in the FCC Reference Center, of the Federal Communications Commission, Room CY–A257, 445 12th Street SW., Washington, DC 20554, and will be placed on the Commission's Internet Home Page http://www.fcc.gov.

[33] *Electronic Filing of Documents in Rulemaking Proceedings*, 63 FR 24121 (1998).

B. Ex Parte Rules

34. This is a permit-but-disclosed notice and comment rulemaking proceeding. *Ex parte* presentations are permitted, except during the Sunshine Agenda period, provided they are disclosed pursuant to the Commission's rules.[34]

C. Initial Regulatory Flexibility Analysis

35. As required by the Regulatory Flexibility Act,[35] the Commission has prepared an Initial Regulatory Flexibility Analysis (IRFA) of the possible impact on small entities of the proposals suggested in this document. The IRFA is set forth as Attachment A. Written public comments are requested with respect to the IRFA. These comments must be filed in accordance with the same filing deadlines for comments on the rest of the *NPRM*, and must have a separate and distinct heading, designating the comments as responses to the IRFA. The Consumer Information Bureau, Reference Information Center, shall send a copy of this *NPRM*, including the IRFA, to the Chief Counsel for Advocacy of the Small Business Administration, in accordance with the Regulatory Flexibility Act.

D. Authority and Further Information

36. Authority for this proceeding is contained in sections 4(i) and (j), 9, and 303(r) of the Communications Act of 1934, as amended.[36] It is ordered that this *NPRM* is adopted. It is further ordered that the Commission's Consumer Information Bureau, Reference Information Center, shall

[34] 47 CFR 1.1202, 1.1203 and 1026(a).

[35] See 5 U.S.C. 603.

[36] 47 U.S.C. 154(i)–(j), 159, & 303(r).

send a copy of this *NPRM*, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

37. Further information about this proceeding may be obtained by contacting the Fees Hotline at (202) 418–0192.

Federal Communications Commission.

Magalie Roman Salas,

Secretary.

Attachment A: Initial Regulatory Flexibility Analysis

1. As required by the Regulatory Flexibility Act (RFA),[37] the Commission has prepared this Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on small entities by the policies and rules proposed in the present *Notice of Proposed Rulemaking, In the Matter of Assessment and Collection of Regulatory Fees for Fiscal Year 2000.* Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments on the IRFA provided in paragraph 33. The Commission will send a copy of the *NPRM*, including the IRFA, to the Chief Counsel for Advocacy of the Small Business Administration.[38] In addition, the *NPRM* and IRFA (or summaries thereof) will be published in the **Federal Register**.[39]

I. Need for, and Objectives of, the Proposed Rules

2. This rulemaking proceeding is initiated to obtain comments concerning the Commission's proposed amendment of its Schedule of Regulatory Fees. For Fiscal Year 2000, we intend to collect regulatory fees in the amount of $185,754,000, the amount that Congress has required the Commission to recover. The Commission seeks to collect the necessary amount through its proposed revised fees, as contained in the attached Schedule of Regulatory Fees, in the most efficient manner possible and without undue burden on the public.

II. Legal Basis

3. This action, including publication of proposed rules, is authorized under sections (4)(i) and (j), 9, and 303(r) of the Communications Act of 1934, as amended.[40]

[37] 5 U.S.C. 603. The RFA, 5 U.S.C. 601 *et. seq.* has been amended by the Contract With America Advancement Act of 1996, Public Law No. 104–121, 110 Stat. 847 (1996) (CWAAA). Title II of the CWAAA is the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA).

[38] 5 U.S.C. 603(a).

[39] *Id.*

[40] 47 U.S.C. 154(i) and (j), 159, and 303(r).

III. Description and Estimate of the Number of Small Entities to Which the Proposed Rules Will Apply

4. The RFA directs agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the proposed rules, if adopted.[41] The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction."[42] In addition, the term "small business" has the same meaning as the term "small business concern" under the Small Business Act.[43] A small business concern is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).[44] A small organization is generally "any not-for-profit enterprise which is independently owned and operated and is not dominant in its field."[45] Nationwide, as of 1992, there were approximately 275,801 small organizations.[46] "Small governmental jurisdiction"[47] generally means "governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than 50,000."[48] As of 1992, there were approximately 85,006 such jurisdictions in the United States.[49] This number includes 38,978 counties, cities, and towns; of these, 37,566, or 96 percent, have populations of fewer than 50,000.[50] The Census Bureau estimates that this ratio is approximately accurate for all governmental entities. Thus, of the 85,006 governmental entities, we estimate that 81,600 (96 percent) are small entities. Below, we further describe and estimate the number of small entity licensees and regulatees that may be affected by the proposed rules, if adopted.

[41] 5 U.S.C. 603(b)(3).

[42] *Id.* 601(6).

[43] 5 U.S.C. 601(3) (incorporating by reference the definition of "small business concern" in 15 U.S.C. 632). Pursuant to the RFA, the statutory definition of a small business applies "unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the activities of the agency and publishes such definition(s) in the **Federal Register**." 5 U.S.C. 601(3).

Cable Services or Systems

5. The SBA has developed a definition of small entities for cable and other pay television services, which includes all such companies generating $11 million or less in revenue annually.[51] This definition includes cable systems operators, closed circuit television services, direct broadcast satellite services, multipoint distribution systems, satellite master antenna systems and subscription television services. According to the Census Bureau data from 1992, there were 1,788 total cable and other pay television services and 1,423 had less than $11 million in revenue.[52]

6. The Commission has developed its own definition of a small cable system operator for purposes of rate regulation. Under the Commission's rules, a "small cable company" is one serving fewer than 400,000 subscribers nationwide.[53] Based on our most recent information, we estimate that there were 1,439 cable operators that qualified as small cable system operators at the end of 1995.[54] Since then, some of those companies may have grown to serve over 400,000 subscribers, and others may have been involved in transactions that caused them to be combined with other cable operators. Consequently, we estimate that there are fewer than 1,439 small entity cable system operators.

7. The Communications Act also contains a definition of a small cable system operator, which is "a cable operator that, directly or through an affiliate, serves in the aggregate fewer than 1 percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed $250,000,000."[55] The Commission has determined that there are 66,690,000 subscribers in the United States. Therefore, we found that an operator serving fewer than 666,900 subscribers shall be deemed a small operator, if its annual revenues, when combined with

[51] 13 CFR 121.201, SIC code 4841.

[52] *1992 Economic Census Industry and Enterprise Receipts Size Report*, Table 2D, SIC code 4841 (U.S. Bureau of the Census data under contract to the Office of Advocacy of the U.S. Small Business Administration).

[53] 47 CFR 76.901(e). The Commission developed this definition based on its determination that a small cable system operator is one with annual revenues of $100 million or less. *Implementation of Sections of the 1992 Cable Act: Rate Regulation, Sixth Report and Order and Eleventh Order on Reconsideration*, 10 FCC Rcd 7393 (1995), 60 FR 10534 (Feb. 27, 1995).

[54] Paul Kagan Associates, Inc., *Cable TV Investor*, Feb. 29, 1996 (based on figures for Dec. 30, 1995).

[55] 47 U.S.C. 543(m)(2).

the total annual revenues of all of its affiliates, do not exceed $250 million in the aggregate.[56] Based on available data, we find that the number of cable operators serving 666,900 subscribers or less totals 1,450.[57] We do not request nor do we collect information concerning whether cable system operators are affiliated with entities whose gross annual revenues exceed $250,000,000,[58] and thus are unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act.

8. *Other Pay Services.* Other pay television services are also classified under Standard Industrial Classification (SIC) 4841, which includes cable systems operators, closed circuit television services, direct broadcast satellite services (DBS),[59] multipoint distribution systems (MDS),[60] satellite master antenna systems (SMATV), and subscription television services.

Common Carrier Services and Related Entities

9. The most reliable source of information regarding the total numbers of certain common carrier and related providers nationwide, as well as the number of commercial wireless entities, appears to be data the Commission publishes in its *Trends in Telephone Service* report.[61] However, in a recent news release, the Commission indicated that there are 4,144 interstate carriers.[62] These carriers include, *inter alia,* local exchange carriers, wireline carriers and service providers, interexchange carriers, competitive access providers, operator service providers, pay telephone operators, providers of telephone service, providers of telephone exchange service, and resellers.

10. The SBA has defined establishments engaged in providing "Radiotelephone Communications" and "Telephone Communications, Except Radiotelephone" to be small businesses when they have no more than 1,500 employees.[63] Below, we discuss the total estimated number of telephone companies falling within the two categories and the number of small businesses in each, and we then attempt to refine further those estimates to correspond with the categories of telephone companies that are commonly used under our rules.

11. We have included small incumbent LECs in this present RFA analysis. As noted above, a "small business" under the RFA is one that, inter alia, meets the pertinent small business size standard (*e.g.,* a telephone communications business having 1,500 or fewer employees), and "is not dominant in its field of operation."[64] The SBA's Office of Advocacy contends that, for RFA purposes, small incumbent LECs are not dominant in their field of operation because any such dominance is not "national" in scope.[65] We have therefore included small incumbent LECs in this RFA analysis, although we emphasize that this RFA action has no effect on FCC analyses and determinations in other, non-RFA contexts.

12. *Total Number of Telephone Companies Affected.* The U.S. Bureau of the Census ("Census Bureau") reports that, at the end of 1992, there were 3,497 firms engaged in providing telephone services, as defined therein, for at least one year.[66] This number contains a variety of different categories of carriers, including local exchange carriers, interexchange carriers, competitive access providers, cellular carriers, mobile service carriers, operator service providers, pay telephone operators, covered specialized mobile radio providers, and resellers. It seems certain that some of these 3,497 telephone service firms may not qualify as small entities or small ILECs because they are not "independently owned and operated."[67] For example, a PCS provider that is affiliated with an interexchange carrier having more than 1,500 employees would not meet the definition of a small business. It is reasonable to conclude that fewer than 3,497 telephone service firms are small entity telephone service firms or small ILECs that may be affected by the proposed rules, if adopted.

13. *Wireline Carriers and Service Providers.* The SBA has developed a definition of small entities for telephone communications companies except radiotelephone (wireless) companies. The Census Bureau reports that there were 2,321 such telephone companies in operation for at least one year at the end of 1992.[68] According to the SBA's definition, a small business telephone company other than a radiotelephone company is one employing no more than 1,500 persons.[69] All but 26 of the 2,321 non-radiotelephone companies listed by the Census Bureau were reported to have fewer than 1,000 employees. Thus, even if all 26 of those companies had more than 1,500 employees, there would still be 2,295 non-radiotelephone companies that might qualify as small entities or small ILECs. We do not have data specifying the number of these carriers that are not independently owned and operated, and thus are unable at this time to estimate with greater precision the number of wireline carriers and service providers that would qualify as small business concerns under the SBA's definition. Consequently, we estimate that fewer than 2,295 small telephone communications companies other than radiotelephone companies are small entities or small ILECs that may be affected by the proposed rules, if adopted.

14. *Local Exchange Carriers.* Neither the Commission nor the SBA has developed a definition for small providers of local exchange services (LECs). The closest applicable definition under the SBA rules is for telephone communications companies other than radiotelephone (wireless) companies.[70] According to the most recent *Telecommunications Industry Revenue* data, 1,348 incumbent carriers reported that they were engaged in the provision

[64] 5 U.S.C. 601(3).

[65] Letter from Jere W. Glover, Chief Counsel for Advocacy, SBA, to William E. Kennard, Chairman, FCC (May 27, 1999). The Small Business Act contains a definition of "small business concern," which the RFA incorporates into its own definition of "small business." See 15 U.S.C. 632(a) (Small Business Act); 5 U.S.C. 601(3) (RFA). SBA regulations interpret "small business concern" to include the concept of dominance on a national basis. 13 CFR 121.102(b). Since 1996, out of an abundance of caution, the Commission has included small incumbent LECs in its regulatory flexibility analyses. See, e.g., Implementation of the Local Competition Provisions of the Telecommunications Act of 1996, CC Docket, 96–98, First Report and Order, 11 FCC Rcd 15499, 16144–45 (1996), 61 FR 45476 (Aug. 29, 1996).

[67] *See generally* 15 U.S.C. 632(a)(1).

[68] *1992 Census, supra,* at Firm Size 1–123.

[69] 13 CFR 121.201, SIC code 4813.

[70] *Id.*

of local exchange services.[71] We do not have data specifying the number of these carriers that are either dominant in their field of operations, are not independently owned and operated, or have more than 1,500 employees, and thus are unable at this time to estimate with greater precision the number of LECs that would qualify as small business concerns under the SBA's definition. Consequently, we estimate that fewer than 1,348 providers of local exchange service are small entities or small ILECs that may be affected by the proposed rules, if adopted.

15. *Interexchange Carriers.* Neither the Commission nor the SBA has developed a definition of small entities specifically applicable to providers of interexchange services (IXCs). The closest applicable definition under the SBA rules is for telephone communications companies other than radiotelephone (wireless) companies.[72] According to the most recent *Trends in Telephone Service* data, 171 carriers reported that they were engaged in the provision of interexchange services.[73] We do not have data specifying the number of these carriers that are not independently owned and operated or have more than 1,500 employees, and thus are unable at this time to estimate with greater precision the number of IXCs that would qualify as small business concerns under the SBA's definition. Consequently, we estimate that there are fewer than 171 small entity IXCs that may be affected by the proposed rules, if adopted.

16. *Competitive Access Providers.* Neither the Commission nor the SBA has developed a definition of small entities specifically applicable to competitive access services providers (CAPs). The closest applicable definition under the SBA rules is for telephone communications companies other than except radiotelephone (wireless) companies.[74] According to the most recent *Trends in Telephone Service* data, 212 CAP/CLECs carriers and 10 other LECs reported that they were engaged in the provision of competitive local exchange services.[75] We do not have data specifying the number of these carriers that are not independently owned and operated, or have more than 1,500 employees, and thus are unable at this time to estimate with greater precision the number of CAPs that would qualify as small business concerns under the SBA's definition. Consequently, we estimate that there are fewer than 212 small entity CAPs and 10 other LECs that may be affected by the proposed rules, if adopted.

17. *Operator Service Providers.* Neither the Commission nor the SBA has developed a definition of small entities specifically applicable to providers of operator services. The closest applicable definition under the SBA rules is for telephone communications companies other than radiotelephone (wireless) companies.[76] According to the most recent *Trends in Telephone Service* data, 24 carriers reported that they were engaged in the provision of operator services.[77] We do not have data specifying the number of these carriers that are not independently owned and operated or have more than 1,500 employees, and thus are unable at this time to estimate with greater precision the number of operator service providers that would qualify as small business concerns under the SBA's definition. Consequently, we estimate that there are fewer than 24 small entity operator service providers that may be affected by the proposed rules, if adopted.

18. *Pay Telephone Operators.* Neither the Commission nor the SBA has developed a definition of small entities specifically applicable to pay telephone operators. The closest applicable definition under SBA rules is for telephone communications companies other than radiotelephone (wireless) companies.[78] According to the most recent *Trends in Telephone Service* data, 615 carriers reported that they were engaged in the provision of pay telephone services.[79] We do not have data specifying the number of these carriers that are not independently owned and operated or have more than 1,500 employees, and thus are unable at this time to estimate with greater precision the number of pay telephone operators that would qualify as small business concerns under the SBA's definition. Consequently, we estimate that there are fewer than 615 small entity pay telephone operators that may be affected by the proposed rules, if adopted.

19. *Resellers (including debit card providers).* Neither the Commission nor the SBA has developed a definition of small entities specifically applicable to resellers. The closest applicable SBA definition for a reseller is a telephone communications company other than radiotelephone (wireless) companies.[80] According to the most recent *Trends in Telephone Service* data, 388 toll and 54 local entities reported that they were engaged in the resale of telephone service.[81] We do not have data specifying the number of these carriers that are not independently owned and operated or have more than 1,500 employees, and thus are unable at this time to estimate with greater precision the number of resellers that would qualify as small business concerns under the SBA's definition. Consequently, we estimate that there are fewer than 388 small toll entity resellers and 54 small local entity resellers that may be affected by the proposed rules, if adopted.

20. *Toll-Free 800 and 800-Like Service* Subscribers.[82] Neither the Commission nor the SBA has developed a definition of small entities specifically applicable to 800 and 800-like service ("toll free") subscribers. The most reliable source of information regarding the number of these service subscribers appears to be data the Commission collects on the 800, 888, and 877 numbers in use.[83] According to our most recent data, at the end of January 1999, the number of 800 numbers assigned was 7,692,955; the number of 888 numbers that had been assigned was 7,706,393; and the number of 877 numbers assigned was 1,946,538. We do not have data specifying the number of these subscribers that are not independently owned and operated or have more than 1,500 employees, and thus are unable at this time to estimate with greater precision the number of toll free subscribers that would qualify as small business concerns under the SBA's definition. Consequently, we estimate that there are fewer than 7,692,955 small entity 800 subscribers, fewer than 7,706,393 small entity 888 subscribers, and fewer than 1,946,538 small entity

877 subscribers may be affected by the proposed rules, if adopted.

INTERNATIONAL SERVICES

21. The Commission has not developed a definition of small entities applicable to licensees in the international services. Therefore, the applicable definition of small entity is generally the definition under the SBA rules applicable to Communications Services, Not Elsewhere Classified (NEC).[84] This definition provides that a small entity is expressed as one with $11.0 million or less in annual receipts.[85] According to the Census Bureau, there were a total of 848 communications services providers, NEC, in operation in 1992, and a total of 775 had annual receipts of less than $9.999 million.[86] The Census report does not provide more precise data.

22. *International Broadcast Stations.* Commission records show that there are 20 international broadcast station licensees. We do not request nor collect annual revenue information, and thus are unable to estimate the number of international broadcast licensees that would constitute a small business under the SBA definition. However, the Commission estimates that only six international broadcast stations are subject to regulatory fee payments.

23. *International Public Fixed Radio (Public and Control Stations).* There are 3 licensees in this service subject to payment of regulatory fees. We do not request nor collect annual revenue information, and thus are unable to estimate the number of international broadcast licensees that would constitute a small business under the SBA definition.

24. *Fixed Satellite Transmit/Receive Earth Stations.* There are approximately 2,679 earth station authorizations, a portion of which are Fixed Satellite Transmit/Receive Earth Stations. We do not request nor collect annual revenue information, and thus are unable to estimate the number of the earth stations that would constitute a small business under the SBA definition.

25. *Fixed Satellite Small Transmit/Receive Earth Stations.* There are approximately 2,679 earth station authorizations, a portion of which are Fixed Satellite Small Transmit/Receive Earth Stations. We do not request nor collect annual revenue information, and thus are unable to estimate the number of fixed satellite transmit/receive earth stations that would constitute a small business under the SBA definition.

26. *Fixed Satellite Very Small Aperture Terminal (VSAT) Systems.* These stations operate on a primary basis, and frequency coordination with terrestrial microwave systems is not required. Thus, a single "blanket" application may be filed for a specified number of small antennas and one or more hub stations. The Commission has processed 377 applications. We do not request nor collect annual revenue information, and thus are unable to estimate the number of VSAT systems that would constitute a small business under the SBA definition.

27. *Mobile Satellite Earth Stations.* There are 11 licensees. We do not request nor collect annual revenue information, and thus are unable to estimate the number of mobile satellite earth stations that would constitute a small business under the SBA definition.

28. *Radio Determination Satellite Earth Stations.* There are four licensees. We do not request nor collect annual revenue information, and thus are unable to estimate the number of radio determination satellite earth stations that would constitute a small business under the SBA definition.

29. *Space Stations (Geostationary).* Commission records reveal that there are 64 Geostationary Space Station licensees. We do not request nor collect annual revenue information, and thus are unable to estimate the number of geostationary space stations that would constitute a small business under the SBA definition.

30. *Space Stations (Non-Geostationary).* There are 12 Non-Geostationary Space Station licensees, of which only three systems are operational. We do not request nor collect annual revenue information, and thus are unable to estimate the number of non-geostationary space stations that would constitute a small business under the SBA definition.

31. *Direct Broadcast Satellites.* Because DBS provides subscription services, DBS falls within the SBA-recognized definition of "Cable and Other Pay Television Services."[87] This definition provides that a small entity is one with $11.0 million or less in annual receipts.[88] As of December 1996, there were eight DBS licensees. However, the Commission does not collect annual revenue data for DBS and, therefore, is unable to ascertain the number of small DBS licensees that would be impacted by these proposed rules. Although DBS service requires a great investment of capital for operation, there are several new entrants in this field that may not yet have generated $11 million in annual receipts, and therefore may be categorized as small businesses, if independently owned and operated.

Mass Media Services

32. *Commercial Radio and Television Services.* The proposed rules and policies will apply to television broadcasting licensees and radio broadcasting licensees.[89] The SBA defines a television broadcasting station that has $10.5 million or less in annual receipts as a small business.[90] Television broadcasting stations consist of establishments primarily engaged in broadcasting visual programs by television to the public, except cable and other pay television services.[91] Included in this industry are commercial, religious, educational, and other television stations.[92] Also included are establishments primarily engaged in television broadcasting and which produce taped television program materials.[93] Separate establishments primarily engaged in producing taped television program materials are

[84] An exception is the Direct Broadcast Satellite (DBS) Service, *infra.*

[87] 13 CFR 120.121, SIC code 4841.

[88] 13 CFR 121.201, SIC code 4841.

[89] While we tentatively believe that the SBA's definition of "small business" greatly overstates the number of radio and television broadcast stations that are small businesses and is not suitable for purposes of determining the impact of the proposals on small television and radio stations, for purposes of this *Notice* we utilize the SBA's definition in determining the number of small businesses to which the proposed rules would apply. We reserve the right to adopt, in the future, a more suitable definition of "small business" as applied to radio and television broadcast stations or other entities subject to the proposed rules in this *Notice,* and to consider further the issue of the number of small entities that are radio and television broadcasters or other small media entities. *See Report and Order in MM Docket No. 93–48 (Children's Television Programming),* 11 FCC Rcd 10660, 10737–38 (1996), 61 FR 43981 (Aug. 27, 1996), *citing* 5 U.S.C. 601(3).

[90] 13 CFR 121.201, SIC code 4833.

[91] Economics and Statistics Administration, Bureau of Census, U.S. Department of Commerce, *1992 Census of Transportation, Communications and Utilities, Establishment and Firm Size, Series UC92–S–1,* Appendix A–9 (1995) (*1992 Census, Series UC92–S–1*).

[92] *Id.; see* Executive Office of the President, Office of Management and Budget, *Standard Industrial Classification Manual* (1987), at 283, which describes "Television Broadcasting Stations" (SIC code 4833) as:

Establishments primarily engaged in broadcasting visual programs by television to the public, except cable and other pay television services. Included in this industry are commercial, religious, educational and other television stations. Also included here are establishments primarily engaged in television broadcasting and which produce taped television program materials.

[93] *1992 Census, Series UC92–S–1,* at Appendix A–9.

classified under another SIC number.[94] There were 1,509 television stations operating in the nation in 1992.[95] That number has remained fairly constant as indicated by the approximately 1,616 operating television broadcasting stations in the nation as of September 30, 1999.[96] For 1992,[97] the number of television stations that produced less than $10.0 million in revenue was 1,155 establishments.[98] Only commercial stations are subject to regulatory fees.

33. Additionally, the Small Business Administration defines a radio broadcasting station that has $5 million or less in annual receipts as a small business.[99] A radio broadcasting station is an establishment primarily engaged in broadcasting aural programs by radio to the public.[100] Included in this industry are commercial, religious, educational, and other radio stations.[101] Radio broadcasting stations, which primarily are engaged in, radio broadcasting and which produce radio program materials are similarly included.[102] However, radio stations which are separate establishments and are primarily engaged in producing radio program material are classified under another SIC number.[103] The 1992 Census indicates that 96 percent (5,861 of 6,127) radio station establishments produced less than $5 million in revenue in 1992.[104] Official Commission records indicate that 11,334 individual radio stations were operating in 1992.[105] As of September 30, 1999, Commission records indicate that 12,615 radio stations were operating, of which 7,832 were FM stations.[106] Only commercial stations are subject to regulatory fees.

34. Thus, the rules may affect approximately 1,616 full power television stations, approximately 1,200 of which are considered small businesses.[107] Additionally, the proposed rules will affect some 12,615 full power radio stations, approximately 11,670 of which are small businesses.[108] These estimates may overstate the number of small entities because the revenue figures on which they are based do not include or aggregate revenues from non-television or non-radio affiliated companies. There are also 2,194 low power television stations (LPTV).[109] Given the nature of this service, we will presume that all LPTV licensees qualify as small entities under the SBA definition.

Alternative Classification of Small Stations

35. An alternative way to classify small radio and television stations is by number of employees. The Commission currently applies a standard based on the number of employees in administering its Equal Employment Opportunity Rule (EEO) for broadcasting.[110] Thus, radio or television stations with fewer than five full-time employees are exempted from certain EEO reporting and record keeping requirements.[111] We estimate that the total number of broadcast stations with 4 or fewer employees is approximately 5,186, of which 340 are television stations.[112]

Auxiliary, Special Broadcast and Other Program Distribution Services

36. This service involves a variety of transmitters, generally used to relay broadcast programming to the public (through translator and booster stations) or within the program distribution chain (from a remote news gathering unit back to the station). The Commission has not developed a definition of small entities applicable to broadcast auxiliary licensees. Therefore, the applicable definitions of small entities are those, noted previously, under the SBA rules applicable to radio broadcasting stations and television broadcasting stations.[113]

37. There are currently 3,237 FM translators and boosters, and 2,964 TV translators.[114] The FCC does not collect financial information on any broadcast facility, and the Department of Commerce does not collect financial information on these auxiliary broadcast facilities. We believe, however, that most, if not all, of these auxiliary facilities could be classified as small businesses by themselves. We also recognize that most commercial translators and boosters are owned by a parent station which, in some cases, would be covered by the revenue definition of small business entity discussed above. These stations would likely have annual revenues that exceed the SBA maximum to be designated as a small business (either $5 million for a radio station or $10.5 million for a TV station). Furthermore, they do not meet the Small Business Act's definition of a "small business concern" because they are not independently owned and operated.[115]

38. *Multipoint Distribution Service (MDS).* This service involves a variety of transmitters, which are used to relay programming to the home or office, similar to that provided by cable television systems.[116] In connection with the 1996 MDS auction, the Commission defined small businesses as entities that had annual average gross revenues for the three preceding years

[104] The Census Bureau counts radio stations located at the same facility as one establishment. Therefore, each co-located AM/FM combination counts as one establishment.

[105] FCC News Release, No. 31327 (Jan. 13, 1993).

[106] FCC News Release, "Broadcast Station Totals as of September 30, 1999."

[107] We use the 77 percent figure of TV stations operating at less than $10 million for 1992 and apply it to the 1997 total of 1558 TV stations to arrive at 1,200 stations categorized as small businesses.

[108] We use the 96% figure of radio station establishments with less than $5 million revenue from the Census data and apply it to the 12,088 individual station count to arrive at 11,605 individual stations as small businesses.

[109] FCC News Release, No. 7033 (Mar. 6, 1997).

[110] The Commission's definition of a small broadcast station for purposes of applying its EEO rules was adopted prior to the requirement of approval by the SBA pursuant to section 3(a) of the Small Business Act, 15 U.S.C. 632(a), as amended by section 222 of the Small Business Credit and Business Opportunity Enhancement Act of 1992, Public Law 102–366, 222(b)(1), 106 Stat. 999 (1992), as further amended by the Small Business Administration Reauthorization and Amendments Act of 1994, Public Law 103–403, 301, 108 Stat. 4187 (1994). However, this definition was adopted after public notice and the opportunity for comment. *See Report and Order* in Docket No. 18244, 23 FCC 2d 430 (1970), 35 FR 8925 (Jun. 6, 1970).

[111] *See, e.g.*, 47 CFR 73.3612 (Requirement to file annual employment reports on Form 395 applies to licensees with five or more full-time employees). *See also, Review of the Commission's Broadcast and Cable Equal Employment Opportunity Rules and Policies and Termination of the EEO Streamlining Proceeding*, FCC 00–20, released February 2, 2000 ("*Review of EEO Rules*").

[115] 15 U.S.C. 632.

[116] For purposes of this item, MDS includes both the single channel Multipoint Distribution Service (MDS) and the Multichannel Multipoint Distribution Service (MMDS).

not in excess of $40 million.[117] This definition of a small entity in the context of MDS auctions has been approved by the SBA.[118] These stations were licensed prior to implementation of section 309(j) of the Communications Act of 1934, as amended.[119] Licenses for new MDS facilities are now awarded to auction winners in Basic Trading Areas (BTAs) and BTA-like areas.[120] The MDS auctions resulted in 67 successful bidders obtaining licensing opportunities for 493 BTAs. Of the 67 auction winners, 61 meet the definition of a small business. There are 2,050 MDS stations currently licensed. Thus, we conclude that there are 1,634 MDS providers that are small businesses as deemed by the SBA and the Commission's auction rules. It is estimated, however, that only 1,650 MDS licensees are subject to regulatory fees, and the number which are small businesses is unknown.

Wireless and Commercial Mobile Services

39. *Cellular Licensees.* Neither the Commission nor the SBA has developed a definition of small entities applicable to cellular licensees. Therefore, the applicable definition of small entity is the definition under the SBA rules applicable to radiotelephone (wireless) companies. This provides that a small entity is a radiotelephone company employing no more than 1,500 persons.[121] According to the Bureau of the Census, only twelve radiotelephone firms from a total of 1,178 such firms which operated during 1992 had 1,000 or more employees.[122] Therefore, even if all twelve of these firms were cellular telephone companies, nearly all cellular carriers were small businesses under the SBA's definition. In addition, we note that there are 1,758 cellular licenses; however, a cellular licensee may own several licenses. In addition, according to the most recent *Telecommunications Industry Revenue* data, 808 carriers reported that they were engaged in the provision of either cellular service or Personal Communications Service (PCS) services, which are placed together in the data.[123] We do not have data specifying the number of these carriers that are not independently owned and operated or have more than 1,500 employees, and thus are unable at this time to estimate with greater precision the number of cellular service carriers that would qualify as small business concerns under the SBA's definition. Consequently, we estimate that there are fewer than 808 small cellular service carriers that may be affected by the proposed rules, if adopted.

40. *220 MHz Radio Service—Phase I Licensees.* The 220 MHz service has both Phase I and Phase II licenses. Phase I licensing was conducted by lotteries in 1992 and 1993. There are approximately 1,515 such non-nationwide licensees and four nationwide licensees currently authorized to operate in the 220 MHz band. The Commission has not developed a definition of small entities specifically applicable to such incumbent 220 MHz Phase I licensees. To estimate the number of such licensees that are small businesses, we apply the definition under the SBA rules applicable to Radiotelephone Communications companies. This definition provides that a small entity is a radiotelephone company employing no more than 1,500 persons.[124] According to the Bureau of the Census, only 12 radiotelephone firms out of a total of 1,178 such firms which operated during 1992 had 1,000 or more employees.[125] Therefore, if this general ratio continues in 1999 in the context of Phase I 220 MHz licensees, we estimate that nearly all such licensees are small businesses under the SBA's definition.

41. *220 MHz Radio Service—Phase II Licensees.* The Phase II 220 MHz service is a new service, and is subject to spectrum auctions. In the 220 MHz *Third Report and Order*, we adopted criteria for defining small businesses and very small businesses for purposes of determining their eligibility for special provisions such as bidding credits and installment payments.[126] We have defined a small business as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding $15 million for the preceding three years. Additionally, a very small business is defined as an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than $3 million for the preceding three years.[127] The SBA has approved these definitions.[128] An auction of Phase II licenses commenced on September 15, 1998, and closed on October 22, 1998.[129] Nine hundred and eight (908) licenses were auctioned in 3 different-sized geographic areas: three nationwide licenses, 30 Regional Economic Area Group Licenses, and 875 Economic Area (EA) Licenses. Of the 908 licenses auctioned, 693 were sold. Companies claiming small business status won: one of the Nationwide licenses, 67% of the Regional licenses, and 54% of the EA licenses. As of January 22, 1999, the Commission announced that it was prepared to grant 654 of the Phase II licenses won at auction.[130]

42. *Private and Common Carrier Paging.* The Commission has proposed a two-tier definition of small businesses in the context of auctioning licenses in the Common Carrier Paging and exclusive Private Carrier Paging services. Under the proposal, a small business will be defined as either (1) an entity that, together with its affiliates and controlling principals, has average gross revenues for the three preceding years of not more than $3 million, or (2) an entity that, together with affiliates and controlling principals, has average gross revenues for the three preceding calendar years of not more than $15 million. Because the SBA has not yet approved this definition for paging services, we will utilize the SBA's definition applicable to radiotelephone companies, *i.e.*, an entity employing no more than 1,500 persons.[131] At present, there are approximately 24,000 Private Paging licenses and 74,000 Common Carrier Paging licenses. According to the most recent *Telecommunications Industry Revenue* data, 172 carriers reported that they were engaged in the provision of either paging or "other mobile" services, which are placed together in the data.[132] We do not have

[132] *Trends in Telephone Service*, Table 19.3 (February 19, 1999).

data specifying the number of these carriers that are not independently owned and operated or have more than 1,500 employees, and thus are unable at this time to estimate with greater precision the number of paging carriers that would qualify as small business concerns under the SBA's definition. Consequently, we estimate that there are fewer than 172 small paging carriers that may be affected by the proposed rules, if adopted. We estimate that the majority of private and common carrier paging providers would qualify as small entities under the SBA definition.

43. *Mobile Service Carriers.* Neither the Commission nor the SBA has developed a definition of small entities specifically applicable to mobile service carriers, such as paging companies. As noted above in the section concerning paging service carriers, the closest applicable definition under the SBA rules is that for radiotelephone (wireless) companies,[133] and the most recent *Telecommunications Industry Revenue* data shows that 172 carriers reported that they were engaged in the provision of either paging or "other mobile" services.[134] Consequently, we estimate that there are fewer than 172 small mobile service carriers that may be affected by the proposed rules, if adopted.

44. *Broadband Personal Communications Service (PCS).* The broadband PCS spectrum is divided into six frequency blocks designated A through F, and the Commission has held auctions for each block. The Commission defined "small entity" for Blocks C and F as an entity that has average gross revenues of less than $40 million in the three previous calendar years.[135] For Block F, an additional classification for "very small business" was added and is defined as an entity that, together with their affiliates, has average gross revenues of not more than $15 million for the preceding three calendar years.[136] These regulations defining "small entity" in the context of broadband PCS auctions have been approved by the SBA.[137] No small businesses within the SBA-approved definition bid successfully for licenses in Blocks A and B. There were 90 winning bidders that qualified as small entities in the Block C auctions. A total of 93 small and very small business bidders won approximately 40% of the 1,479 licenses for Blocks D, E, and F.[138] Based on this information, we conclude that the number of small broadband PCS licensees will include the 90 winning C Block bidders and the 93 qualifying bidders in the D, E, and F blocks, for a total of 183 small entity PCS providers as defined by the SBA and the Commission's auction rules.

45. *Narrowband PCS.* The Commission has auctioned nationwide and regional licenses for narrowband PCS. There are 11 nationwide and 30 regional licensees for narrowband PCS. The Commission does not have sufficient information to determine whether any of these licensees are small businesses within the SBA-approved definition for radiotelephone companies. At present, there have been no auctions held for the major trading area (MTA) and basic trading area (BTA) narrowband PCS licenses. The Commission anticipates a total of 561 MTA licenses and 2,958 BTA licenses will be awarded by auction. Such auctions have not yet been scheduled, however. Given that nearly all radiotelephone companies have no more than 1,500 employees and that no reliable estimate of the number of prospective MTA and BTA narrowband licensees can be made, we assume, for purposes of this IRFA, that all of the licenses will be awarded to small entities, as that term is defined by the SBA.

46. *Rural Radiotelephone Service.* The Commission has not adopted a definition of small entity specific to the Rural Radiotelephone Service.[139] A significant subset of the Rural Radiotelephone Service is the Basic Exchange Telephone Radio Systems (BETRS).[140] We will use the SBA's definition applicable to radiotelephone companies, *i.e.*, an entity employing no more than 1,500 persons.[141] There are approximately 1,000 licensees in the Rural Radiotelephone Service, and we estimate that almost all of them qualify as small entities under the SBA's definition.

47. *Air-Ground Radiotelephone Service.* The Commission has not adopted a definition of small entity specific to the Air-Ground Radiotelephone Service.[142] Accordingly, we will use the SBA's definition applicable to radiotelephone companies, *i.e.*, an entity employing no more than 1,500 persons.[143] There are approximately 100 licensees in the Air-Ground Radiotelephone Service, and we estimate that almost all of them qualify as small under the SBA definition.

48. *Specialized Mobile Radio (SMR).* The Commission awards bidding credits in auctions for geographic area 800 MHz and 900 MHz SMR licenses to firms that had revenues of no more than $15 million in each of the three previous calendar years.[144] In the context of 900 MHz SMR, this regulation defining "small entity" has been approved by the SBA; approval concerning 800 MHz SMR is being sought.

49. The proposed fees in the NPRM apply to SMR providers in the 800 MHz and 900 MHz bands that either hold geographic area licenses or have obtained extended implementation authorizations. We do not know how many firms provide 800 MHz or 900 MHz geographic area SMR service pursuant to extended implementation authorizations, nor how many of these providers have annual revenues of no more than $15 million. One firm has over $15 million in revenues. We assume, for purposes of this IRFA, that all of the remaining existing extended implementation authorizations are held by small entities, as that term is defined by the SBA.

50. For geographic area licenses in the 900 MHz SMR band, there are 60 who qualified as small entities. For the 800 MHz SMR's, 38 are small or very small entities.

51. *Private Land Mobile Radio (PLMR).* PLMR systems serve an essential role in a range of industrial, business, land transportation, and public safety activities. These radios are used by companies of all sizes operating in all U.S. business categories. The Commission has not developed a definition of small entity specifically applicable to PLMR licensees due to the vast array of PLMR users. For the purpose of determining whether a licensee is a small business as defined by the SBA, each licensee would need

[139] The service is defined in § 22.99 of the Commission's Rules, 47 CFR 22.99.

[140] BETRS is defined in §§ 22.757 and 22.759 of the Commission's Rules, 47 CFR 22.757 and 22.759.

[141] 13 CFR 121.201, SIC code 4812.

[142] The service is defined in § 22.99 of the Commission's Rules, 47 CFR 22.99.

[143] 13 CFR 121.201, SIC code 4812.

[144] 47 CFR 90.814(b)(1).

to be evaluated within its own business area.

52. The Commission is unable at this time to estimate the number of small businesses which could be impacted by the rules. However, the Commission's 1994 Annual Report on PLMRs [145] indicates that at the end of fiscal year 1994 there were 1,087,267 licensees operating 12,481,989 transmitters in the PLMR bands below 512 MHz. Because any entity engaged in a commercial activity is eligible to hold a PLMR license, the proposed rules in this context could potentially impact every small business in the United States.

53. *Amateur Radio Service.* We estimate that 8,000 applicants will apply for vanity call signs in FY 2000. All are presumed to be individuals. All other amateur licensees are exempt from payment of regulatory fees.

54. *Aviation and Marine Radio Service.* Small businesses in the aviation and marine radio services use a marine very high frequency (VHF) radio, any type of emergency position indicating radio beacon (EPIRB) and/or radar, a VHF aircraft radio, and/or any type of emergency locator transmitter (ELT). The Commission has not developed a definition of small entities specifically applicable to these small businesses. Therefore, the applicable definition of small entity is the definition under the SBA rules for radiotelephone communications.[146]

55. Most applicants for recreational licenses are individuals. Approximately 581,000 ship station licensees and 131,000 aircraft station licensees operate domestically and are not subject to the radio carriage requirements of any statute or treaty. Therefore, for purposes of our evaluations and conclusions in this IRFA, we estimate that there may be at least 712,000 potential licensees which are individuals or are small entities, as that term is defined by the SBA. We estimate, however, that only 16,800 will be subject to FY 2000 regulatory fees.

56. *Fixed Microwave Services.* Microwave services include common carrier,[147] private-operational fixed,[148] and broadcast auxiliary radio services.[149] At present, there are approximately 22,015 common carrier fixed licensees and 61,670 private operational-fixed licensees and broadcast auxiliary radio licensees in the microwave services. The Commission has not yet defined a small business with respect to microwave services. For purposes of this IRFA, we will utilize the SBA's definition applicable to radiotelephone companies—*i.e.*, an entity with no more than 1,500 persons.[150] We estimate, for this purpose, that all of the Fixed Microwave licensees (excluding broadcast auxiliary licensees) would qualify as small entities under the SBA definition for radiotelephone companies.

57. *Public Safety Radio Services.* Public Safety radio services include police, fire, local government, forestry conservation, highway maintenance, and emergency medical services.[151] There are a total of approximately 127,540 licensees within these services. Governmental entities [152] as well as private businesses comprise the licensees for these services. As indicated *supra* in paragraph four of this IRFA, all governmental entities with populations of less than 50,000 fall within the definition of a small entity.[153] All licensees in this category are exempt from the payment of regulatory fees.

58. *Personal Radio Services.* Personal radio services provide short-range, low power radio for personal communications, radio signaling, and business communications not provided for in other services. The services include the citizen's band (CB) radio service, general mobile radio service (GMRS), radio control radio service, and family radio service (FRS).[154] Inasmuch as the CB, GMRS, and FRS licensees are individuals, no small business definition applies for these services. We are unable at this time to estimate the number of other licensees that would qualify as small under the SBA's definition; however, only GMRS licensees are subject to regulatory fees.

59. *Offshore Radiotelephone Service.* This service operates on several UHF TV broadcast channels that are not used for TV broadcasting in the coastal area of the states bordering the Gulf of Mexico.[155] At present, there are approximately 55 licensees in this service. We are unable at this time to estimate the number of licensees that would qualify as small under the SBA's definition for radiotelephone communications.

60. *Wireless Communications Services.* This service can be used for fixed, mobile, radiolocation and digital audio broadcasting satellite uses. The Commission defined "small business" for the wireless communications services (WCS) auction as an entity with average gross revenues of $40 million for each of the three preceding years, and a "very small business" as an entity with average gross revenues of $15 million for each of the three preceding years. The Commission auctioned geographic area licenses in the WCS service. In the auction, there were seven winning bidders that qualified as very small business entities, and one that qualified as a small business entity. We conclude that the number of geographic

[146] 13 CFR 121.201, SIC code 4812.

[147] 47 CFR 101 *et seq.* (formerly, part 21 of the Commission's Rules).

[148] Persons eligible under parts 80 and 90 of the Commission's rules can use Private Operational-Fixed Microwave services. *See* 47 CFR parts 80 and 90. Stations in this service are called operational-fixed to distinguish them from common carrier and public fixed stations. Only the licensee may use the operational-fixed station, and only for communications related to the licensee's commercial, industrial, or safety operations.

[149] Auxiliary Microwave Service is governed by part 74 of Title 47 of the Commission's Rules. *See* 47 CFR 74 *et seq.* Available to licensees of broadcast stations and to broadcast and cable network entities, broadcast auxiliary microwave stations are used for relaying broadcast television signals from the studio to the transmitter, or between two points such as a main studio and an auxiliary studio. The service also includes mobile TV pickups, which relay signals from a remote location back to the studio.

[150] 13 CFR 121.201, SIC 4812.

[151] With the exception of the special emergency service, these services are governed by Subpart B of part 90 of the Commission's Rules, 47 CFR 90.15 through 90.27. The police service includes 26,608 licensees that serve state, county, and municipal enforcement through telephony (voice), telegraphy (code) and teletype and facsimile (printed material). The fire radio service includes 22,677 licensees comprised of private volunteer or professional fire companies as well as units under governmental control. The local government service that is presently comprised of 40,512 licensees that are state, county, or municipal entities that use the radio for official purposes not covered by other public safety services. There are 7,325 licensees within the forestry service which is comprised of licensees from state departments of conservation and private forest organizations who set up communications networks among fire lookout towers and ground crews. The 9,480 state and local governments are licensed to highway maintenance service provide emergency and routine communications to aid other public safety services to keep main roads safe for vehicular traffic. The 1,460 licensees in the Emergency Medical Radio Service (EMRS) use the 39 channels allocated to this service for emergency medical service communications related to the delivery of emergency medical treatment. 47 CFR 90.15 through 90.27. The 19,478 licensees in the special emergency service include medical services, rescue organizations, veterinarians, handicapped persons, disaster relief organizations, school buses, beach patrols, establishments in isolated areas, communications standby facilities, and emergency repair of public communications facilities. 47 CFR 90.33 through 90.55.

[152] 47 CFR 1.1162.

[153] 5 U.S.C. 601(6).

[154] Licensees in the Citizens Band (CB) Radio Service, General Mobile Radio Service (GMRS), Radio Control (R/C) Radio Service and Family Radio Service (FRS) are governed by Subpart D, Subpart A, Subpart C, and Subpart B, respectively, of part 95 of the Commission's Rules. 47 CFR 95.401 through 95.428; 95.1 through 95.181; 95.201 through 95.225; 47 CFR 95.191 through 95.194.

[155] This service is governed by subpart I of part 22 of the Commission's Rules. *See* 47 CFR 22.1001 through 22.1037.

area WCS licensees affected includes these eight entities.

IV. Description of Projected Reporting, Recordkeeping and Other Compliance Requirements

61. With certain exceptions, the Commission's Schedule of Regulatory Fees applies to all Commission licensees and regulatees. Most licensees will be required to count the number of licenses or call signs authorized, complete and submit an FCC Form 159 ("FCC Remittance Advice"), and pay a regulatory fee based on the number of licenses or call signs.[156] Interstate telephone service providers must compute their annual regulatory fee based on their interstate and international end-user revenue using information they already supply to the Commission in compliance with the Form 499–A, Telecommunications Reporting Worksheet, and they must complete and submit the FCC Form 159. Compliance with the fee schedule will require some licensees to tabulate the number of units (*e.g.*, cellular telephones, pagers, cable TV subscribers) they have in service, and complete and submit an FCC Form 159. Licensees ordinarily will keep a list of the number of units they have in service as part of their normal business practices. No additional outside professional skills are required to complete the FCC Form 159, and it can be completed by the employees responsible for an entity's business records.

62. Each licensee must submit the FCC Form 159 to the Commission's lockbox bank after computing the number of units subject to the fee. As an option, licensees are permitted to file electronically or on computer diskette to minimize the burden of submitting multiple copies of the FCC Form 159. This latter, optional procedure may require additional technical skills. Applicants who pay small fees in advance supply fee information as part of their application and do not need to use FCC Form 159.

63. Licensees and regulatees are advised that failure to submit the required regulatory fee in a timely manner will subject the licensee or regulatee to a late payment fee of 25 percent in addition to the required fee.[157] Until payment is received, no new or pending applications will be processed, and existing authorizations may be subject to rescission.[158] Further, in accordance with the Debt Collection Improvement Act of 1996, federal agencies may bar a person or entity from obtaining a federal loan or loan insurance guarantee if that person or entity fails to pay a delinquent debt owed to any federal agency.[159] Nonpayment of regulatory fees is a debt owed the United States pursuant to 31 U.S.C. 3711 *et seq.*, and the *Debt Collection Improvement Act of 1996*, Public Law 194–134. Appropriate enforcement measures, e.g., interest as well as administrative and judicial remedies, may be exercised by the Commission. Thus, debts owed to the Commission may result in a person or entity being denied a federal loan or loan guarantee pending before another federal agency until such obligations are paid.[160]

64. The Commission's rules currently provide for relief in exceptional circumstances. Persons or entities that believe they have been placed in the wrong regulatory fee category or are experiencing extraordinary and compelling financial hardship, upon a showing that such circumstances override the public interest in reimbursing the Commission for its regulatory costs, may request a waiver, reduction or deferment of payment of the regulatory fee.[161] However, timely submission of the required regulatory fee must accompany requests for waivers or reductions. This will avoid any late payment penalty if the request is denied. The fee will be refunded if the request is granted. In exceptional and compelling instances (where payment of the regulatory fee along with the waiver or reduction request could result in reduction of service to a community or other financial hardship to the licensee), the Commission will accept a petition to defer payment along with a waiver or reduction request.

V. Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

65. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives: (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities. As described in Section IV of this IRFA, *supra*, we have created procedures in which all fee-filing licensees and regulatees use a single form, FCC Form 159, and have described in plain language the general filing requirements. We have also created Attachment F, *infra*, which gives "Detailed Guidance on Who Must Pay Regulatory Fees." Because the collection of fees is statutory, our efforts at proposing alternatives are constrained and, throughout these annual fee proceedings, have been largely directed toward simplifying the instructions and necessary procedures for all filers. At this time, we invite comment on other alternatives that might simplify our fee procedures or otherwise benefit small entities, while remaining consistent with our statutory responsibilities in this proceeding.

66. *The Omnibus Consolidated and Emergency Supplemental Appropriations Act for FY 1999*, Public Law 105–277 requires the Commission to revise its Schedule of Regulatory Fees in order to recover the amount of regulatory fees that Congress, pursuant to Section 9(a) of the Communications Act, as amended, has required the Commission to collect for Fiscal Year (FY) 2000.[162] As noted, we seek comment on the proposed methodology for implementing these statutory requirements and any other potential impact of these proposals on small entities.

67. With the use of actual cost accounting data for computation of

[156] The following categories are exempt from the Commission's Schedule of Regulatory Fees: Amateur radio licensees (except applicants for vanity call signs) and operators in other non-licensed services (*e.g.*, Personal Radio, part 15, ship and aircraft). Governments and non-profit (exempt under section 501(c) of the Internal Revenue Code) entities are exempt from payment of regulatory fees and need not submit payment. Non-commercial educational broadcast licensees are exempt from regulatory fees as are licensees of auxiliary broadcast services such as low power auxiliary stations, television auxiliary service stations, remote pickup stations and aural broadcast auxiliary stations where such licenses are used in conjunction with commonly owned non-commercial educational stations. Emergency Alert System licenses for auxiliary service facilities are also exempt as are instructional television fixed service licensees. Regulatory fees are automatically waived for the licensee of any translator station that: (1) Is not licensed to, in whole or in part, and does not have common ownership with, the licensee of a commercial broadcast station; (2) does not derive income from advertising; and (3) is dependent on subscriptions or contributions from members of the community served for support. Receive only earth station permittees are exempt from payment of regulatory fees. A regulatee will be relieved of its fee payment requirement if its total fee due, including all categories of fees for which payment is due by the entity, amounts to less than $10.

[157] 47 U.S.C. 1.1164(a).

[158] 47 U.S.C. 1.1164(c).

[161] 47 U.S.C. 1.1166.

[162] 47 U.S.C. 159(a).

regulatory fees, we found that some fees which were very small in previous years would have increased dramatically. The methodology proposed in this *NPRM* minimizes this impact by limiting the amount of increase and shifting costs to other services which, for the most part, are larger entities.

68. Several categories of licensees and regulatees are exempt from payment of regulatory fees. *See, e.g.,* footnote 149, *supra,* and Attachment F of the *NPRM, infra.*

VI. Federal Rules that May Duplicate, Overlap, or Conflict With the Proposed Rules

69. None.

Attachment B—Sources of Payment Unit Estimates for FY 2000

In order to calculate individual service fees for FY 2000, we adjusted FY 1999 payment units for each service to more accurately reflect expected FY 2000 payment liabilities. We obtained our updated estimates through a variety of means. For example, we used Commission licensee data bases, actual prior year payment records and industry and trade association projections when available. We tried to obtain verification for these estimates from multiple sources and, in all cases, we compared FY 2000 estimates with actual FY 1999 payment units to ensure that our revised estimates were reasonable. Where appropriate, we adjusted and/or rounded our final estimates to take into consideration the fact that certain variables that impact on the number of payment units cannot yet be estimated exactly. These include an unknown number of waivers and/or exemptions that may occur in FY 2000 and the fact that, in many services, the number of actual licensees or station operators fluctuates from time to time due to economic, technical or other reasons. Therefore, when we note, for example, that our estimated FY 2000 payment units are based on FY 1999 actual payment units, it does not necessarily mean that our FY 2000 projection is *exactly* the same number as FY 1999. It means that we have either rounded the FY 2000 number or adjusted it slightly to account for these variables.

Fee category	Sources of payment unit estimates
Land Mobile (All), Microwave, 218–219 MHz[163], Marine (Ship & Coast), Aviation (Aircraft & Ground), GMRS, Amateur Vanity Call Signs, Domestic Public Fixed.	Based on Wireless Telecommunications Bureau (WTB) projections of new applications and renewals taking into consideration existing Commission licensee data bases. Aviation (Aircraft) and Marine (Ship) estimates have been adjusted to take into consideration the licensing of portions of these services on a voluntary basis.
CMRS Mobile Services	Based on industry estimates of growth between FY 1999 and FY 2000 and Wireless Telecommunications Bureau projections of new applications and average number of mobile units associated with each application.
CMRS Messaging Services	Based on industry estimates of the number of units in operation.
AM/FM Radio Stations	Based on actual FY 1999 payment units.
UHF/VHF Television Stations	Based on actual FY 1999 payment units.
AM/FM/TV Construction Permits	Based on actual FY 1999 payment units.
LPTV, Translators and Boosters	Based on actual FY 1999 payment units.
Auxiliaries	Based on Wireless Telecommunications Bureau (WTB) projections.
MDS/MMDS	Based on actual FY 1999 payment units.
Cable Antenna Relay Service (CARS)	Based on actual FY 1999 payment units.
Cable Television System Subscribers	Based on Cable Services Bureau and industry estimates of subscribership.
Interstate Telephone Service Providers	Based on actual FY 1999 interstate revenues associated with the Telecommunications Reporting Worksheet, adjusted to take into consideration FY 2000 revenue growth in this industry as estimated by the Common Carrier Bureau.
Earth Stations	Based on actual FY 1999 payment units.
Space Stations (GSOs & NGSOs)	Based on International Bureau licensee data bases.
International Bearer Circuits	Based on actual FY 1999 payment units.
International HF Broadcast Stations, International Public Fixed Radio Service.	Based on actual FY 1999 payment units.

ATTACHMENT C: CALCULATION OF REVENUE REQUIREMENTS AND PRO-RATA FEES

Fee category	FY 2000 payment units	×	FY 1999 fee	×	Payment years	=	Computed FY 2000 revenue requirement	Pro-rated revenue requirement[1]	Rounded new FY 2000 regulatory fee	Expected FY 2000 revenue
PLMRS (Exclusive Use)	3,800		13		5		247,000	239,408	13	239,408
Microwave	6,250		13		10		812,500	787,525	13	787,525
218–219 MHz (Formerly IVDS)	0		13		10		0	0	0	0
Marine (Ship)	6,300		7		10		441,000	427,444	7	427,444
GMRS/PLMRS (Shared Use)	59,000		7		5		2,065,000	2,001,526	7	2,001,526

Attachment F: Detailed Guidance on Who Must Pay Regulatory Fees

1. The guidelines below provide an explanation of regulatory fee categories established by the Schedule of Regulatory Fees in section 9 (g) of the Communications Act,[164] as modified in the instant *NPRM*. Where regulatory fee categories need interpretation or clarification, we have relied on the legislative history of section 9, our own experience in establishing and regulating the Schedule of Regulatory Fees for Fiscal Years (FY) 1994, 1995, 1996, 1997, 1998 and 1999 and the services subject to the fee schedule. The categories and amounts set out in the schedule have been modified to reflect changes in the number of payment units, additions and changes in the services subject to the fee requirement and the benefits derived from the Commission's regulatory activities, and to simplify the structure of the schedule. The schedule may be similarly modified or adjusted in future years to reflect changes in the Commission's budget and in the services regulated by the Commission.[165]

2. *Exemptions.* Governments and nonprofit entities are exempt from paying regulatory fees and should not submit payment. A nonprofit entity is required to have on file with the Commission an IRS Determination Letter documenting that it is exempt from taxes under section 501 of the Internal Revenue Code or the certification of a governmental authority attesting to its nonprofit status. In instances where the IRS Determination Letter or the letter of certification from a governmental authority attesting to its nonprofit status is not sufficiently current, the nonprofit entity may be asked to submit more current documentation. The governmental exemption applies even where the government-owned or community-owned facility is in competition with a commercial operation. Other specific exemptions are discussed below in the descriptions of other particular service categories.

1. Private Wireless Radio Services

3. Two levels of statutory fees were established for the Private Wireless Radio Services—exclusive use services and shared use services. Thus, licensees who generally receive a higher quality communication channel due to exclusive or lightly shared frequency assignments will pay a higher fee than those who share marginal quality assignments. This dichotomy is consistent with the directive of section 9, that the regulatory fees reflect the benefits provided to the licensees.[166] In addition, because of the generally small amount of the fees assessed against Private Wireless Radio Service licensees, applicants for new licenses and reinstatements and for renewal of existing licenses are required to pay a regulatory fee covering the entire license term, with only a percentage of all licensees paying a regulatory fee in any one year. Applications for modification or assignment of existing authorizations do not require the payment of regulatory fees. The expiration date of those authorizations will reflect only the unexpired term of the underlying license rather than a new license term.

a. Exclusive Use Services

4. *Private Land Mobile Radio Services (PLMRS) (Exclusive Use):* Regulatees in this category include those authorized under part 90 of the Commission's Rules to provide limited access Wireless Radio service that allows high quality voice or digital communications between vehicles or to fixed stations to further the business activities of the licensee. These services, using the 220–222 MHz band and frequencies at 470 MHz and above, may be offered on a private carrier basis in the Specialized Mobile Radio Services (SMRS).[167] For FY 2000, PMRS licensees will pay a $13 annual regulatory fee per license, payable for an entire five or ten year license term at the time of application for a new, renewal, or reinstatement license.[168] The total regulatory fee due is either $65 for a license with a five-year term or $130 for a license with a 10-year term.

5. *Microwave Services:* These services include private and commercial microwave systems and private and commercial carrier systems authorized under part 101 of the Commission's Rules to provide telecommunications services between fixed points on a high quality channel of communications. Microwave systems are often used to relay data and to control railroad, pipeline, and utility equipment. Commercial systems typically are used for video or data transmission or distribution. For FY 2000, Microwave licensees will pay a $13 annual regulatory fee per license, payable for an entire ten-year license term at the time of application for a new, renewal, or reinstatement license. The total regulatory fee due is $130 for the ten-year license term.

6. *218–219 MHz (Formerly Interactive Video Data Service (IVDS)):* The 218–219 MHz service is a two-way, point-to-multi-point radio service allocated high quality channels of communications and authorized under part 95 of the Commission's Rules. The 218–219 MHz service provides information, products, and services, and also the capability to obtain responses from subscribers in a specific service area. The 218–219 MHz service is offered on a private carrier basis. The Commission does not anticipate receiving any applications in the 218–219 MHz service during FY 2000. However, for FY 2000, we propose that the annual regulatory fee for 218–219 MHz licensees be set at $13 should there be any applications submitted. The total regulatory fee due would be $130 for the ten-year license term.

[164] 47 U.S.C. 159(g)

[165] 47 U.S.C. 159(b)(2), (3).

[166] 47 U.S.C. 159(b)(1)(A).

[167] This category only applies to licensees of shared-use private 220–222 MHz and 470 MHz and above in the Specialized Mobile Radio (SMR) service who have elected not to change to the Commercial Mobile Radio Service (CMRS). Those who have elected to change to the CMRS are referred to paragraph 14 of this Attachment.

[168] Although this fee category includes licenses with ten-year terms, the estimated volume of ten-year license applications in FY 2000 is less than one-tenth of one percent and, therefore, is statistically insignificant.

b. Shared Use Services

7. *Marine (Ship) Service:* This service is a shipboard radio service authorized under part 80 of the Commission's Rules to provide telecommunications between watercraft or between watercraft and shore-based stations. Radio installations are required by domestic and international law for large passenger or cargo vessels. Radio equipment may be voluntarily installed on smaller vessels, such as recreational boats. The Telecommunications Act of 1996 gave the Commission the authority to license certain ship stations by rule rather than by individual license. The Commission exercises that authority. Thus, private boat operators sailing entirely within domestic U.S. waters and who are not otherwise required by treaty or agreement to carry a radio, are no longer required to hold a marine license, and they will not be required to pay a regulatory fee. For FY 2000, parties required to be licensed and those choosing to be licensed for Marine (Ship) Stations will pay a $7 annual regulatory fee per station, payable for an entire ten-year license term at the time of application for a new, renewal, or reinstatement license. The total regulatory fee due is $70 for the ten-year license term.

8. *Marine (Coast) Service:* This service includes land-based stations in the maritime services, authorized under part 80 of the Commission's Rules, to provide communications services to ships and other watercraft in coastal and inland waterways. For FY 2000, licensees of Marine (Coast) Stations will pay a $7 annual regulatory fee per call sign, payable for the entire five-year license term at the time of application for a new, renewal, or reinstatement license. The total regulatory fee due is $35 per call sign for the five-year license term.

9. *Private Land Mobile Radio Services (PLMRS) (Shared Use):* These services include Land Mobile Radio Services operating under parts 90 and 95 of the Commission's Rules. Services in this category provide one- or two-way communications between vehicles, persons or fixed stations on a shared basis and include radiolocation services, industrial radio services, and land transportation radio services. For FY 2000, licensees of services in this category will pay a $7 annual regulatory fee per call sign, payable for an entire five-year license term at the time of application for a new, renewal, or reinstatement license. The total regulatory fee due is $35 for the five-year license term.

10. *Aviation (Aircraft) Service:* These services include stations authorized to provide communications between aircraft and between aircraft and ground stations and include frequencies used to communicate with air traffic control facilities pursuant to part 87 of the Commission's Rules. The Telecommunications Act of 1996 gave the Commission the authority to license certain aircraft radio stations by rule rather than by individual license. The commission exercises that authority. Thus, private aircraft operators flying entirely within domestic U.S. airspace and who are not otherwise required by treaty or agreement to carry a radio are no longer required to hold an aircraft license, and they will not be required to pay a regulatory fee. For FY 2000, parties required to be licensed and those choosing to be licensed for Aviation (Aircraft) Stations will pay a $7 annual regulatory fee per station, payable for the entire ten-year license term at the time of application for a new, renewal, or reinstatement license. The total regulatory fee due is $70 per station for the ten-year license term.

11. *Aviation (Ground) Service:* This service includes stations authorized to provide ground-based communications to aircraft for weather or landing information, or for logistical support pursuant to part 87 of the Commission's Rules. Certain ground-based stations which only serve itinerant traffic, i.e., possess no actual units on which to assess a fee, are exempt from payment of regulatory fees. For FY 2000, licensees of Aviation (Ground) Stations will pay a $7 annual regulatory fee per license, payable for the entire five-year license term at the time of application for a new, renewal, or reinstatement license. The total regulatory fee is $35 per call sign for the five-year license term.

12. *General Mobile Radio Service (GMRS):* These services include Land Mobile Radio licensees providing personal and limited business communications between vehicles or to fixed stations for short-range, two-way communications pursuant to part 95 of the Commission's Rules. For FY 2000, GMRS licensees will pay a $7 annual regulatory fee per license, payable for an entire five-year license term at the time of application for a new, renewal or reinstatement license. The total regulatory fee due is $35 per license for the five-year license term.

c. Amateur Radio Vanity Call Signs

13. *Amateur Vanity Call Signs:* This category covers voluntary requests for specific call signs in the Amateur Radio Service authorized under part 97 of the Commission's Rules. Applicants for Amateur Vanity Call-Signs will continue to pay a $1.40 annual regulatory fee per call sign, as prescribed in the FY 1999 fee schedule, payable for an entire ten-year license term at the time of application for a vanity call sign until the FY 2000 fee schedule becomes effective. The total regulatory fee due would be $14 per license for the ten-year license term.[169] For FY 2000, Amateur Vanity Call Sign applicants will again pay a $1.40 annual regulatory fee per call sign, payable for an entire ten-year term at the time of application for a new, renewal or reinstatement license. The total regulatory fee due is $14 per call sign for the ten-year license term.

d. Commercial Wireless Radio Services

14. *Commercial Mobile Radio Services (CMRS) Mobile Services:* The Commercial Mobile Radio Service (CMRS) is an "umbrella" descriptive term attributed to various existing broadband services authorized to provide interconnected mobile radio services for profit to the public, or to such classes of eligible users as to be effectively available to a substantial portion of the public. CMRS Mobile Services include certain licensees which formerly were licensed as part of the Private Radio Services (*e.g.*, Specialized Mobile Radio Services) and others formerly licensed as part of the Common Carrier Radio Services (*e.g.*, Public Mobile Services and Cellular Radio Service). While specific rules pertaining to each covered service remain in separate parts 22, 24, 27, 80 and 90, general rules for CMRS are contained in part 20. CMRS Mobile Services will include: Specialized Mobile Radio Services (part 90);[170] Broadband Personal Communications Services (part 24), Public Coast Stations (part 80); Public Mobile Radio (Cellular, 800 MHz Air-Ground Radiotelephone, and Offshore Radio Services) (part 22); and Wireless Communications Service (part 27). Each licensee in this group will pay an annual regulatory fee for each mobile or cellular unit (mobile or telephone number), assigned to its customers, including resellers of its

[169] Section 9(h) exempts "amateur radio operator licenses under part 97 of the Commission's rules (47 CFR part 97)" from the requirement. However, section 9(g)'s fee schedule explicitly includes "Amateur vanity call signs" as a category subject to the payment of a regulatory fee.

[170] This category does not include licensees of private shared-use 220 MHz and 470 MHz and above in the Specialized Mobile Radio (SMR) service who have elected to remain non-commercial. Those who have elected not to change to the Commercial Mobile Radio Service (CMRS) are referred to paragraph 4 of this Attachment.

services. For FY 2000, the regulatory fee is $.31 per unit.

15. *Commercial Mobile Radio Services (CMRS) Messaging Services:* The Commercial Mobile Radio Service (CMRS) is an "umbrella" descriptive term attributed to various existing narrowband services authorized to provide interconnected mobile radio services for profit to the public, or to such classes of eligible users as to be effectively available to a substantial portion of the public. CMRS Messaging Services include certain licensees which formerly were licensed as part of the Private Radio Services (*e.g.*, Private Paging and Radiotelephone Service), licensees formerly licensed as part of the Common Carrier Radio Services (*e.g.*, Public Mobile One-Way Paging), licensees of Narrowband Personal Communications Service (PCS) (*e.g.*, one-way and two-way paging), and 220–222 MHz Band and Interconnected Business Radio Service. While specific rules pertaining to each covered service remain in separate parts 22, 24 and 90, general rules for CMRS are contained in part 20. Each licensee in the CMRS Messaging Services will pay an annual regulatory fee for each unit (pager, telephone number, or mobile) assigned to its customers, including resellers of its services. For FY 2000, the regulatory fee is $.04 per unit.

16. Finally, we are reiterating our definition of CMRS payment units to make it clear that fees are assessable on each PCS or cellular telephone and each one-way or two-way pager capable of receiving or transmitting information, whether or not the unit is "active" on the "as-of" date for payment of these fees. The unit becomes "feeable" if the end user or assignee of the unit has possession of the unit and the unit is capable of transmitting or receiving voice or non-voice messages or data and the unit is either owned and operated by the licensee of the CMRS system or a reseller, or the end user of a unit has a contractual agreement for the provision of a CMRS service from a licensee of a CMRS system or a reseller of a CMRS service. The responsible payer of the regulatory fee is the CMRS licensee. For example, John Doe purchases a pager and contractually obtains paging services from Paging Licensee X. Paging Licensee X is responsible for paying the applicable regulatory fee for this unit. Likewise, Cellular Licensee Y donates cellular phones to a high school and the high school either pays for or obtains free cellular service from Cellular Licensee Y. In this situation, Cellular Licensee Y is responsible for paying the applicable regulatory fees for these units.

2. Mass Media Services

17. The regulatory fees for the Mass Media fee category apply to broadcast licensees and permittees. Noncommercial Educational Broadcasters are exempt from regulatory fees.

a. Commercial Radio

18. These categories include licensed Commercial AM (Classes A, B, C, and D) and FM (Classes A, B, B1, C, C1, C2, and C3) Radio Stations operating under part 73 of the Commission's Rules.[171] We have combined class of station and city grade contour population data to formulate a schedule of radio fees which differentiate between stations based on class of station and population served. In general, higher class stations and stations in metropolitan areas will pay higher fees than lower class stations and stations located in rural areas. The specific fee that a station must pay is determined by where it ranks after weighting its fee requirement (determined by class of station) with its population. The regulatory fee classifications for Radio Stations for FY 2000 are as follows:

FY 2000 RADIO STATION REGULATORY FEES

Population served	AM class A	AM class B	AM class C	AM class D	FM classes A, B1 & C3	FM classes B, C, C1 & C2
<20,000	400	300	200	250	300	400
20,001–50,000	800	625	300	425	625	800
50,001–125,000	1,325	850	425	650	850	1,325
125,001–400,000	1,950	1,350	625	775	1,350	1,950
400,001–1,000,000	2,725	2,200	1,200	1,450	2,200	2,725
>1,000,000	4,375	3,575	1,725	2,225	3,575	4,375

19. Licensees may determine the appropriate fee payment by referring to a list which will be provided as an attachment to the final *Report and Order* in this proceeding. This same information will be available on the FCC's internet world wide web site (http://www.fcc.gov) by calling the FCC's National Call Center (1–888–225–5322), and may be included in the Public Notices mailed to each licensee for which we have a current address on file (**Note:** Non-receipt of a Public Notice does not relieve a licensee of its obligation to submit its regulatory fee payment).

b. Construction Permits—Commercial AM Radio

20. This category includes holders of permits to construct new Commercial AM Stations. For FY 2000, permittees will pay a fee of $250 for each permit held. Upon issuance of an operating license, this fee would no longer be applicable and licensees would be required to pay the applicable fee for the designated group within which the station appears.

c. Construction Permits—Commercial FM Radio

This category includes holders of permits to construct new Commercial FM Stations. For FY 2000, permittees will pay a fee of $755 for each permit held. Upon issuance of an operating license, this fee would no longer be applicable. Instead, licensees would pay a regulatory fee based upon the designated group within which the station appears.

d. Commercial Television Stations

22. This category includes licensed Commercial VHF and UHF Television Stations covered under part 73 of the Commission's Rules, except commonly owned Television Satellite Stations, addressed separately below. Markets are Nielsen Designated Market Areas (DMA) as listed in the *Television&Cable Factbook*, Stations Volume No. 68, 2000

[171] The Commission acknowledges that certain stations operating in Puerto Rico and Guam have been assigned a higher level station class than would be expected if the station were located on the mainland. Although this results in a higher regulatory fee we believe that the increased interference protection associated with the higher station class is necessary and justifies the fee.

Edition, Warren Publishing, Inc. The fees for each category of station are as follows:

VHF Markets 1–10—$39,950
VHF Markets 11–25—33,275
VHF Markets 26–50—22,750
VHF Markets 51–100—12,750
VHF Remaining Markets—3,300
UHF Markets 1–10—$15,075
UHF Markets 11–25—11,425
UHF Markets 26–50—7,075
UHF Markets 51–100—4,225
UHF Remaining Markets—1,150

e. Commercial Television Satellite Stations

23. Commonly owned Television Satellite Stations in any market (authorized pursuant to Note 5 of § 73.3555 of the Commission's Rules) that retransmit programming of the primary station are assessed a fee of $1,250 annually. Those stations designated as Television Satellite Stations in the 2000 Edition of the *Television and Cable Factbook* are subject to the fee applicable to Television Satellite Stations. All other television licensees are subject to the regulatory fee payment required for their class of station and market.

f. Construction Permits—Commercial VHF Television Stations

24. This category includes holders of permits to construct new Commercial VHF Television Stations. For FY 2000, VHF permittees will pay an annual regulatory fee of $2,700. Upon issuance of an operating license, this fee would no longer be applicable. Instead, licensees would pay a fee based upon the designated market of the station.

g. Construction Permits—Commercial UHF Television Stations

25. This category includes holders of permits to construct new UHF Television Stations. For FY 2000, UHF Television permittees will pay an annual regulatory fee of $2,800. Upon issuance of an operating license, this fee would no longer be applicable. Instead, licensees would pay a fee based upon the designated market of the station.

h. Construction Permits—Satellite Television Stations

26. The fee for UHF and VHF Television Satellite Station construction permits for FY 2000 is $445. An individual regulatory fee payment is to be made for each Television Satellite Station construction permit held.

i. Low Power Television, FM Translator and Booster Stations, TV Translator and Booster Stations

27. This category includes Low Power UHF/VHF Television stations operating under part 74 of the Commission's Rules with a transmitter power output limited to 1 kW for a UHF facility and, generally, 0.01 kW for a VHF facility. Low Power Television (LPTV) stations may retransmit the programs and signals of a TV Broadcast Station, originate programming, and/or operate as a subscription service. This category also includes translators and boosters operating under part 74 which rebroadcast the signals of full service stations on a frequency different from the parent station (translators) or on the same frequency (boosters). The stations in this category are secondary to full service stations in terms of frequency priority. We have also received requests for waivers of the regulatory fees from operators of community based Translators. These Translators are generally not affiliated with commercial broadcasters, are nonprofit, nonprofitable, or only marginally profitable, serve small rural communities, and are supported financially by the residents of the communities served. We are aware of the difficulties these Translators have in paying even minimal regulatory fees, and we have addressed those concerns in the ruling on reconsideration of the FY 1994 *Report and Order*. Community based Translators are exempt from regulatory fees. For FY 2000, licensees in low power television, FM translator and booster, and TV translator and booster category will pay a regulatory fee of $280 for each license held.

j. Broadcast Auxiliary Stations

28. This category includes licensees of remote pickup stations (either base or mobile) and associated accessory equipment authorized pursuant to a single license, Aural Broadcast Auxiliary Stations (Studio Transmitter Link and Inter-City Relay) and Television Broadcast Auxiliary Stations (TV Pickup, TV Studio Transmitter Link, TV Relay) authorized under part 74 of the Commission's Rules. Auxiliary Stations are generally associated with a particular television or radio broadcast station or cable television system. This category does not include translators and boosters (see paragraph 26 *infra*). For FY 2000, licensees of Commercial Auxiliary Stations will pay a $12 annual regulatory fee on a per call sign basis.

k. Multipoint Distribution Service

29. This category includes Multipoint Distribution Service (MDS), Local Multipoint Distribution (LMDS), and Multichannel Multipoint Distribution Service (MMDS), authorized under parts 21 and 101 of the Commission's Rules to use microwave frequencies for video and data distribution within the United States. For FY 2000, MDS, LMDS, and MMDS stations will pay an annual regulatory fee of $275 per call sign.

3. Cable Services

a. Cable Television Systems

30. This category includes operators of Cable Television Systems, providing or distributing programming or other services to subscribers under part 76 of the Commission's Rules. For FY 2000, Cable Systems will pay a regulatory fee of $.47 per subscriber.[172] Payments for Cable Systems are to be made on a per subscriber basis as of December 31, 1999. Cable Systems should determine their subscriber numbers by calculating the number of single family dwellings, the number of individual households in multiple dwelling units, *e.g.*, apartments, condominiums, mobile home parks, etc., paying at the basic subscriber rate, the number of bulk rate customers and the number of courtesy or fee customers. In order to determine the number of bulk rate subscribers, a system should divide its bulk rate charge by the annual subscription rate for individual households. See FY 1994 *Report and Order*, Appendix B at paragraph 31.

b. Gable Antenna Relay Service

31. This category includes Cable Antenna Relay Service (CARS) stations used to transmit television and related audio signals, signals of AM and FM Broadcast Stations, and cablecasting from the point of reception to a terminal point from where the signals are distributed to the public by a Cable Television System. For FY 2000, licensees will pay an annual regulatory fee of $53 per CARS license.

4. Common Carrier Services

a. Commercial Microwave (Domestic Public Fixed Radio Service)

32. This category includes licensees in the Point-to-Point Microwave Radio Service, Local Television Transmission Radio Service, and Digital Electronic Message Service, authorized under part 101 of the Commission's Rules to use microwave frequencies for video and data distribution within the United States. These services are now included in the Microwave category (see paragraph 5 *infra*).

[172] Cable systems are to pay their regulatory fees on a per subscriber basis rather than per 1,000 subscribers as set forth in the statutory fee schedule. See FY 1994 *Report and Order* at paragraph 100.

b. Interstate Telephone Service Providers

33. This category includes all providers of local and telephone services to end users. Covered services include the interstate and international portion of wireline and fixed wireless local exchange service, local and long distance private line services for both voice and data, dedicated and network packet and packet-like services, long distance message telephone services, and other local and toll services. Providers of such services are referred to herein as "interstate telephone service providers".

Interstate service providers include CAP/CLECs, incumbent local exchange carriers (local telephone operating companies), Interexchange carriers (long distance telephone companies), wireless telephone service carriers that provide fixed local or toll services (Cellular, Personal Communications Service, and Specialized Mobile Radio), local resellers, OSPs (operator service providers that enable customers to make away from home calls and to place calls with alternative billing arrangements), payphone service providers, pre-paid card, private service providers, satellite carriers that provide fixed local or message toll services, shared tenant service providers, toll resellers, *and other* local and other service providers.

In order to avoid imposing any double payment burden on resellers, we base the regulatory fee on end-user revenues. Accordingly, interstate telephone service providers, including resellers, must submit fee payments based upon their proportionate share of interstate and international end-user revenues for local and toll services. We use the terms end-user revenues, local service and toll service, based on the methodology used for calculating contributions to the Universal Service support mechanisms.[173] Interstate telephone service providers do not pay the Common Carrier regulatory fee on revenue from the provision of intrastate local and toll services, wireless monthly and local message services, satellite toll services, carrier's carrier telecommunications services, customer premises equipment, Internet service and non-telecommunications services. For FY 2000, carriers must multiply their interstate and international revenue from subject local and toll services by the factor 0.00117 to determine the appropriate fee for this category of service. Regulatees may want to use the following worksheet to determine their fee payment:

CALENDAR 1999 REVENUE INFORMATION

[Show amounts in whole dollars]

1	Service provided by U.S. carriers that both originates and terminates in foreign points. Form 499–A Line 412(e).	
2	Interstate end-user revenue from all telecommunications services. Form 499–A Line 420(d)	
3	International end-user revenue from all telecommunications services exception international-to-international. Form 499–A Line 420(e).	
4	Total interstate and international end-user revenues (Sum of Lines 1, 2 and 3)	
5	End user interstate mobile service monthly and activation charges. Form 499–A Line 409(d)	
6	End user international mobile service monthly and activation charges. Form 499–A Line 409(e)	
7	End user interstate mobile service message charges including roaming charges but excluding toll charges. Form 499–A Line 410(d).	
8	End user international mobile service message charges including roaming charges but excluding toll charges. Form 499–A Line 410(e).	
9	End user interstate satellite service. Form 499–A Line 416(d)	
10	End user international satellite service. Form 499–A Line 416(e)	
11	Total end user interstate and international mobile and satellite service revenue. (Sum lines 5 through 10).	
12	Total end-user interstate and international revenues from local and subject toll services (Line 4 minus Line 11).	
13	Common carrier fee factor	.00117
14	2000 Regulatory Fee (Line 12 times Line 13) [1]	

[1] You are exempt from filing if the amount on line 14 is less than $10.

5. International Services

a. Earth Stations

34. Very Small Aperture Terminal (VSAT) Earth Stations, equivalent C-Band Earth Stations and antennas, and earth station systems comprised of very small aperture terminals operate in the 12 and 14 GHz bands and provide a variety of communications services to other stations in the network. *VSAT* systems consist of a network of technically-identical small Fixed-Satellite Earth Stations which often include a larger hub station. VSAT Earth Stations and C-Band Equivalent Earth Stations are authorized pursuant to part 25 of the Commission's Rules. *Mobile Satellite Earth Stations,* operating pursuant to part 25 of the Commission's Rules under blanket licenses for mobile antennas (transceivers), are smaller than one meter and provide voice or data communications, including position location information for mobile platforms such as cars, buses, or trucks.[174] *Fixed-Satellite Transmit/Receive and Transmit-Only Earth Station antennas,* authorized or registered under part 25 of the Commission's Rules, are operated by private and public carriers to provide telephone, television, data, and other forms of communications. Included in this category are telemetry, tracking and control (TT&C) earth stations, and earth station uplinks. For FY 2000, licensees of VSATs, Mobile Satellite Earth Stations, and Fixed-Satellite Transmit/Receive and Transmit-Only Earth Stations will pay a fee of $175 per authorization or registration *as well as*

[173] *See* 1998 Biennial Regulatory Review—Streamlined Contributor Reporting Requirements Associated with Administration of Telecommunications Relay Services, North American Numbering Plan, Local Number Portability, and Universal Service Support Mechanisms, Report and Order, FCC 99–175, CC Docket No. 98–171 (rel. July 14, 1999), 64 FR 41320 (Jul. 30, 1999) (Contributor Reporting Requirements Order).

[174] Mobile earth stations are hand-held or vehicle-based units capable of operation while the operator or vehicle is in motion. In contrast, transportable units are moved to a fixed location and operate in a stationary (fixed) mode. Both are assessed the same regulatory fee for FY 2000.

a separate fee of $175 for each associated Hub Station.

35. *Receive-only earth stations.* For FY 2000, there is no regulatory fee for receive-only earth stations.

b. Space Stations (Geostationary Orbit)

36. Geostationary Orbit (also referred to as Geosynchronous) Space Stations are domestic and international satellites positioned in orbit to remain approximately fixed relative to the earth. Most are authorized under part 25 of the Commission's Rules to provide communications between satellites and earth stations on a common carrier and/or private carrier basis. In addition, this category includes Direct Broadcast Satellite (DBS) Service which includes space stations authorized under part 100 of the Commission's rules to transmit or re-transmit signals for direct reception by the general public encompassing both individual and community reception. For FY 2000, entities authorized to operate geostationary space stations (including DBS satellites) will be assessed an annual regulatory fee of $94,650 per operational station in orbit. Payment is required for any geostationary satellite that has been launched and tested and is authorized to provide service.

c. Space Stations (Non-Geostationary Orbit)

37. Non-Geostationary Orbit Systems (such as Low Earth Orbit (LEO) Systems) are space stations that orbit the earth in non-geosynchronous orbit. They are authorized under part 25 of the Commission's rules to provide communications between satellites and earth stations on a common carrier and/or private carrier basis. For FY 2000, entities authorized to operate Non-Geostationary Orbit Systems (NGSOs) will be assessed an annual regulatory fee of $175,250 per operational system in orbit. Payment is required for any NGSO System that has one or more operational satellites operational. In our FY 1997 *Report and Order* at paragraph 75 we retained our requirement that licensees of LEOs pay the LEO regulatory fee upon their certification of operation of a single satellite pursuant to section 25.120(d). We require payment of this fee following commencement of operations of a system's first satellite to insure that we recover our regulatory costs related to LEO systems from licensees of these systems as early as possible so that other regulatees are not burdened with these costs any longer than necessary. Because section 25.120(d) has significant implications beyond regulatory fees (such as whether the entire planned cluster is operational in accordance with the terms and conditions of the license) we are clarifying our current definition of an operational LEO satellite to prevent misinterpretation of our intent as follows:

Licensees of Non-Geostationary Satellite Systems (such as LEOs) are assessed a regulatory fee upon the commencement of operation of a system's first satellite as reported annually pursuant to §§ 25.142(c), 25.143(e), 25.145(g), or upon certification of operation of a single satellite pursuant to § 25.120(d).

d. International Bearer Circuits

38. Regulatory fees for International Bearer Circuits are to be paid by facilities-based common carriers (either domestic or international) activating the circuit in any transmission facility for the provision of service to an end user or resale carrier. Payment of the fee for bearer circuits by non-common carrier submarine cable operators is required for circuits sold on an indefeasible right of use (IRU) basis or leased to any customer, including themselves or their affiliates, other than an international common carrier authorized by the Commission to provide U.S. international common carrier services. *Compare* FY 1994 *Report and Order* at 5367. Payment of the international bearer circuit fee is also required by non-common carrier satellite operators for circuits sold or leased to any customer, including themselves or their affiliates, other than an international common carrier authorized by the Commission to provide U.S. international common carrier services. The fee is based upon active 64 kbps circuits, or equivalent circuits. Under this formulation, 64 kbps circuits or their equivalent will be assessed a fee. Equivalent circuits include the 64 kbps circuit equivalent of larger bit stream circuits. For example, the 64 kbps circuit equivalent of a 2.048 Mbps circuit is 30 64 kbps circuits. Analog circuits such as 3 and 4 kHz circuits used for international service are also included as 64 kbps circuits. However, circuits derived from 64 kbps circuits by the use of digital circuit multiplication systems are not equivalent 64 kbps circuits. Such circuits are not subject to fees. Only the 64 kbps circuit from which they have been derived will be subject to payment of a fee. For FY 2000, the regulatory fee is $7 for each active 64 kbps circuit or equivalent. For analog television channels we will assess fees as follows:

Analog television channel size in MHz	Number of equivalent 64 kbps circuits
36	630
24	288
18	240

e. International Public Fixed

39. This fee category includes common carriers authorized under part 23 of the Commission's Rules to provide radio communications between the United States and a foreign point via microwave or HF troposcatter systems, other than satellites and satellite earth stations, but not including service between the United States and Mexico and the United States and Canada using frequencies above 72 MHz. For FY 2000, International Public Fixed Radio Service licensees will pay a $395 annual regulatory fee per call sign.

f. International (HF) Broadcast

40. This category covers International Broadcast Stations licensed under part 73 of the Commission's Rules to operate on frequencies in the 5,950 kHz to 26,100 kHz range to provide service to the general public in foreign countries. For FY 2000, International HF Broadcast Stations will pay an annual regulatory fee of $505 per station license.

Attachment G: Description of FCC Activities

Authorization of Service: The authorization or licensing of radio stations, telecommunications equipment, and radio operators, as well as the authorization of common carrier and other services and facilities. Includes policy direction, program development, legal services, and executive direction, as well as support services associated with authorization activities.[175]

Policy and Rulemaking: Formal inquiries, rulemaking proceedings to establish or amend the Commission's rules and regulations, action on petitions for rulemaking, and requests for rule interpretations or waivers; economic studies and analyses; spectrum planning, modeling, propagation-interference analyses, and allocation; and development of equipment standards. Includes policy direction, program development, legal services, and executive direction, as well as support services associated with policy and rulemaking activities.

[175] Although Authorization of Service is described in this exhibit, it is *not* one of the activities included as a feeable activity for regulatory fee purposes pursuant to section 9(a)(1) of the Act. 47 U.S.C. 159(a)(1).

Enforcement: Enforcement of the Commission's rules, regulations and authorizations, including investigations, inspections, compliance monitoring, and sanctions of all types. Also includes the receipt and disposition of formal and informal complaints regarding common carrier rates and services, the review and acceptance/rejection of carrier tariffs, and the review, prescription and audit of carrier accounting practices. Includes policy direction, program development, legal services, and executive direction, as well as support services associated with enforcement activities.

Public Information Services: The publication and dissemination of Commission decisions and actions, and related activities; public reference and library services; the duplication and dissemination of Commission records and databases; the receipt and disposition of public inquiries; consumer, small business, and public assistance; and public affairs and media relations. Includes policy direction, program development, legal services, and executive direction, as well as support services associated with public information activities.

Attachment H: Factors, Measurements and Calculations That Go Into Determining Station Signal Contours and Associated Population Coverages

AM Stations

Specific information on each day tower, including field ratio, phasing, spacing and orientation was retrieved, as well as the theoretical pattern RMS figure (mV/m @ 1 km) for the antenna system. The standard, or modified standard if pertinent, horizontal plane radiation pattern was calculated using techniques and methods specified in sections 73.150 and 73.152 of the Commission's rules.[176] Radiation values were calculated for each of 72 radials around the transmitter site (every 5 degrees of azimuth). Next, estimated soil conductivity data was retrieved from a database representing the information in FCC Figure M3. Using the calculated horizontal radiation values, and the retrieved soil conductivity data, the distance to the city grade (5 mV/m) contour was predicted for each of the 72 radials. The resulting distance to city grade contours were used to form a geographical polygon. Population counting was accomplished by determining which 1990 block centroids were contained in the polygon. The sum of the population figures for all enclosed blocks represents the total population for the predicted city grade coverage area.

FM Stations

The maximum of the horizontal and vertical HAAT (m) and ERP (kW) was used. Where the antenna HAMSL was available, it was used in lieu of the overall HAAT figure to calculate specific HAAT figures for each of 72 radials under study. Any available directional pattern information was applied as well, to produce a radial-specific ERP figure. The HAAT and ERP figures were used in conjunction with the propagation curves specified in section 73.313 of the Commission's rules to predict the distance to the city grade (70 dBuV/m or 3.17 mV/m) contour for each of the 72 radials.[177] The resulting distance to city grade contours were used to form a geographical polygon. Population counting was accomplished by determining which 1990 block centroids were contained in the polygon. The sum of the population figures for all enclosed blocks represents the total population for the predicted city grade coverage area.

Teacher Quality Enhancement Grants Program

AGENCY: Office of Postsecondary Education, Department of Education

ACTION: Final regulations.

SUMMARY: The Assistant Secretary for Postsecondary Education issues regulations for the three grant programs included in the Teacher Quality Enhancement Grants Program, sections 202–204 of the Higher Education Act of 1965, as amended (HEA). These regulations contain selection criteria that will be used to select applicants for awards under the State Program, Partnership Program, and Teacher Recruitment Program. These regulations also contain certain other requirements that would apply to the programs.

DATES: These regulations are effective May 11, 2000.

FOR FURTHER INFORMATION CONTACT: Kathy Price, Higher Education Programs, Office of Postsecondary Education, Office of Policy, Planning, and Innovation, 1990 K Street, NW, Washington, D.C. 20006–8525: Telephone: (202) 502–7775. Inquiries also may be sent by e-mail to: Kathy—Price@ed.gov or by FAX to: (202) 502–7775. If you use a telecommunications device for the deaf (TDD), you may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

Individuals with disabilities may obtain this document in an alternate format (e.g., Braille, large print, audiotape, or computer diskette) on request to the contact person listed in the preceding paragraph.

SUPPLEMENTARY INFORMATION:

Background

On October 8, 1998, the President signed into law the Higher Education Amendments of 1998 (Pub. L. 105–244). This law addresses the Nation's need to ensure that new teachers enter the classroom prepared to teach all students to high standards by authorizing, as Title II of the Higher Education Act (HEA), the Teacher Quality Enhancement Grants for States and Partnerships (Teacher Quality Programs). The new Teacher Quality Enhancement Grants Program provides an historic opportunity to effect positive change in the recruitment, preparation, licensing, and on-going support of teachers in America.

The new Teacher Quality Enhancement Grants Program consists of three different competitive grant programs: (1) The State Grants Program, which is designed to help States promote a broad array of improvements in teacher licensure, certification, preparation, and recruitment; (2) the Partnership Grants for Improving Teacher Preparation Program, which is designed to have schools of education, schools of arts and sciences, high-need local educational agencies (LEAs), and others work together to ensure that new teachers have the content knowledge and skills their students need of them when they enter the classroom; and (3) the Teacher Recruitment Grants Program, which is designed to help schools and school districts with severe teacher shortages to secure the high-quality teachers that they need. Together, these programs are designed to increase student achievement by supporting comprehensive approaches to improving teacher quality.

State Grants Program (State Program)

The State Grants Program offers a unique opportunity to support far-reaching efforts to redesign teacher education. Through the policy leadership of Governors, State legislatures, and other important partners, the program can assure the statewide support so essential to bringing about the important policy changes needed in teacher recruitment, preparation, licensing and certification, and retention. States are in the position to increase the expectations for newly state-certified and licensed teachers as well as test for and reward high-quality teaching.

Under the program, each State may develop a program application that focuses on activities it chooses to conduct in one or more areas that are key to improving the quality of new teachers. In this regard, areas in which a State may propose to focus include:

Teacher licensure, certification, and preparation policies and practices, including rigorous alternative routes to certification;

- Reforms that hold institutions of higher education (IHE) with teacher preparation programs accountable for preparing teachers who are highly competent in academic content areas and possess strong teaching skills;
- Wholesale redesign of teacher preparation programs, in collaboration with the schools of arts and sciences, in ways that promote stronger academic content and subject-matter knowledge of students in those programs;
- Improved linkages between IHEs and K–12 schools, with more time spent by college faculty and teacher education students in K–12 classrooms, and greater use of technology in the teacher education programs;
- Use of new strategies to attract, prepare, support, and retain highly competent teachers in high-poverty urban and rural areas;
- Redesign and improvement of existing teacher professional development programs to improve the content knowledge, technology skills, and teaching skills of practicing teachers;
- Improved accountability for high-quality teaching through performance-based compensation and the expeditious removal of incompetent or unqualified teachers while ensuring due process; and
- Efforts to address the problem of social promotion and to prepare teachers to deal with the issues raised by ending social promotion.

Partnership Grants for Improving Teacher Education (Partnership Program)

The purpose of the Partnership Program is to improve student learning by bringing about fundamental change and improvement in traditional teacher education programs. Through multi-year awards to a limited number of highly-committed partnerships, the Partnership Program is intended to ensure that new teachers have the content knowledge and teaching skills they need when they enter the classroom. Section 203(a) and (b) of the HEA provides that partnerships eligible for awards must comprise, at a minimum, a partnership institution, a school of arts and science, and a high-need LEA as the law defines these terms. Partnerships also may include other entities that can contribute expertise, resources or both to the teacher preparation project. A key aspect of the program is the active participation of all members of the partnership in the design and implementation of project activities.

By law, successful applicants must propose to implement certain activities:

- The reform of teacher preparation programs so that these programs become accountable for producing teachers who are highly competent in the academic content areas in which they plan to teach;
- The provision of high quality and sustained pre-service clinical experiences and mentoring for new teachers, together with a substantial increase in the interaction between teachers, principals, and higher education faculty; and
- The creation of opportunities for enhanced and ongoing professional development that improves the academic content knowledge of teachers

in fields in which they are or will be certified to teach.

Beyond these minimum requirements, the Partnership Program supports activities that propose to educate teachers in ways that reflect up-to-date knowledge from research and effective practice, and embody high teaching standards. These activities include the preparation of teachers to work with diverse student populations so that all students they will teach can achieve to high State and local content and performance standards, and implementation of instructional programs whose effectiveness has been demonstrated through research.

The Partnership Program also seeks to—

- Offer alternative routes into teaching to individuals who may have had careers in other professions, in the military or in other fields, and to educational paraprofessionals;
- Prepare teachers to successfully integrate technology into teaching and learning;
- Require prospective teachers to participate in intensive, structured, and clinically-based experiences with master teachers;
- Offer continuous assistance to graduates during their initial years in the classroom; and
- Prepare school principals, superintendents, and other school administrators to employ strong management and leadership skills that can help increase student achievement.

Teacher Recruitment Grants Program (Teacher Recruitment Program)

The Teacher Recruitment Program is designed to address the challenge of America's teacher shortage by making significant and lasting systemic changes to the ways that teachers are recruited, prepared, and supported as new teachers in high-need schools. The Teacher Recruitment Program supports projects that use funds to—

- Award scholarships to help students pay the costs of tuition, room, board, and other expenses of completing a teacher training program;
- Provide support services, if needed, to enable scholarship recipients to complete postsecondary education programs; and
- Provide for follow-up services to former scholarship recipients during their first three years of teaching.

Alternatively, funds may be used to develop and implement effective mechanisms to ensure that high-need LEAs and schools are able to effectively recruit highly qualified teachers.

Both States and eligible partnerships may receive awards under the Teacher Recruitment Program. For both States and partnerships, effective relationships and partnerships among all those who will implement project activities are keys to effective Teacher Recruitment Program activities. In particular, out of these partnerships and relationships will come (1) the recruitment strategies that are so vital to meeting the severe teaching needs of the high-need LEAs, (2) the kind of teacher preparation programs, which are built around effective support from both schools of education and schools of arts and science and other areas of the IHE, that recruited individuals will need in order to be effective teachers to the diverse student populations in those LEAs, and (3) the support services these individuals will need once they begin to teach.

The Teacher Recruitment Program also anticipates that projects will provide prospective teachers with high-quality teacher preparation and induction programs that—

- Set high standards for teaching;
- Reflect the best research and practice known across the country; and
- Prepare teachers to use technology in their classrooms.

Finally, all three of the Teacher Quality Enhancement Grant Programs anticipate that when program funding ceases, the work that States and partnerships have begun will be sustained. Therefore, the ability and willingness of grantees to sustain activities after the end of the project are key determinants of success. Section 205(a)(2) of Title II permits an eligible state or eligible partnership to receive only one grant award under each of the State, Partnership, and Teacher Recruitment Programs.

On February 11, 2000, the Secretary published a notice of proposed rulemaking (NPRM) for this part in the **Federal Register** (65 FR 6936–6946). In the preamble to the NPRM, the Secretary discussed on pages 6938 through 6940 the content of proposed regulations for these programs. The major issues addressed by the NPRM included—

- The content of selection criteria for grant competitions conducted under the three Teacher Quality Programs;
- The use of a pre-application process to determine which applicants should be invited to submit full applications under the Partnership Program and Teacher Recruitment Program;
- The elements of a workplan that all applicants for any of the three Teacher Quality Programs would be required to submit with their full applications;
- The applicability of a maximum eight-percent indirect cost rate for all IHE and nonprofit organizations in their use of Teacher Quality Program funds.
- The requirement that recipients of State Program grants provide for each year of their grant, from non-federal sources, an amount equal to 50 percent of the State Program grant award to carry out the activities supported by the grant.

As noted in the section of this preamble entitled "Analysis of Comments and Changes," these final regulations correct a few errors contained in the NPRM, such as the proposed requirement that applicants for Partnership or Teacher Recruitment Program grant awards submit a detailed workplan with their pre-applications rather than, as intended, with their full program applications. Otherwise, while these regulations in a few places clarify language that had been proposed, there are no differences between the final regulations and those proposed in the February 11, 2000 NPRM.

In addition, these regulations include two technical changes for which public comment is not necessary. First, these regulations correct an error made in the final regulations governing scholarships provided with Teacher Quality Program funds, which were published in the **Federal Register** on January 12, 2000 (65 FR 1780–1787). As published, § 611.43(d) requires grantees offering a scholarship to ensure that the scholarship agreement the recipient executes includes the current rate of interest, as provided by the Department. This provision was not included in the proposed regulations to govern the scholarships published on November 5, 1999 at 64 FR 60632–60646, but was added to the final regulations to clarify the grantees' responsibility to add the applicable interest rate annually to the approved scholarship agreements. We added this provision to establish the interest rate that would apply to any scholarship funds received under that agreement in the event the scholarship recipient failed to meet the service obligation and instead had to repay the scholarship.

However, the terms of the scholarship agreement provide that the recipient is not liable for repayment of the scholarship until the Department first has determined that he or she has not fulfilled the service obligation. Therefore, in accordance with 31 U.S.C. 3717, the rate of interest that should apply to the amount of scholarship that a recipient must repay for failure to meet the service obligation is the rate in effect when the indebtedness is established, not the rate in effect when the recipient received the scholarship. Section 611.43(d) has been amended to

reflect this change by deleting the additional provision added to the final regulations. Scholarship recipients who have executed scholarship agreements with a stated rate of interest prior to the effective date of these regulations will be given a choice of—

- Retaining this rate of interest for the portion of their scholarship they have received prior to the effective date of these regulations; or
- Having the interest rate in effect if and when the recipient fails to meet the service obligation apply to both this portion of the scholarship and to scholarship amount received after the regulations' effective date.

In addition, these regulations amend § 75.60(b) of the Education Department General Administrative Regulations (EDGAR). Section 75.60(b) contains a list of Departmental scholarship, fellowship, discretionary grant, and loan programs for which an individual who has received financial assistance must be current in any payments that are due as a condition of eligibility for financial assistance under this or other Department programs. When § 75.60 was proposed on August 18, 1992 (53 FR 31580), the Department announced its intent to apply this rule generally to all Department scholarship or fellowship programs to which part 75 applies. Since part 75 applies to the Teacher Quality Programs and to all other Department discretionary grant programs, we now are adding the Teacher Quality Programs to the list of programs in § 75.60 that are covered by this rule.

Analysis of Comments and Changes

In response to the Assistant Secretary's invitation in the NPRM, we received two comments. An analysis of the comments follows. Generally, we do not address technical and other minor changes—and suggested changes the law does not authorize the Secretary to make.

Comment: The commenters questioned several aspects of the proposed regulations, and asked us to clarify the language of a number of provisions. For example, they objected to language in proposed § 611.2 that would have all those who wish to receive grant awards under the Partnership or Teacher Recruitment Programs submit detailed workplans as part of those pre-applications. One commenter requested that we revisit page limitations of pre-applications in view of the changes in criteria from those used last year under the Partnership program for FY 1999 grants. The commenter asked that we clarify how the Department would implement the tie-breaking measure for applications with the most impact on the nation's Empowerment Zones and Enterprise Communities § 611.2), specifically whether we would use factors such as the number of affected Empowerment Zones and Enterprise Communities, or the number of teachers whom a proposed project would recruit to teach in their schools. The commenter also asked that we clarify how the competitive preference for the State Grants Program (§ 611.13) would work, and how the preference differs from more general State Program activities that the statute authorizes. Finally, the commenter recommended that we clarify aspects of the pre-application and general application selection criteria for the Partnership Program, and general selection criteria for the State Program, to clarify these criteria and the points to be awarded under them.

Discussion: In view of the comment, we have modified the proposed regulations in a number of ways. Sections 611.2 and 611.3 now clarify that only applicants submitting a full application for a Teacher Quality Program grant must submit a detailed workplan. Those submitting pre-applications under the Partnership or Teacher Recruitment Programs will not need to submit workplans with their pre-applications. The final regulations also correct several technical errors that the commenter identified in the proposed regulations. The program application packages, and not these regulations, identify the maximum number of points that reviewers will award applications under the elements of each criterion.

We continue to believe that the proposed language in § 611.2, which would resolve any ties in scoring applications on the basis of a project's relative impact on the nation's Empowerment Zones and Enterprise Communities, is adequate. It provides the Department the latitude to resolve ties on a case-by-case basis in ways that permit us comprehensively to examine the likely impact of a project on the nation's Empowerment Zones and Enterprise Communities. With regard to the proposed competitive preference in § 611.13, we agree with the commenter that each of the three activities entitling an applicant to a preference mirrors activities that section 202 of Title II authorizes. However, the competitive preference in § 611.13 reflects statutory requirements of section 205(b)(2) of the HEA, in which Congress identified certain allowable State Program activities as deserving of this preference.

Changes: The final regulations for this part have been revised accordingly.

Goals 2000: Educate America Act

The Goals 2000: Educate America Act (Goals 2000) focuses the Nation's education reform efforts on the eight National Education Goals and provides a framework for meeting them. Goals 2000 promotes new partnerships to strengthen schools and expands the Department's capacities for helping communities to exchange ideas and obtain information needed to achieve the goals.

These regulations address the National Education Goal that the Nation's teaching force will have the content knowledge and teaching skills needed to instruct all American students for the next century.

Paperwork Reduction Act of 1995

The Paperwork Reduction Act of 1995 does not require you to respond to a collection of information unless it displays a valid OMB control number. We display the valid OMB control numbers assigned to the collections of information in these final regulations at the end of the affected sections of the regulations.

Waiver of Proposed Rulemaking

Under the Administrative Procedure Act (5 U.S.C. 553) the Department generally offers interested parties the opportunity to comment on proposed regulations. However, two regulations announced included in these final regulations are being issued without public comment. The correction of § 611.43(d) reflects a legal requirement governing when a Teacher Quality program scholarship recipient incurs liability for failure to meet the service obligation, and hence no public comment is needed. The amendment to § 75.60(b) of EDGAR, which includes the Teacher Quality Enhancement Grants Program in the list of Department programs for which individuals must be current in their payments or be ineligible for further financial assistance provided by Department programs is a technical amendment. The Department already took public comment on the content of § 75.60(b) before the regulation was published as a final regulation on August 18, 1992 (53 FR 31580). Therefore, under 5 U.S.C. 553(b)(B), the Secretary has determined that proposed regulations are unnecessary and contrary to the public interest.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372

and the regulations in 34 CFR Part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, we intend this document to provide early notification of specific plans and actions for this program.

Assessment of Educational Impact

In the NPRM we requested comments on whether the proposed regulations would require transmission of information that any other agency or authority of the United States gathers or makes available.

Based on the response to the NPRM and on our review, we have determined that these final regulations do not require transmission of information that any other agency or authority of the United States gathers or makes available.

Electronic Access to This Document

You may review this document, as well as all other Department of Education documents published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at either of the following sites:

List of Subjects

34 CFR part 75

Administrative practice and procedure, Education Department, Grant programs—education, Grant administration, Incorporation by reference, Performance reports, Reporting and recordkeeping requirements, Unobligated funds.

34 CFR part 611

Colleges and universities, Elementary and secondary education, Grant programs—education.

Dated: April 5, 2000.

Claudio R. Prieto,

Acting Assistant Secretary for Postsecondary Education.

For the reasons stated in the preamble, the Secretary amends parts 75 and 611 of title 34 of the Code of Federal Regulations as follows:

PART 75—DIRECT GRANT PROGRAMS

1. The authority citation for part 75 continues to read as follows:

Authority: 20 U.S.C. 1221e–3 and 3474

2. Section 75.60 is amended by adding a new paragraph (b) (7) to read as follows:

§ 75.60 Individuals ineligible to receive assistance.

* * * * *

(b) * * *

(7) A scholarship awarded under the Teacher Quality Enhancement Grants Program (20 U.S.C. 1021 *et seq.*).

PART 611—TEACHER QUALITY ENHANCEMENT GRANTS PROGRAM

1. The authority citation for part 611 continues to read as follows:

Authority: 20 U.S.C. 1021 *et seq.*, unless otherwise noted.

2–3. Sections 611.2 and 611.3 are added to Subpart A of part 611 to read as follows:

§ 611.2 What management plan must be included in a Teacher Quality Enhancement Grants Program application?

(a) In addition to a description of the proposed multiyear project, timeline, and budget information required by 34 CFR 75.112 and 75.117 and other applicable law, an applicant for a grant under this part must submit with its application under paragraphs (a)(1), (a)(2)(iii), or (a)(3)(iii) of § 611.3, as appropriate, a management plan that includes a proposed multiyear workplan.

(b) At a minimum, this workplan must identify, for each year of the project—

(1) The project's overall objectives;

(2) Activities that the applicant proposes to implement to promote each project objective;

(3) Benchmarks and timelines for conducting project activities and achieving the project's objectives;

(4) The individual who will conduct and coordinate these activities;

(5) Measurable outcomes that are tied to each project objective, and the evidence by which success in achieving these objectives will be measured; and

(6) Any other information that the Secretary may require.

(c)(1) In any application for a grant that is submitted on behalf of a partnership, the workplan also must identify which partner will be responsible for which activities.

(2) In any application for a grant that is submitted on behalf of a State, the workplan must identify which entities in the State will be responsible for which activities.

(Approved by the Office of Management and Budget under control number 1840–0007.)

(Authority: 20 U.S.C. 1021 *et seq.*)

§ 611.3 What procedures does the Secretary use to award a grant?

The Secretary uses the selection procedures in 34 CFR 75.200 through 75.222 except that—

(a) *Application procedures for each program.* (1) For the State Grants Program, the Secretary evaluates applications for new grants on the basis of the selection criteria and competitive preference contained in §§ 611.11 through 611.13.

(2) For the Partnership Grants Program, the Secretary—

(i) Uses a two-stage application process to determine which applications to fund;

(ii) Uses the selection criteria in §§ 611.21 through 611.22 to evaluate pre-applications submitted for new grants, and to determine those applicants to invite to submit full program applications; and

(iii) For those applicants invited to submit full applications, uses the selection criteria and competitive preference in §§ 611.23–611.25 to evaluate the full program applications.

(3) For the Teacher Recruitment Grants Program, the Secretary—

(i) Uses a two-stage application process to determine which applications to fund;

(ii) Uses the selection criteria in § 611.31 to evaluate pre-applications submitted for new grants, and to determine those applicants to invite to submit full program applications; and

(iii) For those applicants invited to submit full applications, uses the selection criteria in § 611.32 to evaluate the full program applications.

(b) *Required budgets in pre-applications.* An applicant that submits a pre-application for a Partnership Program or Teacher Recruitment Program grant under paragraphs (b)(2)(ii) and (b)(3)(ii) must also submit any budgetary information that the

Secretary may require in the program application package.

(c) *Tie-breaking procedures.* In the event that two or more applicants are ranked equally for the last available award under any program, the Secretary selects the applicant whose activities will focus (or have most impact) on LEAs and schools located in one (or more) of the Nation's Empowerment Zones and Enterprise Communities.

(Approved by the Office of Management and Budget under control number 1840–0007.)

(Authority: 20 U.S.C. 1021 *et seq.*)

4. Subpart B, consisting of §§ 611.11 through 611.13, is added to part 611, to read as follows:

Subpart B—State Grants Program

611.11 What are the program's general selection criteria?
611.12 What additional selection criteria are used for an application proposing teacher recruitment activities?
611.13 What competitive preference doe the Secretary provide?

§ 611.11 What are the program's general selection criteria?

Subpart B—State Grants Program

In evaluating the quality of applications, the Secretary uses the following selection criteria.

(a) *Quality of project design.* (1) The Secretary considers the quality of the project design.

(2) In determining the quality of the project design, the Secretary considers the extent to which—

(i) The project design will result in systemic change in the way that all new teachers are prepared, and includes partners from all levels of the education system;

(ii) The Governor and other relevant executive and legislative branch officials, the K–16 education system or systems, and the business community are directly involved in and committed to supporting the proposed activities;

(iii) Project goals and performance objectives are clear, measurable outcomes are specified, and a feasible plan is presented for meeting them;

(iv) The project is likely to initiate or enhance and supplement systemic State reforms in one or more of the following areas: teacher recruitment, preparation, licensing, and certification;

(v) The applicant will ensure that a diversity of perspectives is incorporated into operation of the project, including those of parents, teachers, employers, academic and professional groups, and other appropriate entities; and

(vi) The project design is based on up-to-date knowledge from research and effective practice.

(b) *Significance.* (1) The Secretary considers the significance of the project.

(2) In determining the significance of the project, the Secretary considers the extent to which—

(i) The project involves the development or demonstration of promising new strategies or exceptional approaches in the way new teachers are recruited, prepared, certified, and licensed;

(ii) Project outcomes lead directly to improvements in teaching quality and student achievement as measured against rigorous academic standards;

(iii) The State is committed to institutionalize the project after federal funding ends; and

(iv) Project strategies, methods, and accomplishments are replicable, thereby permitting other States to benefit from them.

(c) *Quality of resources.* (1) The Secretary considers the quality of the project's resources.

(2) In determining the quality of the project resources, the Secretary considers the extent to which—

(i) Support available to the project, including personnel, equipment, supplies, and other resources, is sufficient to ensure a successful project;

(ii) Budgeted costs are reasonable and justified in relation to the design, outcomes, and potential significance of the project; and

(iii) The applicant's matching share of the budgeted costs demonstrates a significant commitment to successful completion of the project and to project continuation after federal funding ends.

(d) *Quality of management plan.* (1) The Secretary considers the quality of the project's management plan.

(2) In determining the quality of the management plan, the Secretary considers the following factors:

(i) The extent to which the management plan, including the workplan, is designed to achieve goals and objectives of the project, and includes clearly defined activities, responsibilities, timelines, milestones, and measurable outcomes for accomplishing project tasks.

(ii) The adequacy of procedures to ensure feedback and continuous improvements in the operation of the project.

(iii) The qualifications, including training and experience, of key personnel charged with implementing the project successfully.

(Approved by the Office of Management and Budget under control number 1840–0007.)

(Authority: 20 U.S.C. 1021 *et seq.*)

§ 611.12 What additional selection criteria are used for an application proposing teacher recruitment activities?

In reviewing applications that propose to undertake teacher recruitment activities, the Secretary also considers the following selection criteria:

(a) In addition to the elements contained in § 611.11(a) (Quality of project design), the Secretary considers the extent to which the project addresses—

(1) Systemic changes in the ways that new teachers are to be recruited, supported and prepared; and

(2) Systemic efforts to recruit, support, and prepare prospective teachers from disadvantaged and other underrepresented backgrounds.

(b) In addition to the elements contained in § 611.11(b) (Significance), the Secretary considers the applicant's commitment to continue recruitment activities, scholarship assistance, and preparation and support of additional cohorts of new teachers after funding under this part ends.

(c) In addition to the elements contained in § 611.11(c) (Quality of resources), the Secretary considers the impact of the project on high-need LEAs and high-need schools based upon—

(1) The amount of scholarship assistance the project will provide students from federal and non-federal funds;

(2) The number of students who will receive scholarships; and

(3) How those students receiving scholarships will benefit from high-quality teacher preparation and an effective support system during their first three years of teaching.

(Approved by the Office of Management and Budget under control number 1840–0007.)

(Authority: 20 U.S.C. 1021 *et seq.*)

§ 611.13 What competitive preference does the Secretary provide?

The Secretary provides a competitive preference on the basis of how well the State's proposed activities in any one or more of the following statutory priorities are likely to yield successful and sustained results:

(a) Initiatives to reform State teacher licensure and certification requirements so that current and future teachers possess strong teaching skills and academic content knowledge in the subject areas in which they will be certified or licensed to teach.

(b) Innovative reforms to hold higher education institutions with teacher preparation programs accountable for preparing teachers who are highly competent in the academic content areas and have strong teaching skills.

(c) Innovative efforts to reduce the shortage (including the high turnover) of highly competent teachers in high-poverty urban and rural areas.

(Approved by the Office of Management and Budget under control number 1840–0007.)

(Authority: 20 U.S.C. 1021 *et seq.*)

5. Subpart C, consisting of §§ 611.21 through 611.25, is added to part 611, to read as follows:

Subpart C—Partnership Grants Program

611.21 What are the program's selection criteria for pre-applications?
611.22 What additional selection criteria are used for pre-application that proposes teacher recruitment activities?
611.23 What are the program's general selection criteria for full applications?
611.24 What additional selection criteria are used for a full application that proposes teacher recruitment activities?
611.25 What competitive preference does the Secretary provide?

Subpart C—Partnership Grants Program

§ 611.21 What are the program's selection criteria for pre-applications?

In evaluating the quality of pre-applications, the Secretary uses the following selection criteria.

(a) *Project goals and objectives.* (1) The Secretary considers the goals and objectives of the project design.

(2) In determining the quality of the project goals and objectives, the Secretary considers the following factors:

(i) The extent to which the partnership's vision will produce significant and sustainable improvements in teacher education.

(ii) The needs the partnership will address.

(iii) How the partnership and its activities would be sustained once federal support ends.

(b) *Partnering commitment.* (1) The Secretary considers the partnering commitment embodied in the project.

(2) In determining the quality of the partnering commitment, the Secretary considers the following factors:

(i) Evidence of how well the partnership would be able to accomplish objectives working together that its individual members could not accomplish working separately.

(ii) The significance of the roles given to each principal partner in implementing project activities.

(c) *Quality and comprehensiveness of key project components.* (1) The Secretary considers the quality and comprehensiveness of key project components in the process of preparing new teachers.

(2) In determining the quality and comprehensiveness of key project components in the process of preparing new teachers, the Secretary considers the extent to which—

(i) Specific activities are designed and would be implemented to ensure that students preparing to be teachers are adequately prepared, including activities designed to ensure that they have improved content knowledge, are able to use technology effectively to promote instruction, and participate in extensive, supervised clinical experiences;

(ii) Specific activities are designed and would be implemented to ensure adequate support for those who have completed the teacher preparation program during their first years as teachers; and

(iii) The project design reflects up-to-date knowledge from research and effective practice.

(d) *Specific project outcomes.* (1) The Secretary considers the specific outcomes the project would produce in the preparation of new teachers.

(2) In determining the specific outcomes the project would produce in the preparation of new teachers, the Secretary considers the following factors:

(i) The extent to which important aspects of the partnership's existing teacher preparation system would change.

(ii) The way in which the project would demonstrate success using high-quality performance measures.

(Approved by the Office of Management and Budget under control number 1840–0007.)

(Authority: 20 U.S.C. 1021 *et seq.*)

§ 611.22 What additional selection criteria are used for a pre-application that proposes teacher recruitment activities?

In reviewing pre-applications that propose to undertake teacher recruitment activities, the Secretary also considers the following selection criteria:

(a) In addition to the elements contained in § 611.21(a) (Project goals and objectives), the Secretary considers the extent to which—

(1) The partnership's vision responds to LEA needs for a diverse and high quality teaching force, and will lead to reduced teacher shortages in these high-need LEAs; and

(2) The partnership will sustain its work after federal funding has ended by recruiting, providing scholarship assistance, training and supporting additional cohorts of new teachers.

(b) In addition to the elements contained in § 611.21(c) (Quality and comprehensiveness of key project components), the Secretary considers the extent to which the project will—

(1) Significantly improve recruitment of new students, including those from disadvantaged and other underrepresented backgrounds; and

(2) Provide scholarship assistance and adequate training to preservice students, as well as induction support for those who become teachers after graduating from the teacher preparation program.

(c) In addition to the elements contained in § 611.21(d) (Specific project outcomes), the Secretary considers the extent to which the project addresses the number of new teachers to be produced and their ability to teach effectively in high-need schools.

(Approved by the Office of Management and Budget under control number 1840–0007.)

(Authority: 20 U.S.C. 1021 *et seq.*)

§ 611.23 What are the program's general selection criteria for full applications?

In evaluating the quality of applications, the Secretary uses the following selection criteria.

(a) *Quality of project design.* (1) The Secretary considers the quality of the project design.

(2) In determining the quality of the project design, the Secretary considers the following factors:

(i) The extent of evidence of institution-wide commitment to high quality teacher preparation that includes significant policy and practice changes supported by key leaders, and which result in permanent changes to ensure that preparing teachers is a central mission of the entire university.

(ii) The extent to which the partnership creates and sustains collaborative mechanisms to integrate professional teaching skills, including skills in the use of technology in the classroom, with strong academic content from the arts and sciences.

(iii) The extent of well-designed and extensive preservice clinical experiences for students, including mentoring and other forms of support, implemented through collaboration between the K–12 and higher education partners.

(iv) Whether a well-planned, systematic induction program is established for new teachers to increase their chances of being successful in high-need schools.

(v) The strength of linkages within the partnership between higher education and high-need schools or school districts so that all partners have important roles in project design, implementation, governance and evaluation.

(vi) Whether the project design is based on up-to-date knowledge from research and effective practice, especially on how students learn.

(b) *Significance of project activities.* (1) The Secretary considers the significance of project activities.

(2) In determining the significance of the project activities, the Secretary considers the following factors:

(i) How well the project involves promising new strategies or exceptional approaches in the way new teachers are recruited, prepared and inducted into the teaching profession.

(ii) The extent to which project outcomes include preparing teachers to teach to their State's highest K–12 standards, and are likely to result in improved K–12 student achievement.

(iii) The extent to which the partnership has specific plans to institutionalize the project after federal funding ends.

(iv) The extent to which the partnership is committed to disseminating effective practices to others and is willing to provide technical assistance about ways to improve teacher education.

(v) How well the partnership will integrate its activities with other education reform efforts underway in the State or communities where the partners are located, and will coordinate its work with local, State or federal teacher training, teacher recruitment, or professional development programs.

(c) *Quality of resources.* (1) The Secretary considers the quality of resources of project activities.

(2) In determining the quality of resources, the Secretary considers the extent to which—

(i) Support available to the project, including personnel, equipment, supplies, and other resources, is sufficient to ensure a successful project;

(ii) Budgeted costs are reasonable and justified in relation to the design, outcomes, and potential significance of the project; and

(iii) The applicant's matching share of the budgeted costs demonstrates a significant commitment to successful completion of the project and to project continuation after federal funding ends.

(d) *Quality of management plan.* (1) The Secretary considers the quality of the management plan.

(2) In determining the quality of the management plan, the Secretary considers the following factors:

(i) The extent to which the management plan, including the work plan, is designed to achieve goals and objectives of the project, and includes clearly defined activities, responsibilities, timelines, milestones, and measurable outcomes for accomplishing project tasks.

(ii) The extent to which the project has an effective, inclusive, and responsive governance and decision-making structure that will permit all partners to participate in and benefit from project activities, and to use evaluation results to ensure continuous improvements in the operations of the project.

(iii) The qualifications, including training and experience, of key personnel charged with implementing the project successfully.

(Approved by the Office of Management and Budget under control number 1840–0007.)

(Authority: 20 U.S.C. 1021 *et seq.*)

§ 611.24 What additional selection criteria are used for a full application that proposes teacher recruitment activities?

In reviewing full applications that propose to undertake teacher recruitment activities, the Secretary also considers the following selection criteria:

(a) In addition to the elements contained in § 611.23(a) (Quality of project design), the Secretary considers the extent to which the project reflects—

(1) A commitment to recruit, support and prepare additional well-qualified new teachers for high-need schools;

(2) Appropriate academic and student support services; and

(3) A comprehensive strategy for addressing shortages of well-qualified and well-trained teachers in high-need LEAs, especially teachers from disadvantaged and other underrepresented backgrounds.

(b) In addition to the elements contained in § 611.23(b) (Significance of project activities), the Secretary considers the extent to which the project promotes the recruitment, scholarship assistance, preparation, and support of additional cohorts of new teachers.

(c) In addition to the elements contained in § 611.23(c) (Quality of resources), the Secretary considers the impact of the project on high-need LEAs and high-need schools based upon—

(1) The amount of scholarship assistance the project will provide students from federal and non-federal funds;

(2) The number of students who will receive scholarships; and

(3) How those students receiving scholarships will benefit from high-quality teacher preparation and an effective support system during their first three years of teaching.

(Approved by the Office of Management and Budget under control number 1840–0007.)

(Authority: 20 U.S.C. 1021 *et seq.*)

§ 611.25 What competitive preference does the Secretary provide?

The Secretary provides a competitive preference on the basis of how well the project includes a significant role for private business in the design and implementation of the project.

(Approved by the Office of Management and Budget under control number 1840–0007.)

(Authority: 20 U.S.C. 1021 *et seq.*)

6. Subpart D, consisting of §§ 611.31 and 611.32, is added to part 611, to read as follows:

Subpart D—Teacher Recruitment Grants Program

611.31 What are the program's selection criteria for pre-applications?
611.32 What are the program's general selection criteria?

Subpart D—Teacher Recruitment Grants Program

§ 611.31 What are the program's selection criteria for pre-applications?

In evaluating pre-applications, the Secretary considers the following criteria:

(a) *Project goals and objectives.* (1) The Secretary considers the goals and objectives of the project design.

(2) In determining the quality of the project goals and objectives, the Secretary considers how the partnership or State applicant intends to—

(i) Produce significant and sustainable improvements in teacher recruitment, preparation, and support; and

(ii) Reduce teacher shortages in high-need LEAs and schools, and improve student achievement in the schools in which teachers who participate in its project will teach.

(b) *Partnership commitment.* (1) The Secretary considers the partnering commitment embodied in the project.

(2) In determining the quality of the partnering commitment, the Secretary considers the following factors:

(i) What the partnership, or the State and its cooperating entities, can accomplish by working together that could not be achieved by working separately.

(ii) How the project proposed by the partnership or State is driven by the needs of LEA partners.

(c) *Quality of key project components.* (1) The Secretary considers the quality of key project components.

(2) In determining the quality of key project components, the Secretary considers the following factors:

(i) The extent to which the project would make significant and lasting systemic changes in how the applicant recruits, trains, and supports new

teachers, and reflects knowledge gained from research and practice.

(ii) The extent to which the project would be implemented in ways that significantly improve recruitment, scholarship assistance to preservice students, training, and induction support for new entrants into teaching.

(d) *Specific project outcomes.* (1) The Secretary considers the specific outcomes the project would produce in the recruitment, preparation, and placement of new teachers.

(2) In determining the specific outcomes the project would produce in the recruitment, preparation, and placement of new teachers, the Secretary considers the following factors:

(i) The number of teachers to be produced and the quality of their preparation.

(ii) The partnership's or State's commitment to sustaining the work of the project after federal funding has ended by recruiting, providing scholarship assistance, training, and supporting additional cohorts of new teachers.

(Approved by the Office of Management and Budget under control number 1840–0007.)

(Authority: 20 U.S.C. 1021 *et seq.*)

§ 611.32 What are the program's general selection criteria?

In evaluating the quality of full applications, the Secretary uses the following selection criteria.

(a) *Quality of the project design.* (1) The Secretary considers the quality of the project design for ensuring that activities to recruit and prepare new teachers are a central mission of the project.

(2) In considering the quality of the project design for ensuring that activities to recruit and prepare new teachers are a central mission of the project, the Secretary considers the extent to which the project design—

(i) Shows evidence of institutional or (in the case of a State applicant) State-level commitment both to recruitment of additional new teachers, and to high-quality teacher preparation that includes significant policy and practice changes supported by key leaders and that result in permanent changes to current institutional practices;

(ii) Creates and sustains collaborative mechanisms to integrate professional teaching skills, including skills in the use of technology in the classroom, with academic content provided by the school of arts and sciences;

(iii) Includes well-designed academic and student support services as well as carefully planned and extensive preservice clinical experiences for students, including mentoring and other forms of support, that are implemented through collaboration between the K–12 and higher education partners;

(iv) Includes establishment of a well-planned, systematic induction program for new teachers that increases their chances of being successful in high-need schools;

(v) Includes strong linkages among the partner institutions of higher education and high-need schools and school districts (or, in the case of a State applicant, between the State and these entities in its project), so that all those who would implement the project have important roles in project design, implementation, governance, and evaluation;

(vi) Responds to the shortages of well-qualified and well-trained teachers in high-need school districts, especially from disadvantaged and other underrepresented backgrounds; and

(vii) Is based on up-to-date knowledge from research and effective practice.

(b) *Significance.* (1) The Secretary considers the significance of the project.

(2) In determining the significance of the project, the Secretary considers the extent to which—

(i) The project involves promising new strategies or exceptional approaches in the way new teachers are recruited, prepared, and inducted into the teaching profession;

(ii) Project outcomes include measurable improvements in teacher quality and in the number of well-prepared new teachers, that are likely to result in improved K–12 student achievement;

(iii) The project will be institutionalized after federal funding ends, including recruitment, scholarship assistance, preparation, and support of additional cohorts of new teachers;

(iv) The project will disseminate effective practices to others, and provide technical assistance about ways to improve teacher recruitment and preparation; and

(v) The project will integrate its activities with other education reform activities underway in the State or communities in which the project is based, and will coordinate its work with local, State, and federal teacher recruitment, training, and professional development programs.

(c) *Quality of resources.* (1) The Secretary considers the quality of the project's resources.

(2) In determining the quality of the project's resources, the Secretary considers the extent to which—

(i) The amount of support available to the project, including personnel, equipment, supplies, student scholarship assistance, and other resources is sufficient to ensure a successful project.

(ii) Budgeted costs are reasonable and justified in relation to the design, outcomes, and potential significance of the project.

(iii) The applicant's matching share of budgeted costs demonstrates a significant commitment to successful completion of the project, and to project continuation after federal funding ends.

(d) *Quality of management plan.* (1) The Secretary considers the quality of the project's management plan.

(2) In determining the quality of the management plan, the Secretary considers the following factors:

(i) The extent to which the management plan, including the workplan, is designed to achieve goals and objectives of the project, and includes clearly defined activities, responsibilities, timelines, milestones, and measurable outcomes for accomplishing project tasks.

(ii) The extent to which the project has an effective, inclusive, and responsive governance and decisionmaking structure that will permit all partners to participate in and benefit from project activities, and to use evaluation results to continuously improve project operations.

(iii) The qualifications, including training and experience, of key personnel charged with implementing the project successfully.

(Approved by the Office of Management and Budget under control number 1840–0007.)

(Authority: 20 U.S.C. 1021 *et seq.*)

7. Section 611.43 is amended by revising paragraph (d) to read as follows:

§ 611.43 What are the consequences of a scholarship recipient's failure to meet the service obligation?

* * * * *

(d) *Interest.* In accordance with 31 U.S.C. 3717 and 34 CFR part 30, the Secretary charges interest on the unpaid balance that the scholarship recipient owes. However, except as provided in § 611.44(d), the Secretary does not charge interest for the period of time that precedes the date on which the scholarship recipient is required to begin repayment.

* * * * *

8. Subpart F of part 611 is revised to read as follows:

Subpart F—Other Grant Conditions

Subpart F—Other Grant Conditions

611.61 What is the maximum indirect cost rate that applies to a recipient's use of program funds?
611.62 What are a grantee's matching requirements?

§ 611.61 What is the maximum indirect cost rate that applies to a recipient's use of program funds?

Notwithstanding 34 CFR 75.560–75.562 and 34 CFR 80.22, the maximum indirect cost rate that any recipient of funds under the Teacher Quality Enhancement Grants Program may use to charge indirect costs to these funds is the lesser of—

(a) The rate established by the negotiated indirect cost agreement; or

(b) Eight percent.

(Authority: 20 U.S.C. 1021 *et seq.*)

§ 611.62 What are a grantee's matching requirements?

(a)(1) Each State receiving a grant under the State Grants Program or Teacher Recruitment Grants Program must provide, from non-federal sources, an amount equal to 50 percent of the amount of the grant to carry out the activities supported by the grant.

(2) The 50 percent match required by paragraph (a)(1) of this section must be made annually during the project period, with respect to each grant award the State receives.

(b) Each partnership receiving a grant under the Partnership Grant Program or the Teacher Recruitment Grant Program must provide, from non-federal sources, an amount equal to—

(1) 25 percent of the grant award for the first year of the grant;

(2) 35 percent of the grant award for the second year of the grant; and

(3) 50 percent of the grant award for each succeeding year of the grant.

(c) The match from non-federal sources required by paragraphs (a) and (b) of this section may be made in cash or in kind.

(Authority: 20 U.S.C. 1021 *et seq.*)

DEPARTMENT OF EDUCATION

[CFDA No. 84.336]

Teacher Quality Enhancement Grants Program; Notice Inviting Applications for New Awards for Fiscal Year (FY) 2000

Purpose of Program: The program provides grants to States and to partnerships to promote improvements in the quality of new teachers with the ultimate goal of increasing student achievement in the nation's pre-K–12 classrooms. For FY 2000, a new competition will be conducted under the State Grants Program (State Program) and the Partnership Program for Improving Teacher Education (Partnership Program). The purpose of the State Program is to improve the quality of a State's teaching force by supporting the implementation of comprehensive statewide reform activities in areas such as teacher licensing and certification, accountability for high-quality teacher preparation, and recruitment. The purpose of the Partnership Program is to promote significant improvements in teacher education by strengthening the vital role of K–12 educators in the design and implementation of effective teacher education programs, and by increasing collaboration among these practitioners and departments of arts and sciences and schools of education.

Eligible Applicants: State Grants (including the District of Columbia, Puerto Rico and the insular areas)—States that did not receive an FY 1999 grant under the State Program.

Partnership Grants—Partnerships comprised, at a minimum, of an institution of higher education with an eligible teacher preparation program, a school of arts and sciences, and a high-need local educational agency (LEA). These terms are defined in section 203 of the Higher Education Act and in regulations for this program in 34 CFR 611.1. Partnerships that received an FY 1999 grant under this program are not eligible for this competition.

Applications Available: April 11, 2000.

Deadline for Transmittal of Applications: State Grants—June 12, 2000.

Partnership Grants—Pre-applications: May 26, 2000; Final Applications: August 15, 2000.

Deadline for Intergovernmental Review: August 9, 2000.

Available Funds: State Grants—$7,900,000; Partnership Grants—$6,300,000.

Estimated Range of Awards: State Grants—$1,000,000–$2,000,000 per year; Partnership Grants—$1,000,000–$2,000,000 per year.

Estimated Average Size of Awards: State Grants—$1.5 million per year; Partnership Grants—$1.5 million per year.

Estimated Number of Awards: State Grants—6; Partnership Grants—5.

Note: The Department is not bound by any estimates in this notice.

Project Period: State Grants—up to 36 months; Partnership Grants—up to 60 months.

Page Limits:

Note: The application narrative is where you, the applicant, address the selection criteria reviewers use in evaluating your pre-application or application.

Pre-applications for Partnership Grants—If you are submitting a pre-application for a Partnership grant, you must limit your pre-application narrative to the equivalent of no more than 10 pages and your estimated budget information to the equivalent of no more than three pages.

State Grants and Final Applications for Partnership Grants—If you are submitting an application for a State grant or a final application for a Partnership grant, you must limit your narrative to the equivalent of no more than 50 pages and your accompanying work plan to the equivalent of no more than 10 pages. Submit the work plan as an appendix. In addition, you must limit your budget narrative to the equivalent of no more than 10 pages and your evaluation plan to the equivalent of no more than five pages.

For the pre-application or application narrative, work plan, budget narrative, and evaluation plan, the following standards apply:

- A page is 8.5″ x 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text, including titles, headings, quotations, references, and captions.
- Use a font that is either 12-point or larger or no smaller than 10 pitch (characters per inch).
- For tables, charts, or graphs also use a font that is either 12-point or larger or no smaller than 10 pitch.

Our reviewers will not read any of the specified sections of your application that

- Exceed the page limit if you apply these standards; or
- Exceed the equivalent of the page limit if you apply other standards.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 82, 85, 86, 97, 98 and 99. (b) The regulations for this program in 34 CFR part 611, published in this edition of the **Federal Register**.

Pre-Application Technical Workshops: We will be conducting four regional technical assistance workshops to assist prospective applicants.

1. *Tempe:* April 13, 2000, 8:30 a.m. to 1:00 p.m., Arizona State University, Payne Bldg., Room 129, Tempe, Arizona (Registration: 8:30 to 9:00 a.m.) Contact Person: Kathy Langerman, (480) 965–3146 or klang@asu.edu

2. *Boston:* April 18, 2000, 8:30 a.m. to 1:00 p.m., Boston College, Lower Dining Hall, Heights Room, 140 Commonwealth Avenue, Chestnut Hill, Massachusetts (Registration: 8:30 to 9:00 a.m.) Contact Person: Pamela Herrup, (617) 552–0763 or herrup@bc.edu

3. *Milwaukee:* April 20, 2000, 8:30 a.m. to 1:00 p.m., University of Wisconsin-Milwaukee, University Center for Continuing Education (UCCE), 161 W. Wisconsin Avenue, Room 7970, Milwaukee, Wisconsin (Registration: 8:30 to 9:00 a.m.) Contact Person: Linda Post, (414) 229–4884 or lpost@uwm.edu

4. *Miami:* April 25, 2000, 8:30 a.m. to 1:00 p.m., University of Miami, University Center, Section A, Flamingo Ballroom, 1306 Stanford Drive, Coral Gables, Florida (Registration: 8:30 to 9:00 a.m.) Contact Person: Martha Kairuz (305) 284–5937 or mkairuz@umiami.ir.miami.edu

Any interested parties are invited to attend these workshops.

Assistance to Individuals with Disabilities at the Technical Assistance Workshops—The meeting sites are accessible to individuals with disabilities. The Department will provide a sign language interpreter at each of the scheduled workshops. An individual with a disability who will need an auxiliary aid or service other than an interpreter to participate in the meeting (*e.g.*, assistive listening device, or materials in an alternate format) should notify the Department at least two weeks before the scheduled workshop date. Although we will attempt to meet a request received after this date, the requested auxiliary aid or service may not be available because of insufficient time to arrange it. Requests for assistance should be directed by contacting the Teacher Quality Program Office as directed in the **FOR FURTHER INFORMATION CONTACT** section. There is no pre-registration for these workshops. For additional workshop information, you may visit the Teacher Quality website at: http://www.ed.gov/offices/OPE/heatqp/index.html or contact the

person designated as contact for each workshop site listed.

FOR FURTHER INFORMATION OR APPLICATIONS: Brenda Shade, Teacher Quality Program, Office of Postsecondary Education, U.S. Department of Education, 1990 K Street NW, Room 6152, Washington, DC 20006–8525. Telephone Number: (202) 502–7773. The e-mail address for Ms. Shade is Brenda__Shade@ed.gov

The fax number is (202) 502–7699. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

Individuals with disabilities may obtain this document in an alternate format (*e.g.*, Braille, large print, audiotape, or computer diskette) on request to the contact person listed under **FOR FURTHER INFORMATION OR APPLICATIONS CONTACT** section.

Electronic Access to This Document

You may view this document, as well as all other Department of Education documents published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at either of the following sites:

Environmental Protection Agency

Incentives for Self-Policing: Discovery, Disclosure, Correction and Prevention of Violations; Notice

VOL 65 ISS 70 AP 11 2000 UMI

ENVIRONMENTAL PROTECTION AGENCY

[FRL–6576–3]

Incentives for Self-Policing: Discovery, Disclosure, Correction and Prevention of Violations

AGENCY: Environmental Protection Agency (EPA, or Agency).

ACTION: Final Policy Statement.

SUMMARY: EPA today issues its revised final policy on "Incentives for Self-Policing: Discovery, Disclosure, Correction and Prevention of Violations," commonly referred to as the "Audit Policy." The purpose of this Policy is to enhance protection of human health and the environment by encouraging regulated entities to voluntarily discover, promptly disclose and expeditiously correct violations of Federal environmental requirements. Incentives that EPA makes available for those who meet the terms of the Audit Policy include the elimination or substantial reduction of the gravity component of civil penalties and a determination not to recommend criminal prosecution of the disclosing entity. The Policy also restates EPA's long-standing practice of not requesting copies of regulated entities' voluntary audit reports to trigger Federal enforcement investigations. Today's revised Audit Policy replaces the 1995 Audit Policy (60 FR 66706), which was issued on December 22, 1995, and took effect on January 22, 1996. Today's revisions maintain the basic structure and terms of the 1995 Audit Policy while clarifying some of its language, broadening its availability, and conforming the provisions of the Policy to actual Agency practice. The revisions being released today lengthen the prompt disclosure period to 21 days, clarify that the independent discovery condition does not automatically preclude penalty mitigation for multi-facility entities, and clarify how the prompt disclosure and repeat violation conditions apply to newly acquired companies. The revised Policy was developed in close consultation with the U.S. Department of Justice (DOJ), States, public interest groups and the regulated community. The revisions also reflect EPA's experience implementing the Policy over the past five years.

DATES: This revised Policy is effective May 11, 2000.

FOR FURTHER INFORMATION CONTACT: Catherine Malinin Dunn (202) 564–2629 or Leslie Jones (202) 564–5123. Documentation relating to the development of this Policy is contained in the environmental auditing public docket (#C–94–01). An index to the docket may be obtained by contacting the Enforcement and Compliance Docket and Information Center (ECDIC) by telephone at (202) 564–2614 or (202) 564–2119, by fax at (202) 501–1011, or by email at docket.oeca@epa.gov. ECDIC office hours are 8:00 am to 4:00 pm Monday through Friday except for Federal holidays. An index to the docket is available on the Internet at www.epa.gov/oeca/polguid/enfdock.html. Additional guidance regarding interpretation and application of the Policy is also available on the Internet at www.epa.gov/oeca/ore/apolguid.html.

I. Explanation of Policy

A. Introduction

On December 22, 1995, EPA issued its final policy on "Incentives for Self-Policing: Discovery, Disclosure, Correction and Prevention of Violations" (60 FR 66706) (Audit Policy, or Policy). The purpose of the Policy is to enhance protection of human health and the environment by encouraging regulated entities to voluntarily discover, disclose, correct and prevent violations of Federal environmental law. Benefits available to entities that make disclosures under the terms of the Policy include reductions in the amount of civil penalties and a determination not to recommend criminal prosecution of disclosing entities.

Today, EPA issues revisions to the 1995 Audit Policy. The revised Policy reflects EPA's continuing commitment to encouraging voluntary self-policing while preserving fair and effective enforcement. It lengthens the prompt disclosure period to 21 days, clarifies that the independent discovery condition does not automatically preclude Audit Policy credit in the multi-facility context, and clarifies how the prompt disclosure and repeat violations conditions apply in the acquisitions context. The revised final Policy takes effect May 11, 2000.

B. Background and History

The Audit Policy provides incentives for regulated entities to detect, promptly disclose, and expeditiously correct violations of Federal environmental requirements. The Policy contains nine conditions, and entities that meet all of them are eligible for 100% mitigation of any gravity-based penalties that otherwise could be assessed. ("Gravity-based" refers to that portion of the penalty over and above the portion that represents the entity's economic gain from noncompliance, known as the "economic benefit.") Regulated entities that do not meet the first condition—systematic discovery of violations—but meet the other eight conditions are eligible for 75% mitigation of any gravity-based civil penalties. On the criminal side, EPA will generally elect not to recommend criminal prosecution

by DOJ or any other prosecuting authority for a disclosing entity that meets at least conditions two through nine—regardless of whether it meets the systematic discovery requirement—as long as its self-policing, discovery and disclosure were conducted in good faith and the entity adopts a systematic approach to preventing recurrence of the violation.

The Policy includes important safeguards to deter violations and protect public health and the environment. For example, the Policy requires entities to act to prevent recurrence of violations and to remedy any environmental harm that may have occurred. Repeat violations, those that result in actual harm to the environment, and those that may present an imminent and substantial endangerment are not eligible for relief under this Policy. Companies will not be allowed to gain an economic advantage over their competitors by delaying their investment in compliance. And entities remain criminally liable for violations that result from conscious disregard of or willful blindness to their obligations under the law, and individuals remain liable for their criminal misconduct.

When EPA issued the 1995 Audit Policy, the Agency committed to evaluate the Policy after three years. The Agency initiated this evaluation in the Spring of 1998 and published its preliminary results in the **Federal Register** on May 17, 1999 (64 FR 26745). The evaluation consisted of the following components:

- An internal survey of EPA staff who process disclosures and handle enforcement cases under the 1995 Audit Policy;
- A survey of regulated entities that used the 1995 Policy to disclose violations;
- A series of meetings and conference calls with representatives from industry, environmental organizations, and States;
- Focused stakeholder discussions on the Audit Policy at two public conferences co-sponsored by EPA's Office of Enforcement and Compliance Assurance (OECA) and the Vice President's National Partnership for Reinventing Government, entitled "Protecting Public Health and the Environment through Innovative Approaches to Compliance";
- A **Federal Register** notice on March 2, 1999, soliciting comments on how EPA can further protect and improve public health and the environment through new compliance and enforcement approaches (64 FR 10144); and
- An analysis of data on Audit Policy usage to date and discussions amongst EPA officials who handle Audit Policy disclosures.

The same May 17, 1999, **Federal Register** notice that published the evaluation's preliminary results also proposed revisions to the 1995 Policy and requested public comment. During the 60-day public comment period, the Agency received 29 comment letters, copies of which are available through the Enforcement and Compliance Docket and Information Center. (See contact information at the beginning of this notice.) Analysis of these comment letters together with additional data on Audit Policy usage has constituted the final stage of the Audit Policy evaluation. EPA has prepared a detailed response to the comments received; a copy of that document will also be available through the Docket and Information Center as well on the Internet at www.epa.gov/oeca/ore/apolguid.html.

Overall, the Audit Policy evaluation revealed very positive results. The Policy has encouraged voluntary self-policing while preserving fair and effective enforcement. Thus, the revisions issued today do not signal any intention to shift course regarding the Agency's position on self-policing and voluntary disclosures but instead represent an attempt to fine-tune a Policy that is already working well.

Use of the Audit Policy has been widespread. As of October 1, 1999, approximately 670 organizations had disclosed actual or potential violations at more than 2700 facilities. The number of disclosures has increased each of the four years the Policy has been in effect.

Results of the Audit Policy User's Survey revealed very high satisfaction rates among users, with 88% of respondents stating that they would use the Policy again and 84% stating that they would recommend the Policy to clients and/or their counterparts. No respondents stated an unwillingness to use the Policy again or to recommend its use to others.

The Audit Policy and related documents, including Agency interpretive guidance and general interest newsletters, are available on the Internet at www.epa.gov/oeca/ore/apolguid. Additional guidance for implementing the Policy in the context of criminal violations can be found at www.epa.gov/oeca/oceft/audpol2.html.

In addition to the Audit Policy, the Agency's revised Small Business Compliance Policy ("Small Business Policy") is also available for small entities that employ 100 or fewer individuals. The Small Business Policy provides penalty mitigation, subject to certain conditions, for small businesses that make a good faith effort to comply with environmental requirements by discovering, disclosing and correcting violations. EPA has revised the Small Business Policy at the same time it revised the Audit Policy. The revised Small Business Policy will be available on the Internet at www.epa.gov/oeca/smbusi.html.

C. Purpose

The revised Policy being announced today is designed to encourage greater compliance with Federal laws and regulations that protect human health and the environment. It promotes a higher standard of self-policing by waiving gravity-based penalties for violations that are promptly disclosed and corrected, and which were discovered systematically—that is, through voluntary audits or compliance management systems. To provide an incentive for entities to disclose and correct violations regardless of how they were detected, the Policy reduces gravity-based penalties by 75% for violations that are voluntarily discovered and promptly disclosed and corrected, even if not discovered systematically.

EPA's enforcement program provides a strong incentive for compliance by imposing stiff sanctions for noncompliance. Enforcement has contributed to the dramatic expansion of environmental auditing as measured in numerous recent surveys. For example, in a 1995 survey by Price Waterhouse LLP, more than 90% of corporate respondents who conduct audits identified one of the reasons for doing so as the desire to find and correct violations before government inspectors discover them. (A copy of the survey is contained in the Docket as document VIII–A–76.)

At the same time, because government resources are limited, universal compliance cannot be achieved without active efforts by the regulated community to police themselves. More than half of the respondents to the same 1995 Price Waterhouse survey said that they would expand environmental auditing in exchange for reduced penalties for violations discovered and corrected. While many companies already audit or have compliance management programs in place, EPA believes that the incentives offered in this Policy will improve the frequency and quality of these self-policing efforts.

D. Incentives for Self-Policing

Section C of the Audit Policy identifies the major incentives that EPA

provides to encourage self-policing, self-disclosure, and prompt self-correction. For entities that meet the conditions of the Policy, the available incentives include waiving or reducing gravity-based civil penalties, declining to recommend criminal prosecution for regulated entities that self-police, and refraining from routine requests for audits. (As noted in Section C of the Policy, EPA has refrained from making routine requests for audit reports since issuance of its 1986 policy on environmental auditing.)

1. Eliminating Gravity-Based Penalties

In general, civil penalties that EPA assesses are comprised of two elements: the economic benefit component and the gravity-based component. The economic benefit component reflects the economic gain derived from a violator's illegal competitive advantage. Gravity-based penalties are that portion of the penalty over and above the economic benefit. They reflect the egregiousness of the violator's behavior and constitute the punitive portion of the penalty. For further discussion of these issues, see "Calculation of the Economic Benefit of Noncompliance in EPA's Civil Penalty Enforcement Cases," 64 FR 32948 (June 18, 1999) and "A Framework for Statute-Specific Approaches to Penalty Assessments," #GM–22 (1984), U.S. EPA General Enforcement Policy Compendium.

Under the Audit Policy, EPA will not seek gravity-based penalties for disclosing entities that meet all nine Policy conditions, including systematic discovery. ("Systematic discovery" means the detection of a potential violation through an environmental audit or a compliance management system that reflects the entity's due diligence in preventing, detecting and correcting violations.) EPA has elected to waive gravity-based penalties for violations discovered systematically, recognizing that environmental auditing and compliance management systems play a critical role in protecting human health and the environment by identifying, correcting and ultimately preventing violations.

However, EPA reserves the right to collect any economic benefit that may have been realized as a result of noncompliance, even where the entity meets all other Policy conditions. Where the Agency determines that the economic benefit is insignificant, the Agency also may waive this component of the penalty.

EPA's decision to retain its discretion to recover economic benefit is based on two reasons. First, facing the risk that the Agency will recoup economic benefit provides an incentive for regulated entities to comply on time. Taxpayers whose payments are late expect to pay interest or a penalty; the same principle should apply to corporations and other regulated entities that have delayed their investment in compliance. Second, collecting economic benefit is fair because it protects law-abiding companies from being undercut by their noncomplying competitors, thereby preserving a level playing field.

2. 75% Reduction of Gravity-based Penalties

Gravity-based penalties will be reduced by 75% where the disclosing entity does not detect the violation through systematic discovery but otherwise meets all other Policy conditions. The Policy appropriately limits the complete waiver of gravity-based civil penalties to companies that conduct environmental auditing or have in place a compliance management system. However, to encourage disclosure and correction of violations even in the absence of systematic discovery, EPA will reduce gravity-based penalties by 75% for entities that meet conditions D(2) through D(9) of the Policy. EPA expects that a disclosure under this provision will encourage the entity to work with the Agency to resolve environmental problems and begin to develop an effective auditing program or compliance management system.

3. No Recommendations for Criminal Prosecution

In accordance with EPA's Investigative Discretion Memo dated January 12, 1994, EPA generally does not focus its criminal enforcement resources on entities that voluntarily discover, promptly disclose and expeditiously correct violations, unless there is potentially culpable behavior that merits criminal investigation. When a disclosure that meets the terms and conditions of this Policy results in a criminal investigation, EPA will generally not recommend criminal prosecution for the disclosing entity, although the Agency may recommend prosecution for culpable individuals and other entities. The 1994 Investigative Discretion Memo is available on the Internet at http://www.epa.gov/oeca/ore/ aed/comp/acomp/a11.html.

The "no recommendation for criminal prosecution" incentive is available for entities that meet conditions D(2) through D(9) of the Policy. Condition D(1) "systematic discovery" is not required to be eligible for this incentive, although the entity must be acting in good faith and must adopt a systematic approach to preventing recurring violations. Important limitations to the incentive apply. It will not be available, for example, where corporate officials are consciously involved in or willfully blind to violations, or conceal or condone noncompliance. Since the regulated entity must satisfy conditions D(2) through D(9) of the Policy, violations that cause serious harm or which may pose imminent and substantial endangerment to human health or the environment are not eligible. Finally, EPA reserves the right to recommend prosecution for the criminal conduct of any culpable individual or subsidiary organization.

While EPA may decide not to recommend criminal prosecution for disclosing entities, ultimate prosecutorial discretion resides with the U.S. Department of Justice, which will be guided by its own policy on voluntary disclosures ("Factors in Decisions on Criminal Prosecutions for Environmental Violations in the Context of Significant Voluntary Compliance or Disclosure Efforts by the Violator," July 1, 1991) and by its 1999 Guidance on Federal Prosecutions of Corporations. In addition, where a disclosing entity has met the conditions for avoiding a recommendation for criminal prosecution under this Policy, it will also be eligible for either 75% or 100% mitigation of gravity-based civil penalties, depending on whether the systematic discovery condition was met.

4. No Routine Requests for Audit Reports

EPA reaffirms its Policy, in effect since 1986, to refrain from routine requests for audit reports. That is, EPA has not and will not routinely request copies of audit reports to trigger enforcement investigations. Implementation of the 1995 Policy has produced no evidence that the Agency has deviated, or should deviate, from this Policy. In general, an audit that results in expeditious correction will reduce liability, not expand it. However, if the Agency has independent evidence of a violation, it may seek the information it needs to establish the extent and nature of the violation and the degree of culpability.

For discussion of the circumstances in which EPA might request an audit report to determine Policy eligibility, see the explanatory text on cooperation, section I.E.9.

E. Conditions

Section D describes the nine conditions that a regulated entity must

meet in order for the Agency to decline to seek (or to reduce) gravity-based penalties under the Policy. As explained in section I.D.1 above, regulated entities that meet all nine conditions will not face gravity-based civil penalties. If the regulated entity meets all of the conditions except for D(1)—systematic discovery—EPA will reduce gravity-based penalties by 75%. In general, EPA will not recommend criminal prosecution for disclosing entities that meet at least conditions D(2) through D(9).

1. Systematic Discovery of the Violation Through an Environmental Audit or a Compliance Management System

Under Section D(1), the violation must have been discovered through either (a) an environmental audit, or (b) a compliance management system that reflects due diligence in preventing, detecting and correcting violations. Both "environmental audit" and "compliance management system" are defined in Section B of the Policy.

The revised Policy uses the term "compliance management system" instead of "due diligence," which was used in the 1995 Policy. This change in nomenclature is intended solely to conform the Policy language to terminology more commonly in use by industry and by regulators to refer to a systematic management plan or systematic efforts to achieve and maintain compliance. No substantive difference is intended by substituting the term "compliance management system" for "due diligence," as the Policy clearly indicates that the compliance management system must reflect the regulated entity's due diligence in preventing, detecting and correcting violations.

Compliance management programs that train and motivate employees to prevent, detect and correct violations on a daily basis are a valuable complement to periodic auditing. Where the violation is discovered through a compliance management system and not through an audit, the disclosing entity should be prepared to document how its program reflects the due diligence criteria defined in Section B of the Policy statement. These criteria, which are adapted from existing codes of practice—such as Chapter Eight of the U.S. Sentencing Guidelines for organizational defendants, effective since 1991—are flexible enough to accommodate different types and sizes of businesses and other regulated entities. The Agency recognizes that a variety of compliance management programs are feasible, and it will determine whether basic due diligence criteria have been met in deciding whether to grant Audit Policy credit.

As a condition of penalty mitigation, EPA may require that a description of the regulated entity's compliance management system be made publicly available. The Agency believes that the availability of such information will allow the public to judge the adequacy of compliance management systems, lead to enhanced compliance, and foster greater public trust in the integrity of compliance management systems.

2. Voluntary Discovery

Under Section D(2), the violation must have been identified voluntarily, and not through a monitoring, sampling, or auditing procedure that is required by statute, regulation, permit, judicial or administrative order, or consent agreement. The Policy provides three specific examples of discovery that would not be voluntary, and therefore would not be eligible for penalty mitigation: emissions violations detected through a required continuous emissions monitor, violations of NPDES discharge limits found through prescribed monitoring, and violations discovered through a compliance audit required to be performed by the terms of a consent order or settlement agreement. The exclusion does not apply to violations that are discovered pursuant to audits that are conducted as part of a comprehensive environmental management system (EMS) required under a settlement agreement. In general, EPA supports the implementation of EMSs that promote compliance, prevent pollution and improve overall environmental performance. Precluding the availability of the Audit Policy for discoveries made through a comprehensive EMS that has been implemented pursuant to a settlement agreement might discourage entities from agreeing to implement such a system.

In some instances, certain Clean Air Act violations discovered, disclosed and corrected by a company prior to issuance of a Title V permit are eligible for penalty mitigation under the Policy. For further guidance in this area, see "Reduced Penalties for Disclosures of Certain Clean Air Act Violations," Memorandum from Eric Schaeffer, Director of the EPA Office of Regulatory Enforcement, dated September 30, 1999. This document is available on the Internet at www.epa.gov/oeca/ore/apolguid.html.

The voluntary requirement applies to discovery only, not reporting. That is, any violation that is voluntarily discovered is generally eligible for Audit Policy credit, regardless of whether reporting of the violation was required after it was found.

3. Prompt Disclosure

Section D(3) requires that the entity disclose the violation in writing to EPA within 21 calendar days after discovery. If the 21st day after discovery falls on a weekend or Federal holiday, the disclosure period will be extended to the first business day following the 21st day after discovery. If a statute or regulation requires the entity to report the violation in fewer than 21 days, disclosure must be made within the time limit established by law. (For example, unpermitted releases of hazardous substances must be reported immediately under 42 U.S.C. 9603.) Disclosures under this Policy should be made to the appropriate EPA Regional office or, where multiple Regions are involved, to EPA Headquarters. The Agency will work closely with States as needed to ensure fair and efficient implementation of the Policy. For additional guidance on making disclosures, contact the Audit Policy National Coordinator at EPA Headquarters at 202–564–5123.

The 21-day disclosure period begins when the entity discovers that a violation has, or may have, occurred. The trigger for discovery is when any officer, director, employee or agent of the facility has an objectively reasonable basis for believing that a violation has, or may have, occurred. The "objectively reasonable basis" standard is measured against what a prudent person, having the same information as was available to the individual in question, would have believed. It is not measured against what the individual in question thought was reasonable at the time the situation was encountered. If an entity has some doubt as to the existence of a violation, the recommended course is for the entity to proceed with the disclosure and allow the regulatory authorities to make a definitive determination. Contract personnel who provide on-site services at the facility may be treated as employees or agents for purposes of the Policy.

If the 21-day period has not yet expired and an entity suspects that it will be unable to meet the deadline, the entity should contact the appropriate EPA office in advance to develop disclosure terms acceptable to EPA. For situations in which the 21-day period already has expired, the Agency may accept a late disclosure in the exceptional case, such as where there are complex circumstances, including where EPA determines the violation could not be identified and disclosed within 21 calendar days after discovery.

EPA also may extend the disclosure period when multiple facilities or acquisitions are involved.

In the multi-facility context, EPA will ordinarily extend the 21-day period to allow reasonable time for completion and review of multi-facility audits where: (a) EPA and the entity agree on the timing and scope of the audits prior to their commencement; and (b) the facilities to be audited are identified in advance. In the acquisitions context, EPA will consider extending the prompt disclosure period on a case-by-case basis. The 21-day disclosure period will begin on the date of discovery by the acquiring entity, but in no case will the period begin earlier than the date of acquisition.

In summary, Section D(3) recognizes that it is critical for EPA to receive timely reporting of violations in order to have clear notice of the violations and the opportunity to respond if necessary. Prompt disclosure is also evidence of the regulated entity's good faith in wanting to achieve or return to compliance as soon as possible. The integrity of Federal environmental law depends upon timely and accurate reporting. The public relies on timely and accurate reports from the regulated community, not only to measure compliance but to evaluate health or environmental risk and gauge progress in reducing pollutant loadings. EPA expects the Policy to encourage the kind of vigorous self-policing that will serve these objectives and does not intend that it justify delayed reporting. When violations of reporting requirements are voluntarily discovered, they must be promptly reported. When a failure to report results in imminent and substantial endangerment or serious harm to the environment, Audit Policy credit is precluded under condition D(8).

4. Discovery and Disclosure Independent of Government or Third Party Plaintiff

Under Section D(4), the entity must discover the violation independently. That is, the violation must be discovered and identified before EPA or another government agency likely would have identified the problem either through its own investigative work or from information received through a third party. This condition requires regulated entities to take the initiative to find violations on their own and disclose them promptly instead of waiting for an indication of a pending enforcement action or third-party complaint.

Section D(4)(a) lists the circumstances under which discovery and disclosure will not be considered independent. For example, a disclosure will not be independent where EPA is already investigating the facility in question. However, under subsection (a), where the entity does not know that EPA has commenced a civil investigation and proceeds in good faith to make a disclosure under the Audit Policy, EPA may, in its discretion, provide penalty mitigation under the Audit Policy. The subsection (a) exception applies only to civil investigations; it does not apply in the criminal context. Other examples of situations in which a discovery is not considered independent are where a citizens' group has provided notice of its intent to sue, where a third party has already filed a complaint, where a whistleblower has reported the potential violation to government authorities, or where discovery of the violation by the government was imminent. Condition D(4)(c)—the filing of a complaint by a third party—covers formal judicial and administrative complaints as well as informal complaints, such as a letter from a citizens' group alerting EPA to a potential environmental violation.

Regulated entities that own or operate multiple facilities are subject to section D(4)(b) in addition to D(4)(a). EPA encourages multi-facility auditing and does not intend for the "independent discovery" condition to preclude availability of the Audit Policy when multiple facilities are involved. Thus, if a regulated entity owns or operates multiple facilities, the fact that one of its facilities is the subject of an investigation, inspection, information request or third-party complaint does not automatically preclude the Agency from granting Audit Policy credit for disclosures of violations self-discovered at the other facilities, assuming all other Audit Policy conditions are met. However, just as in the single-facility context, where a facility is already the subject of a government inspection, investigation or information request (including a broad information request that covers multiple facilities), it will generally not be eligible for Audit Policy credit. The Audit Policy is designed to encourage regulated entities to disclose violations before any of their facilities are under investigation, not after EPA discovers violations at one facility. Nevertheless, the Agency retains its full discretion under the Audit Policy to grant penalty waivers or reductions for good-faith disclosures made in the multi-facility context. EPA has worked closely with a number of entities that have received Audit Policy credit for multi-facility disclosures, and entities contemplating multi-facility auditing are encouraged to contact the Agency with any questions concerning Audit Policy availability.

5. Correction and Remediation

Under Section D(5), the entity must remedy any harm caused by the violation and expeditiously certify in writing to appropriate Federal, State, and local authorities that it has corrected the violation. Correction and remediation in this context include responding to spills and carrying out any removal or remedial actions required by law. The certification requirement enables EPA to ensure that the regulated entity will be publicly accountable for its commitments through binding written agreements, orders or consent decrees where necessary.

Under the Policy, the entity must correct the violation within 60 calendar days from the date of discovery, or as expeditiously as possible. EPA recognizes that some violations can and should be corrected immediately, while others may take longer than 60 days to correct. For example, more time may be required if capital expenditures are involved or if technological issues are a factor. If more than 60 days will be required, the disclosing entity must so notify the Agency in writing prior to the conclusion of the 60-day period. In all cases, the regulated entity will be expected to do its utmost to achieve or return to compliance as expeditiously as possible.

If correction of the violation depends upon issuance of a permit that has been applied for but not issued by Federal or State authorities, the Agency will, where appropriate, make reasonable efforts to secure timely review of the permit.

6. Prevent Recurrence

Under Section D(6), the regulated entity must agree to take steps to prevent a recurrence of the violation after it has been disclosed. Preventive steps may include, but are not limited to, improvements to the entity's environmental auditing efforts or compliance management system.

7. No Repeat Violations

Condition D(7) bars repeat offenders from receiving Audit Policy credit. Under the repeat violations exclusion, the same or a closely-related violation must not have occurred at the same facility within the past 3 years. The 3-year period begins to run when the government or a third party has given the violator notice of a specific violation, without regard to when the original violation cited in the notice

actually occurred. Examples of notice include a complaint, consent order, notice of violation, receipt of an inspection report, citizen suit, or receipt of penalty mitigation through a compliance assistance or incentive project.

When the facility is part of a multi-facility organization, Audit Policy relief is not available if the same or a closely-related violation occurred as part of a pattern of violations at one or more of these facilities within the past 5 years. If a facility has been newly acquired, the existence of a violation prior to acquisition does not trigger the repeat violations exclusion.

The term "violation" includes any violation subject to a Federal, State or local civil judicial or administrative order, consent agreement, conviction or plea agreement. Recognizing that minor violations sometimes are settled without a formal action in court, the term also covers any act or omission for which the regulated entity has received a penalty reduction in the past. This condition covers situations in which the regulated entity has had clear notice of its noncompliance and an opportunity to correct the problem.

The repeat violation exclusion benefits both the public and law-abiding entities by ensuring that penalties are not waived for those entities that have previously been notified of violations and fail to prevent repeat violations. The 3-year and 5-year "bright lines" in the exclusion are designed to provide regulated entities with clear notice about when the Policy will be available.

8. Other Violations Excluded

Section D(8) provides that Policy benefits are not available for certain types of violations. Subsection D(8)(a) excludes violations that result in serious actual harm to the environment or which may have presented an imminent and substantial endangerment to public health or the environment. When events of such a consequential nature occur, violators are ineligible for penalty relief and other incentives under the Audit Policy. However, this condition does not bar an entity from qualifying for Audit Policy relief solely because the violation involves release of a pollutant to the environment, as such releases do not necessarily result in serious actual harm or an imminent and substantial endangerment. To date, EPA has not invoked the serious actual harm or the imminent and substantial endangerment clauses to deny Audit Policy credit for any disclosure.

Subsection D(8)(b) excludes violations of the specific terms of any order, consent agreement, or plea agreement. Once a consent agreement has been negotiated, there is little incentive to comply if there are no sanctions for violating its specific requirements. The exclusion in this section also applies to violations of the terms of any response, removal or remedial action covered by a written agreement.

9. Cooperation

Under Section D(9), the regulated entity must cooperate as required by EPA and provide the Agency with the information it needs to determine Policy applicability. The entity must not hide, destroy or tamper with possible evidence following discovery of potential environmental violations. In order for the Agency to apply the Policy fairly, it must have sufficient information to determine whether its conditions are satisfied in each individual case. In general, EPA requests audit reports to determine the applicability of this Policy only where the information contained in the audit report is not readily available elsewhere and where EPA decides that the information is necessary to determine whether the terms and conditions of the Policy have been met. In the rare instance where an EPA Regional office seeks to obtain an audit report because it is otherwise unable to determine whether Policy conditions have been met, the Regional office will notify the Office of Regulatory Enforcement at EPA headquarters.

Entities that disclose potential criminal violations may expect a more thorough review by the Agency. In criminal cases, entities will be expected to provide, at a minimum, the following: access to all requested documents; access to all employees of the disclosing entity; assistance in investigating the violation, any noncompliance problems related to the disclosure, and any environmental consequences related to the violations; access to all information relevant to the violations disclosed, including that portion of the environmental audit report or documentation from the compliance management system that revealed the violation; and access to the individuals who conducted the audit or review.

F. Opposition to Audit Privilege and Immunity

The Agency believes that the Audit Policy provides effective incentives for self-policing without impairing law enforcement, putting the environment at risk or hiding environmental compliance information from the public. Although EPA encourages environmental auditing, it must do so without compromising the integrity and enforceability of environmental laws. It is important to distinguish between EPA's Audit Policy and the audit privilege and immunity laws that exist in some States. The Agency remains firmly opposed to statutory and regulatory audit privileges and immunity. Privilege laws shield evidence of wrongdoing and prevent States from investigating even the most serious environmental violations. Immunity laws prevent States from obtaining penalties that are appropriate to the seriousness of the violation, as they are required to do under Federal law. Audit privilege and immunity laws are unnecessary, undermine law enforcement, impair protection of human health and the environment, and interfere with the public's right to know of potential and existing environmental hazards.

Statutory audit privilege and immunity run counter to encouraging the kind of openness that builds trust between regulators, the regulated community and the public. For example, privileged information on compliance contained in an audit report may include information on the cause of violations, the extent of environmental harm, and what is necessary to correct the violations and prevent their recurrence. Privileged information is unavailable to law enforcers and to members of the public who have suffered harm as a result of environmental violations. The Agency opposes statutory immunity because it diminishes law enforcement's ability to discourage wrongful behavior and interferes with a regulator's ability to punish individuals who disregard the law and place others in danger. The Agency believes that its Audit Policy provides adequate incentives for self-policing but without secrecy and without abdicating its discretion to act in cases of serious environmental violations.

Privilege, by definition, invites secrecy, instead of the openness needed to build public trust in industry's ability to self-police. American law reflects the high value that the public places on fair access to the facts. The Supreme Court, for example, has said of privileges that, " [w]hatever their origins, these exceptions to the demand for every man's evidence are not lightly created nor expansively construed, for they are in derogation of the search for truth." *United States* v. *Nixon*, 418 U.S. 683, 710 (1974). Federal courts have unanimously refused to recognize a privilege for environmental audits in the context of government investigations. See, *e.g.*, *United States* v. *Dexter Corp.*, 132 F.R.D. 8, 10 (D.Conn. 1990)

(application of a privilege "would effectively impede [EPA's] ability to enforce the Clean Water Act, and would be contrary to stated public policy.") Cf. In re Grand Jury Proceedings, 861 F. Supp. 386 (D. Md. 1994) (company must comply with a subpoena under Food, Drug and Cosmetics Act for self-evaluative documents).

G. Effect on States

The revised final Policy reflects EPA's desire to provide fair and effective incentives for self-policing that have practical value to States. To that end, the Agency has consulted closely with State officials in developing this Policy. As a result, EPA believes its revised final Policy is grounded in commonsense principles that should prove useful in the development and implementation of State programs and policies.

EPA recognizes that States are partners in implementing the enforcement and compliance assurance program. When consistent with EPA's policies on protecting confidential and sensitive information, the Agency will share with State agencies information on disclosures of violations of Federally-authorized, approved or delegated programs. In addition, for States that have adopted their own audit policies in Federally-authorized, approved or delegated programs, EPA will generally defer to State penalty mitigation for self-disclosures as long as the State policy meets minimum requirements for Federal delegation. Whenever a State provides a penalty waiver or mitigation for a violation of a requirement contained in a Federally-authorized, approved or delegated program to an entity that discloses those violations in conformity with a State audit policy, the State should notify the EPA Region in which it is located. This notification will ensure that Federal and State enforcement responses are coordinated properly.

For further information about minimum delegation requirements and the effect of State audit privilege and immunity laws on enforcement authority, see "Statement of Principles: Effect of State Audit/Immunity Privilege Laws on Enforcement Authority for Federal Programs," Memorandum from Steven A. Herman et al, dated February 14, 1997, to be posted on the Internet under www.epa.gov/oeca/oppa.

As always, States are encouraged to experiment with different approaches to assuring compliance as long as such approaches do not jeopardize public health or the environment, or make it profitable not to comply with Federal environmental requirements. The Agency remains opposed to State legislation that does not include these basic protections, and reserves its right to bring independent action against regulated entities for violations of Federal law that threaten human health or the environment, reflect criminal conduct or repeated noncompliance, or allow one company to profit at the expense of its law-abiding competitors.

H. Scope of Policy

EPA has developed this Policy to guide settlement actions. It is the Agency's practice to make public all compliance agreements reached under this Policy in order to provide the regulated community with fair notice of decisions and to provide affected communities and the public with information regarding Agency action. Some in the regulated community have suggested that the Agency should convert the Policy into a regulation because they feel doing so would ensure greater consistency and predictability. Following its three-year evaluation of the Policy, however, the Agency believes that there is ample evidence that the Policy has worked well and that there is no need for a formal rulemaking. Furthermore, as the Agency seeks to respond to lessons learned from its increasing experience handling self-disclosures, a policy is much easier to amend than a regulation. Nothing in today's release of the revised final Policy is intended to change the status of the Policy as guidance.

I. Implementation of Policy

1. Civil Violations

Pursuant to the Audit Policy, disclosures of civil environmental violations should be made to the EPA Region in which the entity or facility is located or, where the violations to be disclosed involve more than one EPA Region, to EPA Headquarters. The Regional or Headquarters offices decide whether application of the Audit Policy in a specific case is appropriate. Obviously, once a matter has been referred for civil judicial prosecution, DOJ becomes involved as well. Where there is evidence of a potential criminal violation, the civil offices coordinate with criminal enforcement offices at EPA and DOJ.

To resolve issues of national significance and ensure that the Policy is applied fairly and consistently across EPA Regions and at Headquarters, the Agency in 1995 created the Audit Policy Quick Response Team (QRT). The QRT is comprised of representatives from the Regions, Headquarters, and DOJ. It meets on a regular basis to address issues of interpretation and to coordinate self-disclosure initiatives. In addition, in 1999 EPA established a National Coordinator position to handle Audit Policy issues and implementation. The National Coordinator chairs the QRT and, along with the Regional Audit Policy coordinators, serves as a point of contact on Audit Policy issues in the civil context.

2. Criminal Violations

Criminal disclosures are handled by the Voluntary Disclosure Board (VDB), which was established by EPA in 1997. The VDB ensures consistent application of the Audit Policy in the criminal context by centralizing Policy interpretation and application within the Agency.

Disclosures of potential criminal violations may be made directly to the VDB, to an EPA regional criminal investigation division or to DOJ. In all cases, the VDB coordinates with the investigative team and the appropriate prosecuting authority. During the course of the investigation, the VDB routinely monitors the progress of the investigation as necessary to ensure that sufficient facts have been established to determine whether to recommend that relief under the Policy be granted.

At the conclusion of the criminal investigation, the Board makes a recommendation to the Director of EPA's Office of Criminal Enforcement, Forensics, and Training, who serves as the Deciding Official. Upon receiving the Board's recommendation, the Deciding Official makes his or her final recommendation to the appropriate United States Attorney's Office and/or DOJ. The recommendation of the Deciding Official, however, is only that—a recommendation. The United States Attorney's Office and/or DOJ retain full authority to exercise prosecutorial discretion.

3. Release of Information to the Public

Upon formal settlement, EPA places copies of settlements in the Audit Policy Docket. EPA also makes other documents related to self-disclosures publicly available, unless the disclosing entity claims them as Confidential Business Information (and that claim is validated by U.S. EPA), unless another exemption under the Freedom of Information Act is asserted and/or applies, or the Privacy Act or any other law would preclude such release. Presumptively releasable documents include compliance agreements reached under the Policy (see Section H) and descriptions of compliance management systems submitted under Section D(1).

Any material claimed to be Confidential Business Information will be treated in accordance with EPA regulations at 40 CFR Part 2. In determining what documents to release, EPA is guided by the Memorandum from Assistant Administrator Steven A. Herman entitled "Confidentiality of Information Received Under Agency's Self-Disclosure Policy," available on the Internet at www.epa.gov/oeca/sahmemo.html.

II. Statement of Policy—Incentives for Self-Policing: Discovery, Disclosure, Correction and Prevention of Violations

A. Purpose

This Policy is designed to enhance protection of human health and the environment by encouraging regulated entities to voluntarily discover, disclose, correct and prevent violations of Federal environmental requirements.

B. Definitions

For purposes of this Policy, the following definitions apply:

"Environmental Audit" is a systematic, documented, periodic and objective review by regulated entities of facility operations and practices related to meeting environmental requirements.

"Compliance Management System" encompasses the regulated entity's documented systematic efforts, appropriate to the size and nature of its business, to prevent, detect and correct violations through all of the following:

(a) Compliance policies, standards and procedures that identify how employees and agents are to meet the requirements of laws, regulations, permits, enforceable agreements and other sources of authority for environmental requirements;

(b) Assignment of overall responsibility for overseeing compliance with policies, standards, and procedures, and assignment of specific responsibility for assuring compliance at each facility or operation;

(c) Mechanisms for systematically assuring that compliance policies, standards and procedures are being carried out, including monitoring and auditing systems reasonably designed to detect and correct violations, periodic evaluation of the overall performance of the compliance management system, and a means for employees or agents to report violations of environmental requirements without fear of retaliation;

(d) Efforts to communicate effectively the regulated entity's standards and procedures to all employees and other agents;

(e) Appropriate incentives to managers and employees to perform in accordance with the compliance policies, standards and procedures, including consistent enforcement through appropriate disciplinary mechanisms; and

(f) Procedures for the prompt and appropriate correction of any violations, and any necessary modifications to the regulated entity's compliance management system to prevent future violations.

"Environmental audit report" means the documented analysis, conclusions, and recommendations resulting from an environmental audit, but does not include data obtained in, or testimonial evidence concerning, the environmental audit.

"Gravity-based penalties" are that portion of a penalty over and above the economic benefit, *i.e.*, the punitive portion of the penalty, rather than that portion representing a defendant's economic gain from noncompliance.

"Regulated entity" means any entity, including a Federal, State or municipal agency or facility, regulated under Federal environmental laws.

C. Incentives for Self-Policing

1. No Gravity-Based Penalties

If a regulated entity establishes that it satisfies all of the conditions of Section D of this Policy, EPA will not seek gravity-based penalties for violations of Federal environmental requirements discovered and disclosed by the entity.

2. Reduction of Gravity-Based Penalties by 75%

If a regulated entity establishes that it satisfies all of the conditions of Section D of this Policy except for D(1)—systematic discovery—EPA will reduce by 75% gravity-based penalties for violations of Federal environmental requirements discovered and disclosed by the entity.

3. No Recommendation for Criminal Prosecution

(a) If a regulated entity establishes that it satisfies at least conditions D(2) through D(9) of this Policy, EPA will not recommend to the U.S. Department of Justice or other prosecuting authority that criminal charges be brought against the disclosing entity, as long as EPA determines that the violation is not part of a pattern or practice that demonstrates or involves:

(i) A prevalent management philosophy or practice that conceals or condones environmental violations; or

(ii) High-level corporate officials' or managers' conscious involvement in, or willful blindness to, violations of Federal environmental law;

(b) Whether or not EPA recommends the regulated entity for criminal prosecution under this section, the Agency may recommend for prosecution the criminal acts of individual managers or employees under existing policies guiding the exercise of enforcement discretion.

4. No Routine Request for Environmental Audit Reports

EPA will neither request nor use an environmental audit report to initiate a civil or criminal investigation of an entity. For example, EPA will not request an environmental audit report in routine inspections. If the Agency has independent reason to believe that a violation has occurred, however, EPA may seek any information relevant to identifying violations or determining liability or extent of harm.

D. Conditions

1. Systematic Discovery

The violation was discovered through:

(a) An environmental audit; or

(b) A compliance management system reflecting the regulated entity's due diligence in preventing, detecting, and correcting violations. The regulated entity must provide accurate and complete documentation to the Agency as to how its compliance management system meets the criteria for due diligence outlined in Section B and how the regulated entity discovered the violation through its compliance management system. EPA may require the regulated entity to make publicly available a description of its compliance management system.

2. Voluntary Discovery

The violation was discovered voluntarily and not through a legally mandated monitoring or sampling requirement prescribed by statute, regulation, permit, judicial or administrative order, or consent agreement. For example, the Policy does not apply to:

(a) Emissions violations detected through a continuous emissions monitor (or alternative monitor established in a permit) where any such monitoring is required;

(b) Violations of National Pollutant Discharge Elimination System (NPDES) discharge limits detected through required sampling or monitoring; or

(c) Violations discovered through a compliance audit required to be performed by the terms of a consent order or settlement agreement, unless the audit is a component of agreement terms to implement a comprehensive environmental management system.

3. Prompt Disclosure

The regulated entity fully discloses the specific violation in writing to EPA within 21 days (or within such shorter time as may be required by law) after the entity discovered that the violation has, or may have, occurred. The time at which the entity discovers that a violation has, or may have, occurred begins when any officer, director, employee or agent of the facility has an objectively reasonable basis for believing that a violation has, or may have, occurred.

4. Discovery and Disclosure Independent of Government or Third-Party Plaintiff

(a) The regulated entity discovers and discloses the potential violation to EPA prior to:

(i) The commencement of a Federal, State or local agency inspection or investigation, or the issuance by such agency of an information request to the regulated entity (where EPA determines that the facility did not know that it was under civil investigation, and EPA determines that the entity is otherwise acting in good faith, the Agency may exercise its discretion to reduce or waive civil penalties in accordance with this Policy);

(ii) Notice of a citizen suit;

(iii) The filing of a complaint by a third party;

(iv) The reporting of the violation to EPA (or other government agency) by a "whistleblower" employee, rather than by one authorized to speak on behalf of the regulated entity; or

(v) imminent discovery of the violation by a regulatory agency.

(b) For entities that own or operate multiple facilities, the fact that one facility is already the subject of an investigation, inspection, information request or third-party complaint does not preclude the Agency from exercising its discretion to make the Audit Policy available for violations self-discovered at other facilities owned or operated by the same regulated entity.

5. Correction and Remediation

The regulated entity corrects the violation within 60 calendar days from the date of discovery, certifies in writing that the violation has been corrected, and takes appropriate measures as determined by EPA to remedy any environmental or human harm due to the violation. EPA retains the authority to order an entity to correct a violation within a specific time period shorter than 60 days whenever correction in such shorter period of time is feasible and necessary to protect public health and the environment adequately. If more than 60 days will be needed to correct the violation, the regulated entity must so notify EPA in writing before the 60-day period has passed. Where appropriate, to satisfy conditions D(5) and D(6), EPA may require a regulated entity to enter into a publicly available written agreement, administrative consent order or judicial consent decree as a condition of obtaining relief under the Audit Policy, particularly where compliance or remedial measures are complex or a lengthy schedule for attaining and maintaining compliance or remediating harm is required.

6. Prevent Recurrence

The regulated entity agrees in writing to take steps to prevent a recurrence of the violation. Such steps may include improvements to its environmental auditing or compliance management system.

7. No Repeat Violations

The specific violation (or a closely related violation) has not occurred previously within the past three years at the same facility, and has not occurred within the past five years as part of a pattern at multiple facilities owned or operated by the same entity. For the purposes of this section, a violation is:

(a) Any violation of Federal, State or local environmental law identified in a judicial or administrative order, consent agreement or order, complaint, or notice of violation, conviction or plea agreement; or

(b) Any act or omission for which the regulated entity has previously received penalty mitigation from EPA or a State or local agency.

8. Other Violations Excluded

The violation is not one which (a) resulted in serious actual harm, or may have presented an imminent and substantial endangerment, to human health or the environment, or (b) violates the specific terms of any judicial or administrative order, or consent agreement.

9. Cooperation

The regulated entity cooperates as requested by EPA and provides such information as is necessary and requested by EPA to determine applicability of this Policy.

E. Economic Benefit

EPA retains its full discretion to recover any economic benefit gained as a result of noncompliance to preserve a "level playing field" in which violators do not gain a competitive advantage over regulated entities that do comply. EPA may forgive the entire penalty for violations that meet conditions D(1) through D(9) and, in the Agency's opinion, do not merit any penalty due to the insignificant amount of any economic benefit.

F. Effect on State Law, Regulation or Policy

EPA will work closely with States to encourage their adoption and implementation of policies that reflect the incentives and conditions outlined in this Policy. EPA remains firmly opposed to statutory environmental audit privileges that shield evidence of environmental violations and undermine the public's right to know, as well as to blanket immunities, particularly immunities for violations that reflect criminal conduct, present serious threats or actual harm to health and the environment, allow noncomplying companies to gain an economic advantage over their competitors, or reflect a repeated failure to comply with Federal law. EPA will work with States to address any provisions of State audit privilege or immunity laws that are inconsistent with this Policy and that may prevent a timely and appropriate response to significant environmental violations. The Agency reserves its right to take necessary actions to protect public health or the environment by enforcing against any violations of Federal law.

G. Applicability

(1) This Policy applies to settlement of claims for civil penalties for any violations under all of the Federal environmental statutes that EPA administers, and supersedes any inconsistent provisions in media-specific penalty or enforcement policies and EPA's 1995 Policy on "Incentives for Self-Policing: Discovery, Disclosure, Correction and Prevention of Violations."

(2) To the extent that existing EPA enforcement policies are not inconsistent, they will continue to apply in conjunction with this Policy. However, a regulated entity that has received penalty mitigation for satisfying specific conditions under this Policy may not receive additional penalty mitigation for satisfying the same or similar conditions under other policies for the same violation, nor will this Policy apply to any violation that has received penalty mitigation under other policies. Where an entity has failed to meet any of conditions D(2) through D(9) and is therefore not eligible for penalty relief under this Policy, it may still be eligible for penalty

relief under other EPA media-specific enforcement policies in recognition of good faith efforts, even where, for example, the violation may have presented an imminent and substantial endangerment or resulted in serious actual harm.

(3) This Policy sets forth factors for consideration that will guide the Agency in the exercise of its enforcement discretion. It states the Agency's views as to the proper allocation of its enforcement resources. The Policy is not final agency action and is intended as guidance. This Policy is not intended, nor can it be relied upon, to create any rights enforceable by any party in litigation with the United States. As with the 1995 Audit Policy, EPA may decide to follow guidance provided in this document or to act at variance with it based on its analysis of the specific facts presented. This Policy may be revised without public notice to reflect changes in EPA's approach to providing incentives for self-policing by regulated entities, or to clarify and update text.

(4) This Policy should be used whenever applicable in settlement negotiations for both administrative and civil judicial enforcement actions. It is not intended for use in pleading, at hearing or at trial. The Policy may be applied at EPA's discretion to the settlement of administrative and judicial enforcement actions instituted prior to, but not yet resolved, as of the effective date of this Policy.

(5) For purposes of this Policy, violations discovered pursuant to an environmental audit or compliance management system may be considered voluntary even if required under an Agency "partnership" program in which the entity participates, such as regulatory flexibility pilot projects like Project XL. EPA will consider application of the Audit Policy to such partnership program projects on a project-by-project basis.

(6) EPA has issued interpretive guidance addressing several applicability issues pertaining to the Audit Policy. Entities considering whether to take advantage of the Audit Policy should review that guidance to see if it addresses any relevant questions. The guidance can be found on the Internet at www.epa.gov/oeca/ore/apolguid.html.

H. Public Accountability

EPA will make publicly available the terms and conditions of any compliance agreement reached under this Policy, including the nature of the violation, the remedy, and the schedule for returning to compliance.

I. Effective Date

This revised Policy is effective May 11, 2000.

Dated: March 30, 2000.

Steven A. Herman,

Assistant Administrator for Enforcement and Compliance Assurance.

Environmental Protection Agency

Small Business Compliance Policy; Notice

VOL 65 ISS 70 AP 11 2000 UMI

ENVIRONMENTAL PROTECTION AGENCY

[FRL–6576–4]

Small Business Compliance Policy

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final Policy Statement.

SUMMARY: The Environmental Protection Agency (EPA) today issues its revised final *Small Business Compliance Policy* to expand the options allowed under the Policy for discovering violations and to establish a time period for disclosure. This Policy was originally titled the *Policy on Compliance Incentives for Small Businesses*. This Policy is intended to promote environmental compliance among small businesses by providing incentives for voluntary discovery, prompt disclosure, and prompt correction of violations. The Policy accomplishes this in two ways: by setting forth guidelines for the Agency to apply in reducing or waiving penalties for small businesses that come forward to disclose and make good faith efforts to correct violations, and by deferring to State, local and Tribal governments that offer these incentives. Major revisions released today include lengthening the prompt disclosure period from 10 to 21 calendar days and broadening the applicability of the Policy to violations uncovered by small businesses through any means of voluntary discovery.

DATES: This policy is effective May 11, 2000.

ADDRESSES: Additional documentation relating to the development of this policy is contained in the Office of Enforcement and Compliance Assurance (OECA) public docket (EC–P–1999–009). An index to the docket may be obtained by contacting the Enforcement and Compliance Docket and Information Center by telephone at (202) 564–2614 or (202) 564–2119, by fax at (202) 564–1011, or by email at docket.oeca@epa.gov. Office hours are 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays. An additional contact is Ginger Gotliffe (202) 564–7072; fax (202) 564–009; e-mail: gotliffe.ginger@epa.gov.

SUPPLEMENTARY INFORMATION:

Introduction

Five years ago, EPA reorganized its compliance programs. This reorganization was undertaken by Administrator Browner with a goal of making EPA's enforcement and compliance programs more effective in protecting public health, safety and the environment. The reorganization also improved and enhanced EPA's ability to reach out to small businesses with information to help them comply with environmental requirements. Five years after the reorganization, EPA conducted outreach efforts to obtain feedback on compliance and enforcement activities, on ways to further improve public health, safety and the environment through compliance efforts, and on actions the Agency has taken over the past five years. From these and other outreach efforts and from meetings and conference calls with interested stakeholder groups, OECA received feedback that improvements were needed to both its Audit Policy and to its Small Business Policy. In response to that feedback, OECA reviewed ways to improve these Policies.

Background and History

EPA issued two incentives policies in 1995 and 1996. The "Incentives for Self-Policing: Discovery, Disclosure, Correction and Prevention of Violations," informally known as the "Audit Policy," was issued in December 1995. See 60 FR 66706 (Dec. 22, 1995). The purpose of the Audit Policy, which is available to entities of any size, is to enhance protection of human health, safety and the environment by encouraging regulated businesses to voluntarily discover, promptly disclose, expeditiously correct and prevent violations of federal environmental law. Benefits available to businesses that qualify for the Audit Policy include reductions in the amount of civil penalties and no recommendation for prosecution of potential criminal violations. The Audit Policy has been recently modified, and the Final revised Audit Policy is being published today in the **Federal Register**.

To address the special needs of small businesses EPA issued the "Policy on Compliance Incentives for Small Businesses," which is commonly called the "Small Business Policy," in June 1996. See 61 FR 27984 June 3, 1996. The Small Business Policy implements section 223 of the Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996. The term "small business" will be used throughout this Policy, however this term will also cover entities such as small governments and small organizations as defined in SBREFA. Under the existing Small Business Policy, EPA will waive or reduce civil penalties whenever a small business makes a good faith effort to comply with environmental requirements by discovering violations as part of a government sponsored compliance assistance program or a voluntary environmental audit, promptly disclosing those violations, and correcting them in a timely manner. If the small business meets all the criteria in the policy, including violation history, correction timeframe, and lack of harm, EPA will waive 100% of the gravity component of the civil penalty. Moreover, EPA will defer to State, local and Tribal actions that are consistent with the criteria set forth in this Policy. The Small Business Policy provides penalty reduction as an incentive for small businesses, who are less likely than large businesses to have sophisticated environmental expertise, to ask for compliance assistance. This policy was also simpler for small businesses to use.

There are several notable differences between the existing Audit Policy and Small Business Policy. First, the policies allow penalty reduction for violations discovered in different ways. The Audit Policy addresses violations discovered through systematic methods such as audits as well as through non-systematic methods. The Small Business Policy applies only to violations discovered through audits and during government sponsored on-site compliance assistance activities. Second, the penalty reduction granted by the policies varies. The Audit Policy provides 100% reduction of the gravity component of the penalty (explained below) for systematic discoveries (i.e., part of a regular audit program) and 75% for non-systematic discoveries. The Small Business Policy grants provides up to 100% reduction of the gravity component of the penalty for violations discovered either through regular audits or during government sponsored on-site compliance assistance activities. Finally, the period within which violations must be corrected is different. Under the Audit Policy, businesses must correct a violation within up to 60 days of its discovery of the violation to qualify for penalty reduction. Under the Small Business Policy, a business must generally correct a violation within 180 days of its discovery to qualify for penalty reduction, and within 360 days if the correction involves pollution prevention modifications.

In addition to these notable differences, the Audit Policy addresses several issues not covered by the Small Business Policy; criminal conduct and multi-facility disclosures. The Small Business Policy is inapplicable for criminal violations. Violations that may involve criminal conduct can be addressed under the Audit Policy. In the unlikely situation where a disclosure involves a multi-facility business, the Agency will identify the relevant

provisions of the Audit and Small Business Policies.

Changes to Policy

EPA is today making several major changes to the Small Business Compliance Policy. All of these changes will make it easier for small businesses to take advantage of the Small Business Compliance Policy. These changes result from EPA's evaluation of comments received on our proposed modification of the Small Business Compliance Policy, which was published on July 29, 1999. See 64 FR 41116.

The following sections discuss the two major changes that we have made to the Small Business Compliance Policy: expansion of options for discovery of violations and lengthening the disclosure period.

1. Expanded Options for Discovery of Violations

Comments submitted to EPA suggested that this Policy should be expanded to include violations that are discovered by a variety of compliance assistance activities, including participation in compliance programs or the use of tools that have been developed or sponsored by EPA, the States, and local, private and non-profit assistance providers. Based on its evaluation of those comments, EPA has decided in the revised Small Business Compliance Policy to allow small businesses to obtain penalty relief if violations are discovered by any voluntary means in addition to discovery as the result of government sponsored on-site compliance assistance activities or environmental audits. For example, voluntary discovery could result from compliance management systems (CMSs), pollution prevention assessments, participation in mentoring programs, training classes, use of on-line compliance assistance centers, and use of checklists. These programs and activities need not be associated with environmental regulatory agencies, but may be associated with any public, private, or non-profit organization. The Agency wants to encourage participation in those programs or activities that could increase compliance, improve efficiency, and reduce pollution.

There are a variety of activities and sources of information that a small business can use to learn more about environmental regulatory requirements. EPA and the States provide various forms of compliance assistance. Some State assistance programs are run as confidential services to the small business community. If a small business wishes to obtain a corrections period under this policy after receiving compliance assistance from a confidential program, the business must promptly disclose the violations to the EPA or the State or Tribal government agency which is applying a similar policy and comply with the other provisions of this Policy.

2. Clarify and Lengthen the Disclosure Period

This revised Small Business Compliance Policy extends the time period within which the small business must fully disclose a violation from 10 to 21-calendar days. The original Policy required "prompt disclosure" for compliance assistance discovery and 10 day disclosure for discoveries made through an environmental audit. Lengthening the disclosure period to 21 calendar days regardless of how the violation was discovered will give small businesses more opportunity to make use of the Small Business Compliance Policy while allowing EPA to get timely reporting of violations. Such timely reporting provides the Agency with clear notice of violations that have or may have occurred and the opportunity to respond if necessary, as well as an accurate picture of a given businesses's compliance record. Lengthening the disclosure period to 21 calendar days is also consistent with a similar change that EPA made to the Audit Policy.

EPA received comment that there might be situations where small businesses would not able to disclose within the 21 calendar day period. Therefore the revised Small Business Compliance Policy addresses this issue. Where the 21 calendar day disclosure period has not expired and a small business knows that it will be unable to disclose within that time period, the small business is advised to contact the appropriate EPA Office before the period expires to request additional time. For situations in which the 21 calendar day disclosure period has already expired, the Agency may accept a late disclosure in the exceptional case, such as where there are complex circumstances. In such instances, the small business will need to demonstrate that an exceptional case exists.

With the broadening of the options for the discovery of violations, there was some concern by one commenter in a follow-up conversation about the event that triggers the beginning of the 21 calendar day disclosure period. The 21 calendar day disclosure period begins when the small business discovers that a violation has, or may have, occurred. Discovery occurs when any officer, director, employee or agent of the facility becomes aware of any facts that reasonably lead him or her to believe that a violation has or may have occurred at the facility.

Other Issues Addressed by Public Comment

There were also issues that the public commented on, either through outreach activities or in response to the Agency's proposed modifications. These covered reduction of penalties, implementation of the policy, and the combination of the Audit Policy and the Small Business Compliance Policy.

1. Penalty Reduction

EPA did not change the Small Business Compliance Policy provisions on reducing or eliminating the gravity component of civil penalties that it would otherwise seek. Civil penalties are made up of two components: a gravity component and an economic benefit component. The gravity component typically reflects the nature of the violations, the duration of the violations, the environmental, safety or public health impacts of the violations, good faith efforts by the business to promptly remedy the violation, and the business's overall record of compliance with environmental requirements. Under this Policy, the Agency will grant 100% reduction of the gravity component of the penalty for violations provided all the other criteria in the policy are met. The Agency believes the incentive of 100% reduction of the gravity component should encourage small businesses to disclose violations promptly and correct them within the specified time period.

The economic benefit component typically reflects any monetary advantage a small business has derived from the violations. For example, if a small business significantly reduced its expenses by not purchasing and installing an emission control device to meet regulatory requirements, then that small business has gained an economic benefit or advantage over its competitors who have complied with the environmental requirements. We received a comment that the possibility of being subject to the economic benefit component of a civil penalty would keep small businesses from using the policy. However, other commenters stated that the economic benefit component should be retained to protect law abiding small businesses from being placed at a competitive disadvantage to those which do not comply.

EPA retains discretion to consider and collect economic benefit where a significant benefit was gained, although based on its experience, the Agency

does not anticipate the need to exercise this discretion often. To date, the vast majority of the disclosures under the Audit Policy and all of the disclosures under the Small Business Compliance Policy have not necessitated recovery of economic benefit.

2. Implementation of the Policy

EPA has modified the Small Business Compliance Policy in format and language to provide the information in a more understandable manner. This in part helps to respond to comments about how we have implemented the Policy. In addition, when they become available, EPA will provide a fact sheet, contact list, and other information about the Policy at the EPA web site (*http://www.epa.gov/oeca/smbusi.html*) to increase the usefulness of the Policy. We will also ensure that other internet sites such as EPA's Small Business Ombudsman web site and the Compliance Assistance Center's web sites (9 Centers available at http://www.epa.gov/oeca/centers) link to this information about the Policy. EPA staff and other compliance assistance activities and initiatives will also provide information about the Small Business Compliance Policy.

Enhanced implementation of the Policy also involves improved procedures and coordination within EPA. EPA Headquarters and Regional staff working on the Audit Policy as well as this Small Business Compliance Policy are coordinating on issues and procedures to ensure national consistency in its application and to improve the timeliness of the Agency's review of each disclosure. In most circumstances, EPA will respond to a small business within 60 days of disclosure of a violation.

3. Combining Both Compliance Incentives Policies

As part of the Agency's evaluations of the Audit and Small Business Policies and given the similarities between the two Policies, EPA asked for comments on the advisability of combining them. In particular, the Agency was interested in whether small businesses would be more likely to audit (or seek compliance assistance) and self-disclose violations if the two policies were merged. EPA received a range of comments supportive of combining the two policies if doing so would simplify the process for small businesses. After a careful review, EPA decided that it is preferable for small businesses to have a separate policy tailored specifically for them. The Small Business Compliance Policy: (1) Is shorter and simpler, (2) contains additional benefits for small businesses such as a longer correction period and 100% penalty reduction of the gravity component for all covered violations, and (3) can be more easily distributed with compliance assistance materials developed just for small businesses.

We expect these changes to enable more small businesses to use the policy and thereby promote environmental compliance.

Small Business Compliance Policy

A. Introduction and Purpose

The Small Business Compliance Policy is intended to promote environmental compliance among small businesses by providing incentives for them to make use of compliance assistance programs, environmental audits, or compliance management systems (CMS), or to participate in any activities that may increase small businesses' understanding of the environmental requirements with which they must comply. The Policy accomplishes this in two ways: by waiving or reducing civil penalties to which a small business might otherwise be subject, and by deferring to States and local governments or tribal authorities that offer these incentives consistent with the criteria established in this Policy.

EPA will waive or reduce the gravity component of civil penalties whenever a small business makes a good faith effort to comply with environmental requirements by:

(1) Voluntarily discovering a violation,

(2) Promptly disclosing the violation within the required time period, and

(3) Expeditiously correcting the violation within the proper timeframe.

To obtain the benefits of the Policy, the facility must also meet criteria on violation history, lack of harm, and criminal conduct.

B. Background

This Policy implements section 223 of the Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996.

C. Applicability

This Policy applies to facilities owned by small businesses as defined here. A small business is a person, corporation, partnership, or other entity that employs 100 or fewer individuals (across all facilities and operations owned by the small business).[1] Entities, as defined under SBREFA, also include small governments and small organizations. Facilities that are operated by municipalities or other local governments may be covered under the Small Communities Policy (see *http://www.epa.gov/oeca/scpolcy.html*). Facilities that are disclosing violations involving multiple facilities should refer to the sections on multiple facilities in the Policy on Incentives for Self-Policing: Discovery, Disclosure, Correction and Prevention of Violations (the Audit Policy) of April 11, 2000.

This Policy supersedes the previous version of the policy which was called the Policy on Compliance Incentives for Small Businesses and became effective on June 10,1996. To the extent that this Policy may differ from the terms of applicable enforcement response policies (including penalty policies) under media-specific programs, this document supersedes those policies.

D. How Small Businesses Can Qualify for Penalty Reduction

EPA will eliminate or reduce the gravity component of civil penalties against small businesses based on the following criteria:

1. Discovery is Voluntary

The small business discovers a violation on its own before an EPA or State inspection. For example, a small business may discover violations after receiving compliance assistance, conducting an environmental audit or participating in mentoring programs. Other activities that may be useful in discovering violations include establishing CMS, using compliance checklists, reading materials on complying with environmental requirements, using compliance assistance center web sites, and attending training classes.

The violation must be identified voluntarily, and not through a monitoring or sampling requirement prescribed by statute, regulation, permit, judicial or administrative order, or consent agreement. For example, emissions violations discovered through a continuous emissions monitor (or alternative monitor established in a permit), violations of National Pollutant Discharge Elimination System (NPDES) discharge limits discovered through required sampling or monitoring, and violations discovered through a compliance audit required to be performed by terms of a consent order or settlement order are not eligible for penalty reduction under the policy.

[1] The number of employees should be considered as full-time equivalents on an annual basis, including contract employees. Full-time equivalents means 2,000 hours per year of employment. For example, see 40 CFR 372.3.

2. Disclosure Period is Met

i. The small business must voluntarily disclose a specific violation fully and in writing to EPA or the State within 21 calendar days after the small business has discovered that the violation has occurred, or may have occurred. Prompt disclosure is evidence of the small business's good faith in wanting to achieve or return to compliance as soon as possible. For purposes of this Policy, the time at which a small business discovers that a violation has or may have occurred begins when any officer, director, employee, or agent of the facility becomes aware of any facts that reasonably lead him or her to believe that a violation may exist. If a small business has some doubt as to the existence of a violation, EPA recommends that the business make a prompt disclosure and allow the regulatory authorities to make a definitive determination. This will ensure that the small business meets the disclosure period requirement.

ii. The disclosure of the violation must occur before the violation was otherwise discovered by, or reported to EPA, the appropriate state or local regulatory agency. See section F.1 of the Policy below. Good faith also requires that a small business cooperate with EPA and in a timely manner provide such information requested by EPA to determine applicability of this Policy.

iii. If a small business wishes to obtain a corrections period after receiving compliance assistance from a confidential assistance program, the business may still take advantage of the policy by disclosing the violation to the appropriate regulatory agency.

3. Violation is Corrected

The business corrects the violation within the corrections period set forth below. Small businesses are expected to remedy the violations within the shortest practicable period of time. Correcting the violation includes remediating any environmental harm associated with the violation, as well as putting into place procedures to prevent the violation from happening again.

i. For any violation that cannot be corrected within 90 calendar days of its discovery, the small business must submit a written schedule, or the agency may, at its sole discretion, elect to issue a compliance order with a schedule, as appropriate. The small business must correct any violations within 180 calendar days after the date that they were discovered.

ii. If the small business intends to correct the violation by putting into place pollution prevention measures, the business may take an additional period of up to 180 calendar days, *i.e.*, up to a period of 360 calendar days from the date the violation is discovered.

4. When the Policy Does Not Apply

The Policy *does not* apply if:

a. The facility has the following noncompliance history:

i. It has previously *received* a warning letter, notice of violation, or field citation, or been subject to a citizen suit or any other enforcement action by a government agency for a violation of the same requirement within the past three years.

ii. It has been granted penalty reduction under this Policy (or a similar State or Tribal policy) for a violation of the same or a similar requirement within the past three years.

iii. It has been subject to two or more enforcement actions for violations of environmental requirements in the past five years, even if this is the first violation of this particular requirement.

b. The violation was discovered through an information request, inspections, field citations, reported to a federal, state or local agency by a member of the public or a "whistleblower" employee, identified in notices of citizen suits, previously reported to an agency, or through an investigation unless the facility can demonstrate that it did not know that the agency had initiated the investigation and has disclosed in good faith.

c. The violation has caused actual serious harm to public health, safety, or the environment;

d. The violation is one that may present an imminent and substantial endangerment to public health, safety or the environment; or

e. The violation involves criminal conduct.

E. Penalty Reduction Guidelines That EPA Will Follow

EPA will exercise its enforcement discretion to eliminate or reduce civil penalties as follows.

1. EPA will waive the gravity component of the civil penalty if a small business satisfies all of the criteria in section D. If, however a small business has obtained a significant economic benefit from the violation(s), EPA will still waive 100% of the gravity component of the penalty, but may seek the full amount of the significant economic benefit associated with the violations.[2] EPA anticipates that such a significant economic benefit will occur infrequently. However, EPA retains its discretion to ensure that small businesses that comply with public health protections are not put at a serious competitive disadvantage by those who have not complied.

2. If a small business does not fit within the guideline E.1.immediately above, this Policy does not provide any special penalty reduction. However, if a small business has otherwise made a good faith effort to comply, EPA has discretion, pursuant to its applicable enforcement response or penalty policies, to waive or reduce civil penalties.[3]

3. Further, the Agency's enforcement response and penalty policies may allow for penalty reduction where the small business is able to document an inability to pay all or a portion of the penalty. Penalty reduction in this situation allows the small business to stay in business and to finance compliance. See *Guidance on Determining a Violator's Ability to Pay a Civil Penalty* of December 1986 (see http://www.epa.gov/oeca/ore/aed/comp/acomp/a1.html). Penalties also may be reduced pursuant to the *Final EPA Supplemental Environmental Projects Policy* of May 1998 (63 FR 24796, June 5, 1998, available at http://www.epa.gov/oeca/sep/sepfinal.html) and *Incentives for Self-Policing: Discovery, Disclosure, Correction and Prevention of Violations Policy of April 11, 2000.*

4. This Policy sets forth how the Agency expects to exercise its enforcement discretion in deciding on an appropriate enforcement response and determining an appropriate civil penalty for violations by small businesses. It states the Agency's views as to the proper allocation of enforcement resources. This Policy is not final agency action and is intended as guidance. It does not create any rights, duties, obligations, or defenses, implied or otherwise, in any third parties.

F. Enforcement for Violations Not Promptly Corrected

To ensure that this Policy enhances and does not compromise public health and the environment, a business remains subject to all applicable enforcement response policies (which may include discretion whether or not to take formal enforcement action) for all violations that were not remedied within the corrections period. The

[2] The "gravity component" of the penalty includes everything except the economic benefit amount.

[3] For example, in some media specific penalty policies, the penalty calculation may be reduced to account for good faith efforts to comply.

penalty in such action may include the time period before and during the correction period.

G. Applicability to States and Tribes

Small businesses may take advantage of small business policies that many States have developed. EPA recognizes that states and tribes are partners in enforcement and compliance assurance and may have adopted their own penalty mitigation policies in Federally-authorized, approved or delegated programs. Therefore, EPA will generally defer to State and Tribal penalty mitigation for self disclosures as long as the State policy meets minimum requirements for Federal delegation and is generally consistent with the criteria set forth in this Policy. Whenever a State agency or Tribe provides a penalty waiver or mitigation or a correction period to a small business pursuant to this Policy or a similar policy, that State or Tribe should notify the appropriate EPA Region to ensure coordination and to request that EPA defer to that action. Similarly, EPA will notify the appropriate State agency or Tribe whenever EPA applies this policy to ensure coordination and request the States defer to EPA's action. Regional contacts, along with other materials about the Policy, will be posted at the EPA web page (*http://www.epa.gov/oeca/smbusi.html*) as they become available.

H. Effective Date

This revised Policy is effective May 11, 2000.

Dated: April 5, 2000.

Sylvia K. Lowrance,

Acting Assistant Administrator for Enforcement and Compliance Assurance.

Part IX

Department of Education

Office of Special Education and Rehabilitative Services; List of Correspondence; Notice

VOL 65 ISS 70 AP 11 2000 UMI

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services List of Correspondence

AGENCY: Department of Education.

ACTION: List of Correspondence from October 1, 1999 through December 31, 1999.

SUMMARY: The Secretary is publishing the following list pursuant to section 607(d) of the Individuals with Disabilities Education Act (IDEA). Under section 607(d) of IDEA, the Secretary is required, on a quarterly basis, to publish in the **Federal Register** a list of correspondence from the Department of Education received by individuals during the previous quarter that describes the interpretations of the Department of Education of IDEA or the regulations that implement IDEA.

FOR FURTHER INFORMATION CONTACT: JoLeta Reynolds or Rhonda Weiss. Telephone: (202) 205–5507. Individuals who use a telecommunications device for the deaf (TDD) may call (202) 205–5465 or the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8:00 a.m. and 8:00 p.m., Eastern time, Monday through Friday, except Federal holidays.

Individuals with disabilities may obtain a copy of this notice in an alternate format (e.g., Braille, large print, audiotape, or computer diskette) on request to Katie Mincey, Director of the Alternate Formats Center. Telephone: (202) 205–8113.

SUPPLEMENTARY INFORMATION: The following list identifies correspondence from the Department issued between October 1, 1999 and December 31, 1999.

Included on the list are those letters that contain interpretations of the requirements of IDEA and its implementing regulations, as well as letters and other documents that the Department believes will assist the public in understanding the requirements of the law and its regulations. The date and topic addressed by a letter are identified, and summary information is also provided, as appropriate. To protect the privacy interests of the individual or individuals involved, personally identifiable information has been deleted, as appropriate.

Part A—General Provisions

Section 607—Requirements for Prescribing Regulations

Topic Addressed: Policy Interpretation Under Part B of the Individuals With Disabilities Education Act

• OSEP memorandum 00–1 dated October 7, 1999 to Chief State School Officers, regarding the determination that the letter dated October 8, 1998 to Wisconsin Superintendent of Public Instruction John T. Benson regarding public charter schools contained an interpretation that raised an issue of national significance to the implementation of Part B of IDEA.

Part B—Assistance for Education of All Children With Disabilities

Section 611—Authorization; Allotment; Use of Funds; Authorization of Appropriations

Topic Addressed: Use of Funds

• Letter dated December 27, 1999 to Northern Mariana Islands Federal Program Officer William Matson, regarding whether use of Part B funds for the purchase of a school bus to be used exclusively to meet the special needs of eligible disabled students is an allowable cost.

Section 612—State Eligibility

Topic Addressed: Free Appropriate Public Education

• Letter dated November 8, 1999 to Fredric B. Garner, M.D., clarifying that decisions about services provided to each child must be based on each child's special education and related services needs, and that the entitlement under Part B of IDEA is to a free appropriate public education, and not to a particular label.

Topic Addressed: Least Restrictive Environment

• Letter dated November 19, 1999 to Montgomery County Maryland Public Schools Department of Special Education Director Raymond W. Bryant, regarding the application of the least restrictive environment requirements to the proposed movement of children with disabilities from special education centers to other settings, including requirements to make available a continuum of alternative placements and to give parents written prior notice in accordance with the change of placement procedures.

• Letter dated December 27, 1999 to individual, (personally identifiable information redacted), regarding whether a State is compelled to maintain a special or residential school placement within a State if an appropriate placement for a child with a disability is available at no cost to the parents.

Topic Addressed: Children With Disabilities Placed in Private Schools by Their Parents

• Letter dated November 15, 1999 to Baton Rouge, Louisiana Special Education Department Director Sharon M. Crary, regarding the requirement for public agencies to expend a proportionate share of available Federal funds on services for parentally-placed private school children with disabilities, even though districts can count for purposes of generating Part B funds only those parentally-placed private school children with disabilities whom they are serving, and clarifying the two required child counts for these children.

Topic Addressed: State Educational Agency General Supervisory Responsibility

• Letter dated October 29, 1999 to Washington State Director of Special Education Douglas Gill, responding to an inquiry about the doctrine of *res judicata* and clarifying that a State is not relieved of its obligation to resolve an issue raised in a complaint filed with the State if the merits of that issue were not decided in a prior due process hearing involving the same parties.

• Letter dated December 3, 1999 to California Department of Education Chief Deputy Superintendent Leslie Fausset, regarding the State's longstanding failure to exercise its general supervisory responsibility effectively through a corrective action plan to achieve State-wide compliance and the State's tardiness in submitting a report as required under the special conditions to its Federal Fiscal Year (FFY) 1999 Part B of IDEA grant award.

• Letter dated December 17, 1999 to Attorney Marc Grober regarding requirements for States receiving IDEA FFY 1998 and FFY 1999 Part B funds to provide assurances in order to comply with the IDEA Amendments of 1997.

• Letter dated December 27, 1999 to Pennsylvania Big Spring School District Superintendent Dr. William Kerr Cowden, regarding the provisions in the IDEA Amendments of 1997 that reduce unnecessary paperwork, and clarifying that States may impose their own requirements to govern the education of students with disabilities, as long as those State requirements are not in conflict with Federal requirements.

Topic Addressed: Personnel Standards

• Letter dated December 1, 1999 to individual (personally identifiable

information redacted), regarding personnel shortages of special education teachers in New Hampshire and the provisions under the IDEA Amendments of 1997 that may relate to such shortages.

Topic Addressed: Information Required for State Program Grants

• OSEP memorandum 00–4 dated November 3, 1999 to State Directors of Special Education, clarifying the eligibility documentation and public participation requirements that States must meet to comply with Part B of IDEA.

Section 614—Evaluations, Eligibility Determinations, Individualized Education Programs, and Educational Placements

Topic Addressed: Individualized Education Programs

• Letter dated October 6, 1999 to Winston-Salem and Forsyth County Schools, North Carolina Attorney Douglas S. Punger, regarding the ability of the parents of a child with autism to invite parents of other students with disabilities to their child's individualized education program (IEP) meeting, and the responsibility of the IEP team to determine, if appropriate, whether a child with autism should receive applied behavioral analysis.

Section 615—Procedural Safeguards

Topic Addressed: Student Discipline

• Letter dated December 7, 1999 to Iacocca Professor of Education Perry A. Zirkel, regarding the requirements in the IDEA Amendments of 1997 and the March 12, 1999 final regulations that are applicable to students with disabilities removed from their current placements for more than 10 school days in a school year.

Section 619—Preschool Grants

Topic Addressed: Procedures for Allocating Preschool Grants

• Letter dated October 21, 1999 to New York State Education Department Deputy Commissioner Lawrence Gloeckler, regarding New York's distribution of section 619 funds to eligible entities, and confirming that ineligible entities cannot receive future awards under the Preschool Grants program.

• Letter dated November 24, 1999 to New York State Education Department Deputy Commissioner Lawrence Gloeckler, regarding the State's discretion to require its local educational agencies that place preschool age students with disabilities in approved private preschool special education programs to provide those programs with an amount equal to the flow-through dollars generated by the individual students, and clarifying that if LEAs provide section 619 funds to those schools, those funds must be used in accordance with the requirements of Part B of IDEA, including the applicable cost principles.

Part C—Infants and Toddlers With Disabilities

Sections 631–641

Topic Addressed: Definitions

• Letter dated December 15, 1999 to Permanent Judicial Commission on Justice for Children Member Sheryl Dicker, clarifying that the Part C regulatory definition of "parent," like the statutory definition applicable under both Parts B and C of IDEA, does not include the "State" if the State is the child's guardian.

Section 635—Requirements for Statewide System

Topic Addressed: State Lead Agency General Supervisory Responsibility

• Letter dated December 15, 1999 to Mississippi State Health Officer Dr. E.F. Thompson, Jr., regarding a Part C State lead agency's general supervisory responsibility to ensure State-wide compliance within its Part C system and to identify whether deficiencies in some districts exist in other districts and to correct all identified deficiencies.

Section 640—Payor of Last Resort

Topic Addressed: Payments by CHAMPUS and TRICARE Program Funds for Early Intervention Services

• Letter dated December 21, 1999 to TRICARE Management Activity, requesting clarification of, and amendment to, a Department of Defense proposed regulation to provide that CHAMPUS and TRICARE is first payor for early intervention services under Part C of IDEA, as required by the IDEA Amendments of 1997.

Title 3—

The President

Proclamation 7287 of April 7, 2000

National Volunteer Week, 2000

By the President of the United States of America

A Proclamation

Each year our Nation is blessed by the service of more than 100 million Americans who take time out of their busy lives to reach out to those in need. Volunteers come from every age group and walk of life, yet they share a common conviction: that by giving of themselves, they can bridge the divide between strangers, create stronger families, and build better communities.

National Volunteer Week offers us a chance to thank the many volunteers whose work and compassion add so much to the quality of our lives. It also gives those who have never volunteered the opportunity to learn more about the many organizations that would benefit from their time and talents. People who enjoy sports can volunteer at a Special Olympics event; those who love the arts can work as docents in a gallery or historic home; those who love to read can share that love through a literacy program.

Our success with the AmeriCorps program demonstrates the power and promise of community service in America. Since we passed the National and Community Service Trust Act in 1993, more than 150,000 young people have served in AmeriCorps. They have taught or mentored more than 4 million children; helped to immunize more than a million people; worked to build some 11,000 homes; and sparked a new spirit of community service across our Nation. In my proposed budget for fiscal 2001, I have included funding to reach our goal of 100,000 AmeriCorps members in service each year. I have also outlined a new AmeriCorps Reserves program that will allow us to call upon AmeriCorps alumni during times of special need, such as following natural disasters. The Corporation for National Service will commit $10 million to create a new "E-corps"—750 qualified AmeriCorps volunteers who will help to bring digital opportunity to communities by providing technical support to school computer systems, tutoring at Community Technology Centers, and offering technical training for careers in the information technology sector. Through a new Community Coaches program, we will place adults in 1,000 schools to help engage students in service programs that will connect them to the wider community. And through new Youth Empowerment Grants, we will reward social entrepreneurship among young people who are seeking solutions to problems such as youth violence and alienation.

Dr. Martin Luther King, Jr., reminded us that "everyone can be great because anyone can serve." During National Volunteer Week, let us pause to thank all who have responded to that call to greatness, and let each of us make our own commitments to volunteer in our neighborhoods and communities.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim April 9 through April 15, 2000, as National Volunteer Week. I call upon all Americans to observe this week with appropriate programs, ceremonies, and activities to express appreciation to the volunteers among us for their commitment to service and to encourage the spirit of volunteerism in our families and communities.

IN WITNESS WHEREOF, I have hereunto set my hand this seventh day of April, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fourth.

William J. Clinton

Appeals regulations and rules of practice—

Subpoenas; clarification; comments due by 4-17-00; published 2-15-00

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. This list is also available online at http://www.nara.gov/fedreg.

The text of laws is not published in the **Federal Register** but may be ordered in "slip law" (individual pamphlet) form from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–1808). The text will also be made available on the Internet from GPO Access at http://www.access.gpo.gov/nara/index.html. Some laws may not yet be available.

H.R. 5/P.L. 106–182

Senior Citizens' Freedom to Work Act of 2000 (Apr. 7, 2000; 114 Stat. 198)

Last List April 10, 2000

Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service of newly enacted public laws. To subscribe, go to www.gsa.gov/archives/publaws-l.html or send E-mail to **listserv@www.gsa.gov** with the following text message:

SUBSCRIBE PUBLAWS-L Your Name.

Note: This service is strictly for E-mail notification of new laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.

The United States Government Manual 1999/2000

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to contact about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix B, which lists the agencies and functions of the Federal Government abolished, transferred, or renamed subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

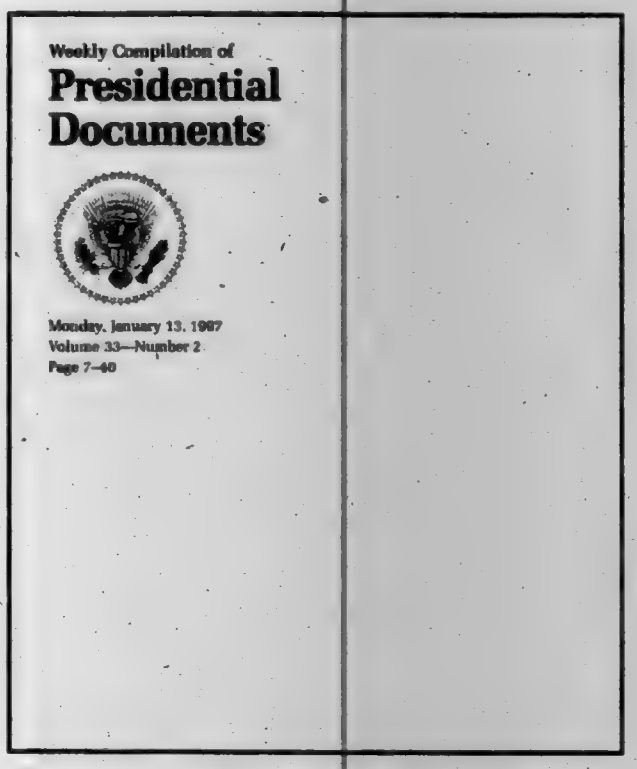
The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$27 per year.

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$25 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Public Laws

106th Congress, 2nd Session, 2000

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 106th Congress, 2nd Session, 2000.

Individual laws also may be purchased from the Superintendent of Documents, U.S. Government Printing Office. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws or access the online database at http://www.access.gpo.gov/nara/index.html

Federal Register

4–12–00 Wednesday
Vol. 65 No. 71 Apr. 12, 2000
Pages 19643–19818

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512-1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $555, or $607 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $220. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 65 FR 12345.

Printed on recycled paper.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 18, 2000 at 9:00 a.m.
WHERE: Conference Room, Suite 700
Office of the Federal Register
800 North Capitol Street, NW.
Washington, DC
(3 blocks north of Union Station Metro)
RESERVATIONS: 202–523–4538

Rules and Regulations

Federal Register
Vol. 65, No. 71
Wednesday, April 12, 2000

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 550 and 553

RIN 3206–AI92

Repeal of Dual Compensation Reductions for Military Retirees

AGENCY: Office of Personnel Management.

ACTION: Interim regulations with request for comments.

SUMMARY: The Office of Personnel Management (OPM) is issuing interim regulations to implement the repeal of reductions in military retired or retainer pay required of some military retirees employed in civilian positions. Section 651 of the National Defense Authorization Act for Fiscal Year 2000 repeals section 5532 of title 5, United States Code, effective October 1, 1999. This Act repeals two reductions in military retired or retainer pay previously required of some retired members of the uniformed services when they became Federal employees.

DATES: These regulations are effective April 12, 2000. Comments must be received by June 12, 2000.

ADDRESSES: Send written comments to Mary Lou Lindholm, Associate Director for Employment, Office of Personnel Management, Room 6500; 1900 E Street, NW., Washington, DC 20415–9500.

FOR FURTHER INFORMATION CONTACT: Laurence T. Lorenz on (202) 606–0830, FAX (202) 606–0390, or e-mail ltlorenz@opm.gov.

SUPPLEMENTARY INFORMATION:

Background

On October 5, 1999, President Clinton signed S. 1059, the National Defense Authorization Act for Fiscal Year 2000, Public Law 106–65. Section 651 of this Act repeals section 5532 of title 5, United States Code, effective retroactively to October 1, 1999. This action ended two reductions in retired or retainer pay previously required of retired members of a uniformed service who are employed in civilian offices or positions of the U.S. Government. This repeal affects positions in the legislative, executive, and judicial branches of the Government of the United States (including Government corporations, nonappropriated fund instrumentalities under the jurisdiction of the armed forces, and the U.S. Postal Service).

Two Reductions Ended

This repeal ends the following two reductions in military retired pay that applied to some Federal employees who had retired from a uniformed service:

1. The pay cap that limited the combined total of Federal civilian basic pay plus military retired pay to $110,700 (Executive Level V) for all Federal employees who retired from a uniformed service; and

2. The partial reduction in retired pay required of retired officers of a regular component of a uniformed service.

As a consequence of the repeal, exceptions and waivers to the reductions for military retirees approved by OPM under criteria in 5 CFR 553, or by agencies under delegated authority, are no longer needed.

GPPA Revised

The Guide to Processing Personnel Actions (GPPA) prior to January 2, 2000 required sending a copy of the Notification of Personnel Action (SF–50) for retired members of a uniformed service to the appropriate uniformed service finance center for all covered personnel actions. OPM and the Department of Defense agreed that this Act eliminated the statutory basis for sending a copy of personnel actions effective on or after October 1, 1999. Accordingly, OPM eliminated this requirement in GPPA Update 33, dated January 2, 2000. Agencies should not send covered personnel actions for military retirees with effective dates on or after October 1, 1999.

Service Credit and Preference Limitations Unchanged

The repeal of 5 U.S.C. 5532 does not repeal two other parts of the Dual Compensation Act of 1964. This Act adopted a "fresh start" policy for military retirees and established limits on service credit and veterans' preference to ensure that military retirees did not receive unfair advantages in pay and tenure over civilian employees, including other veterans. As a result, unlike other former service members, retired members of a uniformed service generally cannot count their service time as creditable service for retention (RIF), annual leave accrual, and retirement purposes (see 5 U.S.C. 3501(a), 3502(a), 6303(a) and 8411(c)). On the other hand, retirement does not change a service member's entitlement to veterans' preference in the employment process.

Reductions for Civilian Retirees Unchanged

This repeal does not affect the reduction in salary required of reemployed civilian annuitants under the Civil Service Retirement System (CSRS) and Federal Employees' Retirement System (FERS). Agencies may continue to request waivers of these reductions when appropriate under criteria in 5 CFR 553 and 5 U.S.C. 8344 or 8468.

Employee Questions

The uniformed services finance centers are responsible for making all adjustments in military retired or retainer pay. Employee questions regarding restoration of retired pay should be directed to the appropriate uniformed service finance center. These finance centers are identified in Chapter 8, of the Guide to Processing Personnel Actions, page 8–19, issued February 26, 1999 *[http://www.opm.gov/feddata/GPPA/Gppa.htm]*.

Waiver of Notice of Proposed Rulemaking and Delay in Effective Date

Pursuant to 5 U.S.C. 553(b)(3)(B), I find that good cause exists for waiving the general notice of proposed rulemaking because it would be contrary to the public interest to delay access to benefits provided by law. Also, pursuant to 5 U.S.C. 553(d)(3), I find that good cause exists to waive the effective date and make this amendment effective in less than 30 days in order to implement immediately statutory language in Sec. 651 of the National Defense Authorization Act for Fiscal Year 2000, Public Law 106–65, that is effective retroactively to October 1, 1999.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities (including small businesses, small organizational units, and small governmental jurisdictions) because the regulations apply only to appointment procedures for certain employees in Federal agencies.

Executive Order 12866, Regulatory Review

This interim rule has been reviewed by the Office of Management and Budget in accordance with Executive Order 12866.

List of Subjects

5 CFR Part 553

Administrative practice and procedure, Government employees, Military Personnel, Retirement, Wages.

Office of Personnel Management.

Janice R. Lachance

Director.

Accordingly, OPM is amending parts 550 and 553 of title 5, Code of Federal Regulations, as follows:

PART 550—PAY ADMINISTRATION (GENERAL)

Subpart F—[Removed and Reserved]

1. The authority citation for subpart F continues to read as follows:

Authority: 5 U.S.C. 5532.

2. Subpart F consisting of §§ 550.601, 550.602 and 550.603 is removed and reserved.

PART 553—REEMPLOYMENT OF MILITARY AND CIVILIAN RETIREES TO MEET EXCEPTIONAL EMPLOYMENT NEEDS

3. The authority citation for part 553 is revised to read as follows:

Authority: 5 U.S.C. 8344, 8468, Sec. 651, Pub. L. 106–65 (113 STAT. 664).

4. Section 553.101 is revised to read as follows:

§ 553.101 Applicability.

This part applies to employment of civilian annuitants who would be subject to termination of annuity or annuity offset under 5 U.S.C. 8344 or 5 U.S.C. 8468. Agencies may request exceptions as provided in subpart B of this part from the reemployed annuitant provisions of 5 U.S.C. 8344 (for Civil Service Retirement System annuitants) or 8468 (for Federal Employees' Retirement System annuitants), as appropriate.

5. In § 553.102, paragraph (c) is revised to read as follows:

§ 553.102 Definitions.

* * * * *

(c) Retiree, as used in this part refers to an annuitant as defined in paragraph (b) of this section.

6. In § 553.103, paragraph (b) is revised to read as follows:

§ 553.103 General policy.

* * * * *

(b) Application of exceptions. An exception to the salary offset provisions of 5 U.S.C. 8344 or 8468 authorized by OPM or an agency under this part applies only to the particular individual for whom it was authorized and only while that individual continues to serve in the same or a successor position. The exception terminates upon the individual's assignment to a different position unless a new exception is authorized under the provisions of this part.

7. In § 553.201, paragraph (c)(2), is revised to read as follows:

§ 553.201 Requesting OPM approval for reemployment without reduction in individual cases.

* * * * *

(c) * * *

(2) *Need for the individual's services.* The agency must show either that the individual is uniquely qualified for the emergency response work to be done or that the number of positions to be filled and/or urgency of response justifies making the particular appointment without further delay. OPM will not approve reemployment without penalty under 5 U.S.C. 8344, or 8468 solely to meet normal seasonal workload fluctuations.

8. In § 553.203, paragraph (b) is revised to read as follows:

§ 553.203 Status of individuals serving without reduction.

* * * * *

(b) *Retired members of the uniformed services.* Except for individuals to whom paragraph (a) of this section is applicable, retired members of uniformed services are considered employees for the purposes of subchapter III of chapter 83 or chapter 84 of title 5, United States Code, subject to the same conditions as apply to any other employees.

BILLING CODE 6325–01–U

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 932

[Docket No. FV00–932–1 FIR]

Olives Grown in California; Decreased Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture (Department) is adopting, as a final rule, without change, the provisions of an interim final rule which decreased the assessment rate established for the California Olive Committee (Committee) for the 2000 and subsequent fiscal years from $26.18 to $21.73 per ton of olives handled. The Committee is responsible for local administration of the marketing order which regulates the handling of olives grown in California. Authorization to assess olive handlers enables the Committee to incur expenses that are reasonable and necessary to administer the program. The fiscal year began January 1 and ends December 31. The assessment rate will remain in effect indefinitely unless modified, suspended, or terminated.

EFFECTIVE DATE: May 12, 2000.

FOR FURTHER INFORMATION CONTACT: Diane Purvis, Marketing Assistant, and Rose Aguayo, Marketing Specialist, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 2202 Monterey Street, Suite 102B, Fresno, California 93721; telephone: (559) 487–5901; Fax: (559) 487–5906; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, room 2525–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 720–2491, Fax: (202) 720–5698.

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, P.O. Box 96456, room 2525–S, Washington, DC 20090–6456; telephone (202) 720–2491, Fax: (202) 720–5698, or E-mail: Jay.Guerber@usda.gov.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement No. 148 and Order No. 932, both as amended (7 CFR part 932), regulating the handling of olives grown in California, hereinafter referred to as the

"order." The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department is issuing this rule in conformance with Executive Order 12866. This rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under the marketing order now in effect, California olive handlers are subject to assessments. Funds to administer the order are derived from such assessments. It is intended that the assessment rate as issued herein will be applicable to all assessment olives beginning on January 1, 2000, and continue until amended, suspended, or terminated. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review the Secretary's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule continues the decrease in the assessment rate established for the Committee for the 2000 and subsequent fiscal years from $26,18 per ton to $21.73 per ton of olives handled.

The California olive marketing order provides authority for the Committee, with the approval of the Department, to formulate an annual budget of expenses and collect assessments from handlers to administer the program. The members of the Committee are producers and handlers of California olives. They are familiar with the Committee's needs and with the costs for goods and services in their local area and are thus in a position to formulate an appropriate budget and assessment rate. The assessment rate is formulated and discussed in a public meeting. Thus, all directly affected persons have an opportunity to participate and provide input.

For the 1999 and subsequent fiscal years, the Committee recommended, and the Department approved, an assessment rate that would continue in effect from fiscal year to fiscal year unless modified, suspended, or terminated by the Secretary upon recommendation and information submitted by the Committee or other information available to the Secretary.

The Committee met on December 9, 1999, and unanimously recommended fiscal year 2000 expenditures of $2,472,235 and an assessment rate of $21.73 per ton of olives. In comparison, last year's budgeted expenditures were $1,845,185. Recommended budget expenditures for research are significantly higher this year because of higher anticipated research expenses. The higher research budget of $868,550 is needed to fund: (1) Continued research and development of the mechanical olive harvester and (2) scientific studies to develop chemical or biological defenses to counteract a potential threat from the olive fruit fly in the California production area.

The following table compares major budget expenditure recommendations for the 2000 fiscal year with those from last year.

Budget Expenditure	1999	2000
Administration	$346,485	$356,190
Research	302,000	868,550
Market Development	1,190,500	1,212,495

The assessment rate recommended by the Committee was derived by considering anticipated expenses, an estimated assessable tonnage, and additional pertinent factors. The estimate of assessable olives for the 2000 fiscal year is 113,750 tons. This compares to an assemble tonnage of 67,990 for fiscal year 1999. The increase in fiscal year 2000, due in large part to the alternate-bearing nature of olives, allowed the Committee to lower the assessment rate from $26.18 to $21.73 per ton, a decrease of $4.45. Income derived from handler assessments, interest, and carryover of reserve funds will be adequate to cover budgeted expenses. Funds in the reserve at the end of fiscal year 2000 will be less than the maximum permitted by § 932.40 of the order (approximately one fiscal year's expenses).

The assessment rate will continue in effect indefinitely unless modified, suspended, or terminated by the Secretary upon recommendation and information submitted by the Committee or other available information.

Although this assessment rate is effective for an indefinite period, the Committee will continue to meet prior to or during each fiscal year to recommend a budget of expenses and consider recommendations for modification of the assessment rate. The dates and times of Committee meetings are available for the Committee or the Department. Committee meetings are open to the public and interested persons may express their views at these meetings. The Department will evaluate Committee recommendations and other available information to determine whether modification of the assessment rate is needed. Further rulemaking will be undertaken as necessary. The Committee's fiscal year 2000 budget and those for subsequent fiscal years will be reviewed and, as appropriate, approved by the Department.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 1,200 producers of olives in the production area and 3 handlers subject to regulation under the marketing order. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.201) as those having annual receipts less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $5,000,000. None of the olive handlers may be classified as small entities, while the majority of olive producers may be classified as small entities.

This rule continues the decrease in the assessment rate established for the Committee and collected from handlers for the 2000 and subsequent fiscal years from $26.18 per ton to $21.73 per ton of olives. The Committee unanimously recommended fiscal year 2000 expenditures of $2,472,235 and an assessment rate of $21.73 per ton. The assessment rate of $21.73 is $4.45 lower than the 1999 rate. The estimated

quantity of assessable olives for the 2000 fiscal year is 113,750 tons. Thus, the $21.73 rate should be adequate to meet this year's budgeted expenses, when combined with funds from the authorized reserve and interest income.

The following table compares major budget expenditure recommendations for the 2000 fiscal year with those from last year.

	Budget Expenditure	
	1999	2000
Administration	$346,485	$356,190
Research	302,000	868,550
Market Development	1,190,500	1,212,495

The higher research budget of $868,550 is needed to fund: (1) Continue research and development of the mechanical olive harvester and (2) scientific studies to develop chemical and scientific defenses to counteract a potential threat from the olive fruit fly in the California production area.

A lower assessment rate was recommended for fiscal year 2000 because the estimated 2000 fiscal year assessable tonnage is approximately 40 percent larger than last fiscal years tonnage, due in large part to the alternate bearing nature of the crop. A comparison of assessable tonnage for fiscal year 2000 with the two previous fiscal years is listed below:

1998	1999	2000
85,585	67,990	113,750

The Committee reviewed and unanimously recommended fiscal year 2000 expenditures of $2,472,235, which reflects increases in the research, market development, and administrative budgets. Prior to arriving at this budget, the Committee considered information from various sources, such as the Committee's Executive Subcommittee, the Research Subcommittee, and the Marketing Subcommittee. Alternate spending levels were discussed by these groups, based upon potential reductions in the funding of various research and marketing projects. The Committee determined it was not necessary to increase the assessment rate to cover these expenses because the increased estimated tonnage will provide sufficient funds to cover anticipated expenses. The assessment rate of $21.73 per ton of assessable olives was derived by considering anticipated expenses, as estimated assessable tonnage of olives, and additional pertinent factors.

A review of historical and preliminary information pertaining to the current fiscal year indicates that the grower revenue for the 1999–2000 crop year will approximate $64,126,725. With an assessment rate of 421.73 per ton and assessable tonnage totaling 113,750 tons, the Committee's assessment revenue for fiscal year 2000 will be $2,471,788, or approximately 3.9 percent of grower revenue.

This action continues to decrease in the assessment obligation imposed on handlers for fiscal year 2000 by $506,187. Assessments are applied uniformly on all handlers, and some of the costs may be passed on to producers. However, decreasing the assessment rate reduces the burden on handlers, and may reduce the burden on producers. In addition, the Committee's meeting was widely publicized throughout the California olive industry and all interested persons were invited to attend the meeting and participate in Committee deliberations on all issues. Like all Committee meetings, the December 9, 1999, meeting was a public meeting and all entities, both large and small, were able to express views on this issue.

This action imposes no additional reporting or recordkeeping requirements on California olive handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

The Department has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

An interim final rule concerning this action was published in the **Federal Register** on January 19, 2000 (65 FR 2839). Copies of that rule were also mailed or sent via facsimile to all commodity handlers. Finally, the interim final rule was made available through the Internet by the Office of the Federal Register. A 60-day comment period was provided for interested persons to respond to the interim final rule. The comment period ended on March 20, 2000, and no comments were received.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at the following web site: http://www.ams.usda.gov/fv/moab.html. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORAMTION CONTACT** section.

After consideration of all relevant material presented, including the information and recommendation submitted by the Committee and other available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

BILLING CODE 3410–02–M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1206

RIN 2700–AC36

Availability of Agency Records to Members of the Public

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Final rule; technical amendment.

SUMMARY: This amendment to NASA's regulations on availability of agency records to members of the public clarifies an inconsistency in the provisions relating to notice to submitters of commercial information.

DATES: Effective April 12, 2000.

ADDRESSES: Freedom of Information Act Officer, Code PO, NASA Headquarters, Washington, DC 20546

FOR FURTHER INFORMATION CONTACT: Kellie N. Robinson, 202/358–2265, or Sharon S. Seward, 202/358–2085.

SUPPLEMENTARY INFORMATION: The National Aeronautics and Space Administration published a Final Rule to revise its Freedom of Information Act (FOIA) regulations on July 22, 1999 (64 FR 39404), in accordance with the EFOIA of 1996 as amended by Public Law 104–231. This amendment provides clarification of an inconsistency in that Final Rule. This amendment removes § 1206.610(e)(4) so that § 1206.610(e) is consistent with the provisions of § 1206.610(d).

List of Subjects in 14 CFR Part 1206

Freedom of information.

Dated: March 23, 2000.

Daniel S. Goldin,

Administrator.

Accordingly as set forth above, NASA amends 14 CFR chapter V as follows:

PART 1206—AVAILABILITY OF AGENCY RECORDS TO MEMBERS OF THE PUBLIC

1. The authority citation for part 1206 continues to read as follows:

Authority: 5 U.S.C. 552, 552a; 42 U.S.C. 2473.

§ 1206.610 [Amended]

2. In § 1206.610, remove paragraph (e)(4).

BILLING CODE 7510–01–P

RAILROAD RETIREMENT BOARD

20 CFR Parts 325, 330, 335, and 336

RIN 3220–AB39

Registration for Railroad Unemployment Benefits; Sickness Benefits; Determination of Daily Benefit Rates; Duration of Normal and Extended Benefits

AGENCY: Railroad Retirement Board.

ACTION: Final rule.

SUMMARY: The Railroad Retirement Board (Board) amends its regulations to incorporate amendments made to the Railroad Unemployment Insurance Act, which shortened the waiting period for receipt of benefits under the RUIA, changed the method of computing the daily benefit rate, and eliminated certain extended benefits.

EFFECTIVE DATE: This rule will be effective May 12, 2000.

ADDRESSES: Secretary to the Board, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611.

FOR FURTHER INFORMATION CONTACT: Marguerite P. Dadabo, Senior Attorney, (312) 751–4945, TDD (312) 751–4701.

SUPPLEMENTARY INFORMATION: Public Law 104–251 (110 Stat. 3161), commonly known as the Railroad Unemployment Insurance Act Amendments of 1996, amended the Railroad Unemployment Insurance Act (RUIA) to shorten the waiting period for receipt of unemployment and sickness benefits payable under that statute, to change the method of computing the daily benefit rate, and to eliminate certain extended payments of benefits, and the Board amends its regulations under the RUIA to conform to those amendments.

Section 325.1 is amended to reflect the change in the waiting period for unemployment benefits from 14 days to seven days. As amended, § 325.1 would provide that unemployment benefits are payable to any qualified employee for each day of unemployment in excess of seven in his or her first two-week registration period, and then for up to ten days of unemployment in any subsequent registration period within the same period of continuing unemployment. However, if the unemployment is the result of a strike, no benefits are payable for the first day 14 days of unemployment. For purposes of applying the seven-day waiting period, a period of continuing unemployment would end when an employee exhausts his or her unemployment benefits for a benefit year. Section 325.1 would also be amended to incorporate a definition of "period of continuing unemployment", a concept added by the 1996 amendments. The concept of a period of continuing unemployment was added to the RUIA so as to permit the continued payment of benefits from one benefit year to the next without a new waiting period if the period of unemployment runs from one year to the next. Finally, § 325.1 is amended to provide that if an employee's earnings in a registration period exceed the monthly compensation base for the applicable base year, then no unemployment benefits are payable in that registration period. For example, for benefit year 2000 the base year is calendar year 1999 in which the monthly compensation base was $970. No benefits are payable for any days of unemployment in the benefit year beginning July 1, 2000, for any registration period in which the employee earns more than $970. An employee who declines suitable work during a registration period is treated as having earned the amount of earnings he would have received had he not declined employment.

Section 330.2 is amended to provide that the maximum daily benefit rate under the RUIA is the monthly compensation base, as computed under 20 CFR part 302, multiplied by 5%, rounded down to the nearest $1. This change is the result of a change in the RUIA enacted under the 1996 amendments. The Board will publish the maximum daily benefit rate for the upcoming benefit year by June 1 of each year.

Section 335.6 is revised to reflect the same changes with respect to the waiting period for sickness benefits that the amendments to § 325.1 make with respect to unemployment benefits.

Finally, § 336.13 is revised, and § 336.14 is amended to reflect a change in the payment of extended benefits made by the 1996 amendments. Under the RUIA, as amended, an employee with ten or more years of service will receive a maximum of 65 days of extended unemployment or sickness benefits after the employee has exhausted his or her normal 130 days of unemployment or sickness.

The Board published this rule as a proposed rule on December 3, 1999 (64 FR 67811), and invited comments by February 1, 2000. No comments were received.

The Board, with the concurrence of the Office of Management and Budget, has determined that this is not a significant regulatory action under Executive Order 12866; therefore no regulatory impact analysis is required. There are no information collections associated with these rules.

List of Subjects in 20 CFR Parts 325, 330, 335, and 336

Railroad employees, Railroad unemployment and sickness benefits.

For the reasons set out in the preamble, the Railroad Retirement Board amends chapter II, title 20 of the Code of Federal Regulations as follows:

PART 325—REGISTRATION FOR RAILROAD UNEMPLOYMENT BENEFITS

1. The authority citation for part 325 continues to read as follows:

Authority: 45 U.S.C. 362(i) and 362(l).

2. Paragraphs (a) through (d) of § 325.1 are revised, paragraph (e) is redesignated as paragraph (h), and new paragraphs (e) through (g) are added as follows:

§ 325.1 General.

(a) *Day of unemployment.* A "day of unemployment" is a calendar day on which an employee, although ready and willing to work, is unemployed, and on which no remuneration is payable and for which the employee has registered, as required by this part. The amount of compensable days of unemployment shall be computed in accordance with this section.

(b) *Registration period.* Except for registration periods in extended unemployment benefit periods, a "registration period" means a period of 14 consecutive days beginning with the first day for which an employee registers following:

(1) His or her last day of work, or

(2) The last day of the employee's last preceding registration period, and with respect to which the employee properly files a claim for benefits on such form and in such manner as the Board prescribes.

(c) *General waiting period.* Benefits are payable to any qualified employee for each day of unemployment in excess of seven during his or her first registration period in a period of continuing unemployment if such period of continuing unemployment is his or her initial period of continuing unemployment beginning in the benefit year, and then for each day of unemployment in excess of four during any subsequent registration period within the same period of continuing unemployment. A strike waiting period, described in paragraph (d) of this section, will satisfy a general waiting period with respect to a benefit year.

(d) *Strike waiting period.* If a qualified employee has a period of continuing unemployment that includes days of unemployment due to a stoppage of work because of a strike in the establishment, premises, or enterprise at which he or she was last employed, no benefits are payable for his or her first 14 days of unemployment due to such stoppage of work. For subsequent days of unemployment due to the same stoppage of work, benefits are payable for days of unemployment in excess of four in each subsequent registration period within the period of continuing unemployment. If such period of continuing unemployment ends because the employee has exhausted his or her benefits as provided for under part 336 of this chapter, but the stoppage of work continues, benefits are payable for days of unemployment in excess of seven in the employee's first registration period in a new period of continuing unemployment based upon the same stoppage of work and for days of unemployment in excess of four in subsequent registration periods in the same period of continuing unemployment.

(e) *Period of continuing unemployment.* A "period of continuing unemployment" means a single registration period that includes more than four days of unemployment or a series of consecutive periods each of which includes more than four days of unemployment, or a series of successive registration periods, each of which includes more than four days of unemployment, if each succeeding registration period begins within 15 days after the last day of the immediately preceding registration period. An employee's period of continuing unemployment ends on the last day of a benefit year in which he or she exhausts rights to unemployment benefits as provided for in part 336 of this chapter.

(f) *Computation of compensable days.* (1) *Example 1.* An employee has an initial period of continuing unemployment from June 14 through July 25 and is unemployed on all days in that period. The employee's first registration period covers June 14 to June 27, and his subsequent registration periods cover June 28 to July 11 and July 12 to July 25. Under paragraph (c) of this section, a one-week waiting period applies to his first registration period and the employee is therefore paid benefits for days of unemployment in excess of seven in that period. The employee is then paid benefits for days of unemployment in excess of four in each of the two ensuing registration periods. [Note: if this employee's period of continuing unemployment had been the result of a strike in the establishment, premises, or enterprise at which the employee was last employed, then under paragraph (d) of this section, no benefits would be payable for the period June 14 to June 27, and benefits would then be payable for days of unemployment in excess of four in each of the ensuing registration periods.]

(2) *Example 2.* Same facts as in example 1, but the employee is unemployed again beginning August 18. Since August 18 is more than 15 days after July 25, the end of his last registration period, the employee begins a new period of continuing unemployment. The employee's first registration period in the new period of continuing unemployment covers August 18 to August 31. The employee is paid benefits for days of unemployment in excess of seven in that registration period because that period is the employee's first registration period in a new period of continuing unemployment commencing in the benefit year beginning July 1, and he or she did not previously have a waiting period in any registration period earlier in that benefit year. The employee's next registration period covers September 1 to September 14, and the employee returned to work on September 12. In that registration period, the employee has 11 days of unemployment and is therefore paid benefits for days of unemployment in excess of four.

(3) *Example 3.* Same facts as in examples 1 and 2, but the employee then has a new period of continuing unemployment beginning November 1 in the same benefit year. November 1 to November 14 is the employee's first registration period in that period of continuing unemployment. The employee is paid benefits for days of unemployment in excess of four in that registration period and for days of unemployment in excess of four in any subsequent registration period in the same benefit year because earlier in the benefit year the employee had a registration period, August 18 to August 31, in which he or she satisfied the waiting period.

(g) *Remuneration exceeds base year compensation.* (1) No benefits are payable to any otherwise eligible employee for any day of unemployment in a registration period where the total amount of remuneration, as defined in part 322 of this chapter, payable to the employee during a registration period exceeds the amount of the base year monthly compensation base. For this purpose an employee is considered to have received the amount he would have earned except for the fact that he declined suitable work available to him or her during the registration period.

(2) Days of unemployment which are not compensable by virtue of paragraph (g)(1) of this section shall nevertheless be counted as days of unemployment for purposes of determining whether the general waiting period, as described in paragraph (c) of this section, has been satisfied, and for purposes of determining a period of continuing unemployment.

PART 330—DETERMINATION OF DAILY BENEFIT RATES

3. The authority citation for part 330 continues to read as follows:

Authority: 45 U.S.C. 362(l).

4. Section 330.1 is revised to read as follows:

§ 330.1 Introduction.

The Railroad Unemployment Insurance Act provides for the payment of benefits, at a specified daily benefit rate, to any qualified employee for his or her days of unemployment or days of sickness, subject to a maximum amount per day. The "daily benefit rate" for an employee is the amount of benefits that he or she may receive for each compensable day of unemployment or sickness in any registration period in a period of continuing unemployment or sickness.

5. Paragraphs (b), (c), and (d) of § 330.2 are revised to read as follows:

§ 330.2 Computation of daily benefit rate.

* * * * *

(b) *Maximum daily benefit rate.* The maximum daily benefit rate is the

product of the monthly compensation base, as computed under part 302 of this chapter, for the base year immediately preceding the beginning of the benefit year, multiplied by five percent. If the maximum daily benefit rate so computed is not a multiple of $1.00, the Board will round it down to the nearest multiple of $1.00.

(c) *When increase effective.* Whenever the annual application of the formula in paragraph (b) of this section triggers an increase in the maximum daily benefit rate, such increase will apply to days of unemployment or days of sickness in registration periods beginning after June 30 of the calendar year immediately following the base year referred to in paragraph (b) of this section.

(d) *Notice.* Whenever the annual application of the formula in paragraph (b) of this section triggers an increase in the maximum daily benefit rate, or if the annual application of the formula does not trigger an increase, the Board will publish a notice in the **Federal Register** explaining how it computed the maximum daily benefit rate for the year. The Board will also notify each employer of the maximum amount of the daily benefit rate. The Board will make the computation as soon as it has computed the amount of the monthly compensation base under part 302 of this chapter and will publish notice as soon as possible thereafter, but in no event later than June 1 of each year. Information as to the current amount of the maximum daily benefit rate will also be available in any Board district or regional office.

* * * * *

PART 335—SICKNESS BENEFITS

6. The authority citation for part 335 continues to read as follows:

Authority: 45 U.S.C 362(i) and 362(l).

7. Section 335.6 is revised to read as follows:

§ 335.6 Payment of sickness benefits.

(a) *General rule.* Except as provided in this section, benefits are payable to any qualified employee for each day of sickness after the fourth consecutive day of sickness in a period of continuing sickness, as defined in § 335.1(c), but excluding four days of sickness in any registration period in such period of continuing sickness.

(b) *Waiting period.* Benefits are payable to any qualified employee for each day of sickness in excess of seven during his or her first registration period in a period of continuing sickness if such period of continuing sickness is his or her initial period of continuing sickness beginning in the benefit year. For this purpose, the first registration period in a period of continuing sickness is the registration period that first begins with four consecutive days of sickness and includes more than four days of sickness. For the purpose of computing benefits under this section, a period of continuing sickness ends on the last day of a benefit year in which the employee exhausts rights to sickness benefits as provided for under part 336 of this chapter.

(c) *Computation of compensable days.* (1) *Example 1.* An employee has an initial period of continuing sickness from June 14 through July 25, and all days in that period are days of sickness. The employee's first registration period covers June 14 to June 27, and his or her subsequent registration period covers June 28 to July 11, and July 12 to July 25. In the one-week waiting period the employee is paid benefits for days of sickness in excess of seven. In each of the two ensuing registration periods the employee is paid benefits for days of sickness in excess of four.

(2) *Example 2.* Same facts as in Example 1, but the employee later has a new period of continuing sickness based upon a different illness or impairment beginning September 17. The employee's first registration period in his or her new period of continuing sickness covers September 17 to September 30. The employee is paid benefits for days of sickness in excess of seven in that 14-day period because that period is his or her first registration period in a new period of continuing sickness commencing in the benefit year beginning July 1, and he or she did not previously have a waiting period in any registration period earlier in the benefit year.

(3) *Example 3.* Same facts as in examples 1 and 2, but the employee then has a new period of continuing sickness beginning January 1 in the same benefit year. January 1 to January 14 is the employee's first registration period in that period of continuing sickness. The employee is paid benefits for days of sickness in excess of four in that registration period because earlier in the benefit year he or she had a registration period, September 17 to September 30, in which he or she satisfied the initial seven-day waiting period.

(d) *Amount payable.* The gross amount of sickness benefits for any registration period in a period of continuing sickness shall be computed by multiplying the number of compensable days of sickness in such registration period by the employee's daily benefit rate, as computed under part 330 of this chapter.

PART 336—DURATION OF NORMAL AND EXTENDED BENEFITS

8. The authority citation for part 336 continues to read as follows:

Authority: 45 U.S.C. 362(l).

9. Section 336.13 is revised to read as follows:

§ 336.13 Years of service requirement.

(a) *Eligibility.* For the purposes of this part, an employee is not eligible for extended unemployment or sickness benefits if he or she does not have at least 10 years of railroad service. An employee who has 120 service months, as defined in part 210 of this chapter, whether or not consecutive, is considered to have 10 years of railroad service.

(b) *Initial determination.* The Board will determine whether an employee has 10 years of railroad service on the basis of reports filed by employers pursuant to part 209 of this chapter. The number of years of service shown in the Board's records will be accepted as correct for the purposes of this part, unless the employee claims credit for more service than that shown in the Board's records and such additional service is verified, subject to part 211 of this chapter.

(c) *Effective date.* An employee acquires ten years of railroad service as of the first day with respect to which creditable compensation is attributable in his 120th month of service.

10. In § 336.14, paragraphs (a), (c), and (d) are revised to read as follows:

§ 336.14 Extended benefit period.

(a) *Defined.* An extended benefit period consists of seven consecutive 14-day registration periods.

* * * * *

(c) *Ending date.* An employee's extended benefit period ends on the 97th day after it began. If an employee attains age 65 during an extended sickness benefit period, such extended benefit period will terminate on the day next preceding the date on which the employee attains age 65, except that it may continue for the purpose of paying benefits for his or her days of unemployment, if any, during such extended period. If an extended sickness benefit period terminates because the employee has attained age 65, and if at that point the employee has rights to normal sickness benefits, the employee will be paid normal sickness benefits if he or she is otherwise entitled to payment thereof.

(d) *Maximum number of compensable days.* Extended benefits may be paid for a maximum of 65 days of

unemployment (or 65 days of sickness, as the case may be) within an employee's extended benefit period.

Dated: March 24, 2000.

By Authority of the Board.

Beatrice Ezerski,

Secretary to the Board.

BILLING CODE 7905–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 876

[Docket No. 92N–0445]

Gastroenterology-Urology Devices; Effective Date of Requirement for Premarket Approval of the Penile Inflatable Implant

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule to require the filing of a premarket approval application (PMA) or a notice of completion of a product development protocol (PDP) for the penile inflatable implant, a generic type of medical device intended for the treatment of erectile dysfunction. This regulation reflects FDA's exercise of its discretion to require PMA's or PDP's for preamendments devices and is consistent with FDA's stated priorities and Congress' requirement that class III devices are to be regulated by FDA's premarket review. This action is being taken under the Federal Food, Drug, and Cosmetic Act (the act), as amended by the Medical Device Amendments of 1976 (the amendments), the Safe Medical Devices Act of 1990, and the Food and Drug Administration Modernization Act of 1997.

DATES: This rule is effective April 12, 2000.

FOR FURTHER INFORMATION CONTACT: John H. Baxley, Center for Devices and Radiological Health (HFZ–470), Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20850, 301–594–2194.

SUPPLEMENTARY INFORMATION:

I. Introduction

In the **Federal Register** of November 23, 1983 (48 FR 53023), FDA published a final rule classifying into class III (premarket approval) the penile inflatable implant, a medical device. Section 876.3350 (21 CFR 876.3350) of FDA's regulations setting forth the classification of the penile inflatable implant applies to: (1) Any penile inflatable implant that was in commercial distribution before May 28, 1976, and (2) any device that FDA has found to be substantially equivalent to a penile inflatable implant in commercial distribution before May 28, 1976.

In the **Federal Register** of April 28, 1993 (58 FR 25902), FDA published a proposed rule, under section 515(b) of the act (21 U.S.C. 360e(b)), to require the filing of PMA's or PDP's for the classified penile inflatable implant and all substantially equivalent devices (hereinafter referred to as the April 1993 proposed rule). In accordance with section 515(b)(2)(A) of the act, FDA included in the preamble, the agency's proposed findings regarding: (1) The degree of risk of illness or injury designed to be eliminated or reduced by requiring the device to meet the premarket approval requirements of the act, and (2) the benefits to the public from use of the device.

The preamble also provided an opportunity for interested persons to submit comments on the proposed rule and the agency's proposed findings. Under section 515(b)(2)(B) of the act, it also provided an opportunity for interested persons to request a change in the classification of the device based on new information relevant to its classification. Any petition requesting a change in the classification of the penile inflatable implant was required to be submitted by May 13, 1993. The comment period initially closed on June 28, 1993. In the **Federal Register** of July 1, 1993 (58 FR 35416), FDA extended the comment period for 60 days to August 27, 1993, to ensure that there was adequate time for preparation and submission of comments on the proposed rule.

The agency received 32 comments in response to the April 1993 proposed rule. These comments were from physicians and other health care providers, professional organizations, physician groups, manufacturers, and consumers and other individuals. Most of the comments supported the proposed rule.

This regulation is final upon publication and requires PMA's or notices of completion of a PDP for all penile inflatable implants classified under § 876.3350 and all devices that are substantially equivalent to them. PMA's or notices of completion of a PDP for these devices must be filed with FDA within 90 days of the effective date of this regulation. (See section 501(f)(1)(A) of the act (21 U.S.C. 351(f)(1)(A)).) This regulation does not include the penile rigidity implant (21 CFR 876.3630).

II. Summary and Analysis of Comments and FDA's Response

A. General Comments

(Comment 1) FDA received 23 comments from individual physicians and 2 comments from professional medical organizations. Although the majority of these comments did not object to the proposed call for PMA's or PDP's, they voiced the following common concerns: (1) Erectile dysfunction is a serious medical problem affecting tens of millions of American men and their partners, (2) removal of this device from the U.S. market would be detrimental to public health, and (3) citing the 25 years of use of the device, sufficient historical data exist to evaluate the safety and effectiveness of the penile inflatable implant. This last concern was also noted in two comments from penile inflatable implant manufacturers, which stated that the decades of medical literature regarding the risks and benefits of this device provide sufficient evidence of its safety and effectiveness. Several comments remarked that FDA has overstated the risks of the inflatable penile implant.

FDA agrees that erectile dysfunction is a significant medical problem that negatively affects the lives of more than 10 million men in the United States. Furthermore, since penile inflatable implants represent an important option in the treatment of erectile dysfunction, FDA agrees with these comments that removal of the penile inflatable implant from the market would negatively impact public health. As a result of this concern, FDA has taken the following steps to promote the continued availability of the penile inflatable implant during the call for PMA's or PDP's: (1) FDA issued the guidance document entitled "Draft Guidance for Preparation of PMA Applications for Penile Inflatable Implants" in March 1993 (the 1993 guidance document) to provide industry with detailed recommendations on the content of PMA's; (2) FDA has communicated closely with each penile inflatable implant manufacturer to address the concerns identified in the proposed rule using least burdensome methods, as well as provided recommendations on the design of preclinical and clinical studies; and (3) FDA intentionally postponed the call for PMA's or PDP's to allow manufacturers to collect

sufficient data to support the filing of a PMA or PDP.

FDA agrees with the comments that there is a significant amount of information in the published and unpublished literature regarding the penile inflatable implant. However, to FDA's knowledge, these studies are neither sufficiently detailed nor properly designed to perform a statistically valid evaluation of the safety and effectiveness of any of the specific device models currently on the market. As recommended in the 1993 guidance document, PMA's or PDP's should contain safety and effectiveness information on the specific device model(s) proposed in the application. Although a large body of historical data exists regarding the clinical outcomes of models of penile inflatable implants that are no longer marketed, there is less information available regarding the safety and effectiveness of currently-marketed models. However, if sufficient historical information exists to document the safety and effectiveness of a particular penile inflatable implant model that a manufacturer desires to market, or if data about earlier models are directly relevant to a particular device, FDA encourages the use of these data in support of a PMA or PDP for that model.

While FDA agrees that the April 1993 proposed rule may have overstated the risks of some of the specific penile inflatable implant models that are currently on the market, we believe that the information in the proposed rule represents a reasonable estimate of the risks and benefits of the entire category of penile inflatable implants. As noted in many of these comments, manufacturers have made numerous design modifications to improve the reliability of the penile inflatable implant and the medical community continues to improve the patient selection criteria, patient counseling information, operative technique, and postoperative care to reduce the incidence of complications. Therefore, FDA expects the rates of complications reported in PMA's or PDP's for particular penile inflatable implants to be lower than estimated from a review of the literature on the entire device category. However, in writing the proposed call for PMA's or PDP's, FDA must consider the risks and benefits of all penile inflatable implants that currently have legally marketed status in the United States.

(Comment 2) FDA received one comment from a penile inflatable implant recipient, who is supportive of the proposed call for PMA's or PDP's. This consumer has received a total of four devices to date, and his most recent device has failed, requiring replacement. He states that the penile inflatable implant affects both his quality of life and manhood.

FDA agrees that the potential benefits of a penile inflatable implant include improvements in quality of life and self-image, and notes that these secondary benefits of penile inflatable implant implantation were cited in the proposed call for PMA's or PDP's. Furthermore, FDA believes that requiring the submission of PMA's or PDP's for the penile inflatable implant will allow FDA to assess the risks and benefits of specific devices in order to determine whether there is reasonable assurance of their safety and effectiveness.

(Comment 3) One comment stated that FDA's assessment of the risks of penile inflatable implants is inconsistent with FDA's assessment of the risks of class II silicone prostheses such as the bone cap (21 CFR 888.3000), chin prosthesis (21 CFR 878.3550), the ear prosthesis (21 CFR 878.3590), and the finger joint prosthesis (21 CFR 888.3230).

FDA is aware of the existence of information on silicone and silicone-containing prostheses, and expects that applicants may include such information in their submissions to support the safety and effectiveness of the penile inflatable implant. However, FDA does not believe that the existing information on silicone and silicone-containing prostheses can be used as the sole basis of establishing the safety and effectiveness of the penile inflatable implant, and believes that a determination of safety and effectiveness of the penile inflatable implant must be made, at least in part, on data collected on each particular device for which a PMA or PDP is submitted. FDA will consider all information contained in PMA's and PDP's in determining whether there is reasonable assurance of safety and effectiveness of this device.

(Comment 4) Many comments noted that FDA was incorrect in stating that some penile inflatable implant models contain silicone gel. These comments concluded, therefore, that the risks of silicone gel do not apply to the penile inflatable implant.

FDA disagrees with the comments that no penile inflatable implant contains silicone gel. Although silicone gel has never been used as a penile inflatable implant inflation medium, FDA is aware of at least one device model, no longer marketed in the United States, that contained silicone gel within its cylinder tip. FDA agrees with the comments that the potential risks of silicone gel are not applicable to penile inflatable implants that do not contain silicone gel.

The agency would not expect PMA's or PDP's for those devices to address the risks related to silicone gel.

(Comment 5) One comment objected that Congress never intended "old" preamendments medical devices to undergo the same scrutiny as "new" postamendments medical devices.

FDA does not believe that Congress intended to differentiate between "old" preamendments devices and "new" postamendments device with respect to the requirement that valid scientific evidence is needed to support PMA approval. Neither section 513(a)(3) (21 U.S.C. 360c(a)(3)) nor section 515(d) of the act makes any distinction between "old" and "new" devices with regard to any aspect of the requirement for PMA approval.

(Comment 6) One comment stated that FDA should allow an appropriate timeframe prior to issuance of the call for PMA's or PDP's for the following reasons: (1) FDA needs sufficient time to develop additional guidance on the data requirements for PMA's and PDP's; (2) since several of the main suppliers of silicone and polyurethane raw materials have announced a planned withdrawal of these products from the market, penile inflatable implant manufacturers need sufficient time to qualify and test new materials; and (3) device manufacturers need sufficient time to collect the preclinical and clinical data recommended by FDA.

FDA believes there has been sufficient time for PMA and PDP sponsors to develop data and address the issues identified as potential risks. Section 515(b) of the act does not require the agency to provide guidance on the contents of specific PMA's. However, FDA issued the 1993 guidance document to provide industry with detailed recommendations on the appropriate data to be included in PMA's and PDP's for penile inflatable implants. The 1993 guidance document is available from the Internet at www.fda.gov/cdrh/ode/oderp810.html. In order to receive the 1993 guidance document via your fax machine, call the CDRH Facts-On-Demand (FOD) system at 800–899–0381 or 301–827–0111 from a touch-tone telephone. Press 1 to enter the system and then enter the document number (810) followed by the pound sign (#). Follow the remaining voice prompts to complete your request. While the 1993 guidance document continues to remain in effect, FDA plans to revise this document in the near future to incorporate many of the comments subsequently received from

the industry and public. Furthermore, the agency encourages penile inflatable implant manufacturers to meet with FDA before submitting a PMA or PDP to obtain additional guidance regarding the recommended data to submit to demonstrate the safety and effectiveness of each specific device model proposed for market approval.

In addition, the period of time between the classification of the device in 1983 and the date by which PMA's must be filed is more than 16 years. Thus, FDA believes that sufficient time and guidance have been provided to allow sponsors to develop the data for a PMA submission.

FDA agrees that dialogue with industry and with the scientific community and medical community is important. To elicit early public discussion on the 1993 guidance document and the agency's plans to call for PMA's or PDP's for the penile inflatable implant, FDA called a meeting of the Gastroenterology and Urology Devices Advisory Panel on April 15, 1993, to discuss these topics. Following publication of the proposed call for PMA's or PDP's, FDA communicated closely with each penile inflatable implant manufacturer to address the concerns identified by FDA in the April 1993 proposed rule, as well as provide recommendations on the design of preclinical and clinical studies for their particular device models. Furthermore, FDA staff have been and continue to be accessible to discuss PMA and PDP content information with industry and the scientific and medical community.

(Comment 7) One comment stated that FDA was incorrect in its determination that the penile inflatable implant has a high priority for initiating a proceeding to require premarket approval due to inappropriate comparison to potential adverse effects of silicone gel breast implants and due to the volume of Medical Device Reports (MDR's) received to date for penile inflatable implants. The comment further noted that an early call for PMA's or PDP's is unwarranted since the penile inflatable implant was not included in the January 6, 1989 (54 FR 550), list of 31 "high priority" preamendments class III devices.

FDA believes the call for PMA's or PDP's for this device cannot be considered an "early" call in light of its classification in 1983 and the proposed call for PMA's in 1993.

By adding section 515(i) to the act in the Safe Medical Devices Act of 1990 (Public Law 101–629), Congress made it clear that it expected FDA to move forward expeditiously to either require premarket approval or notices of completion of PDP for all preamendments class III devices or to reclassify them into class I or class II. Therefore, FDA believes that it is appropriate to issue this final rule at this time.

B. Infection

(Comment 8) There were 19 comments on the risk of infection. Several comments stated that the incidence of infection associated with the implantation of penile inflatable implants is not any higher than it is for other implantation surgeries. Many of these comments further stated that the risk of infection is minimized by proper patient selection, meticulous attention to sterile technique during device implantation, and adherence to appropriate postoperative precautions. Several comments stated that infection, if it occurs, often can be successfully controlled without the need for device removal if it is recognized early and treated with appropriate aggressive antibiotic therapy with or without drainage and wound irrigation. One comment added that infections of penile inflatable implants only rarely result in an inability to replace the device due to corporeal fibrosis and cavernositis.

FDA agrees that the risk of infection can be minimized by proper patient selection, surgical precautions, and postoperative care. However, FDA believes that it is important for studies submitted in a PMA or PDP to provide accurate information on the incidence and consequences of infection associated with the implantation of the penile inflatable implant. As noted in the 1993 guidance document, FDA is requesting information on the incidence of infection for this device.

C. Migration and Extrusion

(Comment 9) There were 13 comments regarding the risks of migration and extrusion. These comments stated that migration and extrusion of penile inflatable implants occur infrequently, are directly related to infection or excessive pressure of the prosthesis on surrounding tissues, and are minimized by properly placing an appropriately sized device using appropriate surgical techniques. For these reasons, several comments stated that migration and extrusion should not be labeled as "significant risks" of implantation of the device.

While FDA agrees that migration and extrusion can be minimized by proper device sizing and placement, insufficient information is available to determine the frequency of this event or its effects. Therefore, FDA believes that it is important for studies submitted in a PMA or PDP to provide accurate information on the incidences of migration and extrusion associated with the implantation of the penile inflatable implant.

FDA disagrees with the comment that migration and extrusion are not significant risks. Migration and extrusion of the penile inflatable implant can lead to surgical intervention, making them serious risks to health. As noted in the 1993 guidance document, FDA is requesting information to address the incidences of migration and extrusion for this device.

D. Erosion

(Comment 10) There were 13 comments regarding the risk of erosion. These comments stated that, similar to migration and extrusion, erosion of penile inflatable implants occurs infrequently, is directly related to infection or excessive pressure of the prosthesis on surrounding tissues, and is minimized by properly placing an appropriately sized device using appropriate surgical techniques. For these reasons, several comments stated that erosion should not be labeled as a "significant risk" of implantation of the device.

While FDA agrees that the risk of erosion can be minimized by proper device sizing and placement, insufficient information is available to determine the frequency of this event or its consequences. Therefore, FDA believes that it is important for studies submitted in a PMA or PDP to provide accurate information on the incidence of erosion associated with the implantation of the penile inflatable implant.

FDA disagrees with the comment that erosion is not a significant risk. Erosion of the penile inflatable implant can require surgical intervention, making it a serious risk to health. As noted in the 1993 guidance document, FDA is requesting information to address the incidence of erosion for this device.

E. Fibrous Capsule Formation

(Comment 11) FDA received 15 comments regarding the risk of fibrous capsule formation. Most of these comments stated that fibrous capsule formation is part of the body's normal reaction to an implanted device, and is not harmful to the patient. One comment stated that fibrous capsule formation does not adversely affect the function of the penile inflatable implant, while several others acknowledged that the fibrotic capsule can keep the reservoir or other device components from completely filling, thus hindering the ability of the device

to fully inflate or deflate. Many of the comments regarding the effect of fibrous capsule formation upon inflation and deflation of the penile inflatable implant further stated that this risk can be minimized by leaving the device deflated during the healing period so that the capsule formed around the reservoir minimally impedes refilling. One comment further stated that FDA was wrong to refer to fibrous capsule formation as a "foreign body reaction," since fibrotic reactions are not only related to the material of the implant but also to other factors such as loading forces on the implant and the patient's biological tendency to form a scar. Two comments stated that fibrous capsule formation is only problematic with static prostheses, such as breast implants, and, therefore, is not a concern with penile inflatable implants.

FDA agrees that fibrous capsule formation is part of the body's normal reaction to all implanted devices including penile inflatable implants, and is usually not life-threatening. Also, FDA recognizes that the severity of this risk to health is dependent upon multiple factors other than foreign body reaction. Furthermore, FDA agrees that the risk of inflation/deflation difficulties secondary to fibrous capsule formation around the reservoir can be minimized by proper postoperative care. However, FDA believes that fibrous capsule formation can affect the function of the penile inflatable implant and is potentially serious. Severe fibrous capsule formation has been reported to impede the ability of the penile inflatable implant to operate as it is designed, which reduces or eliminates the benefit of the device. In addition, the recipient may then elect to have his implant surgically explanted and have a second device implanted. This additional surgery makes fibrous capsule formation a potentially serious adverse event. As noted in the 1993 guidance document, FDA is requesting information to address the incidence of fibrous capsule formation for this device.

F. Mechanical Malfunctions

(Comment 12) There were 14 comments regarding the risk of mechanical malfunction. All of these comments stated that while early models of penile inflatable implants were associated with high rates of mechanical malfunction, improvements in device design and implantation technique have steadily decreased the failure rate. Several of these comments added that the mechanical malfunction rate of current device designs ranges from "rare" to 1 to 3 percent. One comment added that FDA's statement that a penile inflatable implant "should not be considered a lifetime implant" is inaccurate, since prostheses may be expected to endure indefinitely with the proviso that there is a risk of mechanical failure.

FDA agrees that the mechanical malfunction rate of the penile inflatable implant has significantly decreased as compared to early models. Despite this observed trend, however, insufficient information is available to determine the frequency of this event for each of the particular device models that manufacturers intend to market following the effective date of this regulation. Therefore, FDA believes that it is important for studies submitted in a PMA or PDP to provide accurate information on the incidence of mechanical malfunction associated with the implantation of the penile inflatable implant.

FDA disagrees with the comment that the penile inflatable implant can be considered a lifetime implant. As complex mechanical devices, penile inflatable implants are subject to wear over time and, therefore, have finite lifetimes. The fact that each device carries the risk of mechanical failure, as acknowledged in the comment, underscores the need to inform patients that the device should not be expected to function indefinitely.

G. Iatrogenic Disorders

(Comment 13) FDA received 11 comments regarding the risk of iatrogenic disorders. These comments stated that iatrogenic disorders occur infrequently, are minimized with proper operative technique and surgeon experience, are not directly related to the device, and are medical issues outside the domains of clinical testing and premarket review.

FDA agrees that iatrogenic disorders are infrequent events which are reduced through adherence to proper surgical technique. FDA also agrees that the medical community has had a major role in defining these surgical practices in an effort to minimize the incidence of iatrogenic disorders. However, FDA believes that iatrogenic disorders are, in part, device related, since issues of sizing, device assembly, and implantation technique are influenced by the specific device design being implanted. As a result, FDA believes that iatrogenic disorders should be evaluated in the clinical testing and premarket review of penile inflatable implants so that the product-specific information obtained from such testing is appropriately incorporated into the labeling of that device model. As noted in the 1993 guidance document, FDA is requesting information to address the incidence of iatrogenic disorders for this device.

H. Patient Dissatisfaction

(Comment 14) There were 14 comments regarding the risk of patient dissatisfaction. These comments stated that patient dissatisfaction is infrequent and is only rarely the primary cause for reoperation. Additionally, many comments stated that patient dissatisfaction is the result of the patient having unrealistic expectations regarding the postimplantation appearance and function of his penis, and that this situation can be minimized by requiring thorough preoperative counseling regarding the realistic outcomes of device implantation. One physician comment stated that none of his patients had ever asked him to have a penile inflatable implant removed due to dissatisfaction.

FDA agrees that the majority of patients who receive penile inflatable implants report satisfaction with their device. Additionally, FDA concurs with the comments that patient dissatisfaction is typically the result of the patient having unrealistic expectations regarding the implant, and can be minimized by patient educational measures such as patient labeling and physician counseling. However, since patient dissatisfaction can ultimately require surgical intervention, FDA considers patient dissatisfaction a risk that should be addressed by manufacturers. Furthermore, since implantation of a penile inflatable implant may destroy any latent erectile capability the patient may have had, as well as make other, more conservative forms of treatment for erectile dysfunction difficult or impossible, dissatisfied patients are left with few recourses. To assess and optimize the adequacy of information materials available to potential implant recipients, FDA believes it is essential to evaluate the frequency of this event and its consequences. Therefore, FDA believes it is important for studies submitted in a PMA or PDP to provide accurate information on the incidence of patient dissatisfaction associated with the implantation of the penile inflatable implant.

I. Human Carcinogenicity

(Comment 15) Sixteen comments were received regarding the risk of human carcinogenicity. These comments stated that there is no evidence in the medical literature that the penile inflatable implant is associated with the development of

cancer. Furthermore, nine of these comments were from physicians, who stated that they had not observed carcinogenicity in their personal experiences with these devices. One physician comment added that while carcinogenicity has not been proven to occur with the penile inflatable implant, further research is necessary to rule out this potential complication. Several comments stated that silicone causes solid state tumors in rodents, a phenomenon thought to be restricted to rodents and not applicable to humans. These comments also stated that epidemiological studies have not found that women with silicone breast implants, which contain silicone elastomers similar or identical to those used in the penile inflatable implant, are at an increased risk for cancer. Several comments stated that human carcinogenicity should be removed from the list of significant risks associated with the penile inflatable implant.

FDA believes that the potential carcinogenicity for this device remains unknown. The agency continues to believe that carcinogenicity is a potential risk that must be assessed in a PMA or PDP.

J. Human Reproductive and Teratogenic Effects

(Comment 16) There were 16 comments related to human reproductive and teratogenic effects. These comments stated that there is no evidence that the penile inflatable implant is teratogenic. Nine comments from physicians stated that they had not observed reproductive and teratogenic effects in their personal experiences with these devices, one of whom added that further research is necessary to rule out this potential complication. Two comments stated that since most implant patients are beyond the age of fathering children, the risks of reproductive problems and teratogenic effects are not significant concerns. Furthermore, the small numbers of patients who do receive a device during their reproductive ages would not warrant a prospective study. Several comments stated that human reproductive and teratogenic effects should be removed from the list of significant risks associated with the penile inflatable implant.

FDA agrees that there are no published studies showing that penile inflatable implants are associated with toxic reproductive effects or teratogenic effects. However, FDA believes that the reproductive and/or teratogenic effects of these products remain potential risks that should be assessed in a PMA or PDP.

K. Immune Related Connective Tissue Disorders—Immunological Sensitization

(Comment 17) There were 16 comments regarding the risks of immune related connective tissue disorders and immunological sensitization. These comments stated that there is no evidence that the penile inflatable implant causes either immune related connective tissue disorders or immunological sensitization. Nine comments from physicians stated that they had not observed connective tissue disorders and other immunological effects in their personal experiences with these devices. Two comments stated that further research is necessary to rule out this potential complication. Several comments stated that no definitive link between silicone and autoimmune diseases has been established. Furthermore, several comments stated that since the diseases most frequently associated with autoimmune responses occur at a lower frequency in men than women, it may be impossible to extrapolate the findings from any study of silicone breast implants to the penile inflatable implant. Several comments stated that immune related connective tissue disorders and immunological sensitization should be removed from the list of significant risks associated with the penile inflatable implant.

FDA agrees that no definitive causal relationship has been established between immunological effects and/or connective tissue disorders and the penile inflatable implant. Epidemiological data published within the last several years (Refs. 3, 4, and 5) addressing the relationship between silicone breast prostheses and autoimmune diseases or connective tissue diseases indicate that silicone breast prostheses have not caused a large increase in the incidence of connective tissue disease in women with breast implants. However, the possibility of a smaller, increased risk of immunological effects among men with penile inflatable implants, or of an atypical, as yet undefined, syndrome or disease, cannot be eliminated based on these data. FDA is aware that differences in the incidence of such disorders between men and women make extrapolation of the results of breast implant studies to the outcome of the penile inflatable implant difficult. In the 1993 guidance document, FDA recommends that a cohort of penile inflatable implant recipients be regularly monitored for the occurrence of such adverse events as part of an active surveillance program for a minimum of 5 years postimplantation. FDA continues to believe that adverse immune related connective tissue disorders and immunological sensitization remain potential risks that must be assessed in a PMA or PDP, but FDA does not believe that 5 years of prospective data collection on a specific product will be necessary before PMA approval or PDP completion.

L. Biological Effects of Silica

(Comment 18) Five comments stated that fumed amorphous silica is so tightly bound in the silicone elastomer components of the penile inflatable implant that the fumed amorphous silica is biologically inactive. For that reason, these comments believed that the presence of fumed amorphous silica is not a risk to health of the penile inflatable implant. Two other comments stated that complications related to the release of silica from the penile inflatable implant have not been observed, although one of these comments added that further research is necessary to rule out this potential complication.

FDA does not believe there is sufficient information to eliminate fumed amorphous silica as a potential risk to health associated with the penile inflatable implant, particularly since the amount of fumed amorphous silica is varied in order to achieve the desired physical characteristics of the device's components. Consequently, the agency believes that this potential risk to health should be addressed in a PMA or PDP.

M. Silicone Particle Shedding, Silicone Gel Leakage, and Associated Migration

(Comment 19) There were seven comments regarding the risk of silicone particle shedding. Four of these comments stated that small, but clinically insignificant, quantities of silicone particles have been noted in the periprosthetic tissues and inguinal lymph nodes of some penile inflatable implant recipients. Two comments stated that there is no evidence of silicone particle shedding from the penile inflatable implant. One comment stated that minimal, if any, silicone particle shedding occurs with this device. Several of these comments concluded that silicone particle shedding is not a risk of the penile inflatable implant.

Based upon information presented in the comments, FDA agrees that silicone particle shedding is not a risk to health of the penile inflatable implant. Although silicone particle shedding and subsequent migration have been reported with penile inflatable implants (Ref. 1), the quantity of such particles was minimal and no deleterious effects

were associated with this finding. Furthermore, subsequent research published after the proposed call for PMA's and PDP's was unable to document evidence of silicone particle migration (Ref. 2). FDA, therefore, does not believe silicone particle shedding is a risk that needs to be addressed in PMA's or PDP's for these devices.

(Comment 20) Several comments stated that silicone gel leakage and migration are not risks to health of this device since there are no penile inflatable implants that contain silicone gel.

FDA disagrees with the comments that no penile inflatable implant contains silicone gel. As stated in response to comment 4 of this document, FDA is aware of at least one device model, no longer marketed in the United States, that contained silicone gel within its cylinder tip. FDA agrees with the comments that the potential risks of silicone gel leakage and migration are not applicable to penile inflatable implants that do not contain silicone gel.

N. Degradation of Polyurethane Elastomer

(Comment 21) There were three comments regarding the risk of polyurethane elastomer degradation. These comments stated that: (1) Currently marketed penile inflatable implants do not use polyurethane as a surface material, (2) in vitro testing regarding the degradation of polyurethane may not be predictive of degradation in vivo, and (3) there is no evidence in the literature of the release of either methylene diamine or toluene diamine in vivo from polyurethane.

FDA is aware of at least two penile inflatable implant models that have polyurethane elastomer as one of their surface materials; therefore, the agency does not agree with the comment that this material is not used. Furthermore, since the available information regarding the degradation of polyurethane elastomer is inconclusive, FDA does not believe there is sufficient information to eliminate it as a potential risk to health associated with the penile inflatable implant. Consequently, the agency believes that this potential risk to health should be addressed in a PMA or PDP. FDA believes that this potential risk is only applicable to penile inflatable implants that employ polyurethane elastomer as a surface, patient-contacting material.

O. Other Reported Complications

(Comment 22) Several comments were received regarding the "other reported complications" of the penile inflatable implant (i.e., hematoma, chronic pain, erythema, edema, ulceration, necrosis, scarring, and urinary retention). These comments stated that these complications either occur infrequently, are transient, or are not judged by patients or physicians to be severe.

FDA believes that insufficient information is available to determine the frequency of these events or their consequences. Therefore, FDA believes that it is important for studies submitted in a PMA or PDP to provide accurate information on the incidence of all complications associated with the implantation of the penile inflatable implant.

P. Benefits of the Device

(Comment 23) Many comments were received regarding FDA's description of the benefit of the penile inflatable implant. Several comments objected to FDA's statement that "device implantation is a discretionary surgical procedure performed for reasons related to quality of life, rather than medical reasons." One comment stated that the benefits of the penile inflatable implant include penile reconstruction, in addition to quality of life improvement. This comment added that while many patients benefit with an improved quality of life, medical necessity and need are important indications for the use of penile inflatable implants. Another comment noted that the penile inflatable implant is, in fact, used to correct a medical problem—erectile dysfunction. A third comment argued that restoration of erectile function is analogous to surgical procedures to restore vision or hearing, or to salvage a limb, all of which could potentially be regarded as discretionary surgical procedures to improve quality of life.

Lastly, several comments stated that the benefits of the penile inflatable implant include improvement of quality of life, and the psychological benefits of the device should not be underestimated or undervalued. Furthermore, a comment from a penile inflatable implant recipient stated that the device impacts his "quality of life and manhood."

As stated in the proposed call for PMA's or PDP's, FDA believes that the penile inflatable implant is designed to provide sufficient penile rigidity to permit sexual intercourse. The proposed rule further states that this device is intended for the treatment of erectile dysfunction resulting from many medical conditions, such as diabetes mellitus, spinal cord injury, Peyronie's disease, and pelvic surgery. FDA continues to believe that device implantation is usually elective in nature, and the agency agrees with the comments that the primary benefit of the penile inflatable implant is restoration of erectile function. As noted by these comments, however, many implant recipients also benefit with an improved quality of life and FDA does not intend to underestimate or undervalue this benefit.

(Comment 24) Three comments objected to FDA's reference to improved fertility as being an intended benefit of the penile inflatable implant. One comment agreed with the April 1993 proposed rule, noting that a benefit of the device is the restoration of the ability for young men with erectile dysfunction to father children naturally.

FDA agrees that restoration of male fertility should not be listed as a benefit of the penile inflatable implant. Although this device may have provided an opportunity for a small number of patients to father children naturally, the agency acknowledges that this consequence of the device should not be listed as a benefit of the penile inflatable implant for the following reasons: (1) The primary reason for device implantation is the treatment of erectile dysfunction; (2) no penile inflatable implant manufacturer promotes their device with the claim of restoration of fertility; and (3) the majority of penile inflatable implant candidates are beyond the age of which they desire to father children. The agency's response to these comments is consistent with the recommendations provided at an April 15, 1993, meeting of the Gastroenterology and Urology Devices Advisory Panel.

Q. Need for Risk/Benefit Information

(Comment 25) Two comments objected to FDA's proposal that PMA's and PDP's analyze the prior treatment history and presurgical workup of penile inflatable implant recipients. They stated that it is physicians, in consultation with patients, who should decide the choice of treatment for erectile dysfunction, and that devices should not be treated any differently in this respect than pharmaceuticals where a physician has many different drugs available to treat a disorder and chooses the appropriate one based on the patient's needs.

FDA agrees that it should not interfere with the practice of medicine. However, the agency believes that manufacturers have a responsibility to report the circumstances of use of their device in the product's labeling, especially due to the potential for irreversible effects following implantation of a penile inflatable implant. Consequently, FDA believes that information regarding the

prior treatment history and presurgical workup of penile inflatable implant recipients should be reported in a PMA or PDP to ensure that labeling for the product will provide reasonable assurance of safe and effective use.

(Comment 26) Three comments stated that quality of life and psychological evaluations are not useful to judge the effectiveness of the penile inflatable implant since the primary goal of device implantation is restoration of erectile function. Two of these comments added that: (1) Manufacturers do not make claims regarding psychological benefit, (2) it is inappropriate for FDA to require a manufacturer to demonstrate this benefit, (3) there are no accepted tests for measuring the psychological impact of the penile inflatable implant, and (4) existing tests for psychological well-being and self-esteem are confounded by multiple life variables, including the patient's and partner's general health, sexual functioning, and understanding of the potential complications when making the decision to have a penile inflatable implant. One comment stated that assessment of psychological benefit would likely require large clinical studies.

FDA agrees that the primary benefit derived from implantation of a penile inflatable implant is restoration of erectile function. However, FDA continues to believe that the potential quality of life and psychological benefits offered by the device are important, albeit secondary, components of the device's effectiveness. Although FDA agrees that designing studies to assess the psychological benefit of implantation with a penile inflatable implant may be difficult, FDA believes the psychological impact of the device can and should be assessed in a PMA or PDP as a secondary effectiveness measure. The agency will accept a variety of types of scientific evidence in support of a PMA or PDP, as long as the data constitute valid scientific evidence within the meaning of 21 CFR 860.7(c)(2) (e.g., a validated quality of life patient questionnaire can provide data to address this issue).

R. PMA Contents

(Comment 27) FDA received two extensive comments on the types of manufacturing information, preclinical testing, and clinical data that should be required in a PMA for a penile inflatable implant, as well as several general comments on the appropriate contents of a PMA. Additionally, FDA received one comment proposing detailed modifications to the quality of life, satisfaction, and psychological evaluation recommendations stated in the proposed call for PMA's and PDP's.

FDA agrees with many of the points raised in these comments. Although the 1993 guidance document describes the general types of manufacturing, preclinical, and clinical data that FDA believes can support approval of a PMA for a penile inflatable implant, the agency realizes that other, scientifically sound methods exist for addressing the identified risks and benefits of the device and encourages manufacturers to document the safety and effectiveness of their device using the least burdensome approaches. In fact, FDA has agreed to the use of many of these alternative approaches for the collection and analysis of data in its past interactions with penile inflatable implant manufacturers. Furthermore, FDA intends to revise the 1993 guidance document to incorporate many of these comments.

III. Findings With Respect to Risks and Benefits

A. Degree of Risk

1. Infection

Infection is a risk associated with any surgical implant procedure, including the penile inflatable implant. Compromised device sterility and surgical techniques may be a major contributing factor to this risk. Infection may result in the removal of the implant and may result in an inability to replace the device due to corporeal fibrosis and scarring.

2. Migration and Extrusion

Migration refers to the movement of the components of the penile inflatable implant within the body. In some cases, a portion of the implant migrates externally ("extrusion"). The cylinders and pump can migrate either proximally or distally, leading to inadequate support of the glans penis, difficulty in manipulating the pump, or pressure necrosis with subsequent erosion. Extrusion is usually associated with wound dehiscence at the site of incision, but can also occur secondary to erosion. Factors contributing to migration and extrusion include implantation of a device that is too large, iatrogenic injury to the surrounding tissues, and infection. Migration and extrusion of the penile inflatable implant can lead to surgical intervention.

3. Erosion

Erosion is the breakdown of tissue adjacent to the device. The cylinders can erode through the distal urethra, the pump can erode through the scrotal wall, and, rarely, the reservoir can erode through the bladder or bowel. Factors contributing to erosion include implantation of a device that is too large, iatrogenic injury to the surrounding tissues, and infection. Erosion may lead to device extrusion, and can require surgical intervention.

4. Fibrous Capsular Formation

The formation of a fibrous capsule around the components of the penile inflatable implant is a risk associated with this device. Fibrous capsule formation around the reservoir and/or pump may either cause spontaneous inflation of the cylinders or prevent the cylinders from completely deflating. Significant fibrous capsular formation may be corrected by device manipulation, corrective surgery, or surgical removal of the device and adjacent tissues. The effects of fibrous capsule formation vary from reduced satisfaction with the implant to explantation.

5. Mechanical Malfunctions

As with other prosthetic devices intended to restore a physiologic function, penile inflatable implants may mechanically malfunction. Reported types of mechanical malfunctions include leakage, cylinder rupture, cylinder aneurysm, spontaneous inflation/deflation, tubing kinks, and pump valve failure. Mechanical malfunctions may be caused by improper device handling or improper surgical technique, or problems with the device's design or manufacturing process. Surgical intervention to remove or replace the device is required if the patient desires a functional prosthesis.

6. Iatrogenic Disorders

Improper device handling, inadequate or vigorous dilatation, aggressive dissection, malpositioning of the device, cylinder suturing, and cylinder missizing are among the preventable complications caused as a result of surgical technique. Iatrogenic disorders may be responsible for various adverse conditions necessitating device removal and/or replacement.

7. Patient Dissatisfaction

If patients are not provided information and counseling regarding the risks and benefits of the penile inflatable implant prior to implantation, they may not have realistic expectations of the physical, psychological, and functional outcomes of the device. Uninformed patients may be dissatisfied with the device due to complications such as unresolved pain, as well as disappointment in cosmetic appearance,

concealability, rigidity/firmness, and penile sensation. Some dissatisfied patients have elected to have the device surgically removed because the implant did not meet their expectations.

8. Human Carcinogenicity

The potential for developing cancer as a result of the long-term implantation of the penile inflatable implant cannot be eliminated as a potential risk associated with this device.

9. Human Reproductive and Teratogenic Effects

Although FDA is not aware of data indicating that the penile inflatable implant is associated with reproductive and teratogenic effects, the potential for teratogenicity and other reproductive adverse effects as a result of long-term implantation of the device cannot be eliminated as a possible risk to health.

10. Immune Related Connective Tissue Disorders—Immunological Sensitization

The potential for developing immunological effects and/or connective tissue disorders as a result of long-term exposure to the penile inflatable implant remains uncertain. Since the publication of the proposed rule 6 years ago, new epidemiological data (Refs. 3, 4, and 5) addressing the relationship between silicone breast prostheses and autoimmune diseases or connective tissue diseases indicate that silicone breast prostheses have not caused a large increase in the incidence of connective tissue disease in women with breast implants. However, the possibility of a smaller, increased risk of immunological effects among men with penile inflatable implants, or of an atypical, as yet undefined, syndrome or disease, cannot be eliminated based on these data.

11. Biological Effects of Silica

Amorphous fumed silica is bound to the silicone in the elastomer of the penile inflatable implant. Silica presents a potential risk which should be addressed in a PMA or PDP.

12. Silicone Gel Leakage and Associated Migration

Small quantities of silicone gel are present in at least one model of penile inflatable implant. Silicone gel leakage and associated migration are potential risks which should be addressed in a PMA or PDP for any device that contains this material.

13. Degradation of Polyurethane Elastomer

Polyurethane elastomer materials, which have been used as surface materials in some penile inflatable implants, may degrade over time and release degradation products which are potential carcinogens in animals. When present, polyurethane elastomer degradation is a potential risk that should be addressed in a PMA or PDP.

14. Other Reported Complications

Other reported complications associated with implantation of the penile inflatable implant include hematoma, chronic pain, erythema, edema, ulceration, necrosis, scarring, and urinary retention, which should be addressed in a PMA or PDP.

B. Benefits of the Device

The penile inflatable implant is intended to restore the ability to have an erection in men with erectile dysfunction. It has the potential to be an effective treatment for erectile dysfunction. Implant recipients may also benefit from an improved quality of life.

IV. Final Rule

Under section 515(b)(3) of the act, FDA is adopting the findings as published in the preamble to the April 1993 proposed rule and is issuing this final rule to require premarket approval of the generic type of device, the penile inflatable implant, by revising § 876.3350(c).

Under the final rule, a PMA or a notice of completion of a PDP is required to be filed on or before July 11, 2000, for any penile inflatable implant that was in commercial distribution before May 28, 1976, or that has been found by FDA to be substantially equivalent to such a device on or before July 11, 2000. An approved PMA or a declared completed PDP is required to be in effect for any such device on or before 180 days after FDA files the application.

Any other penile inflatable implant that was not in commercial distribution before May 28, 1976, or that has not been found by FDA to be substantially equivalent to such a device on or before July 11, 2000, is required to have an approved PMA or a declared completed PDP in effect before it may be marketed.

If a PMA or a notice of completion of a PDP for a penile inflatable implant is not filed on or before the 90th day past the effective date of this regulation, that device will be deemed adulterated under section 501(f)(1)(A) of the act (21 U.S.C. 351(f)(1)(A)), and commercial distribution of the device will be required to cease immediately. The device may, however, be distributed for investigational use, if the requirements of the investigational device exemption (IDE) regulations (part 812) (21 CFR part 812) are met.

Under § 812.2(d) of the IDE regulations, FDA hereby stipulates that, on the effective date of this rule, the exemptions from the IDE requirements in § 812.2(c)(1) and (c)(2) will no longer apply to clinical investigations of the penile inflatable implant. Further, FDA concludes that investigational penile inflatable implants are significant risk devices as defined in § 812.3(m) and advises that, as of the effective date of this rule, the requirements of the IDE regulations regarding significant risk devices will apply to any clinical investigation of a penile inflatable implant. For any penile inflatable implant that is not the subject of a timely filed PMA or PDP, an IDE must be in effect under § 812.20 on or before 90 days after the effective date of this regulation or distribution of the device must cease. FDA advises all persons presently sponsoring a clinical investigation involving the penile inflatable implant to submit an IDE application to FDA no later than 60 days after the effective date of this final rule to avoid the interruption of ongoing investigations.

V. Environmental Impact

The agency has determined under 21 CFR 25.30(h) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VI. Analysis of Impacts

FDA has examined the impacts of the final rule under Executive Order 12866 and the Regulatory Flexibility Act (5 U.S.C. 601–612) (as amended by subtitle D of the Small Business Regulatory Fairness Act of 1996 (Public Law 104–121)), and the Unfunded Mandates Reform Act of 1995 (Public Law 104–4). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). The agency believes that this final rule is consistent with the regulatory philosophy and principles identified in the Executive Order. The Office of Management and Budget (OMB) has determined that this final rule is a significant regulatory action subject to review under the Executive Order.

FDA expects that only two manufacturers will submit a PMA or PDP for the penile inflatable implant. FDA does not believe that two companies are a significant number of small entities. FDA estimates that it costs up to $1 million to develop and submit a PMA or PDP for this type of device. As noted previously, the penile inflatable implant was classified into class III on November 23, 1983, and FDA published a proposed rule to require a PMA or PDP for this device on April 28, 1993. Thus, manufacturers have long been aware of the need to develop information in support of a PMA or a PDP. The cost of developing the data, therefore, has been spread over the past several years. Moreover, since the publication of the proposed rule, FDA has been working closely with both manufacturers to assist them in preparing for the submission of a PMA or a PDP, and one has successfully completed a PDP for two device models. FDA estimates based on such information as is publicly available, that these two companies have annual revenues in excess of several hundred million dollars. FDA, therefore, believes that this final rule will not be an undue burden on these manufacturers. The agency therefore certifies that the final rule will not have a significant economic impact on a substantial number of small entities. Therefore, under the Regulatory Flexibility Act, no further analysis is required.

VII. Paperwork Reduction Act of 1995

This proposed rule contains information collection provisions that are subject to review by OMB under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3530). The burden hours required for § 876.3350(c) are reported and approved under OMB Control No. 0910–0231.

List of Subjects in 21 CFR Part 876

Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 876 is amended as follows:

PART 876—GASTROENTEROLOGY–UROLOGY DEVICES

1. The authority citation for 21 CFR part 876 continues to read as follows:

Authority: 21 U.S.C. 351, 360, 360c, 360e, 360j, 360l, 371.

2. Section 876.3350 is amended by revising paragraph (c) to read as follows:

§ 876.3350 Penile inflatable implant.

* * * * *

(c) *Date premarket approval application (PMA) or notice of completion of a product development protocol (PDP) is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before July 11, 2000, for any penile inflatable implant that was in commercial distribution before May 28, 1976, or that has, on or before July 11, 2000, been found to be substantially equivalent to a penile inflatable implant that was in commercial distribution before May 28, 1976. Any other penile inflatable implant shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

Dated: March 24, 2000.

Linda S. Kahan,

Deputy Director for Regulations Policy, Center for Devices and Radiological Health.

BILLING CODE 4160–01–F

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 8

RIN 2900–AJ78

National Service Life Insurance

AGENCY: Department of Veterans Affairs.

ACTION: Final rule; technical amendment.

SUMMARY: This document amends the Department of Veterans Affairs regulations regarding payments of premiums for National Service Life Insurance by correcting cross-references.

DATES: *Effective date:* April 12, 2000.

FOR FURTHER INFORMATION CONTACT: Ms. Jeanne Derrick, Attorney-Advisor, Department of Veterans Affairs Regional Office and Insurance Center, P.O. Box 8079, Philadelphia, Pennsylvania 19101, telephone number (215) 842–2000, ext. 4277, fax number (215) 381–3504.

SUPPLEMENTARY INFORMATION: In a final rule published in the **Federal Register** on February 15, 2000 (65 FR 7437), VA redesignated certain sections in 38 CFR part 8. This document makes changes regarding cross-references to reflect these redesignations.

Since this document makes only non-substantive changes, we are dispensing with prior notice and comment and delayed effective date provisions of 5 U.S.C. 552 and 553.

The Catalog of Federal Domestic Assistance Program number for this regulation is 64.103.

List of Subjects in 38 CFR Part 8

Disability benefits, Life insurance, Loan programs-veterans, Military personnel, Veterans.

Approved: April 6, 2000.

Thomas O. Gessel,

Director, Office of Regulations Management.

Accordingly, 38 CFR part 8 is corrected by making the following correcting amendments:

PART 8—NATONAL SERVICE LIFE INSURANCE

1. The authority citation for part 8 continues to read as follows:

Authority: 38 U.S.C. 501, 1901–1929, 1981–1988, unless otherwise noted.

§ 8.3 [Amended]

2. In § 8.3(a)(5), remove "(§ 8.9)" and add, in its place, "(§ 8.2(d))".

3. In § 8.3(a)(7), remove "(§ 8.17)" and add, in its place, "(§ 8.14)".

4. In § 8.3(b)(3), remove "(§ 8.17)" and add, in its place, "(§ 8.14)".

§ 8.6 [Amended]

5. In § 8.6, remove "§§ 8.3, 8.4 or 8.5" and add, in its place, "§§ 8.2 or 8.3".

§ 8.7 [Amended]

6. In § 8.7(a), remove "§ 8.11" and add, in its place, "§ 8.8".

§ 8.9 [Amended]

7. In § 8.9, remove "§ 8.11" and add, in its place, "§ 8.8"; and, in both places it appears, remove "§ 8.11(a)" and add, in its place, "§ 8.8(a)".

§ 8.10 [Amended]

8. In § 8.10(g), remove "§§ 8.17 and 8.18" and add, in its place, "§§ 8.14 and 8.15".

§ 8.11 [Amended]

9. In § 8.11(a), remove "§ 8.17(b)" and add, in its place, "§ 8.14(b)".

§ 8.24 [Amended]

10. In § 8.24, remove "§ 8.25" and add, in its place, "§ 8.22".

BILLING CODE 8320–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 131

[FRL–6576–2]

Withdrawal of Certain Federal Human Health and Aquatic Life Water Quality Criteria Applicable to Rhode Island, Vermont, the District of Columbia, Kansas and Idaho

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: In 1992, EPA promulgated Federal regulations establishing water quality criteria for toxic pollutants for several States, including Rhode Island, Vermont, the District of Columbia, Kansas and Idaho. These States have now adopted, and EPA has approved, human health and aquatic life water quality criteria. In this action, EPA is amending the Federal regulations to withdraw certain human health and aquatic life criteria applicable to these States. EPA is withdrawing its criteria applicable to these States without a notice and comment rulemaking because the States' adopted criteria are no less stringent than the Federal criteria.

DATES: This rule is effective April 12, 2000.

ADDRESSES: The administrative record for consideration of Rhode Island and Vermont's criteria is available for public inspection at EPA Region 1, Office of Water, 1 Congress Street, Suite 1100, Boston MA 02114–1505 during normal business hours of 9:00 a.m. to 5:00 p.m. The administrative record for consideration of the District of Columbia human health criteria is available at EPA Region 3, Water Protection Division, 1650 Arch St, Philadelphia PA 19103–2029 during normal business hours of 9:00 am to 5:00 pm. The administrative record for consideration of Kansas's human health and aquatic life criteria is available for public inspection at EPA Region 7, Water Resources Protection Branch, 901 North 5th Street, Kansas City, Kansas 66101 during normal business hours of 8:00 a.m. to 4:30 p.m. The administrative record for consideration of Idaho's aquatic life criteria is available for public inspection at EPA Region 10, Office of Water, 1200 Sixth Avenue, Seattle, Washington 98101 during normal business hours of 8:00 a.m. to 4:30 p.m

FOR FURTHER INFORMATION CONTACT: Thomas J. Gardner at EPA Headquarters, Office of Water (4305), 1200 Pennsylvania Ave NW, Washington, D.C., 20460 (tel: 202–260–7309). For questions regarding Rhode Island and Vermont, contact Bill Beckwith in EPA's Region 1 at 617–918–1544. For questions regarding the District of Columbia, contact Garrison Miller in EPA's Region 3 at 215–814–5745. For questions regarding Kansas, contact Ann Jacobs in EPA's Region 7 at 913–551–7930. For questions regarding Idaho, contact Lisa Macchio in EPA's Region 10 at 206–553–1834.

SUPPLEMENTARY INFORMATION:

Potentially Affected Entities

Citizens concerned with water quality in Rhode Island, Vermont, Kansas, the District of Columbia and Idaho may be interested in this rulemaking. Entities discharging toxic pollutants to waters of the United States in these States could be affected by this rulemaking since criteria are used in determining NPDES permit limits. Potentially affected categories and entities include:

Category	Examples of potentially affected entities
Industry	Industries discharging toxic pollutants to surface waters in Rhode Island, Vermont, District of Columbia, Kansas and Idaho.
Municipalities	Publicly-owned treatment works discharging toxic pollutants to surface waters in Rhode Island, Vermont, District of Columbia, Kansas and Idaho.

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be potentially affected by this action. This table lists the types of entities that EPA is now aware could potentially be affected by this action. Other types of entities not listed in the table could also be affected. To determine whether your facility is affected by this action, you should carefully examine the applicability criteria in § 131.36 of title 40 of the Code of Federal Regulations. If you have any questions regarding the applicability of this action to a particular entity, consult the appropriate person(s) listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

Background

In 1992, EPA promulgated a final rule (known as the "National Toxics Rule", or "NTR") to establish numeric water quality criteria for 12 States and two Territories (hereafter "States") that had failed to comply fully with section 303(c)(2)(B) of the Clean Water Act ("CWA") (57 FR 60848). The criteria, codified at 40 CFR 131.36, became the applicable water quality standards in those 14 jurisdictions for all purposes and programs under the CWA effective February 5, 1993.

When a State adopts criteria that meet the requirements of the CWA, EPA will issue a rule amending the NTR to withdraw its criteria. Section 553 of the Administrative Procedure Act, U.S.C. 533(b)(B) provides that, when an agency for good cause finds that notice and public procedure are impracticable, unnecessary or contrary to the public interest, the agency may issue a rule without providing notice and opportunity for public comment. EPA has determined that there is good cause for making today's rule final without prior proposal and opportunity for comment because EPA has determined that, if the State's criteria are no less stringent than the Federal regulations, additional comment on the criteria is unnecessary. EPA finds that this constitutes good cause for issuing this final rule without notice and comment. EPA has determined that the States criteria are no less stringent than the

NTR criteria because they are identical, identical when rounded using conventional rounding techniques, or more stringent. For the same reason, and because this rule relieves a restriction, EPA has determined that good cause exists to waive the requirement for a 30-day period before the amendment becomes effective and therefore, the amendment will be immediately effective.

Rhode Island

On August 6, 1997, Rhode Island adopted revisions to its surface water quality standards (Regulation EVM 112–88.97–1), regarding human health criteria. Rhode Island adopted human health criteria for toxic pollutants contained in the NTR. EPA Region 1 approved the State's human health criteria on January 15, 1999, because Rhode Island's numeric criteria for the protection of human health were consistent with the CWA and EPA's implementing regulations at 40 CFR Part 131. By adoption of numeric criteria, Rhode Island complied with the requirements of Section 303(c)(2)(b) of the CWA to have numeric criteria for toxic pollutants. EPA Region 1 requested that the Agency withdraw the Federal criteria applicable to Rhode Island for which the State now has numeric criteria.

In today's action, EPA is withdrawing Rhode Island from the NTR for those criteria that the State has adopted that are no less stringent than the Federal criteria in the NTR. Rhode Island adopted, and EPA approved, a human health (organisms only) criterion of 50 µg/l for arsenic. The value promulgated in the NTR for this criterion is 0.14 µg/l. Rhode Island will remain in the NTR for this criterion. In a separate, upcoming action, EPA will propose to remove Rhode Island from the NTR for this criterion and provide for public comment. Additionally, Rhode Island adopted, and EPA approved, human health criteria of 18 mg/l and 59 mg/l (water and organisms, and organisms only, respectively) for bis(2)ethylhexyl pthalate. The values promulgated in the NTR are 18 µg/l and 59 µg/l, respectively. Rhode Island will remain in the NTR for these criteria.

Vermont

On July 12, 1994, Vermont adopted revisions to its surface water quality standards (Appendix C, *Vermont Water Quality Standards*, effective August 1, 1994). EPA Region 1 approved the State's adoption of criteria for all toxics contained in the NTR on December 5, 1996, because they are consistent with the CWA and EPA's implementing regulations at 40 CFR Part 131. EPA Region 1 requested that the Agency withdraw the Federal criteria applicable to Vermont for which the State now has numeric criteria.

In today's action, EPA is withdrawing Vermont from the NTR for certain human health and aquatic life criteria where the State adopted criteria that are no less stringent than the Federal criteria. Vermont adopted, and EPA approved, a human health (organisms only) criterion of 1.5 µg/l for arsenic. The value promulgated in the NTR for this criterion is 0.14 µg/l. Vermont will remain in the NTR for this criterion. In a separate, upcoming action, EPA will propose to remove Vermont from the NTR for this criterion and provide for public comment. Additionally, Vermont adopted and EPA approved, an aquatic life criterion continuous concentration (CCC) of 0.8 µg/l for gamma-BHC. The value promulgated for this criterion in the NTR was 0.08. Vermont will remain in the NTR for this criterion.

District of Columbia

On March 4, 1994, the District of Columbia adopted revisions to its surface water quality standards [amended Chapter 11 of Title 21 DCMR pursuant to the authority set forth in Section 5 of the Water Pollution Control Act of 1984, D.C. Law 5–188, effective March 16, 1985, D.C. Code Section 6–924 (1988) and Mayor's Order 85–152, September 12, 1985], adopting human health criteria to protect from effects related to fish consumption. EPA Region 3 approved these revisions on November 4, 1996, because the District's numeric criteria are consistent with section 303(c)(2)(B) of the Clean Water Act and EPA's implementing regulations at 40 CFR Part 131. EPA Region 3 requested that the Agency withdraw the Federal human health (organism only) criteria applicable to the District for which the District now has numeric criteria.

In today's action, EPA is withdrawing the District of Columbia from the NTR for those human health "organism only" criteria that the District has adopted that are no less stringent than the Federal criteria in the NTR. The District remains in the NTR for organism + water human health criteria. The District removed the drinking water use for the only water body in the District designated for that use. EPA approved the removal of this use and, in a separate upcoming action, EPA will propose to remove the District from the NTR for organism + water human health criteria and will provide for public comment.

Kansas

On June 29, 1994, Kansas adopted revisions to its water quality standards (K.A.R. 28–16–28) regarding both human health and aquatic life criteria, and submitted them to EPA Region 7 for review and approval on October 31, 1994. On February 19, 1998, EPA Region 7 approved certain new or revised water quality criteria for the protection of human health and aquatic life because they are consistent with section 303(c)(2)(B) of the CWA and EPA's implementing regulations at 40 CFR 131, and requested that the Agency withdraw the Federal criteria applicable to Kansas for which the State now has numeric criteria. Additionally, on June 29, 1999, Kansas adopted new and revised ambient water quality criteria for additional pollutants. They were submitted to EPA for review and approval on August 10, 1999. On January 19, 2000, EPA Region 7 approved these additional criteria because they are also consistent with section 303(c)(2)(B) of the CWA and EPA's implementing regulations at 40 CFR 131, and requested that the Agency withdraw the Federal criteria applicable to Kansas for which the State now has numeric criteria.

In today's action, EPA is removing Kansas from the NTR for certain human health and aquatic life criteria because the State's adopted criteria are no less stringent than the Federal criteria. Kansas remains in the NTR for arsenic (human health—organisms only) and cadmium (acute and chronic aquatic life). For these pollutants, Kansas adopted criteria that are less stringent than the Federal rule. In a separate, upcoming action, EPA will propose to withdraw the NTR criteria for these pollutants and provide for public comment. In addition, Kansas remains in the NTR for certain other toxic pollutants for which it has not yet adopted numeric criteria.

In addition, EPA is modifying the NTR for Kansas to reflect the State's adoption of a 10^{-6} risk level for carcinogens and a change in nomenclature for one of the State's use classifications.

Idaho

On August, 24, 1994, Idaho adopted revisions to its surface water quality standards (Title 1, chapter 2, Section 250 of the Idaho Administrative Code). For all aquatic life toxic pollutants, Idaho adopted the NTR criteria by reference. On June 25, 1996, EPA Region 10 approved the criteria because they were identical to the Federal criteria. EPA Region 10 requested that the

Agency withdraw the Federal criteria applicable to Idaho for which the State now has numeric criteria.

In today's action, EPA is withdrawing Idaho from the NTR for all aquatic life criteria because the State adopted criteria that are identical to the Federal criteria.

Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and is therefore not subject to review by the Office of Management and Budget. Because the agency has made a "good cause" finding that this action is not subject to notice-and-comment requirements under the Administrative Procedure Act or any other statute, it is not subject to the regulatory flexibility provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), or to sections 202 and 205 of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4). In addition, this action does not significantly or uniquely affect small governments or impose a significant intergovernmental mandate, as described in sections 203 and 204 of UMRA. This rule also does not significantly or uniquely affect the communities of tribal governments, as specified by Executive Order 13084 (63 FR 27655, May 10, 1998). This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant.

This action does not involve technical standards; thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. The rule also does not involve special consideration of environmental justice related issues as required by Executive Order 12898 (59 FR 7629, February 16, 1994). This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Congressional Review Act (5 U.S.C. 801 *et seq.*), as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. Section 808 allows the issuing agency to make a rule effective sooner than otherwise provided by the CRA if the agency makes a good cause finding that notice and public procedure is impracticable, unnecessary or contrary to the public interest. This determination must be supported by a brief statement. 5 U.S.C. 808(2). As stated previously, EPA made such a good cause finding, including the reasons therefore, and established an immediate effective date of April 12, 2000. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804 (2).

List of Subjects in 40 CFR Part 131

Environmental protection, Indians—lands, Intergovernmental relations, Water pollution control.

Dated: April 4, 2000.

Carol M. Browner,

Administrator.

For the reasons set out in the preamble title 40, chapter I, of the Code of Federal Regulations is proposed to be amended as follows:

PART 131—WATER QUALITY STANDARDS

1. The authority citation for part 131 continues to read as follows:

Authority: 33 U.S.C. 1251 *et seq.*

§ 131.36 [Amended]

2. Section 131.36 is amended by:

a. Revising the table in paragraph (d)(1)(ii).

b. Revising the table in paragraph (d)(2)(ii).

c. Revising the table in paragraph (d)(5)(ii).

d. Revising the table in paragraph (d)(9)(i).

e. Revising the table in paragraph (d)(9)(ii).

f. In paragraph (d)(9)(iii) by revising "State-proposed" to read "State-adopted".

g. Removing and reserving paragraph (d)(13).

The revisions read as follows:

§ 131.36 Toxics criteria for those states not complying with Clean Water Act Section 303(c)(2)(B).

* * * * *

(d) * * *

(1) * * *

(ii) * * *

Use classification	Applicable criteria
Class A	These classifications are assigned the criteria in Column D1—#2, 68
Class B waters where water supply use is designated	
Class B waters where water supply use is not designated	
Class C;	
Class SA;	
Class SB;	
Class SC	

(2) * * *

(ii) * * *

Use classification	Applicable criteria
Class A	This classification is assigned criteria in: Column B2—#105
Class B waters where water supply use is designated	
Class B waters where water supply use is not designated	These classifications are assigned all the criteria in: Column B2—#105 Column D2—#2
Class C.	

* * * * *

(5) * * *

(ii) * * *

Use classification	Applicable criteria
Class C	This classification is assigned the additional criteria in: Column B2—#10, 118, 126 Column D1—#15, 16, 44, 67, 68, 79, 80, 81, 88, 114, 116, 118.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[OPP–300973A; FRL–6496–4]

RIN 2070–AB78

Ethoxylated Propoxylated (C_{12}–C_{15}) Alcohols; Tolerance Exemption, Technical Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: This document makes a technical correction to the exemption from the requirement of a tolerance for residues of a range of polymers, α-alkyl (C_{12}–C_{15})-ω-hydroxypoly (oxypropylene)poly(oxyethylene) copolymers (where the poly(oxypropylene) content is 3-60 moles and the poly(oxyethylene) content is 5-80 moles, when used as an inert ingredient (surfactant) in or on growing crops, when applied to raw agricultural commodities after harvest, or to animals.

DATES: This technical correction is effective April 12, 2000.

FOR FURTHER INFORMATION CONTACT: By mail: Kathryn Boyle, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, Ariel Rios Bldg., 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: 703–305–6304; and e-mail address: boyle.kathryn@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected categories and entities may include, but are not limited to:

Categories	NAICS	Examples of potentially affected entities
Industry	111 112 311 32532	Crop production Animal production Food manufacturing Pesticide manufacturing

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action might apply to certain entities. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

B. How Can I Get Additional Information, Including Copies of This Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations" and then look up the entry for this document under the "**Federal Register**–Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/.

2. *In person.* The Agency has established an official record for this action under docket control number OPP–300973A. The official record consists of the documents specifically referenced in this action, and other information related to this action, including any information claimed as Confidential Business Information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

II. What Action is EPA Taking?

In the **Federal Register** of May 26, 1999 (64 FR 28480) (FRL–6081–3), EPA issued a notice pursuant to section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, as amended by the Food Quality Protection Act (FQPA) (Public Law 104–170) announcing the filing of a pesticide tolerance petition (PP 8E4950) by Omnichem S.A., Industrial Research Park, 1348 Louvain-La-Neuve, Belgium. This notice included a summary of the petition prepared by the petitioner, including a statement of the number average molecular weight of the range of polymers. There were no comments received in response to the notice of filing.

In the **Federal Register** of February 28, 2000 (65 FR 10401) (FRL–6491–3), EPA issued a rule establishing an exemption from the requirement of a tolerance for residues of a range of polymers α-alkyl (C_{12}–C_{15})-ω-hydroxypoly (oxypropylene)poly (oxyethylene)copolymers (where the poly(oxypropylene) content is 3-60 moles and the poly(oxyethylene) content is 5-80 moles in or on growing crops, when applied to raw agricultural commodities after harvest, or to animals when used as an inert ingredient (surfactant). The number average molecular weight, which is routinely included in the tolerance exemption expression, was inadvertently omitted from the tolerance exemption expression in § 180.1001(c) and (e). This rule corrects the tolerance exemption to include the molecular weight as a limitation.

III. Why is this Technical Correction Issued as a Final Rule?

Section 553 of the Administrative Procedure Act (APA), 5 U.S.C. 553(b)(B), provides that, when an agency for good cause finds that notice and public procedure are impracticable, unnecessary or contrary to the public interest, the agency may issue a rule without providing notice and an opportunity for public comment. EPA has determined that there is good cause for making today's rule final without prior proposal and opportunity for comment, because EPA is amending the tolerance exemption expression that was previously issued to include the number average molecular weight. The preamble to the previously published Final Rule discussed how the number average molecular weeight was one of the criteria for identifying low risk polymers. Thus, notice and public procedure are unnecessary. EPA finds that this constitutes good cause under 5 U.S.C. 553(b)(B).

IV. Do Any of the Regulatory Assessment Requirements Apply to this Action?

No. This final rule implements a technical amendment to the Code of Federal Regulations to reflect a technical correction to a previously

issued Final Rule, and it does not otherwise impose or amend any requirements. As such, the Office of Management and Budget (OMB) has determined that a technical correction is not a "significant regulatory action" subject to review by OMB under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993). Nor does this rule contain any information collection requirements that require review and approval by OMB pursuant to the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501 et seq.).

Because this action is not economically significant as defined by section 3(f) of Executive Order 12866, this action is not subject to Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This action will not result in environmental justice related issues and does not, therefore, require special consideration under Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994). Since the Agency has made a "good cause" finding that this action is not subject to notice-and-comment requirements under the Administration Procedure Act or any other statute (see Unit IV), this action is not subject to provisions of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 et seq.), or to sections 202 and 205 of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104-4). In addition, this action does not significantly or uniquely affect small governments or impose a significant intergovernmental mandate, as described in sections 203 and 204 of UMRA. Nor does this action significantly or uniquely affect the communities of tribal governments as specified by Executive Order 13084, entitled *Consultation and Coordination with Indian Tribal Governments* (63 FR 27655, May 10, 1998). This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999). This action does not involve any technical standards that require the Agency's consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104-113, section 12(d) (15 U.S.C. 272 note). In issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct, as required by section 3 of Executive Order 12988, entitled *Civil Justice Reform* (61 FR 4729, February 7, 1996). EPA has complied with Executive Order 12630, entitled *Governmental Actions and Interference with Constitutionally Protected Property Rights* (53 FR 8859, March 15, 1988), by examining the takings implications of this rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the Executive Order.

For information about the applicability of the regulatory assessment requirements to the final rule that was issued on February 28, 2000 (65 FR 10401) (FRL–6491–3), please refer to the discussion in Unit XII of that document.

V. Will EPA Submit this Final Rule to Congress and the Comptroller General?

Yes. The Congressional Review Act (CRA), 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. Section 808 allows the issuing agency to make a rule effective sooner than otherwise provided by the CRA if the agency makes a good cause finding that notice and public procedure is impracticable, unnecessary or contrary to the public interest. This determination must be supported by a brief statement. (5 U.S.C. 808(2)). EPA has made such a good cause finding for this final rule, and established an effective date of April 12, 2000. Pursuant to 5 U.S.C. 808(2), this determination is supported by the brief statement in Unit III. of this document. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: March 22, 2000.

James Jones,

Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is corrected as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a, 371.

2. In § 180.1001, the table in paragraph (c) is corrected by revising the entry beginning with "α-alkyl (C_{12}-C_{15})" and the table to paragraph (e) is corrected by revising the entry beginning with "α-alkyl (C_{12}-C_{15})-ω-hydroxypoly (oxypropylene)poly (oxyethylene)copolymers" to read as follows:

§ 180.1001 Exemptions from the requirements of a tolerance.

* * * * * *

(c) * * *

Inert ingredients	Limits	Uses
* * * * * * *		
α-alkyl (C_{12}-C_{15})-ω-hydroxypoly (oxypropylene)poly (oxyethylene)copolymers (where the poly(oxypropylene) content is 3-60 moles and the poly(oxyethylene) content is 5-80 moles), the resulting ethoxylated propoxylated (C_{12}-C_{15}) alcohols having a minimum molecular weight (in amu) of 1,500, CAS Reg. No. 68551–13–3.	Not to exceed 20% of pesticide formulations	Surfactant

BILLING CODE 6560–50–P

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 65

Changes in Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Final rule.

SUMMARY: Modified base (1% annual chance) flood elevations are finalized for the communities listed below. These modified elevations will be used to calculate flood insurance premium rates for new buildings and their contents.

EFFECTIVE DATES: The effective dates for these modified base flood elevations are indicated on the following table and revise the Flood Insurance Rate Map(s) (FIRMs) in effect for each listed community prior to this date.

ADDRESSES: The modified base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: Matthew B. Miller, P.E., Chief, Hazards Study Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–3461, or (email) matt.miller@fema.gov.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency makes the final determinations listed below of modified base flood elevations for each community listed. These modified elevations have been published in newspapers of local circulation and ninety (90) days have elapsed since that publication. The Associate Director has resolved any appeals resulting from this notification.

The modified base flood elevations are not listed for each community in this notice. However, this rule includes the address of the Chief Executive Officer of the community where the modified base flood elevation determinations are available for inspection.

The modifications are made pursuant to section 206 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The modified base flood elevations are the basis for the floodplain management measures that the community is required to either adopt or to show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program.

These modified elevations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, state or regional entities.

These modified elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

The changes in base flood elevations are in accordance with 44 CFR 65.4.

National Environmental Policy Act.

This rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act.

The Associate Director, Mitigation Directorate, certifies that this rule is exempt from the requirements of the Regulatory Flexibility Act because modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are required to maintain community eligibility in the National Flood Insurance Program. No regulatory flexibility analysis has been prepared.

Regulatory Classification

This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778.

List of Subjects in 44 CFR Part 65

Flood insurance, Floodplains, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 65 is amended to read as follows:

PART 65—[AMENDED]

1. The authority citation for part 65 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 65.4 [Amended]

2. The tables published under the authority of § 65.4 are amended as follows:

State and county	Location	Dates and name of newspaper where notice was published	Chief executive officer of community	Effective date of modification	Community No.
Alabama: Jefferson (FEMA Docket No. 7293).	Unincorporated Areas	May 12, 1999, May 19, 1999, *Birmingham News.*	Mr. Gary White, President of the Jefferson County Board of Commissioners, Courthouse, Room A–360, Birmingham, Alabama 35263.	Aug. 17, 1999	010217 E
Connecticut: Fairfield (FEMA Docket No. 7293.	Town of Wilton	June 17, 1999, June 24, 1999, Wilton Bulletin.	Mr. Robert H. Russell, First Selectman of the Town of Wilton, Wilton Town Hall, 238 Danbury Road, Wilton, Connecticut 06897.	Sept. 22, 1999	090020 C
Florida: Orange (FEMA Docket No. 7293).	City of Ocoee	June 24, 1999, July 1, 1999, *The Orlando Sentinel.*	The Honorable S. Scott Vandergrift, Mayor of the City of Ocoee, City Hall, 150 North Lakeshore Drive, Ocoee, Florida 34761–2258.	June 17, 1999	120185 C
Illinois: Will (FEMA Docket No. 7293).	City of Crest Hill	March 25, 1999, April 1, 1999, *The Herald-News.*	The Honorable Donald R. Randich, Mayor of the City of Crest Hill, 1610 Plainfield Road, Crest Hill, Illinois 60435.	June 30, 1999	170699 D
Illinois: Kane (FEMA Docket No. 7293).	Village of Hampshire ...	April 28, 1999, May 5, 1999, *Hampshire Register-News.*	Mr. William Schmidt, Hampshire Village President, P.O. Box 457, 234 South State Street, Hampshire, Illinois 60140.	July 27, 1999	170327 C
Kentucky: Fayette (FEMA Docket No. 7293).	Lexington-Fayette Urban County Government. BILLING CODE 6718–04–P

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 65

[Docket No. FEMA–7309]

Changes in Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Interim rule.

SUMMARY: This interim rule lists communities where modification of the base (1% annual chance) flood elevations is appropriate because of new scientific or technical data. New flood insurance premium rates will be calculated from the modified base flood elevations for new buildings and their contents.

DATES: These modified base flood elevations are currently in effect on the dates listed in the table and revise the Flood Insurance Rate Map(s) (FIRMs) in effect prior to this determination for each listed community.

From the date of the second publication of these changes in a newspaper of local circulation, any person has ninety (90) days in which to request through the community that the Associate Director reconsider the changes. The modified elevations may be changed during the 90-day period.

ADDRESSES: The modified base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: Matthew B. Miller, P.E., Chief, Hazards Study Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–3461, or (email) matt.miller@fema.gov.

SUPPLEMENTARY INFORMATION: The modified base flood elevations are not listed for each community in this interim rule. However, the address of the Chief Executive Officer of the community where the modified base flood elevation determinations are available for inspection is provided.

Any request for reconsideration must be based upon knowledge of changed conditions, or upon new scientific or technical data.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The modified base flood elevations are the basis for the floodplain management measures that the community is required to either adopt or to show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program.

These modified elevations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, state or regional entities.

The changes in base flood elevations are in accordance with 44 CFR 65.4.

National Environmental Policy Act

This rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Associate Director, Mitigation Directorate, certifies that this rule is exempt from the requirements of the Regulatory Flexibility Act because modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are required to maintain community eligibility in the National Flood Insurance Program. No regulatory flexibility analysis has been prepared.

Regulatory Classification

This interim rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778.

List of Subjects in 44 CFR Part 65

Flood insurance, Floodplains, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 65 is amended to read as follows:

PART 65—[AMENDED]

1. The authority citation for part 65 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq.; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 65.4 [Amended]

2. The tables published under the authority of § 65.4 are amended as follows:

State and county	Location	Dates and name of newspaper where notice was published	Chief executive officer of community	Effective date of modification	Community No.
Alabama: Morgan	City of Decatur	January 25, 2000, February 1, 2000, *The Decatur Daily News.*	The Honorable Julian Price, Mayor of the City of Decatur, P.O. Box 488, Decatur, Alabama 35602.	May 1, 2000	010176 D
Alabama: Jefferson.	City of Homewood	April 28, 1999, May 5, 1999, *Birmingham News.*	The Honorable Barry R. McCulley, Mayor of the City of Homewood, P.O. Box 59666, Homewood, Alabama 35259.	Apr. 21, 1999	015006 D
Florida: Charlotte	Unincorporated Areas.	May 10, 1999, May 17, 1999, *Charlotte Herald Sun.*	Mr. Jan Winters, Charlotte County Administrator, 18500 Murdock Circle, Room 536, Port Charlotte, Florida 33948–1094.	Apr. 30, 1999	120061 D&E
Georgia: Bartow ...	City of Cartersville	February 17, 2000, February 24, 2000, *The Daily Tribune News.*	The Honorable Sam C. Smith, Mayor of the City of Cartersville, 1 North Erwin Street, P.O. Box 1390, Cartersville, Georgia 30120.	May 24, 2000	130209 F
Georgia: Bartow ...	Unincorporated Areas.	February 17, 2000, February 24, 2000, *The Daily Tribune News.*	Mr. Clarence Brown, Bartow County Commissioner, 135 West Cherokee Avenue, Suite 251, Cartersville, Georgia 30120.	May 24, 2000	130463 F

BILLING CODE 6718–04–P

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Final rule.

SUMMARY: Base (1% annual chance) flood elevations and modified base flood elevations are made final for the communities listed below. The base flood elevations and modified base flood elevations are the basis for the floodplain management measures that each community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATES: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base flood elevations and modified base flood elevations for each community. This date may be obtained by contacting the office where the maps are available for inspection as indicated on the table below.

ADDRESSES: The final base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

FOR FURTHER INFORMATION CONTACT: Matthew B. Miller, P.E., Chief, Hazards Study Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–3461, or (email) matt.miller@fema.gov.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA or Agency) makes final determinations listed below of base flood elevations and modified base flood elevations for each community listed. The proposed base flood elevations and proposed modified base flood elevations were published in newspapers of local circulation and an opportunity for the community or individuals to appeal the proposed determinations to or through the community was provided for a period of ninety (90) days. The proposed base flood elevations and proposed modified base flood elevations were also published in the **Federal Register**.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67.

The Agency has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and Flood Insurance Rate Map available at the address cited below for each community.

The base flood elevations and modified base flood elevations are made final in the communities listed below.

Elevations at selected locations in each community are shown.

National Environmental Policy Act

This rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Associate Director, Mitigation Directorate, certifies that this rule is exempt from the requirements of the Regulatory Flexibility Act because final or modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and are required to establish and maintain community eligibility in the National Flood Insurance Program. No regulatory flexibility analysis has been prepared.

Regulatory Classification

This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778.

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 67 is amended as follows:

PART 67—[AMENDED]

1. The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.11 [Amended]

2. The tables published under the authority of § 67.11 are amended as follows:

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
ALABAMA	
Northport (City), Tuscaloosa County (FEMA Docket No. 7295)	
Twomile Creek Tributary No. 5:	
Approximately 100 feet upstream of confluence with Twomile Creek	*184
Approximately 710 feet upstream of confluence with Twomile Creek	*186
Maps available for inspection at the City of Northport City Hall, 3500 McFarland Boulevard, Northport, Alabama.	
Tuscaloosa (City), Tuscaloosa County (FEMA Docket No. 7295)	
Bee Branch:	
At confluence with Hurricane Creek	*214
Approximately 1,600 feet downstream of westbound Route 59	*278
Cottondale Creek Tributary No. 1:	
At confluence with Cottondale Creek	*249
Approximately 1,600 feet upstream of 56th Street East Dam	*298
Cottondale Creek Tributary No. 1A:	
At confluence with Cottondale Creek Tributary No. 1	*268
Approximately 2,450 feet upstream of center point of Interstate 59 and 20/JVC Road culvert	*288
Cypress Creek:	
Approximately 2,400 feet downstream of Kauloosa Avenue	*148
Approximately 800 feet downstream of Springshill Drive	*301
Cribbs Mill Creek:	
Approximately 1,000 feet downstream of 2nd Avenue East	*181
Approximately 630 feet upstream of East 17th Street	*259
Moody Swamp Tributary No. 2:	
Approximately 660 feet downstream of 31st Street	*142
Approximately 525 feet downstream of 25th Street	*159
Moody Swamp Tributary No. 3:	
Approximately 175 feet downstream of Martin Luther King Jr. Boulevard	*141
Approximately 200 feet upstream of 10th Avenue	*179
Maps available for inspection at the City of Tuscaloosa Planning Office, City Hall, 2201 University Boulevard, Tuscaloosa, Alabama.	
Tuscaloosa County (Unincorporated Areas) (FEMA Docket No. 7295)	
Bee Branch:	
Approximately 1,600 feet downstream of Westbound Route 59	*278
Approximately 400 feet downstream of Westbound Route 59	*284
Approximately 100 feet upstream of confluence with Twomile Creek	*184
Approximately 710 feet upstream of confluence with Twomile Creek	*186
Maps available for inspection at the City of Northport City Hall, 3500 McFarland Boulevard, Northport, Alabama.

BILLING CODE 6718-04-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 1, 20, and 43

[CC Docket No. 99-301, FCC 00-114]

Local Competition and Broadband Reporting

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission announces the adoption of a program to collect basic information about the status of local telephone service competition and the deployment of advanced telecommunications capability, also known as broadband. The Commission will use this information to help inform it craft its regulations in a manner that encourages development in these markets. The Commission further intends that this information will inform other policy makers and consumers about these markets. By understating the state of local telephony service competition and the deployment of broadband services, the Commission will be better able to fulfill its statutory obligations.

DATES: *Effective Date:* May 12, 2000. *Compliance Date:* For the first filing respondents must submit 1999 year-end data by May 15, 2000.

FOR FURTHER INFORMATION CONTACT: Scott Bergmann or Ellen Burton, Industry Analysis Division, Common Carrier Bureau, at (202) 418-0940. For additional information concerning the information collections contained in the Report and Order (Order) contact Judy Boley at 202-418-0214, or via the Internet at jboley@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order (Order) released March 30, 2000 (FCC 00-114), issued in response to the Notice of Proposed Rulemaking released by the Commission on October 22, 1999 (FCC 99-301). The full text of the Order is available for inspection and copying during normal business hours in the FCC Reference Center, Room CY-A257, 445 12th Street, SW, Washington, DC 20554. The complete text also may be purchased from the Commission's copy contractor, International Transcription Service, Inc. (202) 857-3800, 1231 20th Street, NW, Washington, DC 20037. Additionally, the complete item is available on the Commission's website at <http://www.fcc.gov/Bureaus/Common_Carrier/Orders/2000/>.

Outreach Workshops: In an effort to inform respondents and answer questions regarding their filings, the Commission will hold two workshops in the Commission's Meeting Room at 445 12th Street, SW, Washington, DC 20554. The workshops will be held on April 17, 2000 and May 1, 2000. Details will be provided by Public Notice released by the Commission.

Electronic Access and Filing

You may obtain the latest version of the form (FCC Form 477) from the Common Carrier Bureau's website at <http://www.fcc.gov/broadband/data>. The form is best accessed using Excel 97. However, other comparable spreadsheet software programs may access a version of the form that will be located at the same website.

Summary of the Report and Order

1. In the Order summarized here, we adopt an information collection program to collect basic information about the status of local telephone service competition and the deployment of advanced telecommunications capability, also known as broadband. We conclude that we need timely and reliable information about the pace and extent of developing local competition in different geographic areas in order to

evaluate the effectiveness of actions that this Commission and the states are taking to promote local competition. We also conclude that we need timely and reliable information to assess the deployment of broadband services, as required by section 706 of the Telecommunications Act of 1996.

2. Moreover, we conclude that this information would allow us to avoid "one size fits all" regulation, and, specifically, to reduce regulation wherever we can pursuant to new sections 10 and 11 of the Act. 47 U.S.C. 160, 161. The Commission adopts a simple filing that should enable it to make better informed decisions, while placing as low a burden as possible on reporting entities.

3. Throughout the Order, we explain our reasons for the conclusions we reach. We assessed commenters' proposals for alternative means of collecting the needed information. The following text represents a brief summary of conclusions adopted in the Order.

4. *Types of Entities that Must Report:* In the Order, we discuss the types of entities that must report data describing the extent and intensity of local competition and the extent of broadband services deployment. Based on our determination that we need comprehensive data about developing competition for local telephone service, we decide that all local exchange carriers (LECs), both incumbent and competitive, should complete the applicable portions of Form 477 if they meet our defined threshold for deployment of service. We conclude that we should require local exchange carriers to complete Parts II and V of the form for each state in which they provide 10,000 or more voice-grade equivalent lines or wireless channels. Further, we require any facilities-based provider of mobile telephony (defined here as, real time, two-way switched voice service that is interconnected with the public switched network utilizing an in-network switching facility that enables the provider to reuse frequencies and accomplish seamless handoffs of subscriber calls) to complete Part III of the form for each state in which it has 10,000 or more subscribers.

5. We next turn to a consideration of those entities that should report data on deployment of broadband services. The Order concludes that given our broad statutory mandate under section 706 of the Telecommunications Act of 1996, to evaluate the deployment of broadband services, regardless of the transmission media or technology employed, we should collect data from a wide range of broadband providers. More specifically, we require providers of what we term "one-way broadband" and "full broadband" services to complete the applicable portions of Form 477, to the extent that they exceed the broadband reporting threshold. For purposes of the data collection, "full broadband" service is defined, consistent with the *Advanced Telecommunications Report*, as having an information carrying capacity of over 200 Kilobits per second (Kbps) in each direction, simultaneously. *An Inquiry Concerning the Deployment of Advanced Telecommunications Capabilities to All Americans in a Reasonable and Timely Fashion*, 14 FCC 2d 2398, paragraphs 20 through 25 (*Advanced Telecommunications Report*). "One-way broadband" service is defined as having an information carrying capacity of over 200 Kilobits per second (Kbps) in only one direction. Actual or potential providers of broadband services may include: LECs (incumbent and competitive), cable television companies, utilities, MMDS/MDS/ "wireless cable" carriers, other fixed wireless providers, mobile wireless carriers (both terrestrial and satellite-based), government entities, and others. We believe that only by casting our net wide enough to include all such entities can we discern progress, or the lack of it, in meeting the goals stated in the *Advanced Telecommunications Report*. We thus conclude that any entity that provides at least 250 full or one-way broadband service lines (or wireless channels) or has at least 250 full or one-way broadband customers in a state should be required to complete Parts I and V of Form 477 for that state.

6. *Frequency of Reports:* We decide that we can best balance our need for timely information with our desire to minimize the reporting burden on respondents by requiring providers to report data on a semi-annual basis. Given our desire to collect data to be used in the second Advanced Telecommunications Report, we direct that all respondents should file their end-of-year 1999 data on May 15, 2000. Thereafter, entities will report end-of-year data on March 1st and data as of June 30th on September 1st.

7. *Definition of Reporting Area:* To minimize the burden the reporting requirement places on reporting entities, we conclude that information should be reported by state. To aid our understanding of developments within a given state, we also require the reporting entity to provide the Commission with a list of Zip Codes in which they have at least one subscriber.

8. *Confidentiality of Data:* We continue to believe that the value of this data collection is significantly enhanced by making as much information as possible available to the public. At the same time, we conclude that we can achieve this goal in a manner that ensures the non-disclosure of confidential provider-filed data. We discuss, below, our affirmative policies for handling this information and we believe that these policies will allay commenter concerns that legitimately protectible information would be released to the public. We do not, in this Order, make findings about whether the data elements requested in the reporting form would satisfy the Commission's articulated standard for non-disclosure of competitively sensitive information, but we do make clear that our rules for requesting non-disclosure of confidential information will be available to all filers of the FCC Form 477. Moreover, for purposes of this information collection, we take steps to simplify the procedures for requesting confidential treatment of data. Our rules for requesting non-disclosure of competitively sensitive information afford sufficient protection to providers and appropriately balance the concerns of parties submitting information with the interests of the public in obtaining access to that information. We also make clear that we will not release information that is the subject of non-disclosure requests until persons requesting confidential treatment are afforded all of the procedural protections provided by our confidentiality rules. We expect that these policies will allow us to accomplish our goal of making as much information as possible available to the public while ensuring that service providers can file data with confidence that any information found to be competitively sensitive under our rules will not be disclosed.

9. We note that several commenters express concern over the potential for competitive harm that release of the gathered data could cause and, in particular, about the ability of competitors to take the data submitted and tailor market strategies to quash nascent competition, protect areas that are being subjected to increased competition, or deploy facilities to defend strongholds. Again, we believe that our confidentiality rules afford appropriate protection of legitimately protectible information, but we take additional steps to clarify our existing rules for treatment of competitively-sensitive data because we expect that some of the respondents to this form may be less familiar with Commission practices. The Commission's policy on

confidential treatment of information submitted pursuant to a survey or study is to "allow survey and study respondents to request confidential treatment pursuant to Section 0.459 to the extent they can show by a preponderance of the evidence a case for non-disclosure consistent with the Freedom of Information Act (FOIA)." Assessment of the confidentiality of the information is made on a case-by-case basis and action on confidentiality requests is routinely deferred until a request for inspection is made.

10. We also recognize that there is considerable diversity in the way that individual service providers handle the data pertaining to their operations. Indeed, it is our understanding that some providers release considerable data about the nature of their operations, while others more closely safeguard such data, including the type of data that we request in the reporting form. We anticipate that providers will request confidential treatment for data filed where they deem it appropriate. In these cases, and in accordance with the Commission's rules, we will honor all parties' requests for confidential treatment of information that they identify as competitively sensitive until persons requesting confidential treatment are afforded all of the procedural protections provided by our confidentiality rules. Moreover, in such cases, we agree with those commenters who suggest that we can aggregate much of the data—for example, by carrier class and to the state level—so that it does not identify the individual provider in our regularly published reports.

11. We also take an additional step to reduce provider concerns about the release of information identified as competitively sensitive by making it easier for providers to request confidential treatment of their data. In particular, we place a check-box on the first page of the FCC Form 477 that allows providers to request non-disclosure of all or portions of their submitted data without filing at this point in the process the detailed confidentiality justification required by our rules. Thus, where parties seek confidential treatment, they need only check the well-marked box on the first page of the form and provide a completed and a redacted version of the form, as explained fully in the instructions to the Form 477. If the Commission receives a request for, or proposes disclosure of, the information contained in the Form 477, the provider will be notified and required to make the full showing under our rules. Given the unique nature of this data collection, these streamlined procedures for requesting non-disclosure should greatly improve the ability of smaller providers and providers that are less familiar with the Commission's rules to request confidential treatment of their data. We expect that this will lead to a greater level of compliance with this information collection and will give providers confidence that protectible data will not be published in our regular reports.

12. *Part I: Broadband Data.* Without making a prospective decision about whether these data elements would satisfy the Commission's standard for non-disclosure, we state our intention not to publish in our publicly-available reports individual provider-filed data for the broadband (Part I) portion of the form, even where providers do not seek non-disclosure of this data. At this time, we do not have sufficient evidence in the record to make a universally applicable decision about the competitive sensitivity of all of the Part I Broadband information for all providers, but we do agree to aggregate this information in a way that does not identify the individual provider data in our reports because commenters have made at least an initial showing that all or most of the data filed in these sections is typically held confidential by providers of these services. Our decision not to publish individual provider submissions from the Part I Broadband section reflects the particular and limited purposes of this data collection and our desire to maximize the level of voluntary compliance with the information collection. While this is a mandatory collection, we wish to collect as much, and as accurate, information as possible about the status of broadband deployment in a short period of time. We also, as part of this information collection, encourage service providers that are below the reporting thresholds to report data on a voluntary basis. Moreover, particularly with respect to the Part I broadband data, we conclude that we can achieve substantially the same public benefits by releasing this information in an aggregated fashion without any potential risk of competitive harm on the part of respondents. Given the unique nature of this information collection, we believe that this extra step will improve compliance, thus enhancing our understanding of the broadband market, without any material diminution in value of the information collection. Thus, we agree to publish in our regular reports data from Part I of the form only once it has been aggregated, for example by provider class, regardless of whether parties request confidential treatment on the broadband portion of the form.

13. *Parts II and III: Local Competition Data.* With respect to the data filed in Parts II and III of the form concerning wireline and wireless local telephone service, we will also report data in a manner that aggregates and does not identify the identity of providers where providers have requested non-disclosure of the data. We do not decide in advance to publish all of the data filed in Part II of the form in an aggregated fashion, however, because it is our experience that portions of this data are already made publicly available by the individual companies or from other sources. We note, for example, that the local competition market is characterized by incumbent firms that routinely make available their line count data, similar to that reported in Part II of the form. Similarly, competitive LECs in some states are required to submit line count data and this information is routinely made publicly available. We expect that such providers reporting data in Part II of the form will not request non-disclosure of data that has already been made publicly available and that the Commission will be able to publish this data in our reports. Concerning the Part III mobile telephony data, we recognize that mobile telephony providers argue that state-by-state subscriber counts are not routinely made publicly available. We do not, however, have sufficient evidence to make an across-the-board finding at this time. Accordingly, providers submitting data concerning these services may check the box on Form 477 to request confidential treatment of their data, which will afford them the protection of the Commission's confidentiality rules.

14. We emphasize that apart from publicly available information, which we anticipate reporting, we intend to publish the local competition data in our local competition reports only to the level of detail necessary to provide an understanding of how local competition is developing. We therefore agree with those commenters who suggest that we can aggregate much of the data—for example, by carrier class and to the state level—so that it does not identify the individual provider in our regularly published reports. This reporting approach, as well as providers' ability to request confidential treatment under our rules, should maximize the level of voluntary compliance with the information collection.

15. *Part V: Zip Code Data.* In the particular case of Zip Code data (*i.e.*, the lists of Zip Codes where service is offered), the Commission intends to

report information on Zip Codes served, but it will not release the identity of specific providers in a given Zip Code. Public release of Zip Code data in this manner is appropriate, we believe, because it does not reveal information about the actual subscribership levels for any particular provider, but only indicates the presence of one or more providers in the given Zip Code. Although we think it unlikely that any provider would consider this limited release to reveal competitively sensitive information, we do not limit parties' ability to seek non-disclosure of such data under the Commission's rules.

16. *Sharing data with State Commissions.* Finally, because we wish to maximize the value of this information collection for states, we conclude that the Chief of the Common Carrier Bureau may release the information collected under this program to the state commissions, subject to certain conditions. A state commission may view all data submitted on a carrier specific basis, by entities filing data for that commission's state, provided that the state has appropriate protections in place (which may include confidentiality agreements or designation of information as proprietary under state law) that would preclude disclosure of any confidential information. However, where state laws afford less protection than federal FOIA laws, the higher federal standard will prevail. We are aware that there are two states that have "open records" statutes that may prevent the state from providing confidential protection for sensitive provider information. In these situations, we will work with these state commissions to enable them to obtain access to such information in a manner that addresses the state's need for this information and also protects the confidential nature of the provider's sensitive information. We anticipate that these actions will give state commissions a valuable and unique view into the state of local competition and broadband deployment in their states. In addition, we hope that this will further our goal of reducing the overall reporting burdens placed on entities in these markets by minimizing the need for additional information collection programs at the state level.

17. We conclude that these policies, taken as a whole, most effectively balance provider concerns with our broader goals for this proceeding. As stated in the Notice, by making the information available, consumers, investors, and policy makers will be better able to make informed decisions on the development of these markets. Such information has value because a better-informed marketplace promotes a more efficient marketplace. Also, by allowing public release of as much of the information as possible, associations, scholars, and others will be able to use the information in their independent analyses of Commission policies, thereby aiding the Commission in crafting regulations that address specific market problems and eliminating those regulations that have outlived their usefulness.

18. *Electronic Filing:* We adopt the method proposed in the Notice for collection of the information through electronic filing except to modify the allowable methods of submission. Specifically, the form will be made available to reporting entities on the Common Carrier Bureau's website at <www.fcc.gov/broadband/data> and will utilize Excel 97 software, as well as other comparable spreadsheet software programs. Carriers and other entities that must comply with this requirement may submit their completed forms to a specified e-mail address or forward to the Commission diskette copies. Regardless of whether the reporting entity e-mails its submission or mails diskette copies, an officer of the reporting entity must submit a "Certification Statement" to the Commission attesting to the truthfulness of the data submitted. We conclude that this filing system will ensure, for both the reporting entities and the Commission, that the burdens of the program are minimized and that unnecessary expenditures for compliance are not incurred. Also, by allowing diskette submissions, reporting parties seeking confidential treatment can further ensure that the information submitted is protected.

19. To ensure that this information collection program does not outlive its usefulness, the reporting requirement adopted in the Order will terminate in five years, unless the Commission takes affirmative steps to preserve it.

20. *Data to be Reported:* We describe, in the Order, the specific items set out in the data collection form. A brief description of the data collection form follows, with greater detail found in the complete Order.

21. Part I of the form collects information about the number of broadband lines in service to consumers. This includes information about both "full broadband" lines, with information carrying capacity in excess of 200 Kbps in both directions, simultaneously, and asymmetric "one way broadband" lines, with information carrying capacity in excess of 200 Kbps in one direction but not both.

22. Part II of the form collects information from incumbent LECs and competitive LECs about the number of voice-grade equivalent lines and fixed wireless channels in service to provide local exchange or exchange access service. We also require respondents to provide information about the extent to which they use their own facilities in providing these lines or wireless channels, and the extent to which they use the facilities or services of other LECs in doing so.

23. Part III of the form collects information about mobile telephony subscribership.

Final Paperwork Reduction Act of 1995 Analysis

24. As required by the Paperwork Reduction Act of 1995, the *Local Competition and Broadband Deployment Notice* invited the general public and the Office of Management and Budget (OMB) to comment on the proposed information collection requirements contained in the Notice. On December 22, 1999, OMB approved the proposed information collection, as submitted to OMB. [1] In this Order, we adopt the proposed Local Competition and Broadband Reporting form, but modify our proposal to reflect comments received from OMB and other commenters. The revised Local Competition and Broadband Reporting has been approved by OMB. The OMB Control Number is 3060–0816.

Final Regulatory Flexibility Act Analysis

25. As required by the Regulatory Flexibility Act, 5 U.S.C. 603 (RFA), an Initial Regulatory Flexibility Analysis (IRFA) was incorporated into the Notice issued in this proceeding, FCC 99–301, October 22, 1999. The Commission sought written comment in the Notice, including comments on the IRFA. The Commission's Final Regulatory Flexibility Analysis (FRFA) in this Order conforms to the RFA, as amended by the Contract With America Advancement Act of 1996 (CWAAA), Public Law 104–121, 110 Stat. 847 (1996).

(1) Need for, and Objectives of, the Local Competition and Broadband Reporting Order

26. The Commission initiated this proceeding to determine whether it should require certain providers of communications services to report a limited amount of information about the

[1] *See* Letter from Donald R. Arbuckle, Office of Management and Budget, to Judy Boley, Federal Communications Commission (Dec. 22, 1999).

development of local telephone competition and the deployment of broadband services as mandated by the Telecommunications Act of 1996. In this Order, we adopt rules to collect basic information about two important aspects of communications: the status of local telephone service competition and the deployment of "advanced telecommunications capability." The 1996 Act—in particular, sections 251 and 271—tasked the Commission and the states with important roles in opening local telephone markets to competition. Moreover, the Commission needs timely and reliable information on broadband deployment given that section 706 of the 1996 Act requires the Commission to issue periodic reports on the state of broadband deployment. The information collected pursuant to this program will materially improve our ability to develop, evaluate, and revise policy in these critical areas and will provide valuable benchmarks not only for this Commission but for other policy makers and consumers. Further, the information collection program adopted in this Order is the least burdensome means available to fulfill these statutory obligations.

(2) Summary of Significant Issues Raised by Public Comment in Response to the IRFA

27. In the IRFA, we stated that we would seek to minimize the burden imposed on smaller entities by establishing thresholds for reporting that balanced the needs of the Commission to receive data on the development of local competition and deployment of broadband against the burden such reporting places on smaller entities. In response to the Notice, the Commission received comments from 37 parties and held a series of *ex parte* meetings with potential respondents to the information collection adopted in this Order. Among those parties, only the Office of Advocacy, United States Small Business Administration (SBA) and the Organization for the Promotion and Advancement of Small Telecommunications Companies (OPASTCO), commented specifically on the IRFA. We note that many other commenters raised issues about the proposed rules and we encourage readers of this FRFA to consult the complete text of this Order, which describes in detail our analysis of commenter proposals.

28. In its comments to the IRFA, SBA expresses concern that the proposed threshold for reporting broadband data (1,000 broadband lines nationwide) may be set too low and, therefore, include a number of smaller entities that would be unduly burdened by the reporting requirement. As a result, SBA recommends that the Commission raise the reporting threshold to at least 5,000 lines nationwide or "significantly reduce the burden on the small businesses that would be replying." OPASTCO, in its comments, commends the Commission for its efforts to exempt smaller entities and urges the Commission to adopt an existing SBA definition of small companies: those with fewer than 1,500 employees. We note that other commenters, while not in direct response to the IRFA, disagree with SBA and OPASTCO and urge the Commission to adopt its proposed reporting threshold.

29. In an effort to balance the needs of the Commission with the costs our data gathering may place on smaller entities, the Commission has modified the thresholds for reporting and the frequency of filing reports, and other aspects of the requirements. We believe that these modifications satisfy SBA's request that we significantly reduce the burdens for those small entities that must comply. For example, by adopting a state level threshold (250 broadband lines in a given state), we ensure that reporting entities have a significant presence in a given state, before having to complete the form for that state. Moreover, we conclude that this threshold is set to allow the Commission to comply with Congress' charge in section 706 of the 1996 Act to determine whether advanced telecommunications capability, commonly known as "broadband," is being deployed to *all* Americans. In order to gain the comprehensive understanding—as called for in section 706—of the broadband market, particularly in rural and inner-city areas and among demographic groups that are traditionally underserved, it is necessary to gather data from entities that are most likely to serve these areas and groups, which include some smaller entities.

30. Among the other actions taken to reduce the overall burden on small entities, we decouple the broadband and local competition reporting thresholds. In the Notice, the Commission tentatively concluded that any provider meeting the threshold requirement for the broadband part of the form would be required to complete the local competition part of the form, whether or not the entity met the threshold for that part, if the entity provides services listed in that part of the form. We note that the representatives of traditionally smaller providers opposed this linkage of reporting thresholds. By eliminating this linkage, we reduce reporting burdens on these traditionally smaller providers.

31. To further reduce the potential burden this data gathering program may place on smaller entities the Commission, in this Order, has also reduced the frequency of reporting from quarterly to semi-annually. In this regard, we accept the suggestions of many commenters that reducing the frequency of reporting is a measurable way to decrease the burden placed on reporting entities. We necessarily decline SBA's invitation to adopt an annual filing basis, because we conclude that the rapidly changing nature of the local competition and broadband markets necessitate more regular data collections.

32. Supporting the proposal in the Notice, SBA further encourages the Commission to collect information on a statewide basis. In this Order, we adopt our proposal and require providers to report data on a state-by-state basis. To supplement this data, we ask providers of broadband and local exchange services to provide a list of the Zip Codes in which they serve at least one customer. We conclude that reporting scheme best balances our need to achieve geographically disaggregated information while minimizing burdens on all entities, including small entities.

33. Finally, we note SBA's suggestion that small carriers be allowed to file data on a voluntary basis. While the Commission concludes that it is necessary to adopt a mandatory reporting mechanism, we agree with SBA that smaller, exempted providers should be invited to file data on a voluntary basis. Thus, we encourage small providers to file the new FCC Form 477 even if they do not meet the reporting thresholds for mandatory reporting.

34. Overall, we believe that our approach (*e.g.*, changing thresholds to the state level, decoupling the thresholds for different parts of the form, and reducing the reporting frequency to semi-annually) will result in a program that is not overly burdensome on reporting entities, and thus balances the concerns raised by SBA and other commenters with the Commission's need to gain a better understanding of developments in these markets.

(3) Description and Estimate of the Number of Small Entities to Which Rules Will Apply

35. In the IRFA, the Commission included a description and estimate of the number of small entities to which its proposed rules would apply. No commenters addressed the issue. In this

Order, the Commission decides that local exchange carriers and providers of mobile telephony services that serve 10,000 or more voice-grade equivalent lines or wireless channels (or mobile telephony subscribers) in a given state and any entity that provides 250 or more full or one-way broadband lines or channels in a given state, must report data about those services provided in that state. Based on data available to it at present, the Commission estimates that approximately 200 of the nation's local exchange carriers and between 100–200 mobile telephony providers will be required to comply with the requirement. We do not have concrete data on which to base a precise estimate of the number of broadband providers that may be required to report. We set out, however, a detailed description of the types of entities that may be required to comply with the reporting requirement and we detail our understanding of the number of small entities within each of these categories.

36. To estimate the number of small entities that will be affected by the rules, we first consider the statutory definition of "small entity" under the RFA. The RFA generally defines "small entity" as having the same meaning as the term "small business," "small organization," and "small governmental jurisdiction." In addition, the term "small business" has the same meaning as the term "small business concern" under the Small Business Act, unless the Commission has developed one or more definitions that are appropriate to its activities. Under the Small Business Act, a "small business concern" is one that: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) meets any additional criteria established by the Small Business Administration (SBA). The SBA has defined a small business for Standard Industrial Classification (SIC) categories 4812 (Radiotelephone Communications) and 4813 (Telephone Communications, Except Radiotelephone) to be small entities when they have no more than 1,500 employees. We first discuss the number of small telephone companies falling within these SIC categories, then attempt to refine further those estimates to correspond with the categories of telephone companies that are commonly used under our rules.

37. The most reliable source of information regarding the total numbers of common carrier and related providers nationwide, as well as the numbers of commercial wireless entities, appears to be data the Commission publishes annually in its *Carrier Locator* report, derived from filings made in connection with the Telecommunications Relay Service (TRS). According to data in the most recent report, there are 4,144 interstate carriers. These carriers include, *inter alia*, local exchange carriers, wireline carriers and service providers, interexchange carriers, competitive access providers, operator service providers, pay telephone operators, providers of telephone toll service, providers of telephone exchange service, and resellers.

38. We have included small incumbent LECs in this present RFA analysis. As noted above, a "small business" under the RFA is one that, *inter alia*, meets the pertinent small business size standard (*e.g.*, a telephone communications business having 1,500 or fewer employees), and "is not dominant in its field of operation." The SBA's Office of Advocacy contends that, for RFA purposes, small incumbent LECs are not dominant in their field of operation because any such dominance is not "national" in scope. We have therefore included small incumbent LECs in this RFA analysis, although we emphasize that this RFA action has no effect on FCC analyses and determinations in other, non-RFA contexts.

39. *Total Number of Telephone Companies Affected.* The United States Bureau of the Census ("the Census Bureau") reports that, at the end of 1992, there were 3,497 firms engaged in providing telephone services, as defined therein, for at least one year. This number contains a variety of different categories of carriers, including local exchange carriers, interexchange carriers, competitive access providers, cellular carriers, mobile service carriers, operator service providers, pay telephone operators, PCS providers, covered SMR providers, and resellers. It seems certain that some of those 3,497 telephone service firms may not qualify as small entities because they are not "independently owned and operated." For example, a PCS provider that is affiliated with an interexchange carrier having more than 1,500 employees would not meet the definition of a small business. It seems reasonable to conclude, therefore, that fewer than 3,497 telephone service firms are small entity telephone service firms that may be affected by the decisions and rules in the Order.

40. *Wireline Carriers and Service Providers.* SBA has developed a definition of small entities for telephone communications companies other than radiotelephone companies. The Census Bureau reports that, there were 2,321 such telephone companies in operation for at least one year at the end of 1992. According to SBA's definition, a small business telephone company other than a radiotelephone company is one employing no more than 1,500 persons. All but 26 of the 2,321 non-radiotelephone companies listed by the Census Bureau were reported to have fewer than 1,000 employees. Thus, even if all 26 of those companies had more than 1,500 employees, there would still be 2,295 non-radiotelephone companies that might qualify as small entities. Although it seems certain that some of these carriers are not independentiy owned and operated, we are unable at this time to estimate with greater precision the number of wireline carriers and service providers that would qualify as small business concerns under SBA's definition. Consequently, we estimate that there are fewer than 2,295 small entity telephone communications companies other than radiotelephone companies that may be affected by the decisions and rules in the Order.

41. *Local Exchange Carriers, Interexchange Carriers, Competitive Access Providers, Operator Service Providers, and Resellers.* Neither the Commission nor SBA has developed a definition of small local exchange carriers (LECs), interexchange carriers (IXCs), competitive access providers (CAPs), operator service providers (OSPs), or resellers. The closest applicable definition for these carrier-types under SBA rules is for telephone communications companies other than radiotelephone (wireless) companies. The most reliable source of information regarding the number of these carriers nationwide of which we are aware appears to be the data that we collect annually in connection with the Telecommunications Relay Service (TRS). According to our most recent data, there are 1,560 LECs and CAPs, 171 IXCs, 24 OSPs, and 388 resellers. Although it seems certain that some of these carriers are not independently owned and operated, or have more than 1,500 employees, we are unable at this time to estimate with greater precision the number of these carriers that would qualify as small business concerns under SBA's definition. Consequently, we estimate that there are fewer than 1,410 small entity LECs, 151 IXCs, 129 CAPs, 32 OSPs, and 351 resellers that may be affected by the decisions and rules in the Order.

42. *Wireless (Radiotelephone) Carriers.* SBA has developed a definition of small entities for radiotelephone (wireless) companies. The Census Bureau reports that there were 1,176 such companies in operation for at least one year at the end of 1992.

According to SBA's definition, a small business radiotelephone company is one employing no more than 1,500 persons. The Census Bureau also reported that 1,164 of those radiotelephone companies had fewer than 1,000 employees. Thus, even if all of the remaining 12 companies had more than 1,500 employees, there would still be 1,164 radiotelephone companies that might qualify as small entities if they are independently owned are operated. Although it seems certain that some of these carriers are not independently owned and operated, we are unable at this time to estimate with greater precision the number of radiotelephone carriers and service providers that would qualify as small business concerns under SBA's definition. Consequently, we estimate that there are fewer than 1,164 small entity radiotelephone companies that may be affected by the decisions and rules in the Order.

43. *Cellular, PCS, SMR and Other Mobile Service Providers.* In an effort to further refine our calculation of the number of radiotelephone companies that may be affected by the rules adopted herein, we consider the data that we collect annually in connection with the TRS for the subcategories Wireless Telephony (which includes Cellular, PCS, and SMR) and Other Mobile Service Providers. We will utilize the closest applicable definition under SBA rules—which, for both categories, is for telephone companies other than radiotelephone (wireless) companies, however, to the extent that the Commission has adopted definitions for small entities providing PCS and SMR services, we discuss those definitions. According to our most recent TRS data, 732 companies reported that they are engaged in the provision of Wireless Telephony services and 23 companies reported that they are engaged in the provision of Other Mobile Services. Although it seems certain that some of these carriers are not independently owned and operated, or have more than 1,500 employees, we are unable at this time to estimate with greater precision the number of Wireless Telephony Providers and Other Mobile Service Providers, except as described below, that would qualify as small business concerns under SBA's definition. Consequently, we estimate that there are fewer than 732 small entity Wireless Telephony Providers and fewer than 23 small entity Other Mobile Service Providers that may be affected by the decisions and rules in the Order.

44. *Broadband PCS Licensees.* The broadband PCS spectrum is divided into six frequency blocks designated A through F, and the Commission has held auctions for each block. The Commission defined "small entity" for Blocks C and F as an entity that has average gross revenues of less than $40 million in the three previous calendar years. For Block F, an additional classification for "very small business" was added, and is defined as an entity that, together with its affiliates, has average gross revenues of not more than $15 million for the preceding three calendar years. These regulations defining "small entity" in the context of broadband PCS auctions have been approved by SBA. No small businesses within the SBA-approved definition bid successfully for licenses in Blocks A and B. There were 90 winning bidders that qualified as small entities in the Block C auctions. A total of 93 small and very small business bidders won approximately 40% of the 1,479 licenses for Blocks D, E, and F. However, licenses for Blocks C through F have not been awarded fully, therefore there are few, if any, small businesses currently providing PCS services. Based on this information, we estimate that the number of small broadband PCS licenses will include the 90 winning C Block bidders and the 93 qualifying bidders in the D, E, and F blocks, for a total of 183 small PCS providers as defined by SBA and the Commissioner's auction rules.

45. *SMR Licensees.* Pursuant to 47 CFR 90.814(b)(1), the Commission has defined "small entity" in auctions for geographic area 800 MHz and 900 MHz SMR licenses as a firm that had average annual gross revenues of less than $15 million in the three previous calendar years. The definition of a "small entity" in the context of 800 MHz SMR has been approved by the SBA, and approval for the 900 MHz SMR definition has been sought. The rules may apply to SMR providers in the 800 MHz and 900 MHz bands that either hold geographic area licenses or have obtained extended implementation authorizations. We do not know how many firms provide 800 MHz or 900 MHz geographic area SMR service pursuant to extended implementation authorizations, nor how many of these providers have annual revenues of less than $15 million. Consequently, we estimate, for purposes of this FRFA, that all of the extended implementation authorizations may be held by small entities, some of which may be affected by the decisions and rules in the Order.

46. The Commission recently held auctions for geographic area licenses in the 900 MHz SMR band. There were 60 winning bidders who qualified as small entities in the 900 MHz auction. Based on this information, we estimate that the number of geographic area SMR licensees that may be affected by the decisions and rules in the Order includes these 60 small entities. No auctions have been held for 800 MHz geographic area SMR licenses. Therefore, no small entities currently hold these licenses. A total of 525 licenses will be awarded for the upper 200 channels in the 800 MHz geographic area SMR auction. The Commission, however, has not yet determined how many licenses will be awarded for the lower 230 channels in the 800 MHz geographic area SMR auction. There is no basis, moreover, on which to estimate how many small entities will win these licenses. Given that nearly all radiotelephone companies have fewer than 1,000 employees and that no reliable estimate of the number of prospective 800 MHz licensees can be made, we conclude, for purposes of this FRFA, that all of the licenses may be awarded to small entities, some of which may be affected by the decisions and rules in the Order.

47. *220 MHz Radio Service—Phase I Licensees.* The 220 MHz service has both Phase I and Phase II licenses. There are approximately 1,515 such non-nationwide licensees and four nationwide licensees currently authorized to operate in the 220 MHz band. The Commission has not developed a definition of small entities specifically applicable to such incumbent 220 MHz Phase I licensees. To estimate the number of such licensees that are small businesses, we apply the definition under the SBA rules applicable to Radiotelephone Communications companies. According to the Bureau of the Census, only 12 radiotelephone firms out of a total of 1,178 such firms which operated during 1992 had 1,000 or more employees. Therefore, if this general ratio continues to 1999 in the context of Phase I 220 MHz licensees, we estimate that nearly all such licensees are small businesses under the SBA's definition, some of which may be affected by the decisions and rules in the Order.

48. *220 MHz Radio Service—Phase II Licensees.* The Phase II 220 MHz service is a new service, and is subject to spectrum auctions. In the 220 MHz *Third Report and Order* we adopted criteria for defining small businesses and very small businesses for purposes of determining their eligibility for special provisions such as bidding credits and installment payments. We have defined a small business as an entity that, together with its affiliates and controlling principals, has average

gross revenues not exceeding $15 million for the preceding three years. Additionally, a very small business is defined as an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than $3 million for the preceding three years. An auction of Phase II licenses commenced on September 15, 1998, and closed on October 22, 1998. 908 licenses were auctioned in 3 different-sized geographic areas: three nationwide licenses, 30 Regional Economic Area Group Licenses, and 875 Economic Area (EA) Licenses. Of the 908 licenses auctioned, 693 were sold. Companies claiming small business status won: one of the Nationwide licenses, 67% of the Regional licenses, and 54% of the EA licenses. As of October 7, 1999, the Commission had granted 681 of the Phase II 220 MHz licenses won at a first auction and an additional 221 Phase II licenses won at a second auction.

49. *Narrowband PCS.* The Commission has auctioned nationwide and regional licenses for narrowband PCS. There are 11 nationwide and 30 regional licensees for narrowband PCS. The Commission does not have sufficient information to determine whether any of these licensees are small businesses within the SBA-approved definition for radiotelephone companies. At present, there have been no auctions held for the major trading area (MTA) and basic trading area (BTA) narrowband PCS licenses. The Commission anticipates a total of 561 MTA licenses and 2,958 BTA licenses will be awarded by auction. Such auctions have not yet been scheduled, however. Given that nearly all radiotelephone companies have no more than 1,500 employees and that no reliable estimate of the number of prospective MTA and BTA narrowband licensees can be made, we assume, for purposes of this FRFA, that all of the licenses will be awarded to small entities, as that term is defined by the SBA.

50. *Rural Radiotelephone Service.* The Commission has not adopted a definition of small entity specific to the Rural Radiotelephone Service. A significant subset of the Rural Radiotelephone Service is the Basic Exchange Telephone Radio Systems (*BETRS*). We will use the SBA's definition applicable to radiotelephone companies, *i.e.*, an entity employing no more than 1,500 persons. There are approximately 1,000 licensees in the Rural Radiotelephone Service, and we estimate that almost all of them qualify as small entities under the SBA's definition.

51. *Air-Ground Radiotelephone Service.* The Commission has not adopted a definition of small entity specific to the Air-Ground Radiotelephone Service. Accordingly, we will use the SBA's definition applicable to radiotelephone companies, *i.e.*, an entity employing no more than 1,500 persons. There are approximately 100 licensees in the Air-Ground Radiotelephone Service, and we estimate that almost all of them qualify as small entities under the SBA definition.

52. *Private Land Mobile Radio (PLMR).* PLMR systems serve an essential role in a range of industrial, business, land transportation, and public safety activities. These radios are used by companies of all sizes operating in all U.S. business categories. The Commission has not developed a definition of small entity specifically applicable to PLMR licensees due to the vast array of PLMR users. For the purpose of determining whether a licensee is a small business as defined by the SBA, each licensee would need to be evaluated within its own business area. The Commission is unable at this time to estimate the number of, if any, small businesses that could be impacted by the proposed rules. However, the Commission's 1994 Annual Report on PLMRs indicates that at the end of fiscal year 1994 there were 1,087,267 licensees operating 12,481,989 transmitters in the PLMR bands below 512 MHz. Because any entity engaged in a commercial activity is eligible to hold a PLMR license, the rules in this context could potentially impact every small business in the United States. We note, however, that because the vast majority of these licensees are end-users, not providers of telephony or broadband services, they would not be directly affected by the rules adopted in this Order.

53. *Fixed Microwave Services.* Microwave services include common carrier, private-operational fixed, and broadcast auxiliary radio services. At present, there are approximately 22,015 common carrier fixed licensees in the microwave services. The Commission has not yet defined a small business with respect to microwave services. For purposes of this FRFA, we will utilize the SBA's definition applicable to radiotelephone companies—*i.e.*, an entity with no more than 1,500 persons. We estimate, for this purpose, that all of the Fixed Microwave licensees (excluding broadcast auxiliary licensees) would qualify as small entities under the SBA definition for radiotelephone companies.

54. *Offshore Radiotelephone Service.* This service operates on several UHF TV broadcast channels that are not used for TV broadcasting in the coastal area of the states bordering the Gulf of Mexico. At present, there are approximately 55 licensees in this service. We are unable at this time to estimate the number of licensees that would qualify as small entities under the SBA's definition for radiotelephone communications.

55. *Wireless Communications Services.* This service can be used for fixed, mobile, radio location and digital audio broadcasting satellite uses. The Commission defined "small business" for the wireless communications services (WCS) auction as an entity with average gross revenues of $40 million for each of the three preceding years, and a "very small business" as an entity with average gross revenues of $15 million for each of the three preceding years. The Commission auctioned geographic area licenses in the WCS service. In the auction, there were seven winning bidders that qualified as very small business entities, and one that qualified as a small business entity. We conclude that the number of geographic area WCS licensees that may be affected by the decisions and rules adopted in the Order includes these eight entities.

56. *Satellite Services.* The Commission has not developed a definition of small entities applicable to satellite service licensees. Therefore, the applicable definition of small entity is generally the definition under the SBA rules applicable to Communications Services, Not Elsewhere Classified (NEC). This definition provides that a small entity is expressed as one with $11.0 million or less in annual receipts. According to the Census Bureau, there were a total of 848 communications services providers, NEC, in operation in 1992, and a total of 775 had annual receipts of less than $9.999 million. The Census report does not provide more precise data.

57. In addition to the estimates provided above, we consider certain additional entities that may be affected by the data collection from broadband service providers. Because section 706 requires us to monitor the deployment of broadband regardless of technology or transmission media employed, we anticipate that some broadband service providers will not provide telephone service. Accordingly, we describe below other types of firms that may provide broadband services, including cable companies, MDS providers, and utilities, among others.

58. *Cable services or systems.* The SBA has developed a definition of small

entities for cable and other pay television services, which includes all such companies generating $11 million or less in revenue annually. This definition includes cable systems operators, closed circuit television services, direct broadcast satellite services, multipoint distribution systems, satellite master antenna systems and subscription television services. According to the Census Bureau data from 1992, there were 1,788 total cable and other pay television services and 1,423 had less than $11 million in revenue.

59. The Commission has developed its own definition of a small cable system operator for the purposes of rate regulation. Under the Commission's rules, a "small cable company" is one serving fewer than 400,000 subscribers nationwide. Based on our most recent information, we estimate that there were 1,439 cable operators that qualified as small cable system operators at the end of 1995. Since then, some of those companies may have grown to serve over 400,000 subscribers, and others may have been involved in transactions that caused them to be combined with other cable operators. Consequently, we estimate that there are fewer than 1,439 small entity cable system operators.

60. The Communications Act also contains a definition of a small cable system operator, which is "a cable operator that, directly or through an affiliate, serves in the aggregate fewer than 1 percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed $250,000,000." The Commission has determined that there are 66,000,000 subscribers in the United States. Therefore, we found that an operator serving fewer than 660,000 subscribers shall be deemed a small operator, if its annual revenues, when combined with the total annual revenues of all of its affiliates, do not exceed $250 million in the aggregate. Based on available data, we find that the number of cable operators serving 660,000 subscribers or less totals 1,450. We do not request nor do we collect information concerning whether cable system operators are affiliated with entities whose gross annual revenues exceed $250,000,000, and thus are unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act. It should be further noted that recent industry estimates project that there will be a total of 66,000,000 subscribers, and we have based our fee revenue estimates on that figure.

61. *Multipoint Distribution Systems (MDS):* The Commission has defined "small entity" for the auction of MDS as an entity that, together with its affiliates, has average gross annual revenues that are not more than $40 million for the preceding three calendar years. This definition of a small entity in the context of MDS auctions has been approved by the SBA. The Commission completed its MDS auction in March 1996 for authorizations in 493 basic trading areas (BTAs). Of 67 winning bidders, 61 qualified as small entities.

62. MDS is also heavily encumbered with licensees of stations authorized prior to the auction. The SBA has developed a definition of small entities for pay television services, which includes all such companies generating $11 million or less in annual receipts. This definition includes multipoint distribution systems, and thus applies to MDS licensees and wireless cable operators which did not participate in the MDS auction. Information available to us indicates that there are 832 of these licensees and operators that do not generate revenue in excess of $11 million annually. Therefore, for purposes of this FRFA, we find there are approximately 892 small MDS providers as defined by the SBA and the Commission's auction rules, some which may be affected by the decisions and rules adopted in the Order.

63. *Electric Services (SIC 4911):* The SBA has developed a definition for small electric utility firms. The Census Bureau reports that a total of 1379 electric utilities were in operation for at least one year at the end of 1992. According to SBA, a small electric utility is an entity whose gross revenues did not exceed five million dollars in 1992. The Census Bureau reports that 447 of the 1379 firms listed had total revenues below five million dollars.

64. *Electric and Other Services Combined (SIC 4931):* The SBA has classified this entity as a utility whose business is less than 95% electric in combination with some other type of service. The Census Bureau reports that a total of 135 such firms were in operation for at least one year at the end of 1992. The SBA's definition of a small electric and other services combined utility is a firm whose gross revenues did not exceed five million dollars in 1992. The Census Bureau reported that 45 of the 135 firms listed had total revenues below five million dollars.

65. *Combination Utilities, Not Elsewhere Classified (SIC 4939):* The SBA defines this utility as providing a combination of electric, gas, and other services which are not otherwise classified. The Census Bureau reports that a total of 79 such utilities were in operation for at least one year at the end of 1992. According to SBA's definition, a small combination utility is a firm whose gross revenues did not exceed five million dollars in 1992. The Census Bureau reported that 63 of the 79 firms listed had total revenues below five million dollars.

(4) Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

66. The very focus of this proceeding is whether the Commission should require certain providers of communications services to report a limited amount of information about the development of local telephone competition and the deployment of broadband services. The Order concludes that the Commission should undertake such a data collection and that local exchange carriers and providers of mobile telephony services that serve 10,000 or more voice-grade equivalent lines or channels statewide, and any entity that provides 250 or more full or one-way broadband lines or channels statewide, should report specifically targeted information. The Order sets out in detail the types of providers that should report, exempting smaller providers, frequency of reports, data to be reported, and method of reporting. In particular, we conclude in the Order that given the comprehensive data to be obtained from large and medium size providers, it can exempt most small providers from completing the survey without materially affecting its ability to assess the development of local telephone competition and the deployment of broadband services.

(5) Steps Taken to Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

67. The most significant step taken to minimize the impact of these rules on small entities is the adoption of reporting thresholds. For example, the Commission makes specific provision to exempt most smaller carriers from the requirement to report local telephone competition data. The Commission concludes that carriers with fewer than 10,000 statewide voice-grade equivalent lines or channels (or mobile telephony subscribers, in the case of mobile telephony providers) should be exempted from the reporting requirement for that state. Based on this exemption, the Commission estimates that only approximately 200 of the nation's largest local exchange carriers would remain subject to the

requirement. Similarly, the Commission exempts the smallest broadband providers by adopting a broadband reporting threshold. Thus, firms that provide fewer than 250 full or one-way broadband lines or wireless channels in a given state need not report data for that state.

68. Among significant alternatives, the Commission considered whether it might rely on publicly available data or voluntary surveys, in lieu of a mandatory data collection program. The Commission concludes other publicly available information sources present less than complete pictures of actual conditions and trends in developing local service markets and in the deployment of broadband. Further, the Commission considered the need for, and size of, its exemptions for small entities. The Commission concludes that the thresholds adopted will allow it to exempt most smaller carriers from completing the form without materially affecting its ability to assess the development of local competition and the deployment of broadband services. The Commission also accepted other suggestions that will reduce burdens on entities, including decoupling reporting thresholds, adopting a less frequent reporting schedule, and allowing providers to report on a state-by-state basis.

69. *Report to Congress.* The Commission will send a copy of the Local Competition and Broadband Reporting Report and Order, including this FRFA, in a report to be sent to Congress pursuant to the Small Business Regulatory Enforcement Fairness Act of 1996, see 5 U.S.C. 801(a)(1)(A). In addition, the Commission will send a copy of the Local Competition and Broadband Reporting Report and Order, including FRFA, to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the Local Competition and Broadband Reporting Report and Order and FRFA (or summaries thereof) will also be published in the **Federal Register**. *See* 5 U.S.C. 604(b).

Ordering Clause

70. Accordingly, *it is ordered* that, pursuant to sections 1–5, 10, 11, 201–205, 215, 218–220, 251–271, 303(r), 332, 403, 502, and 503 of the Communications Act of 1934, as amended, 47 U.S.C. 151–155, 160, 161, 201–205, 215, 218–220, 251–271, 303(r), 332, 403, 502, and 503 and pursuant to section 706 of the Telecommunications Act of 1996, 47 U.S.C. 157 nt, this order, with all attachments, is hereby adopted.

71. That the requirements and regulations established in this Order shall become effective May 12, 2000. The Commission shall place a notice in the **Federal Register** announcing the effective date of the requirements and regulations adopted herein.

72. That providers subject to the requirements and regulation established in this Order shall complete and file the Local Competition and Broadband Reporting Form (FCC Form 477) no later than May 15, 2000 and semi-annually thereafter.

73. That the Commission's Consumer Information Bureau, Reference Information Center, shall send a copy of this Local Competition and Broadband Reporting Order, including the Final Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with paragraph 603(a) of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* (1981).

Paperwork Reduction Act

The action contained in this Order summarized here contains a modified information collection.

OMB Approval Number: 3060–0816.

Title: "Local Competition and Broadband Reporting, CC Docket No. 99–301."

Form Number: FCC Form 477.

Type of Review: Revision of Existing Collection.

Respondents: Business or Not-for-profit institutions, including small businesses.

Burden Estimate: Average burden per respondent—

Number of Respondents: up to 255.

Estimated Time Per Response Per State: 11.1.

Number of Reports Per Year: 2.

Average States Per Respondents: 5.3.

Total Annual Burden: Up to 29,924 person-hours.

Estimated Costs per Respondent: $0.00.

Needs and Uses: The information collection will be used by the Commission to gather information on the state of the development of local competition and broadband deployment. Without such information, the Commission faces significant difficulty in assessing the development of these markets and, therefore, is less able to fulfill its statutory responsibilities in accordance with the Communications Act of 1934, as amended.

List of Subjects

47 CFR Parts 1 and 43

Communications common carriers, Reporting and recordkeeping requirements, Telecommunications, Telephone.

47 CFR Part 20

Communications common carriers. Federal Communications Commission.

William F. Caton,
Deputy Secretary.

Rule Changes

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR Parts 1, 20 and 43 as follows:

PART 1—PRACTICES AND PROCEDURES

1. The authority citation for part 1 is revised to read as follows:

Authority: 47 U.S.C. 151, 154(i), 154(j), 155, 225, and 303(r), 309.

2. In part 1, subpart U is added to read as follows:

Subpart U—Implementation of Section 706 of the Telecommunications Act of 1996; Commission Collection of Advanced Telecommunications Capability Data

Sec.
1.6000 Purpose.
1.6001 Scope and content of filed reports.
1.6002 Frequency of reports.

§ 1.6000 Purpose.

The purpose of this subpart is to set out the terms by which certain commercial and government-controlled entities report data to the Commission concerning the deployment of advanced telecommunications capability, defined pursuant to 47 U.S.C. 157 as "high-speed, switched, broadband telecommunications capability that enables users to originate and receive high-quality voice, data, graphics, and video telecommunications using any technology," and the deployment of services that are competitive with advanced telecommunications capability.

§ 1.6001 Scope and content of filed reports.

(a) Definitions. Terms used in this subpart have the following meanings:

(1) *Facilities-based providers.* Those entities that provide broadband services over their own facilities or over Unbundled Network Elements (UNEs), special access lines, and other leased lines and wireless channels that the entity obtains from a communications service provider and equips as broadband.

(2) *Full broadband lines or wireless channels.* Lines or wireless channels

with information carrying capability in excess of 200 Kbps in both directions simultaneously.

(3) *One-way broadband lines or wireless channels.* Lines or wireless channels with information carrying capability in excess of 200 Kbps in at least one direction, but not both.

(4) *Own facilities.* Lines and wireless channels the entity actually owns and facilities that it obtained the right to use from other entities as dark fiber or satellite transponder capacity.

(b) All commercial and government-controlled entities, including but not limited to common carriers and their affiliates (as defined in 47 U.S.C. 153 (1)), cable television companies, Multichannel Multipoint Distribution Service (MMDS/MDS) "wireless cable" carriers, other fixed wireless providers, terrestrial and satellite mobile wireless providers, utilities and others, which are facilities-based providers and are providing at least 250 full or one-way broadband lines or wireless channels in a given state, or provide full or one-way broadband service to at least 250 end-user consumers in a given state, shall file with the Commission a completed FCC Form 477, in accordance with the Commission's rules and the instructions to the FCC Form 477, for each state in which they exceed this threshold.

(c) Respondents identified in paragraph (b) of this section shall file the FCC Form 477 on diskette or via e-mail, as directed in the instructions to the FCC Form 477. Upon submission of each report, an original certification letter (as contained in the instructions to FCC Form 477) signed by the responsible official shall be mailed to the Commission.

(d) Respondents may make requests for Commission non-disclosure of provider-specific data contained in FCC Form 477 under § 0.459 of this chapter by so indicating on Form 477 at the time that the subject data are submitted. The Commission shall make all decisions regarding non-disclosure of provider-specific information, except that the Chief of the Common Carrier Bureau may release provider-specific information to a state commission, provided that the state commission has protections in place that would preclude disclosure of any confidential information.

(e) Respondents identified in paragraph (b) of this section shall file a revised version of FCC Form 477 if and when they discover a significant error in their filed FCC Form 477. For counts, a difference amounting to 5 percent of the filed number is considered significant. For percentages, a difference of 5 percentage points is considered significant.

(f) Failure to file the FCC Form 477 in accordance with the Commission's rules and the instructions to the Form 477 may lead to enforcement action pursuant to the Act and any other applicable law.

§ 1.6002 Frequency of reports.

Entities subject to the provisions of § 1.6001 shall file reports semi-annually. Reports shall be filed each year on or before March 1st (reporting data about the status of their broadband deployment as of December 31 of the prior year) and September 1st (reporting data about the status of their broadband deployment as of June 31 of the current year). Entities becoming subject to the provisions of § 1.6001 for the first time within a calendar year shall file data for the reporting period in which they become eligible and semi-annually thereafter. Entities subject to the provisions of § 1.6001 shall make an initial filing of the FCC Form 477 on May 15, 2000 (reporting data about the status of their broadband deployment as of December 31, 1999).

PART 20—COMMERCIAL MOBILE RADIO SERVICES

3. The authority citation for part 20 is revised to read as follows:

Authority: 47 U.S.C. 154, 160, 251–254, 303, and 332 unless otherwise noted.

4. In § 20.15, paragraph (b)(1) is revised to read as follows:

§ 20.15 Requirements under Title II of the Communications Act.

* * * * *

(b) * * *

(1) File with the Commission copies of contracts entered into with other carriers or comply with other reporting requirements, or with §§ 1.781 through 1.814 and 43.21 of this chapter; except that commercial radio service providers that offer broadband service, as described in § 1.6001(a) or mobile telephony are required to file reports pursuant to §§ 1.6000 and 43.11 of this chapter to the extent that they meet the thresholds as set out in §§ 1.6001(b) and 43.11(a) of this chapter. For purposes of this section *mobile, telephony* is defined as real-time, two-way switched voice service that is interconnected with the public switched network utilizing an in-network switching facility that enables the provider to reuse frequencies and accomplish seamless handoff of subscriber calls.

* * * * *

PART 43—REPORTS OF COMMUNICATION COMMON CARRIERS AND CERTAIN AFFILIATES

5. The authority citation for part 43 continues to read as follows:

Authority: 47 U.S.C. 154; Telecommunications Act of 1996, Public Law 104–104, secs. 402(b)(2)(B), (c), 110 Stat. 56 (1996) as amended unless otherwise noted. 47 U.S.C. 211, 219, 220 as amended.

6. In § 43.01, paragraph (b) is revised and paragraph (d) is added to read as follows:

§ 43.01 Applicability

* * * * *

(b) Except as provided in paragraphs (c) and (d) of this section, carriers becoming subject to the provisions of the several sections of this part for the first time, shall, within thirty (30) days of becoming subject, file the required data as set forth in the various sections of this part.

* * * * *

(d) Common carriers subject to the provisions of § 43.11 shall file data semi-annually. Reports shall be filed each year on or before March 1st (reporting data about their deployment of local exchange services as of December 31 of the prior year) and September 1st (reporting data about their deployment of local exchange services as of June 31 of the current year). Common carriers becoming subject to the provisions of § 43.11 for the first time within a calendar year shall file data for the reporting period in which they become eligible and semi-annually thereafter. Common carriers subject to the provisions of § 43.11 shall make an initial filing of the FCC Form 477 on May 15, 2000 (reporting data about their deployment of local exchange services as of December 31, 1999).

7. Section 43.11 is added to read as follows:

§ 43.11 Reports of local exchange competition data

(a) All common carriers and their affiliates (as defined in 47 U.S.C. 153 (1)) providing telephone exchange or exchange access service (as defined in 47 U.S.C. 153 (16) and (47)) or commercial mobile radio service (CMRS) providers offering mobile telephony (as defined in section 20.15(b)(1) of this chapter), which provide at least 10,000 voice-grade equivalent lines or wireless channels or have at least 10,000 end-user consumers in a given state, shall file with the Commission a completed FCC Form 477, in accordance with the Commission's rules and the instructions

to the FCC Form 477, for each state in which they exceed this threshold.

(b) Respondents identified in paragraph (a) of this section shall file the FCC Form 477 on diskette or via e-mail, as directed in the instructions to the FCC Form 477. Upon submission of each report, an original certification letter (as contained in the instructions to FCC Form 477) signed by the responsible official shall be mailed to the Commission.

(c) Respondents may make requests for Commission non-disclosure of provider-specific data contained in the Form 477 under § 0.459 of this chapter by so indicating on the Form 477 at the time that the subject data are submitted. The Commission shall make all decisions regarding non-disclosure of provider-specific information, except that the Chief of the Common Carrier Bureau may release provider-specific information to a state commission, provided that the state commission has protections in place that would preclude disclosure of any confidential information.

(d) Respondents identified in paragraph (b) of this section shall file a revised version of FCC Form 477 if and when they discover a significant error in their filed FCC Form 477. For counts, a difference amounting to 5 percent of the filed number is considered significant. For percentages, a difference of 5 percentage points is considered significant.

(e) Failure to file FCC Form 477 in accordance with the Commission's rules and the instructions to Form 477 may lead to enforcement action pursuant to the Act and any other applicable law.

BILLING CODE 6712–01–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AF34

Endangered and Threatened Wildlife and Plants; Threatened Status for the Santa Ana Sucker

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the Fish and Wildlife Service (Service), determine threatened status according to the Endangered Species Act of 1973, as amended (Act), for the Santa Ana sucker (*Catostomus santaanae*). The species is threatened by potential habitat destruction, natural and human-induced changes in streamflows, urban development and related land-use practices, intensive recreation, introduction of nonnative competitors and predators, and demographics associated with small populations. The final rule invokes the Federal protection afforded by the Act for the Santa Ana sucker within the Los Angeles, San Gabriel, and Santa Ana River drainages.

DATES: The effective date of this rule is May 12, 2000.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours at the U.S. Fish and Wildlife Service, Carlsbad Fish and Wildlife Office, 2730 Loker Avenue West, Carlsbad, California 92008.

FOR FURTHER INFORMATION CONTACT: Glen W. Knowles, Fish and Wildlife Biologist, U.S. Fish and Wildlife Service, Carlsbad Fish and Wildlife Office (telephone 760–431–9440; facsimile 760–431–9624).

SUPPLEMENTARY INFORMATION:

Background

The Santa Ana sucker (*Catostomus santaanae*) is a recognized species and member of the sucker family (*Catostomidae*) (Robbins *et al.* 1991). The Santa Ana sucker was originally described as *Pantosteus santa-anae* by Snyder (1908). The genus *Pantosteus* was reduced to a subgenus of *Catostomus*, and the hyphen was omitted from the specific name in a subsequent revision of the nomenclature (Smith 1966). Smith and Koehn (1971) and Smith (1992) continued to recognize *Pantosteus* as a subgenus, although several authors have followed earlier usage (Miller 1959) in recognizing *Pantosteus* as a genus related to *Catostomus* (Minckley 1973; Minckley *et al.* 1986).

Moyle (1976a) described the Santa Ana sucker as being less than 16 centimeters (cm) (6.3 inches (in.)) in length. The species is silvery below and darker along the back, with irregular blotches and pigmented membranes connecting the rays of the tail (Moyle 1976a).

The Santa Ana sucker inhabits streams that are generally small and shallow, with currents ranging from swift (in canyons) to sluggish (in the bottomlands). All the streams are subject to periodic severe flooding (Moyle 1976a). Santa Ana suckers appear to be most abundant where the water is cool (less than 22° Celsius (72° Fahrenheit)), unpolluted, and clear, although they can tolerate and survive in seasonally turbid water (Moyle 1976a; Moyle and Yoshiyama 1992). Santa Ana suckers feed mostly on algae, diatoms, and detritus scraped from rocks and other hard substrates, with aquatic insects making up a very small component of their diet. Larger fish generally feed more on insects than do smaller fish (Greenfield *et al.* 1970; Moyle 1976a).

Santa Ana suckers generally reach sexual maturity in just over 1 year and typically do not live more than 3 years (Greenfield *et al.* 1970). Spawning generally occurs from early April to early July, with a peak in spawning activity occurring in late May and June (Greenfield *et al.* 1970; Moyle 1976a). The spawning period may be variable and protracted, however. Recent field surveys on the East Fork of the San Gabriel River found evidence of an extended spawning period. These surveys found small juveniles (<30 millimeters (mm) standard length (<1.2 in.)) in December (1998) and March (1999) at the San Gabriel River site (U.S. Geological Survey (USGS) data, *in litt.* 1999). This data indicates that spawning may be very protracted in this stream, and begin as early as November. The fecundity of the Santa Ana sucker appears to be exceptionally high for a small sucker species (Moyle 1976a). Total fecundity of six females, ranging in size from 78 mm (3.1 in.) to 158 mm (6.2 in.), ranged from 4,423 to 16,151 eggs (Greenfield *et al.* 1970). The combination of early sexual maturity, a protracted spawning period, and high fecundity should allow the Santa Ana sucker to quickly repopulate streams following periodic flood events that could decimate populations (Moyle 1976a).

Historically, the Santa Ana sucker appeared to be native to the rivers and larger streams of the Los Angeles Basin—the Los Angeles, San Gabriel, and Santa Ana River drainage systems in Los Angeles, Orange, Riverside, and San Bernardino Counties (Smith 1966). Although historic records are scarce, Santa Ana suckers presumably ranged from near the Pacific Ocean to the uplands of the Los Angeles and San Gabriel River systems, and to at least where Pump House #1 is now located (near the San Bernardino National Forest boundary) in the Santa Ana River (Swift *et al.* 1993; Camm Swift, Icthyologist Consultant, pers. comm. 1996). Although the Santa Ana sucker was described as common in the 1970s (Moyle 1976a), the species has experienced declines throughout most of its range (Moyle *et al.* 1995; Swift *et al.* 1993). The species is now restricted to three noncontiguous populations:

lower Big Tujunga Creek (Los Angeles River drainage); the East, West, and North Forks of the San Gabriel River (San Gabriel River drainage); and the lower and middle Santa Ana River (Santa Ana River drainage) (Moyle *et al.* 1995; Swift *et al.* 1993). A population also occurs in portions of the Santa Clara River drainage system in Ventura and Los Angeles Counties. The Santa Clara population is presumed to be an introduced population, although this presumption is based on the absence of the species from early collections, and not on any documented records of introduction (Hubbs *et al.* 1943; Miller 1968; Moyle 1976a; Bell 1978). The Santa Clara River population was not included in the proposal to list the Santa Ana sucker as threatened because of its presumed introduced status (see the proposed rule, 64 FR 3915, for further details on this population). In this document, we define the native range of the Santa Ana sucker, as outlined in the proposed rule, to include populations in the Los Angeles River, San Gabriel River, and Santa Ana River drainage systems.

Los Angeles River System

Although historically present, the species may now be extirpated from the Los Angeles River (Swift *et al.* 1993). Santa Ana suckers are still found in portions of Big Tujunga Creek (a tributary of the Los Angeles River) between Big Tujunga Dam and Hansen Dam. Surveys downstream of the Big Tujunga Dam found the species to be present but rare (fewer than 20 individuals collected at each site) just below the dam, as well as in the vicinities of Delta Flat and Wildwood. The species was found to be abundant (an estimated 200 individuals collected) near Stoneyvale (Mike Wickman, Angeles National Forest, *in litt.* 1996). Several thousand Santa Ana suckers were observed in a visual survey of Big Tujunga Creek in small sections from the confluence of Little Tujunga Creek to the Foothill Boulevard bridge in May 1999 (C. Swift, pers. com. 1999). Santa Ana suckers were also common in visual surveys of Big Tujunga Creek from Foothill Boulevard to the intersection of Oro Vista and Mt. Gleason Avenues in May 1999 (Glen Knowles, U.S. Fish and Wildlife Service, *in litt.* 1999a); however, by October 1999, this reach had dried up entirely. Santa Ana suckers were abundant in October 1999 in the approximately 1-mile-long stretch of flowing waters of Big Tujunga and Haines Canyon Creeks between the 210 Freeway and Hansen Dam, as were two other rare native fish species, arroyo chub (*Gila orcutti*) and Santa Ana speckled dace (*Rhinichthys osculus* ssp.). Santa Ana suckers could not be found in other parts of the Big Tujunga Creek in October 1999, which were dry except for a few isolated shallow pools (G. Knowles, *in litt.* 1999a). In late summer and autumn of dry years, Big Tujunga Creek becomes a dry wash for much of its length. During these times, Santa Ana suckers may be restricted to about 1 mile of stream in the Los Angeles River Basin. We estimate that the Santa Ana sucker has lost approximately 80 percent of its historic native range in the Los Angeles River Basin. The portions of Big Tujunga Creek currently occupied by the Santa Ana sucker constitute approximately 25 percent of the total remaining native range of the species. Approximately 60 percent of the current range of the Santa Ana sucker in the Los Angeles River Basin occurs on private lands. The remaining 40 percent of the range in the Los Angeles River Basin occurs on Angeles National Forest lands managed by the U.S. Forest Service (USFS).

San Gabriel River System

Santa Ana suckers were common in the San Gabriel River below Morris Dam, near Fish Canyon, until the mid-1970s (C. Swift, *in litt.* 1999a). However, no suckers were found in surveys conducted below Morris Dam in 1995 (Dr. Tom Haglund, University of California, Los Angeles, *in litt.* 1996). Santa Ana suckers were also absent from 1998 surveys in the mainstem San Gabriel River at Browns Gulch, below Morris Dam, and at Rainbow Ranch (Chambers Group 1999). Santa Ana suckers were present in 1998 Chamber Group surveys of the West Fork of the San Gabriel River (Chambers Group 1999); however, surveys conducted by California Department of Fish and Game (CDFG) in 1998 and 1999 failed to locate suckers in the West Fork (Ray Ally, CDFG, *in litt.* 1999; Robert C. Hight, CDFG, *in litt.* 1999). However, CDFG did find Santa Ana suckers in Bear Creek, a tributary of the West Fork San Gabriel River, in June 1999 (R. Ally, CDFG, *in litt.* 1999). Quarterly surveys indicated suckers were common in the East Fork of the San Gabriel Rives throughout 1999 (Mike Saiki, USGS Biological Resources Division (BRD), pers. comm. 1999). Thus, the Santa Ana sucker now appears extant only upstream of the confluence of the East, West, and North Forks of the San Gabriel River. Furthermore, the population of Santa Ana suckers in the North Fork is small, and the population in the West Fork appears to be declining. The portions of the San Gabriel River occupied by the Santa Ana sucker constitute approximately 15 percent of the total remaining native range of the species. However, data gathered during sampling indicates that the San Gabriel River may contain the most individuals of any remaining population (R. Ally, *in litt.* 1996; Mike Guisti, CDFG, *in litt.* 1996; M. Wickman, *in litt,* 1996; Juan Hernandez, CDFG, *in litt.* 1997; M. Saiki, pers. com. 1999). We estimate that the Santa Ana sucker has lost approximately 75 percent of its native range in the San Gabriel River. Approximately 15 percent of the current range of the Santa Ana sucker in the San Gabriel River Basin occurs on private lands. The remaining 85 percent of the range in the San Gabriel River Basin occurs in the Angeles National Forest. Even with the substantial decrease in the sucker's range in the San Gabriel River drainage system, Moyle and Yoshiyama (1992) considered this population of Santa Ana suckers to be the only viable population within the species' native range.

Santa Ana River System

In 1986 and 1987, several hundred Santa Ana suckers were observed in the Santa Ana River downstream of Prado Dam (C. Swift, pers. comm. 1996). By 1996, a general fish survey below Prado Dam yielded only 5 suckers from a total of 271 fishes captured (M. Guisti, CDFG, *in litt.* 1996). In April 1987, only five suckers were found during a sampling effort above the Prado Dam from the City of Norco to about 5 kilometers (km) (3.1 miles (mi)) upstream. In addition to fish being scarce above the dam, no small individuals were observed, indicating the possibility of little or no reproduction occurring in the area (Moyle and Yoshiyama 1992). In 1991, sampling indicated that, although fishery habitat in the Santa Ana River was primarily fair to poor, Santa Ana suckers were abundant between Norco and Riverside (Chadwick and Associates 1992). Additionally, evidence suggested Santa Ana suckers were using tributaries, including Tequesquite Arroyo, Sunnyslope Channel, and Anza Park Drain, for spawning and nurseries (Chadwick and Associates 1996). Seventy-six Santa Ana suckers were taken in three collections about 2.0 km (1.2 mi) below Hamner Avenue, Anaheim County, in the summer of 1997. An extensive survey of the Santa Ana River between Weir Canyon Road and Hamner Avenue, in Anaheim County, during the summer of 1998 yielded 42 Santa Ana suckers. All were juveniles less than 70 mm (2.8 in.) long (C. Swift, *in litt,* 1998). However, recently, in surveys between September

and November 1999, seven adult suckers were captured near River Road, Riverside—three in the main-stem Santa Ana River, and four in the diversion channel that diverts most of the river's flow into the Prado Wetlands (C. Swift, *in litt.* 1999). Snorkel surveys of the Santa Ana River between Mission Boulevard and Riverside Avenue in Riverside in November 1999 found several pockets of tens to hundreds of Santa Ana suckers, usually in the deepest areas of the stream (C. Swift, pers. comm. 1999). Although Chadwick and Associates (1991) collected one Santa Ana sucker in this area near Mission Boulevard in March 1991, they stated that this reach probably would not support viable populations of fishes due to elevated levels of "chlorine and unionized ammonia" in this reach and unsuitable breeding substrates. Recent surveys in September and December 1999 in the Metropolitan Water District crossing near the Van Buren Avenue bridge in Riverside captured 48 and 16 suckers, respectively, although these individuals appeared to be in poorer body condition than those in the San Gabriel River (Barbara Martin, USGS, BRD, pers. comm. 1999). Extensive surveys of the Santa Ana River at Imperial Highway in December 1998 and March, June, September, and December 1999 failed to record any Santa Ana suckers (B. Martin, pers. comm. 1999).

Chadwick and Associates (1996) noted that length-frequency analysis indicates Santa Ana suckers are naturally reproducing in the Santa Ana River system. However, they asserted that Santa Ana sucker population decreases, as evidenced by 1996 surveys, were due to high flows in the basin between 1991 and 1996 (M. Guisti, *in litt.*, 1996). T. Haglund (*in litt.* 1996) contended that a large number of suckers reported in tributaries are juveniles and may be the progeny of very few adults. The presence of juveniles in surveys at the Metropolitan Water District Crossing, in March, June, and September 1999, represent positive evidence of recruitment, despite the apparent lack of suitable spawning habitat at that site (M. Saiki, pers. comm. 1999).

Santa Ana suckers occur in the lower portions of the Santa Ana River, with current survey records from the vicinity of Weir Canyon Road in Anaheim to Riverside Avenue in Riverside, but are now apparently absent from the upper reach of the river in the San Bernardino Mountains (Moyle and Yoshiyama 1992; Swift *et al.* 1993). We estimate that the Santa Ana sucker has lost approximately 70 percent of its native range in the Santa Ana River. The portions of the Santa Ana River occupied by the Santa Ana sucker constitute approximately 60 percent of the total remaining native range of the species. Approximately 75 percent of the range of the species in the Santa Ana River Basin occurs on private lands. The balance is within State, county, city, and regional park lands, with a small portion, 3 percent, on military lands.

In summary, the Santa Ana sucker has declined throughout significant portions of its range. The species has lost approximately 75 percent of its native range. Recent population densities range from approximately 246 fish in 2.9 km (1.8 mi) on the East Fork of the San Gabriel River (J. Hernandez, *in litt.* 1997) to 16 fish in 1.6 km (1.0 mile) of the Santa Ana River in December 1999 (USGS Survey Data, *in litt.* 1999). This overall reduction in range, and the more localized reductions in numbers, are particularly surprising given the high fecundity and apparent broad habitat tolerances of the species. Urbanization, water diversions, dams, introduced competitors and/or predators, and other human-caused disturbances likely are playing a role in the decline of the species. These factors have also been implicated in the decline of other western suckers (Minckley *et al.* 1991; Scoppettone and Vinyard 1991).

The decline of the Santa Ana sucker is also part of a greater overall decline of freshwater fishes in Southern California. The Los Angeles Basin was or is home to at least seven native species of freshwater fishes that have been declining or have been extirpated since the 1930s (Swift *et al.* 1993). Four of these species, the steelhead (*Oncorhynchus mykiss*), the Pacific lamprey (*Lampetra tridentata*), the Pacific brook lamprey (*Lampetra* cf. *pacifica*), and the unarmored three-spined stickleback (*Gasterosteus aculeatus williamsoni*), have been extirpated from the Los Angeles Basin since the 1950s. Two others, the Santa Ana speckled dace (*Rhinichthys osculus*), and the arroyo chub (*Gila orcutti*), have become rare in the Los Angeles Basin (Swift *et al.* 1993).

Previous Federal Action

On September 6, 1994, we received a petition under the Act (16 U.S.C. 1531 *et seq.*) to list the Santa Ana sucker (*Catostomus santaanae*), Santa Ana speckled dace (*Rhinichthys osculus*), and Shay Creek threespine stickleback (*Gasterosteus aculeatus*) as endangered species. The petition was submitted by the Sierra Club Legal Defense Fund, Inc., on behalf of seven groups including the California-Nevada Chapter of the American Fisheries Society, The Nature School, California Sportfishing Protection Alliance, Friends of the River, Izaak Walton League of America, California Trout, and Trout Unlimited. We deferred processing this petition because of other higher priority listing actions and severe funding constraints imposed by a number of continuing resolutions between November 1995 and April 1996.

On July 9, 1996, we published a 90-day petition finding (61 FR 36021) that substantial information had been presented indicating listing may be warranted for the Santa Ana sucker. On November 26, 1996, we published a notice initiating a status review for the Santa Ana sucker (61 FR 60073). On April 3, 1997, we published a 12-month finding (62 FR 15872) that listing the Santa Ana sucker was warranted, but precluded by higher listing priorities. On January 26, 1999, we proposed threatened status for the Santa Ana sucker within its native historic range of the Los Angeles, San Gabriel and Santa Ana River Systems (64 FR 3915). After the close of the comment period, we received seven requests to reopen the comment period. These requests asked us to consider new information gained from ongoing studies on the species, and to consider the use of a special rule under section 4(d) of the Act to implement a long-term conservation program for the species in the Santa Ana River. On December 16, 1999, we reopened the comment period to satisfy the public notice requirements of the Act and our regulations (50 CFR 424.16(c)(vi)), and to consider new scientific information (64 FR 70209).

The processing of this final rule conforms with our Final Listing Priority Guidance published in the **Federal Register** on October 22, 1999 (64 FR 57114). The guidance clarifies the order in which we will process rulemakings. Highest priority is processing emergency listing rules for any species determined to face a significant and imminent risk to its well-being (Priority 1). Second priority (Priority 2) is processing final determinations on proposed additions to the lists of endangered and threatened wildlife and plants. Third priority (Priority 3) is processing new proposals to add species to the lists. The processing of administrative petition findings (petitions filed under section 4 of the Act) is the fourth priority (Priority 4). The processing of this final rule is a Priority 2 action.

Summary of Comments and Recommendations

In the January 26, 1999, proposed rule (64 FR 3915), we requested interested parties to submit factual reports or information that might contribute to development of a final rule. The 60-day comment period closed on March 29, 1999. We contacted appropriate Federal and State agencies, county and city governments, scientific organizations, and other interested parties. We reopened the comment period on December 16, 1999, to satisfy the public notice requirements of the Act and to consider new scientific information. The reopened comment period closed on January 3, 2000. We published public notices of the proposed rule in the *Los Angeles Times*, the *Orange County Register*, and the *Riverside Press Enterprise* on December 17, 1999, which invited general public comment. We did not receive any requests for a public hearing.

During the public comment periods, we received written comments from 45 individuals, organizations, and State and local agencies. Of the comments received, 32 were in support of listing, 3 were opposed, and 10 were neutral. Some commenters submitted updated status information on the Santa Ana sucker and new information on possible threats to the species. This information has been incorporated in the "Background" and "Summary of Factors Affecting the Species" sections. We address all other comments received during the comment periods in the following summary of issues. Comments of a similar nature are grouped into a single issue.

Issue 1: Several commenters felt that the Santa Ana sucker should be listed as an endangered species, rather than a threatened species.

Our Response: Most of these comments did not provide additional information or criteria to justify listing the species as endangered. Those commenters who did provide a basis for endangered status identified potential habitat destruction, natural and human-induced changes in streamflows, urban development and related land-use practices, intensive recreation, the introduction of nonnative competitors and predators, and demographics associated with small populations as reasons that remaining populations were threatened with extinction. We agree that multiple factors threaten the Santa Ana sucker (see "Summary of Factors Affecting the Species" section). However, we do not believe the Santa Ana sucker meets the Act's definition of endangered, which is a species "in danger of extinction throughout all or a significant portion of its range." The Act defines a threatened species as "any species which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range" (section 3(19)). Although current population estimates do not exist for any of the sucker populations, all of the currently known populations within the native range were surveyed in 1999. In each drainage, suckers were locally common in 1999, and no populations appeared to be in imminent danger of extinction. We conclude that the remaining populations that constitute the native range of Santa Ana sucker are likely to become in danger of extinction in the foreseeable future. Therefore, the Act's definition of a threatened species fits the current situation of the Santa Ana sucker best.

Issue 2: Some commenters expressed support for designating critical habitat and felt that we should designate critical habitat for the species at the time of listing. Other commenters offered specific recommendations for areas to list as critical habitat, or requested that we not designate critical habitat in specific stream reaches.

Our Response: In this rule, as in the proposed rule, we find that critical habitat is not determinable because the biological needs of the Santa Ana sucker are not sufficiently known to identify an area as critical habitat. When a "not determinable" finding is made, we must, within 2 years of the publication date of the original proposed rule, propose the designation of critical habitat unless such designation is found to be not prudent. For a more detailed evaluation of our critical habitat finding for the Santa Ana sucker, and an explanation of "not determinable" and "not prudent" findings, please see the "Critical Habitat" section.

Issue 3: Some commenters requested that we list the Santa Clara population as threatened or endangered. Another commenter asked if the Santa Clara River population would require any increased protection because of its possible role in the recovery of the species.

Our Response: In the proposed rule, we identified only those Santa Ana sucker populations within the native range of the species for listing as threatened. The native range of the Santa Ana sucker is considered to be the rivers and streams of the Los Angeles, San Gabriel, and Santa Ana River Basins. The Santa Clara population is presumed to be an introduced population, although this presumption is based on its absence from early collections, and not on a documented record of introduction (Hubbs *et al.* 1943; Miller 1968; Moyle 1976a; Bell 1978). Therefore, the Santa Clara River population was not included in the proposal to list the species.

We believe that the Santa Ana sucker has lost about 75 percent of its historic native range. Considering the total remaining range of the species as all those areas currently occupied by the Santa Ana sucker, including both native and introduced populations, the portions of the Santa Clara River occupied by the species constitute approximately 50 percent of the total remaining range of the species. In light of the current status of the Santa Ana sucker, and the portion of the remaining range that occurs in the Santa Clara River system, further evaluation of the Santa Clara population is needed to determine its role in the recovery of the species. If the Santa Clara River population is determined to be crucial to the recovery of the species, we may need to reevaluate the status of this population under the Act.

Issue 4: Several commenters expressed the opinion that recreational suction dredging actually benefits the Santa Ana sucker, and that such suction dredging should be allowed to continue in streams occupied by the species.

Our Response: Suction dredging is the use of a suction system to remove and return material at the bottom of a stream, river, or lake for the extraction of minerals. Suction dredging in California is regulated by the CDFG under section 228 of the California Code of Regulations and by the U.S. Army Corps of Engineers (USACE) under section 404 of the Clean Water Act. The USFS may also regulate this activity by closing streams to dredging on Forest Service lands. The USACE does not require a section 404 permit for holders of a CDFG 5653 Standard Dredge Permit, but does require a 404 permit for all other types of dredging. Suction dredge operators are required to obtain a permit from CDFG, which is valid for a calender year (J. Reese, USACE, *in litt.* 1995; CDFG, *in litt.* 1999). In 1999, all counties where the Santa Ana sucker naturally occur were open to suction dredging (Los Angeles, Orange, and Riverside Counties); however, the East Fork of the San Gabriel River and portions of the West Fork of the San Gabriel River are covered by special regulation. The East Fork is the only stream containing Santa Ana suckers that is commonly subject to suction dredging. CDFG issues special dredge permits for this stream with conditions to exclude dredging from April 1 to June 30. The closed period is to allow

resident fish and amphibians to spawn without interference from dredging. CDFG issued approximately 200 special dredging permits in 1995 for the East Fork, the first year the stream had been dredged legally in 15 years. This number has decreased steadily to approximately 40 special dredging permits issued in 1999 (Dwayne Maxwell, CDFG, pers. comm. 1999).

Few studies exist on suction dredging and its effects on aquatic ecosystems. Of the studies conducted, most indicate that the effects of a single suction dredge on overall habitat and on benthic (bottom of the stream) aquatic insect communities are highly localized and short term, but vary with stream gradient, flow regime, and sediment load characteristics of the stream (Griffith and Andrews 1981; Harvey *et al.* 1982; Thomas 1985; Harvey 1986; Hall 1988; Somer and Hassler 1992). In general, suction dredging removes all substrates smaller than the diameter of the intake nozzle and deposits them as large, unstable piles just downstream from the dredge. Harvey *et al.* (1982) found that on the American River, Yuba River, and Butte Creek, California, settleable solids and sedimentation rate both increased within several meters of the suction dredge, but rapidly returned to ambient levels downstream. Turbidity, however, was more variable. Streams with higher clay content substrates experienced greater long-lasting changes in turbidity. As with the work by Harvey *et al.* (1982), Thomas (1985) found during a study on Gold Creek in Missoula County, Montana, that suction dredging had only localized, short-term effects on insects living in the soil. Just after dredging, numbers of soil-living insects were significantly reduced in the dredged area. However, within 10 meters (32.5 feet) downstream of the dredged area, insect numbers and turbidity were normal. Within a month, aquatic insect numbers had returned to normal in the dredged section of the stream (Thomas 1985). In addition, Somer and Hassler (1992) found that, while the species composition of benthic insects was altered within sections of streams adjacent to suction dredging, overall abundance remained the same.

Thomas (1985) observed cutthroat trout opportunistically feeding on invertebrates dislodged by a suction dredge. In some circumstances, habitat may be temporarily created by suction dredging. Harvey (1986) observed that fish occupying a riffle during late summer in Butte Creek, California, moved into a newly created dredge excavation, presumably seeking deeper water. Harvey found that adult fishes in general were not sensitive to dredging; however, riffle sculpin (*Cottus gulosus*), a benthic species, was displaced from suction-dredged areas, probably due to disturbance of its microhabitat. Harvey also suspected that the microhabitats of speckled dace (*Rhinichthys osculus*) would also be deleteriously altered by suction dredging.

Although the effects of recreational suction dredging on adult fishes may range from beneficial to deleterious, such dredging appears to have strong negative impacts to early life stages of fishes. Griffith and Andrews (1981) found a mortality rates of up to 100 percent for cutthroat trout (*Oncorhynchus clarki*) eggs and fry, and rainbow trout (*O. mykiss*) un-eyed eggs and sac fry that pass through a suction dredge. Harvey and Lisle (1998) noted that passing through a suction dredge would likely kill eggs, larvae, and fry of other types of fishes as well, including suckers (Catostomidae). Harvey *et al.* (1995) concluded that small larvae of fish such as suckers are easily damaged by physical disturbance caused by the dredge, but adults and juveniles are unlikely to be directly affected by suction dredges since they can either avoid or survive the passage through a dredge. In a review of the current literature on suction dredging, Harvey and Lisle (1998) concluded that while effects from dredging may be minor and local in some situations, fisheries managers would be prudent to consider dredging to be a harmful practice in streams that support threatened or endangered species.

No studies exist that specifically address the effects of suction dredging on Santa Ana suckers. In the proposed rule, we concluded that suction dredging may impact larvae and eggs of Santa Ana suckers, particularly if dredging is concentrated in an area containing spawning suckers. Santa Ana suckers and speckled dace, another species in the East Fork of the San Gabriel River, appear to prefer larger unconsolidated cobble substrates. These types of substrates may actually be created by suction dredging (Harvey and Lisle 1998). Also, suction dredging may provide local increases in food resources for fish (Thomas 1985). However, as stated above, suction dredging could result in mortality of eggs or larvae during spawning periods, and so should be excluded from Santa Ana sucker habitats during spawning. We will continue to evaluate the overall effects of suction dredging on Santa Ana suckers and provide specific recommendations to CDFG and the USFS based on those results.

Issue 5: We received comments that the Service should consider the application of a special rule under section 4(d) of the Act for the Santa Ana sucker in the Santa Ana River. The special rule would exempt certain activities from the take prohibitions of the Act, so long as a Service-approved Santa Ana sucker conservation plan is funded and implemented. The conservation plan would provide for the conservation of the species within the Santa Ana River watershed.

Our Response: Under section 4(d) of the Act, we have the authority to issue regulations as deemed necessary and advisable to provide for the conservation of a species listed as threatened. We are interested in pursuing collaborative, proactive efforts to conserve the Santa Ana sucker. A special rule under section 4(d) could provide an incentive for State, county, and local jurisdictions, as well as private land owners, to protect and conserve the Santa Ana sucker. This special rule could potentially provide for substantial conservation of the Santa Ana sucker. The comments we received from the County of Orange, Orange County Water District, and Santa Ana River Watershed Group provided background information to consider the possibilities of a special rule under section 4(d). If our review of this information indicates that the application of a special rule under 4(d) to facilitate the conservation of the Santa Ana sucker warrants further evaluation, we will publish in the **Federal Register** a notice of intent to consider such a rule.

Issue 6: Commenters expressed concerns about the effects of listing the Santa Ana sucker on the continued use of the San Gabriel Canyon Off Highway Vehicle Area (SGCOHVA), located at the confluence of the East and West Forks of the San Gabriel River in the Angeles National Forest.

Our Response: Although surveys in 1999 failed to record the Santa Ana sucker in the West Fork of the San Gabriel River (R. Ally, CDGF, *in litt.* 1999), the species was found within 1.6 km (1.0 mile) of the SGCOHVA during 1999 surveys of the East Fork (G. Knowles, *in litt.* 1999b). Therefore, we conclude that Santa Ana suckers can be expected to occur in the SGCOHVA.

The commenters stated that the use of the SGCOHVA would have minimal impact to the species because off-road vehicles are not used in streams but cross streams only to access other areas of the SGCOHVA. However, the operation of off-road vehicles in the SGCOHVA could adversely affect Santa Ana sucker habitat due to increased

sedimentation to the stream from erosion, or alteration of channel morphology from the physical disturbance of crossing the stream. In addition, one recent study found that certain types of stream crossings can act as barriers to fish movement (Warren and Pardew 1998), although temporary ford crossings, such as those currently in the SGCOHVA, were not a significant barrier to fish dispersal. Since the overall impact of the SGCOHVA to Santa Ana suckers is not currently known, further evaluation is required. Under section 7 of the Act, Federal agencies are required to insure, through consultation with us, that any actions they authorize, fund, or carry out are not likely to jeopardize the continued existence of any listed species. The USFS would need to consult with us on the impacts that off-road vehicles in the SGCOHVA, or other ongoing and future activities on national forest lands, would have on Santa Ana suckers.

Issue 7: Several commenters were concerned that future efforts to repatriate the Santa Ana sucker into streams of the upper Santa Ana River Drainage would adversely impact the operation of hydroelectric facilities in the area.

Our Response: No decision has been made to reestablish Santa Ana suckers into areas formerly occupied by the species. However, considering the large amount of habitat loss (the Santa Ana sucker is believed to be extirpated from about 75 percent of its former range), reintroduction of Santa Ana suckers into formerly occupied habitats may be an important component of a recovery plan for the species. A decision to reintroduce the Santa Ana suckers to formerly occupied areas would be part of the recovery efforts for the species and would include analysis under and compliance with the Act, National Environmental Policy Act (NEPA), and other applicable Federal laws and regulations. Such analysis would include an evaluation of the impacts reintroduction would have on hydroelectric facilities and ways to minimize potential conflicts.

Issue 8: Commenters were concerned that listing the Santa Ana sucker would impair the ability of flood control districts to protect upland property from flooding. A commenter stated that the Santa Ana sucker has managed to adapt to the long history of flood control and maintenance activities in the Santa Ana River, and therefore, these activities should be allowed to continue. According to the commenters, flood control districts are willing to work with us to develop plans that would promote the recovery of the Santa Ana sucker to the "maximum extent possible."

Our Response: The issue of flood control in Santa Ana sucker habitat is of critical importance. We disagree that the species has managed to adapt to flood control activity in the Santa Ana River. Flood control activity, such as bank stabilization, channelization, vegetation removal, drop structures, and the construction of dams, dikes, and diversions, has been implicated as a key factor responsible for the decline of not only the Santa Ana sucker but six other species of freshwater fishes native to the Los Angeles Basin (Swift *et al.* 1993). An example of the adverse impacts of flood control activity on this species is the Santa Ana River at Imperial Highway (State Highway 90) near Anaheim. Santa Ana suckers were common at this site in the late 1980s and early 1990s. During the last 15 years, the USACE has undertaken various flood control activities at the site. The river has been channelized, riparian vegetation removed, and banks stabilized with rip rap and concrete. Santa Ana suckers have not been recorded in this reach since 1996. Although the exact reasons for the apparent disappearance of Santa Ana suckers from this area may never be known, the drastic changes to its habitat by flood control activities are plausibly a key factor (Chadwick and Associates 1996; Robert Fisher, pers. comm. 1999; M. Saiki, pers. comm. 1999).

We commend the willingness of the flood control districts to work with us to develop a plan to recover the Santa Ana sucker. The Santa Ana River, within the jurisdiction of various flood control districts, contains some of the best remaining occupied habitat for Santa Ana suckers within this drainage, and the protection and enhancement of this habitat likely will be crucial to the recovery of the species. Certain flood control activities are regulated by the USACE under section 404 of the Clean Water Act. Under section 7 of the Act, Federal agencies are required to insure, through consultation with us, that any actions they authorize, fund, or carry out are not likely to jeopardize the continued existence of any listed species. The impacts of ongoing and future flood control activities to Santa Ana sucker would be addressed during the section 7 consultation process. In addition, we are considering proposing special regulations under the authority of section 4(d) of the Act that would promote the conservation of the Santa Ana sucker by exempting certain activities from the take prohibitions of the Act in association with implementing locally prepared, Service-approved programs that would contribute to the overall conservation of the species (see "Issue 5").

Issue 9: Commenters expressed the concern that the listing of the Santa Ana sucker is premature because sound scientific evidence does not exist demonstrating that the species populations are decreasing, because surveys have been inadequate to document declining populations, and because apparent declines represent natural variation in population size resulting from climate cycles and not from human-induced changes to ecosystems.

Our Response: We estimate that the Santa Ana sucker has been eliminated from about 75 percent of its former native range. This loss has been caused by habitat destruction, natural and human-induced changes in streamflows, urban development and related land-use practices, and the introduction of nonnative competitors and predators (Moyle *et al.* 1995; Swift *et al.* 1993). The utilization of the rivers of the Los Angeles Basin for irrigation began as early as 1821, and was extensive by the 1880s (Miller 1961). The demands of an increasing human population in the Los Angeles area resulted in an extreme level of utilization of the Los Angeles Basin Rivers that was apparent as early as 1930, when McGlashan (1930) wrote of the Santa Ana River, "Probably no other stream of its size in the United States is made to serve greater or more varied uses." By the 1950s, urbanization of the greater Los Angeles metropolitan area had resulted in severe declines of the native fish fauna of the Los Angeles Basin, such that four fish species had been extirpated from the basin (Swift *et al.* 1993). This urbanization resulted in conversion of Santa Ana sucker habitat to the concrete-lined storm drains that now constitute the lowermost reaches of the Los Angeles, San Gabriel, and Santa Ana Rivers (Mount 1995) (*see* "Summary of Factors Affecting the Species" section). Moyle and Yoshiyama (1992) stated, "[e]ven though Santa Ana suckers seem to be quite generalized in their habitat requirements, they are intolerant of polluted or highly modified streams." The impacts associated with urbanization are likely the primary cause of the extirpation of Santa Ana suckers from lower reaches of the Los Angeles, San Gabriel, and Santa Ana Rivers. We, therefore, disagree with the contention that sound scientific evidence does not exist demonstrating that the species is decreasing. The decline of the Santa Ana sucker and the destruction of its habitat are well documented (Miller 1961; Moyle 1976a;

Moyle and Yoshiyama 1992; Swift *et al.* 1993; Moyle *et al.* 1995).

Issue 10: Commenters expressed the belief that the newly completed Seven Oaks Dam, upstream from the present range of Santa Ana sucker in the Santa Ana River, would not act as a barrier to upstream fish movement. The only flows connecting the upper and lower Santa Ana River Basins in the last 40 years have been extreme flood flows, which would cause Santa Ana suckers to be lost downstream. In fact, commenters felt that Seven Oaks Dam would be beneficial for the species by reducing the amount of fine particles and sand deposited downstream in flood flows, sediments that threaten Santa Ana sucker habitat in the Santa Ana River.

Our Response: We agree that the surface flows of the Santa Ana River between Riverside and Seven Oaks Dam have long been diverted to provide water for the communities in southwestern San Bernardino County and western Riverside County. We also agree that this dewatered stretch, and not the dam, is the current primary barrier to the movement of Santa Ana suckers upstream in the Santa Ana River. However, records from the 1940s indicate that Santa Ana suckers were once a common resident in the now dewatered stretch of the Santa Ana River near San Bernardino. The restoration of a more perennial flow to these areas may make these areas suitable for Santa Ana suckers. Ideally, connectivity between the upper and lower portions of the drainage would allow for gene flow throughout the population. However, even if water was returned to dry reaches of the Santa Ana River, Seven Oaks Dam would prevent movement of Santa Ana suckers between formerly occupied upstream habitats and the lower reaches they occupy now. Thus, Seven Oaks Dam represents a more permanent barrier to the movement of fishes than dewatered sections of the stream.

We agree that sediment load characteristics of the Santa Ana River have been modified downstream from Seven Oaks Dam. However, the ultimate effects on sediment characteristics of the Santa Ana River downstream of the newly completed Seven Oaks Dam are, at best, difficult to predict. In general, streams below newly closed dams are changed through narrowing and deepening of their channels and coarsening of their beds. This generally results in an armored condition of the river bed just below the dam, such that the bed is lined with relatively large particles that were mobile during high flood flows before the dam was closed but are now too heavy to be moved by the new regime (Graf 1988; Mount 1995). Also, most dams have a high trap efficiency, meaning that they trap most sediment. Only the finer sediments get through (Mount 1995). So, although we cannot know for certain what effect the newly completed Seven Oaks Dam will have on the Santa Ana River downstream, we can generally predict that it will result in a decrease of coarser materials and an increase in finer substrates delivered to downstream reaches. Seven Oaks Dam will further prevent the Santa Ana River from functioning as a natural river, a scenario that has often had numerous negative impacts on the aquatic environment (Hunt 1988; Harden 1996; McCully 1996), as well as on the resident fish populations [Miller 1961; Moyle 1976a; Minckley and Deacon 1991; Mount 1995).

Peer Review

In accordance with the interagency peer review policy published on July 1, 1994 (59 FR 34270), we solicited the expert opinions of independent specialists regarding pertinent scientific or commercial data and assumptions relating to the taxonomy, population status, and supportive biological and ecological information for the taxon under consideration for listing. The purpose of such review is to ensure that listing decisions are based on scientifically sound data, assumptions, and analyses, including input of appropriate experts and specialists. We requested four individuals, who possess expertise in Santa Ana sucker biology and Catostomid ecology, and whose affiliations include academia, a Federal agency, and a private company, to review the proposed rule by the close of the comment period. Two individuals responded to our request, and we have addressed their comments in the previous section of the rule, and in updating the "Background" and "Summary of Factors Affecting the Species" sections.

Summary of Factors Affecting the Species

Section 4 of the Act and regulations (50 CFR part 424) issued to implement the listing provisions of the Act set forth the procedures for adding species to the Federal Lists. A species may be determined to be an endangered or threatened species due to one or more factors described in section 4(a)(1) of the Act. These factors and their application to the Santa Ana sucker (*Catostomus santaanae*) are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of its Habitat or Range

Moyle and Yoshiyama (1992) concluded that the native range of the Santa Ana sucker is largely coincident with the Los Angeles metropolitan area. Intensive urban development of the area has resulted in water diversions, extreme alteration of stream channels, changes in the watershed that result in erosion and debris torrents, pollution, and the establishment of introduced nonnative fishes. Moyle and Yoshiyama (1992) stated, "[e]ven though Santa Ana suckers seem to be quite generalized in their habitat requirements, they are intolerant of polluted or highly modified streams." The impacts associated with urbanization are likely the primary cause of the extirpation of this species from lowland reaches of the Los Angeles, San Gabriel, and Santa Ana Rivers.

As the Los Angeles urban area expanded, the Los Angeles Basin rivers (the Los Angeles, Santa Ana, and San Gabriel Rivers) were highly modified, channelized, or moved in an effort to either capture water runoff or protect property. As Moyle (1976a) stated, "[t]he lower Los Angeles River is now little more than a concrete storm drain." The same is true for the Santa Ana and San Gabriel Rivers. These channelized rivers and canals with uniform and altered substrates do not appear to be suitable for sustaining Santa Ana sucker populations (Swift *et al.* 1993; Chadwick and Associates 1996), and the species appears to persist only in reaches that remain relatively unchannelized. Past and continuing projects have resulted (or will result) in channelization of the Santa Ana River throughout most of the range of the Santa Ana sucker in Orange County. Urban development also threatens the Santa Ana sucker in the Los Angeles and Santa Ana River Basins. This urban development has also resulted in changes in water quality and quantity and the hydrologic regime of these rivers. The Santa Ana sucker is one of seven native freshwater fish species of the Los Angeles Basin that have declined drastically in the last 70 years. Four of these species, the steelhead, Pacific lamprey, Pacific brook lamprey, and the unarmored threespine stickleback have been extirpated from the Los Angeles Basin since the 1950s, and two others are very rare (Santa Ana speckled dace and arroyo chub), presumably due to the same factors that have caused the decline of the Santa Ana sucker (Swift *et al.* 1993) (For an example of the apparent effects of

channelization on Santa Ana suckers, see "Issue 8" in the "Summary of Comments and Recommendations" section).

All three river systems have dams that isolate and fragment fish populations. These dams have likely resulted in some populations being excluded from suitable spawning and rearing tributaries. Reservoirs created by the dams also provide areas where introduced predators and competitors can live and reproduce (Moyle and Light 1996) (see factor C of this section). The newly completed Seven Oaks Dam, upstream from the present range of Santa Ana sucker in the Santa Ana River, forms a barrier for the upstream movement of fish and further isolates Santa Ana sucker populations from their native range in the headwaters of the system.

The population of Santa Ana suckers in the West Fork of the San Gabriel River is threatened by accidental high flows from Cogswell Reservoir, which have devastated this section of stream several times in the past (Moyle and Yoshiyama 1992; Haglund and Baskins 1992; T. Haglund, *in litt.* 1996). T. Haglund (*in litt.* 1996) stated that, "[t]he West Fork population was wiped out by a sluicing event (removal of sediment by releasing a sudden flow of water) from Cogswell Dam in 1981 (anecdotal data) but recolonized from tributaries that acted as refugia. However, data (from CDFG, no date) suggest that the suckers have never returned to their former abundance." Santa Ana suckers have biological adaptations that allow the fish to quickly repopulate streams following periodic flood events (Moyle *et al.* 1995). However, successive high flows could eliminate the sucker population in the West Fork of the San Gabriel River by rapidly depleting the individuals soon after they migrate into the mainstem from tributaries. Proposals for additional sluicing or other sediment removal activities from the Cogswell reservoir on the San Gabriel River system are being considered (R. C. Hight, *in litt.* 1999). The potential effects of the proposed sediment management project may also degrade the habitat of the Santa Ana sucker by depositing large amounts of silt on the streambed, causing a rapid increase in suspended sediments in the water column.

The petitioners contended that suction dredge mining has increased in the Cattle Canyon tributary to the East Fork of the San Gabriel River, thereby threatening the Santa Ana sucker. A commenter indicated that no suction dredging has occurred in Cattle Canyon and suggested that the petitioners took Moyle and Yoshiyama (1992) out of context (Gerald Hobbs, Public Lands Action Committee, *in litt.* 1996, 1999). The CDFG (Patricia Wolf, CDFG, *in litt.* 1996) indicated they are not aware of suction dredging in the Cattle Canyon tributary to the East Fork of the San Gabriel River. However, they had issued nearly 200 Special Dredge Permits for the East Fork of the San Gabriel River in 1995, the first time the East Fork had been dredged in 15 years. This number has dropped to approximately 40 Special Dredge Permits issued in 1999 for the East Fork San Gabriel River (D. Maxwell, CDFG, pers. comm. 1999). Even though surveys from 1996 through 1999 indicate the East Fork of the San Gabriel River continues to maintain a healthy Santa Ana sucker population (R. Ally, *in litt.* 1996; J. Hernandez, *in litt.* 1997;, M. Saiki, pers. comm. 1999), suction dredging may impact larvae and eggs of Santa Ana suckers, particularly if dredging is concentrated in an area containing spawning suckers. Harvey and Lisle (1998) recommended that, given the uncertainty concerning the effects of suction dredging, fisheries managers would be wise to assume that suction dredging is a harmful practice in streams that support threatened or endangered species. (See "Issue 4" in the "Summary of Comments and Recommendations" section.)

Recreational activities on forest lands may also pose some threat to Santa Ana sucker habitat quality. Annually, thousands of people from the Los Angeles metropolitan area and adjacent urban communities use wilderness and nonwilderness areas within the Big Tujunga Creek and San Gabriel Forks areas of the Angeles National Forest for recreation. The impact of large numbers of people using these areas include destruction of streambank vegetation, streambank erosion, and the disposal of untreated human waste and other refuse into the creeks, all of which degrade water quality (D. Maxwell, CDFG, pers. comm. 1999). Given the projected growth of the Los Angeles metropolitan area, this threat should increase.

Although the Santa Ana sucker evolved under conditions that presumably included droughts, water diversions and management practices threaten the continued existence of the species. For example, stretches of the upper Santa Ana River have been permanently dewatered, eliminating Santa Ana sucker populations and migration through these reaches to other areas (Swift *et al.* 1993). As previously discussed, channelization of the rivers of the Los Angeles Basin, water quality degradation, and dam construction have all combined to degrade and eliminate historic Santa Ana sucker habitat. Future human population and urban growth of the basin will further stress the natural resources of the basin and likely exacerbate these conditions by further destruction and degradation of Santa Ana sucker habitat.

Degradation of water quality in the Santa Ana and Los Angeles Rivers may threaten the Santa Ana sucker (Moyle and Yoshiyama 1992). Suckers are common in some areas upstream from Prado Dam where several water treatment facilities discharge into the Santa Ana River (Chadwick and Associates 1992). Chadwick and Associates (1992) attributed high sucker numbers to adequate water supplies discharged by the treatment facilities and the presence of tributaries that offer spawning areas and refugia for suckers. However, they did note that the Santa Ana River between Mission Boulevard and Interstate 10 probably would not support viable populations of fishes, due, in part, to "elevated levels of chlorine and unionized ammonia." Overall, Santa Ana sucker numbers are much reduced in the Santa Ana River, and the Santa Ana River population appears to be less healthy than populations in other rivers occupied by the species (Moyle and Yoshiyama 1992; M. Saiki, pers. comm. 1999; P. Wolf, *in litt.* 1996).

The small mile-long stretch of Big Tujunga and Haines Canyon Creeks that appears to provide a critical refugia for the Santa Ana sucker, as well as the arroyo chub and Santa Ana speckled dace, is threatened by the potential water quality impacts of a proposed golf course development to be built just upstream of Interstate 210 (Bill Eick, *in litt.* 1999). Cohen *et al.* (1999) reviewed studies of 36 golf courses around the United States in an effort to evaluate the impacts to water quality by golf courses. Although no toxicologically significant impacts were observed by the authors, maximum allowable concentrations of pesticides and related chemicals for aquatic organisms occasionally were exceeded. Moreover, maximum contaminant levels/health advisory levels were frequently exceeded for various pesticides and ground water nitrate-nitrogen. Although the water quality tolerances of Santa Ana suckers are unknown, in general, point and non-point source pollution (*e.g.*, urban runoff, sedimentation) have significantly degraded the water quality in most of the native range of the Santa Ana sucker.

In an effort to identify what environmental variables affect the Santa Ana sucker, the Biological Resources Division of the USGS, in conjunction with the Orange County Water District,

County of Orange, Los Angeles County Department of Public Works, and the Service, is nearing completion of a study of the factors affecting Santa Ana sucker abundance. Initial results from this study indicate that tissue concentrations of inorganic and organic contaminants from Santa Ana suckers from the San Gabriel and Santa Ana Rivers were not unusually high. However, measurements of electrical conductance and turbidity did show significant negative correlations with Santa Ana sucker abundance, indicating that Santa Ana suckers are less tolerant where conditions are more turbid and contain more salts (M. Saiki, pers. comm. 1999). Based on available information, we conclude that increased turbidity and associated deposition of fine particles and sand likely threaten the Santa Ana sucker population in the Santa Ana River by decreasing the availability of cobble and other hard substrates and altering the water quality preferred by the species (Moyle and Yoshiyama 1992).

B. Overutilization for Commercial, Sporting, Scientific, or Educational Purposes

We are not aware of any commercial or recreational demand for the Santa Ana sucker. Although the CDFG reported that Santa Ana suckers had been illegally caught with gill and throw nets in the Santa Ana River below Prado Dam (Lt. M. Maytorena, CDFG, pers. comm. 1997), the relative impact of illegal harvesting of the species is unknown.

C. Disease or Predation

Moyle and Yoshiyama (1992) concluded that introduced brown trout (*Salmo trutta*) may have caused the extirpation of the Santa Ana sucker from the upper Santa Ana River in the San Bernardino Mountains. The petitioners noted that centrarchid (sunfishes) and bullheads prey on suckers. In the Los Angeles River, such introduced predators aggregate in pools during droughts and are presumably feeding on native fishes, including Santa Ana suckers (Sierra Club Legal Defense Fund, *in litt.* 1994). Similar conditions exist in the Santa Ana River. Predation by introduced fishes in combination with habitat destruction has been implicated in the decline of other species of suckers in the Southwest (Minckley *et al.* 1991; Scoppettone and Vinyard 1991) and on native fishes in general in California (Moyle 1976b).

Initial results from the USGS study mentioned above indicate that the presence of nonnative fish species was more strongly correlated with the absence of Santa Ana suckers than any water quality variable. Strongly significant negative associations were found with common carp (*Cyprinus carpio*), largemouth bass (*Micropterus salmoides*), bluegill (*Lepomis macrochirus*), and fathead minnow (*Pimephales promelas*), indicating nonnative fishes may exclude Santa Ana suckers by competition, or eliminate suckers through predation (M. Saiki, pers. comm. 1999). Nonnative introduced fishes have long been recognized as having far-reaching negative impacts to native fishes in North America (Moyle *et al.* 1986). Accordingly, introduced predators and competitors likely threaten the continued existence of Santa Ana suckers throughout most of the range of the species.

D. The Inadequacy of Existing Regulatory Mechanisms

Despite existing regulatory mechanisms and conservation activities accomplished to date by private, State, and Federal entities, the Santa Ana sucker has continued to decline throughout a significant portion of its range. Existing regulatory mechanisms that might provide some protection for the Santa Ana sucker if it was not listed include the California Endangered Species Act, California Environmental Quality Act (CEQA), NEPA, Clean Water Act, Federal Endangered Species Act (where the Santa Ana sucker occurs in areas where other federally listed species are located), and land management or conservation measures by Federal, State, or local agencies or by private groups and organizations.

The State of California considers the Santa Ana sucker a "species of special concern." However, the Santa Ana sucker is not listed as endangered or threatened by the State, and "species of special concern" are afforded no protection under the California Endangered Species Act.

CEQA requires full public disclosure of the potential environmental impact of proposed projects. This law also obligates disclosure of environmental resources within proposed project areas and may enhance opportunities for conservation efforts. However, CEQA does not guarantee that such conservation efforts will be implemented. The public agency with primary authority or jurisdiction over the project is designated as the lead agency under CEQA, and is responsible for conducting a review of the project and consulting with other agencies concerned with resources affected by the project. Section 15065 of the CEQA guidelines requires a finding of significance if a project has the potential to "reduce the number or restrict the range of a rare or endangered plant or animal." Although not currently listed under the California Endangered Species Act, the Santa Ana sucker would likely qualify as a rare species under section 15380 of the CEQA guidelines and thus would be given the same consideration under CEQA as those species that are officially listed with the State. Once significant impacts are identified, the lead agency may either require mitigation for effects through changes in the project or decide that overriding considerations justify approval of a project with significant impacts. In the latter case, projects may be approved that cause significant environmental damage, such as resulting in the loss of habitat supporting State-listed species. Protection of listed species through CEQA is, therefore, not assured.

NEPA requires an intensive environmental review of projects that may adversely affect a federally listed species, but project proponents are not required to avoid impacts to nonlisted species. The primary purpose of NEPA is to require Federal agencies to fully disclose impacts that would result from their proposed actions, and to make findings regarding the significance of those impacts. It does not require that resources be protected.

Lead agencies responsible under CEQA and/or NEPA have made determinations that have adversely affected, or would adversely affect, the Santa Ana sucker and its habitat. Examples of projects that have been completed or are currently undergoing the review process under CEQA and/or NEPA that would impact this species include the Santa Ana River Mainstem Project, containing multiple projects including Seven Oaks Dam and the raising of Prado Dam, and the continued channelization of the Santa Ana River in Orange County. The reviews for these projects have not addressed the effects of the proposed actions on the Santa Ana sucker, despite its status as a species proposed for listing. Similarly, on the San Gabriel River, proposed silt removal from Cogswell Dam may adversely affect the sucker. While projects altering a stream course are subject to review under section 1601 or 1603 of the California Fish and Game Code, such State regulations have not prevented habitat loss or sufficiently protected habitats to prevent the decline of the Santa Ana sucker.

Section 404 of the Clean Water Act currently affords some protection for the Santa Ana sucker. However, the Clean Water Act, by itself, does not provide

adequate protection for the Santa Ana sucker. Although the objective of the Clean Water Act is to "restore and maintain the chemical, physical, and biological integrity of the Nation's waters" (33 U.S.C. 1251), this law contains no specific provisions to address the conservation needs of rare species. USACE is the Federal agency with primary responsibility for administering the section 404 program. Under section 404, nationwide permits may be issued for certain activities that are considered to have minimal impacts, including minor dredging and discharges of dredged material, some road crossings, and minor bank stabilization (December 13, 1996; 61 FR 65873). USACE seldom withholds authorization of an activity under nationwide permits unless the existence of a listed threatened or endangered species would be jeopardized. Activities that do not qualify for authorization under a nationwide permit, including projects that would result in more than minimal adverse environmental effects, either individually or cumulatively, may be authorized by an individual permit or regional general permit, which are typically subject to more extensive review. Regardless of the type of permit deemed necessary under section 404, rare species such as the Santa Ana sucker may receive no special consideration with regard to conservation or protection unless they are listed under the Act.

As part of the section 404 review process, we provide comments to USACE on nationwide permits and individual permits under the Fish and Wildlife Coordination Act. Our comments are only advisory, although procedures exist for elevating permit review within the agencies when disagreements between us and USACE arise concerning the issuance of a permit. In practice, the section 404 permit review process has often proven to be inadequate to protect unlisted but rare species, such as the Santa Ana sucker.

The Santa Ana sucker may receive a small amount of protection from the overlap of its habitat with two federally endangered birds, the least Bell's vireo (*Vireo bellii pusillus*) and the southwestern willow flycatcher (*Empidonax traillii extimus*). Consideration for these listed bird species protects some areas from projects that could ultimately damage Santa Ana sucker habitat. However, protection is limited because these listed bird species occupy different areas and have dissimilar ecological requirements from the Santa Ana sucker. Although the federally endangered San Bernardino kangaroo rat (*Dipodomys merriami parvus*) also occurs along the Santa Ana River, this listed mammal occurs upstream from the present range of the Santa Ana sucker. Therefore, the presence of the San Bernardino kangaroo rat will have little effect on the status or protection afforded the sucker.

USFS lands encompass approximately 15 percent of the current native range of the Santa Ana sucker. Although a small percentage of the range is within a designated wilderness area, the majority of the range on USFS lands is not under wilderness management. Wilderness designation offers no direct regulatory protection to the sucker, but it does reduce some human-induced impacts on the stream. For example, motorized equipment is excluded from these areas. This restriction reduces or eliminates all motorized recreation and mining activities within the wilderness areas. Because these types of activities may harm Santa Ana sucker populations and habitats, wilderness designation offers some indirect benefit to the species. Santa Ana sucker habitat on USFS is also not subject to the development pressures existing on private land. However, this protection likely is partially offset by the recreational impacts discussed earlier (see factor "A").

E. Other Natural or Manmade Factors Affecting its Continued Existence

Periodic wildfires could adversely affect Santa Ana suckers by eliminating vegetation that shades the water and moderates water temperature, or by producing silt-and-ash-laden runoff that can significantly increase the turbidity of rivers. Although recent fires, including the 1996 Biedebach Fire (near the vicinity of Prairie Fork on the East Fork of the San Gabriel River) and the 1999 Bridge Fire (adjacent to the West and North Forks of the San Gabriel River), did not burn the riparian corridor, they may have contributed increased runoff and siltation to the creek.

The high degree of fragmentation of the remaining Santa Ana sucker populations makes the species especially vulnerable to random events, environmental factors, and loss of genetic variability. A small population size increases the rate of inbreeding and may allow increased expression of deleterious recessive genes occurring in the population (known as inbreeding depression). Loss of genetic variability, through random genetic drift (random gene frequency changes in a small population due to chance), reduces the ability of small populations to respond successfully to environmental stresses. Most of the lowland river habitats have been lost, and the remaining populations of Santa Ana suckers are low in numbers, with the exception of the San Gabriel Forks populations. Although Santa Ana suckers are locally common in what remains of their native range, the total population size of any one of the remaining native populations is still relatively small. Random events, such as floods, variations of annual weather patterns, predation and associated demographic uncertainty (conditions affected by chance events, such as sex ratios, that influence survival and reproduction in small populations), or other environmental stresses and human-caused factors, such as chemical spills, may lead to the demise of the remnant populations in the Los Angeles or Santa Ana Basins.

We have carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining its status. Based on this evaluation, the preferred action is to list the Santa Ana sucker (*Catostomus santaanae*) as threatened. While not in immediate danger of extinction, the Santa Ana sucker is likely to become an endangered species in the foreseeable future if the present threats continue and populations decline further.

Critical Habitat

Critical habitat is defined in section 3, paragraph (5)(A), of the Act as the specific areas within the geographic area occupied by a species, at the time it is listed in accordance with the Act, on which are found those physical or biological features essential to the conservation of the species and that may require special management considerations or protection; and specific areas outside the geographical area occupied by a species at the time it is listed in accordance with the provisions of section 4 of the Act, upon a determination that such areas are essential for the conservation of the species. "Conservation" means the use of all methods and procedures needed to bring the species to the point at which listing under the Act is no longer necessary.

Critical habitat designation, by definition, directly affects only Federal agency actions through consultation under section 7(a)(2) of the Act. Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or destroy or adversely modify its critical habitat.

Section 4(a)(3) of the Act, as amended, and implementing regulations (50 CFR 424.12) require that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time the species is determined to be endangered or threatened. According to Service regulations (50 CFR 424.12(a)), critical habitat is not determinable if information sufficient to perform required analysis of the impacts of the designation is lacking or if the biological needs of the species are not sufficiently well known to permit identification of an area as critical habitat. Section 4(b)(2) of the Act requires us to consider economic and other relevant impacts of designating a particular area as critical habitat on the basis of the best scientific data available. The Secretary may exclude any area from critical habitat if he determines that the economic benefits of such exclusion outweigh the conservation benefits of designation, unless to do so would result in the extinction of the species.

In designating critical habitat, we consider the following requirements of the species: Space for individual and population growth and for normal behavior; food, water, air, light, minerals, or other nutritional or physiological requirements; cover or shelter; sites for breeding, reproduction, or rearing of offspring; and, generally, habitats that are protected from disturbance or are representative of the historic geographical and ecological distributions of this species (see 50 CFR 424.12(b)). In addition to these factors, we also focus on the known physical and biological features (primary constituent elements) within the designated area that are essential to the conservation of the species and may require special management considerations or protection. The essential features for the Santa Ana sucker may include, but are not limited to, spawning sites, food resources, and water quality and quantity (see 50 CFR 424.12(b)).

We conclude that the knowledge and understanding of the biological needs and environmental limitations of the Santa Ana sucker and the primary constituent elements of its habitat are insufficient to determine critical habitat for the fish. We believe that the Santa Ana sucker is intolerant of highly polluted waters, but little information is available concerning this possible limiting factor. Furthermore, in the Santa Ana River, suckers remain extant, although rare, in the lower reaches where water quality is degraded relative to the headwaters. We need additional information on the environmental limits of the sucker to enable us to accurately designate critical habitat for the Santa Ana sucker throughout its range. The physical and biological features including but not limited to water chemistry, water temperature, instream flows, streambed substrate and structure, and fauna and flora of the aquatic environment that supports the Santa Ana sucker are the features about which we need additional information. In an effort to gain these data, the Orange County Water District, the County of Orange, Los Angeles County Department of Public Works, the National Fish and Wildlife Foundation, the Biological Resources Division of USGS, and the Service have funded and implemented research on the environmental limitations of the Santa Ana Sucker. The study is nearing completion and has already identified some environmental parameters, including water quality (e.g., turbidity and conductivity) and some biological parameters (introduced nonnative fish species) associated with variations in population densities. These correlations will help guide future research to focus on the variable(s) most likely to limit sucker populations.

When a "not determinable" finding is made, we must, within 2 years of the publication date of the original proposed rule, propose the designation of critical habitat, unless the designation is found to be not prudent. Initial results of the USGS–Santa Ana sucker study have been incorporated into this rule. A final report should be available later this year. We will use this study and other new information to reevaluate our knowledge of the species and, if determined prudent, propose critical habitat for the Santa Ana sucker. We will continue in our efforts to obtain more information on Santa Ana sucker biology and ecology, including distribution, population density, and essential habitat characteristics, particularly in regard to water quality. We will also use the information resulting from these efforts to identify measures needed to achieve conservation of the species, as defined under the Act.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Act provides for possible land acquisition and cooperation with the States, and requires that recovery plans be carried out for all listed species. Funding may be available through section 6 of the Act for the State to conduct recovery activities. The protection required of Federal agencies and the prohibitions against certain activities involving listed plants are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) requires Federal agencies to confer with us on any action that is likely to jeopardize the continued existence of a species proposed for listing or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) of the Act requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or destroy or adversely modify its critical habitat, if designated. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with us, under section 7(a)(2) of the Act.

Federal agencies expected to consult with us under section 7 regarding the Santa Ana sucker include USACE and the Environmental Protection Agency because of their permitting authority under section 404 of the Clean Water Act. The USFS may consult with us on its activities on the Angeles National Forest and Los Padres National Forest. These agencies either administer lands/waters containing the Santa Ana sucker or authorize, fund, or otherwise conduct activities that may affect this species.

The Act and its implementing regulations set forth a series of general prohibitions and exceptions that apply to all endangered and threatened wildlife not covered by a special rule. These prohibitions, codified at 50 CFR 17.21 and 17.31, in part, make it illegal for any person subject to the jurisdiction of the United States to take (including harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, collect, or attempt any such conduct), import or export, transport in interstate or foreign commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It is also illegal to possess, sell, deliver, carry, transport, or

ship any such wildlife that has been taken illegally. Certain exceptions apply to our agents and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving threatened wildlife under certain circumstances. Regulations governing permits are at 50 CFR 17.32. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities. For threatened species, permits also are available for zoological exhibition, educational purposes, or special uses consistent with the mission of the Act.

As published in the **Federal Register** (59 FR 34272) on July 1, 1994, our policy is to identify to the maximum extent practicable those activities that would or would not be likely to constitute a violation of section 9 of the Act if a species is listed. The intent of this policy is to increase public awareness of the effect of a listing on proposed and ongoing activities within a species' range. We believe the following actions would not likely result in a violation of section 9:

(1) Actions that may affect the Santa Ana sucker and are authorized, funded, or carried out by a Federal agency when the action is conducted in accordance with any reasonable and prudent alternatives or reasonable and prudent measures to minimize the impacts of take identified by us in accordance with section 7 of the Act; and

(2) Possession, transport within or between States, and import and export, with proper permits, of Santa Ana suckers that were legally collected prior to the date of publication in the **Federal Register** of the final regulation adding this species to the list of threatened and endangered species.

Activities that we believe could potentially harm the Santa Ana sucker and result in a violation of section 9 of the Act include, but are not limited to:

(1) Take of Santa Ana suckers without a permit, which includes harassing, harming, pursuing, hunting, shooting, wounding, killing, trapping, capturing, or collecting, or attempting any of these actions;

(2) Possessing, selling, delivering, carrying, transporting, or shipping illegally taken Santa Ana suckers;

(3) Unauthorized interstate and foreign commerce (commerce across State and international boundaries) and import/export;

(4) Introduction of nonnative species that compete or hybridize with, or prey on Santa Ana suckers;

(5) Unauthorized destruction or alteration of Santa Ana sucker habitat by dredging, channelization, diversion, dewatering through groundwater withdraw, in-stream vehicle operation or rock removal, or other activities that result in the destruction or significant degradation of cover, channel stability, substrate composition, water quality, water temperature, and migratory corridors; and

(6) Discharging or dumping of toxic chemicals, silt, organic waste, or other pollutants (such as may result from mining, land development or land management activities) into waters supporting Santa Ana suckers that results in death or injury to the species or results in the destruction or degradation of cover, channel stability, substrate composition, water quality, water temperature, and migratory corridors used by the species for foraging, cover, migration, and spawning.

We will review other activities not identified above on a case-by-case basis to determine if a violation of section 9 of the Act may be likely to result from such activity. We do not consider these lists to be exhaustive and provide them as information to the public.

Questions regarding whether specific activities may constitute a violation of section 9 should be directed to the Field Supervisor of the Service's Carlsbad Fish and Wildlife Office (see **ADDRESSES** section). Requests for copies of the regulations regarding listed wildlife and inquiries about prohibitions and permits may be addressed to the U.S. Fish and Wildlife Service, Ecological Services, Endangered Species Permits, 911 N.E. 11th Avenue, Portland, Oregon 97232–4181 (telephone 503/231–6241; facsimile 503/231–6243)

National Environmental Policy Act

We have determined that environmental assessments and environmental impact statements, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. We published a notice outlining our reasons for this determination in the **Federal Register** on October 25, 1983 (48 FR 49244).

Paperwork Reduction Act

This rule does not contain any new collections of information other than those already approved under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, and assigned Office of Management and Budget clearance number 1018–0094. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number. For additional information concerning permit and associated requirements for threatened wildlife, see 50 CFR 17.32.

Regulation Promulgation

Accordingly, we amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as follows:

PART 17—[AMENDED]

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500, unless otherwise noted.

2. Amend § 17.11(h) by adding the following, in alphabetical order under FISHES, to the List of Endangered and Threatened Wildlife:

§ 17.11 Endangered and threatened wildlife.

Proposed Rules

Federal Register
Vol. 65, No. 71
Wednesday, April 12, 2000

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 00–AGL–07]

Proposed Establishment of Class E Airspace; Wadena, MN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to establish Class E airspace at Wadena, MN. An Area Navigation (RNAV) Standard Instrument Approach procedure (SIAP) to Runway (Rwy) 34 has been developed for Wadena Municipal Airport. Controlled airspace extending upward from 700 feet or more above the surface of the earth is needed to contain aircraft executing this approach. This action would create controlled airspace for Wadena Municipal Airport.

DATES: Comments must be received on or before May 22, 2000.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Regional Counsel, AGL–7, Rules Docket No. 00–AGL–07, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

The official docket may be examined in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois. An informal docket may also be examined during normal business hours at the Air Traffic Division, Airspace Branch, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois.

FOR FURTHER INFORMATION CONTACT: Denis C. Burke, Air Traffic Division, Airspace Branch, AGL–520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (847) 294–7568.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 00–AGL–07." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the rules Docket, FAA, Great Lakes Region, Office of the Regional Counsel, 2300 East Devon Avenue, Des Plaines, Illinois, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–230, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267–3484. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to 14 CFR part 71 to establish Class E airspace at Wadena, MN, by creating controlled airspace for Wadena Municipal Airport. Controlled airspace extending upward from 700 feet or more above the surface of the earth is needed to contain aircraft executing instrument approach procedures. The area would be depicted on appropriate aeronautical charts. Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9G dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Class E designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an establishment body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9G, Airspace Designations and Reporting Points, dated September 1, 1999, and effective September 16, 1999, is amended as follows:

* * * * *

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

AGL MN E5 Wadena, MN [New]

Wadena Municipal Airport, MN
(Lat. 46°26′51″ N., long. 95°12′41″ W.)

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the Wadena Municipal Airport.

* * * * *

Issued in Des Plaines, Illinois on March 22, 2000.

Christopher R. Blum,

Manager, Air Traffic Division.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 00–AGL–08]

Proposed Establishment of Class E Airspace; Minneapolis, Flying Cloud Airport, Minnesota

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to establish Class E airspace at Minneapolis, Flying Cloud Airport, MN. Flying Cloud Airport is served by Federal Aviation Regulations Part 135 (14 CFR Part 135) air carrier operations. Controlled airspace extending upward from the surface is needed to contain aircraft executing instrument flight procedures and provide a safer operating environment when the control tower is closed. The airport meets the minimum communications and weather observation and reporting requirements for controlled airspace extending upward from the surface. This action proposes to create controlled airspace with a 4.0-mile radius for this airport.

DATES: Comments must be received on or before May 22, 2000.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Regional Counsel, AGL–7, Rules Docket No. 00–AGL–08, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

The official docket may be examined in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois. An informal docket may also be examined during normal business hours at the Air Traffic Division, Airspace Branch, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois.

FOR FURTHER INFORMATION CONTACT: Denis C. Burke, Air Traffic Division, Airspace Branch, AGL–520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (847) 294–7568.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 00–AGL–08." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket, FAA, Great Lakes Region, Office of the Regional Counsel, 2300 East Devon Avenue, Des Plaines, Illinois, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–230, 800 Independence Avenue, SW, Washington, DC 20591, or by calling (202) 267–3484. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to 14 CFR part 71 to establish Class E airspace at Minneapolis, Flying Cloud Airport, MN, to accommodate and Part 135 air carrier aircraft executing instrument flight rules procedure during periods when the control tower is closed. The area would be depicted on appropriate aeronautical charts. Class E airspace designations for airspace areas extending upward from the surface of the earth are published in paragraph 6002 of FAA Order 7400.9G dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an establishment body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore this, proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. .

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9G, Airspace Designations and Reporting Points, dated September 1, 1999, and effective September 16, 1999, is amended as follows:

* * * * *

Paragraph 6002 Class E airspace designated as a surface area.

AGL MN E2 Minneapolis, Flying Cloud Airport, NM [New]

Flying Cloud Airport, MN
(Lat. 44°49′ 38″ N., long. 93°27′26″ W.)
Within an 4.0-mile radius of the Minneapolis, Flying Cloud Airport. This Class E airspace area is effective during the specific dates and times established in advance by Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

* * * * *

Issued in Des Plaines, Illinois on March 22, 2000.

Christopher R. Blum,

Manager, Air Traffic Division.

[FR Doc. 00–8969 Filed 4–11–00; 8:45 am]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 00–AGL–09]

Proposed Establishment of Class E Airspace; Minneapolis, Anoka County-Blaine Airport, MN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to establish Class E airspace at Minneapolis, Anoka County-Blaine Airport, MN. Akoka County-Blaine Airport is served by Federal Aviation Administration Part 135 (14 CFR Part 135) air carrier operations. Controlled airspace extending upward from the surface is needed to contain aircraft executing instrument flight procedures and provide a safer operating environment when the control tower is closed. The airport meets the minimum communications and weather observation and reporting requirements for controlled airspace extending upward from the surface. This action proposes to create controlled airspace with a 3.9-mile radius for this airport.

DATES: Comments must be received on or before May 22, 2000.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Regional Counsel, AGL–7, Rules Docket No. 00–AGL–09, 2300 East Devon Avenue, Des Plaines, Illinois.

The official docket may be examined in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois. An informal docket may also be examined during normal business hours at the Air Traffic Division, Airspace Branch, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois.

FOR FURTHER INFORMATION CONTACT: Denis C. Burke, Air Traffic Division, Airspace Branch, AGL–520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (847) 294–7568.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comment to Airspace Docket No. 00–AGL–09." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket, FAA, Great Lakes Region, Office of The Regional Counsel, 2300 East Devon Avenue, Des Plaines, Illinois, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–230, 800 Independence Avenue, SW, Washington, DC 20591, or by calling (202) 267–3484. Communications must identify the docket number of this NPRM. Persons' interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to 14 CFR part 71 to establish Class E airspace at Minneapolis, Anoka County-Blaine Airport, MN, to accommodate Part 135 air carrier aircraft executing instrument flight rules procedure during periods when the control tower is closed. The area would be depicted on appropriate aeronautical charts. Class E airspace designations for airspace areas extending upward from the surface of the earth are published in paragraph 6002 of FAA Order 7400.9G dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an establishment body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore this, proposed regulation—(1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedure (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities

under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air)

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963., Comp., p. 389.

§71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9G, Airspace Designations and Reporting Points, dated September 1, 1999, and effective September 16, 1999, is amended as follows:

* * * * *

Paragraph 6002 Class E airspace designated as a surface area.

* * * * *

AGL MN E2 Minneapolis, Anoka County-Blaine Airport, MN [New]

Anoka County-Blaine Airport, MN
(Lat. 45°08′42″ N., long 93° 12′ 41″ W.)

Within a 3.9-mile radius of the Minneapolis, Anoka County-Blaine Airport. This Class E airspace area is effective during the specific dates and times established in advance by Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

* * * * *

Issued in Des Plaines, Illinois on March 22, 2000.

Christopher R. Blum,

Manager, Air Traffic Division.

RIN 1545–AO72

Source of Compensation for Labor of Personal Services; Hearing Cancellation

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Cancellation of notice of public hearing on proposed rulemaking.

SUMMARY: This document provides notice of cancellation of a public hearing on proposed regulations under section 861 describing the appropriate basis for determining the source of income from labor or personal services performed partly within and partly without the United States.

DATES: The public hearing originally scheduled for Wednesday, April 19, 2000, at 10 a.m., is cancelled.

FOR FURTHER INFORMATION CONTACT: LaNita Van Dyke of the Regulations Unit, Assistant Chief Counsel (Corporate), (202) 622–7190 (not a toll-free number).

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking and notice of public hearing that appeared in the **Federal Register** on Friday, January 21, 2000 (64 FR 3401), announced that a public hearing was scheduled for Wednesday, April 19, 2000, at 10 a.m., in room 2615, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. The subject of the public hearing is proposed regulations under section 861 of the Internal Revenue Code. The public comment period for these proposed regulations expired on Wednesday, March 29, 2000. The outlines of topics to be addressed at the hearing were due on Wednesday, March 29, 2000.

The notice of proposed rulemaking and notice of public hearing, instructed those interested in testifying at the public hearing to submit a request to speak and an outline of the topics to be addressed. As of Wednesday, April 5, 2000, no one has requested to speak. Therefore, the public hearing scheduled for Wednesday, April 19, 2000, is cancelled.

Cynthia Grigsby,

Chief, Regulations Unit, Assistant Chief Counsel (Corporate).

RIN 1218–AB36

Ergonomics Program Standard Informal Public Hearings

AGENCY: Occupational Safety and Health Administration (OSHA), U.S. Department of Labor.

ACTION: Proposed rule; extension of informal public hearing.

SUMMARY: The Occupational Safety and Health Administration (OSHA) is extending the dates of the informal public hearing on the proposed Ergonomics Program standard (64 FR 65768, November 23, 1999) in Portland, Oregon. OSHA has added two additional days to the Portland hearing, which will now be held from April 24, 2000 through May 5, 2000.

DATES: *Informal Public Hearing:* The hearing in Washington, DC, began at 9:30 a.m., March 13, 2000, at the Frances Perkins Building, 200 Constitution Avenue, NW., Washington, DC 20210. The hearing in Washington is scheduled to run through April 7, 2000. The hearing will continue in Chicago, Illinois, from April 11, 2000 through April 21, 2000. In Portland, the hearing will run from April 24, through May 5, 2000. The hearings will begin at 8:30 a.m. each day in Chicago and Portland.

Notice of Intention To Appear at the Informal Public Hearing: Notices of intention to appear at the informal public hearing were required to have been postmarked to January 24, 2000.

ADDRESSES: The informal public hearing in Washington, DC, is being held in the Auditorium of the Frances Perkins Building, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. In Chicago, the hearing will be held at the State of Illinois Building, James R. Thompson Center (Assembly Hall), 100 West Randolph Street. In Portland, the hearing is being held at the Mark Hatfield Federal Court House, 1000 Southwest 3rd Avenue.

FOR FURTHER INFORMATION CONTACT: OSHA's Ergonomics Team at (202) 693–2116, or visit the OSHA Homepage at *www.osha.gov*.

SUPPLEMENTARY INFORMATION: The amended schedule, as well as any additional updates, is available on OSHA's web site, *http://www.osha.gov*. Participants whose scheduled

presentation times have changed have already received notification of these changes.

Authority: This document was prepared under the direction of Charles N. Jeffress, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. It is issued under sections 4, 6, and 8 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657), Secretary of Labor's Order No. 6–96 (62 FR 111), and 29 CFR part 1911.

Signed at Washington, DC, this 5th day of April, 2000.

Charles N. Jeffress,

Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 2

[FRL–6575–5]

Revised Freedom of Information Act Regulations

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA or Agency) proposes to revise its regulations implementing the Freedom of Information Act (FOIA). EPA is streamlining and condensing its regulations, in accordance with the principles of the National Performance Review, and is using simpler language whenever possible. The regulations also reflect the principles established by President Clinton and Attorney General Reno in their FOIA Policy Memoranda dated October 4, 1993, as well as Attorney General Reno's recent restatement of those principles in a FOIA Policy Memorandum dated September 3, 1999. In addition, the regulations contain new provisions implementing the Electronic Freedom of Information Act Amendments of 1996, reflect developments in case law under the FOIA, and update cost figures for calculating and charging fees.

DATES: Comments must be received on or before May 12, 2000.

ADDRESSES: Please send any comments on this proposed rule to Jeralene B. Green, Office of Environmental Information (2822), Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington, DC 20460.

Public comments on this proposed rule will be available for review at EPA's Air and Radiation Docket and Information Center (6102), Attention Docket Number FOIA–2000–01, 401 M Street, SW., Room M–1500, Waterside Mall (ground floor), Washington, DC 20460. This Docket is available for public inspection and copying between 8:00 a.m. and 5:30 p.m., Monday through Friday, or by calling (202) 260–7548. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Jeralene B. Green, (202) 260–1050.

SUPPLEMENTARY INFORMATION:

I. Description of Proposed Rule

EPA is proposing this comprehensive revision to 40 CFR part 2, subpart A, to add new provisions to implement the Electronic Freedom of Information Act Amendments of 1996, Public Law 104–231, to update the fee schedule, and to incorporate changes to the language and structure of the regulations. New provisions implementing the amendments are found at § 2.101(c) (electronic availability of records), § 2.104(b) (timing of responses), § 2.104(f) (expedited processing), § 2.104(g) (deletion marking), § 2.104(i)(3) (volume estimation), § 2.106(b)(3) (format of disclosure), and § 2.106(b)(8) (electronic searches).

Proposed changes to the Agency's fee schedule are found at § 2.106(c) and (d). The duplication charge will remain the same at fifteen (15) cents per page, while document search and review charges will increase to $4.00, $7.00, and $10.25 per quarter hour for clerical, professional, and managerial time, respectively. The amount at or below which the Agency will not charge a fee will be $14.00.

II. Statutory Authority

EPA is proposing this rule under the authority of 5 U.S.C. 301, 552 (as amended), and 553.

III. Regulatory Flexibility Act, as Amended

The Regulatory Flexibility Act, as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, 5 U.S.C. 601 *et seq.*, generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small enfities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

EPA has determined that this proposed rule will have only a small economic impact on the small entities that submit FOIA requests to EPA for records. Under the FOIA, agencies may recover only the direct costs of searching for, reviewing, and duplicating the records processed for requesters. EPA's proposed fees are nominal and have been calculated to recover only the direct costs of processing a FOIA request. The revision to the fee schedule is minimal and reflects a more specific breakdown of direct costs by the kind of EPA employee involved in processing a FOIA request. Therefore, under 5 U.S.C. 605(b), I certify that this proposed rule will not have a significant economic impact on a substantial number of small entities.

IV. Paperwork Reduction Act

This proposed rule does not impose any reporting or recordkeeping requirements under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* It pertains solely to the dissemination of information under the FOIA.

V. Environmental Impact

This proposed rule is expected to have no environmental impact. It pertains solely to the dissemination of information under the FOIA.

VI. Executive Order 12866

Under Executive Order 12866 (58 FR 51735 (October 4, 1993)), EPA must determine whether this proposed rule is "significant" and therefore subject to Office of Management and Budget (OMB) review and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

EPA has determined that this proposed rule is not a "significant regulatory action" under the terms of

Executive Order 12866 and therefore is not subject to OMB review.

VII. Executive Order 13132 on Federalism

Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government."

Under Section 6 of Executive Order 13132, EPA may not issue a regulation that has federalism implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, or EPA consults with State and local officials early in the process of developing the proposed regulation. EPA also may not issue a regulation that has federalism implications and that preempts State law, unless the Agency consults with State and local officials early in the process of developing the proposed regulation.

This proposed rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. This proposed rule simply revises EPA's regulations implementing the FOIA. Thus, the requirements of section 6 of the Executive Order do not apply to this proposed rule.

VIII. Executive Order 13084 on Consultation With Indian Tribal Governments

Under Executive Order 13084, EPA may not issue a regulation that is not required by statute, that significantly or uniquely affects the communities of Indian tribal governments, and that imposes substantial direct compliance costs on those communities, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by the tribal governments, or EPA consults with those governments. If EPA complies by consulting, Executive Order 13084 requires EPA to provide to OMB, in a separately identified section of the preamble to the rule, a description of the extent of EPA's prior consultation with representatives of affected tribal governments, a summary of the nature of their concerns, and a statement supporting the need to issue the regulation. In addition, Executive Order 13084 requires EPA to develop an effective process permitting elected officials and other representatives of Indian tribal governments "to provide meaningful and timely input in the development of regulatory policies on matters that significantly or uniquely affect their communities."

This proposed rule does not significantly or uniquely affect the communities of Indian tribal governments. Accordingly, the requirements of Executive Order 13084 do not apply to this proposed rule.

IX. Unfunded Mandates Reform Act of 1995

Under section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, EPA must prepare a budgetary impact statement to accompany any general notice of proposed rulemaking or final rule that includes a federal mandate which may result in estimated costs to State, local, or tribal governments in the aggregate, or to the private sector, of $100 million or more. Under section 205, for any rule subject to section 202, EPA generally must select the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Under section 203, before establishing any regulatory requirements that may significantly or uniquely affect small governments, EPA must take steps to inform and advise small governments of the requirements and enable them to provide input.

EPA has determined that this proposed rule does not include a federal mandate as defined in UMRA. This proposed rule does not include a federal mandate that may result in estimated annual costs to State, local or tribal governments in the aggregate, or to the private sector, of $100 million or more, and does not establish regulatory requirements that may significantly or uniquely affect small governments.

X. Executive Order 13045

Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997), applies to any rule that (1) is determined to be "economically significant" as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, EPA must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned rule is preferable to other potentially effective and reasonably feasible alternatives considered by EPA.

EPA believes Executive Order 13045 applies only to those regulatory actions that are based on health or safety risks, such that the analysis required under section 5–501 of the Executive Order has the potential to influence the regulation. This proposed rule is not subject to Executive Order 13045 because it does not establish an environmental standard intended to mitigate health or safety risks.

XI. National Technology Transfer and Advancement Act of 1995

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note), directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.*, materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through OMB, explanations when EPA decides not to use available and applicable voluntary consensus standards.

This proposed rule does not involve any technical standards, and EPA is not considering the use of any voluntary consensus standards. Accordingly, this proposed rule is not subject to the requirements of the NTTAA.

List of Subjects 40 CFR Part 2

Environmental protection, Administrative practice and procedure, Confidential business information, Freedom of information, Government employees.

Dated: March 31, 2000.

Margaret N. Schneider,

Principal Deputy Assistant Administrator.

For the reasons set out above, EPA proposes to amend 40 CFR part 2 as follows:

PART 2—PUBLIC INFORMATION

1. The authority citation for part 2 continues to read as follows:

Authority: 5 U.S.C. 301, 552 (as amended), 553; secs. 114, 205, 208, 301, and 307, Clean Air Act, as amended (42 U.S.C. 7414, 7525, 7542, 7601, 7607); secs. 308, 501 and 509(a), Clean Water Act, as amended (33 U.S.C. 1318, 1361, 1369(a)); sec. 13, Noise Control Act of 1972 (42 U.S.C. 4912); secs. 1445 and 1450, Safe Drinking Water Act (42 U.S.C. 300j–4, 300j–9); secs. 2002, 3007, and 9005, Solid Waste Disposal Act, as amended (42 U.S.C. 6912, 6927, 6995); secs. 8(c), 11, and 14, Toxic Substances Control Act (15 U.S.C. 2607(c), 2610, 2613); secs. 10, 12, and 25, Federal Insecticide, Fungicide, and Rodenticide Act, as amended (7 U.S.C. 136h, 136j, 136w); sec. 408(f), Federal Food, Drug and Cosmetic Act, as amended (21 U.S.C. 346(f)); secs. 104(f) and 108, Marine Protection Research and Sanctuaries Act of 1972 (33 U.S.C. 1414(f), 1418); secs. 104 and 115, Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (42 U.S.C. 9604 and 9615); sec. 505, Motor Vehicle Information and Cost Savings Act, as amended (15 U.S.C. 2005).

2. Subpart A is revised to read as follows:

Subpart A—Procedures for Disclosure of Records Under the Freedom of Information Act

Sec.

2.100 General provisions.
2.101 Where requests for records are to be filed.
2.102 Procedures for making requests.
2.103 Responsibility for responding to requests.
2.104 Responses to requests.
2.105 Preservation of records.
2.106 Fees.
2.107 Other rights and services.

Subpart A—Procedures for Disclosure of Records Under the Freedom of Information Act

§ 2.100 General provisions.

(a) This subpart contains the rules that the Environmental Protection Agency (EPA or the Agency) follows in processing requests for records under the Freedom of Information Act (FOIA), 5 U.S.C. 552. Information routinely provided to the public as part of a regular EPA activity may be provided to the public without following this subpart. As a matter of policy, EPA makes discretionary disclosures of records or information exempt under the FOIA whenever disclosure would not foreseeably harm an interest protected by a FOIA exemption, but this policy does not create any right enforceable in court.

(b) As used in this subpart, the term "component" includes the offices of the Administrator, the Deputy Administrator, the Assistant Administrators, the Regional Administrators, the General Counsel, the Inspector General, the Chief Financial Officer, the Associate Administrators, and the headquarters staff offices.

(c) When documents responsive to a request are maintained for distribution by agencies operating statutory-based fee schedule programs, such as, but not limited to, the Government Printing Office or the National Technical Information Service, EPA will inform the requester of the steps necessary to obtain records from these sources.

§ 2.101 Where requests for records are to be filed.

(a) You may request records by writing to the Headquarters Freedom of Information Operations Staff (1105), Environmental Protection Agency, Ariel Rios Building, 1200 Pennsylvania Avenue, NW., Washington, DC 20460; (202) 260–4048; FAX: (202) 260–4499. If you believe the records sought may be located in an EPA regional office, you should send your request to the appropriate regional Freedom of Information Officer as indicated in the following list:

(1) Region I (CT, ME, MA, NH, RI, VT): EPA, Freedom of Information Officer, One Congress Street, Suite 1100, Boston, MA 02114–2023; (617) 918–1103; FAX: (617) 918–1124.

(2) Region II (NJ, NY, PR, VI): EPA, Freedom of Information Officer, 290 Broadway, 26th Floor, New York, NY 10007–1866; (212) 637–3668; FAX: (212) 637–5046.

(3) Region III (DE, DC, MD, PA, VA, WV): EPA, Freedom of Information Officer, 1650 Arch Street, Philadelphia, PA 19103–2029; (215) 814–5553; FAX: (215) 814–5102.

(4) Region IV (AL, FL, GA, KY, MS, NC, SC, TN): EPA, Freedom of Information Officer, Atlanta Federal Center, 61 Forsyth Street, SW., Atlanta, GA 30303–3104; (404) 562–8034; FAX: (404) 562–8054.

(5) Region V (IL, IN, MI, MN, OH, WI): EPA. Freedom of Information Officer, 77 West Jackson Boulevard, Chicago, IL 60604–3507; (312) 886–2942; FAX: (312) 886–6686.

(6) Region VI (AR, LA, NM, OK, TX): EPA, Freedom of Information Officer, 1445 Ross Avenue, Dallas, TX 75202–2733; (214) 665–6597; FAX: (214) 665–2146.

(7) Region VII (IA, KS, MO, NE): EPA, Freedom of Information Officer, 901 North Fifth Street, Kansas City, KS 66101; (913) 551–7764; FAX: (913) 551–7066. Subpart A. Procedure

(8) Region VIII (CO, MT, ND, SD, UT, WY): EPA, Freedom of Information Officer, 999 18th Street, Suite 500, Denver, CO 80202–2466, (303) 312–6940; FAX: (303) 312–6961.

(9) Region IX (AZ, CA, HI, NV, AS, GU): EPA, Freedom of Information Officer, 75 Hawthorne Street, San Francisco, CA 94105; (415) 744–1593; FAX: (415) 744–1605.

(10) Region X (AK, ID, OR, WA): EPA, Freedom of Information Officer, 1200 Sixth Avenue, Seattle, WA 98101; (206) 553–8665; FAX: (206) 553–0149.

(b) EPA provides access to all records that the FOIA requires an agency to make regularly available for public inspection and copying. Each component is responsible for determining which of the records it generates are required to be made publicly available and for providing access by the public to them. Each component will also maintain and make available for public inspection and copying a current subject-matter index of such records. Each index will be updated regularly, at least quarterly, with respect to newly-included records.

(c) All records created by EPA on or after November 1, 1996, which the FOIA requires an agency to make regularly available for public inspection and copying, will be made available electronically through EPA's worldwide web site, located at http://www.epa.gov, or, upon request, through other electronic means. EPA will also include on its worldwide web site the current subject-matter index of all such records.

§ 2.102 Procedures for making requests.

(a) How made and addressed. You may make a request for EPA records by writing directly to the Freedom of Information Officer of the component as listed in § 2.101(a). Only written requests for records will be accepted for processing under this subpart. If you are making a request for records about yourself, see 40 CFR part 16, which implements the Privacy Act of 1974. If you are making a request for records about another individual, either a written authorization signed by that individual permitting disclosure of those records to you or proof that that individual is deceased (for example, a copy of a death certificate or an obituary) will help EPA to process your request. For records located at EPA headquarters, or in those instances when you cannot determine which EPA office to send your request, you may send it to the Headquarters Freedom of Information Operations Staff (1105), Environmental Protection Agency, Ariel Rios Building, 1200 Pennsylvania Avenue, NW., Washington, DC 20460. That office will forward your request to the component(s) it believes most likely to have the records that you want. Your request will be considered received as of the date it is received by the FOIA

office. Misdirected requests will not be considered received by EPA until the appropriate FOIA office receives the request. For the quickest possible handling, you should mark both your request letter and its envelope "Freedom of Information Act Request."

(b) EPA officers and employees will attempt in good faith to comply with requests for inspection or disclosure of EPA records made orally, by telephone or otherwise, but such requests are not required to be processed in accordance with this subpart.

(c) Description of records sought. You must describe the records you are seeking in enough detail to enable EPA personnel to locate them with a reasonable amount of effort. Whenever possible, your request should include specific information about each record sought, such as the date, title or name, author, recipient, and subject matter. If known, you should include any file designations or descriptions for the records that you want. As a general rule, the more specific you are about the records or type of records that you want, the more likely EPA will be able to locate those records in response to your request. If EPA determines that your request does not reasonably describe the records, it will tell you either what additional information you need to provide or why your request is otherwise insufficient. EPA will also give you an opportunity to discuss and modify your request to meet the requirements of this section. Should it be necessary for you to provide a revised description of the records you are seeking, the time necessary to do so will be excluded from the 20 working day period (or any extension of such period) that EPA has to respond to your request as discussed in § 2.104.

(d) Agreement to pay fees. If you make a FOIA request, EPA will consider your request to be an agreement that you will pay all applicable fees charged under § 2.106, up to $25.00, unless you seek a waiver of fees. The EPA component responsible for responding to your request ordinarily will confirm this agreement in writing. When making a request, you may specify a willingness to pay a greater or lesser amount.

§ 2.103 Responsibility for responding to requests.

(a) *In general.* Except as stated in paragraphs (c), (d), and (e) of this section, the Freedom of Information Office of the component that has possession of that record is the component responsible for responding to you. In determining which records are responsive to a request, a component will include only those records in its possession as of the date the Freedom of Information Office of the component receives the request. If any other date is used, the component will inform you of that date.

(b) *Authority to grant or deny requests.* The head of a component, or the component head's designee, has been delegated authority to grant or deny any request for a record of that component.

(c) *Consultations and referrals.* When a component receives a request for a record in its possession, it will determine whether another component, or another agency of the Federal government, is better able to determine whether the record is exempt from disclosure under the FOIA and, if so, whether it should be disclosed as a matter of administrative discretion. If the receiving component determines that it is best able to process the record in response to the request, then it will do so. If the receiving component determines that it is not best able to process the record, then it will either:

(1) Respond to you regarding the record you have requested, after consulting with the component or agency best able to determine whether to disclose it and with any other component or agency that has a substantial interest in it; or

(2) Refer the responsibility for responding to your request regarding that record to the component best able to determine whether to disclose it, or to another agency that originated the record (but only if that agency is subject to FOIA). Ordinarily, the component or agency that originated a record will be presumed to be best able to determine whether to disclose it.

(d) *Law enforcement information.* Whenever a request is made for a record containing information that relates to an investigation of a possible violation of law and was originated by another component or agency, the receiving component will either refer the responsibility for responding to the request regarding that information to that other component or agency or will consult with that other component or agency prior to making any release determination.

(e) *Notice of referral.* Whenever a component refers all or any part of the responsibility for responding to a request to another component or agency, it ordinarily will notify you of the referral and inform you of the name of each component or agency to which the request has been referred and of the part of the request that has been referred.

§ 2.104 Responses to requests.

(a) The Deputy Administrator, Assistant Administrators, Regional Administrators, General Counsel, Inspector General, Chief Financial Officer, Associate Administrators, and heads of headquarters staff offices are delegated the authority to issue initial determinations to release or deny the release of responsive records. The authority to issue initial determinations denying the release of records, except for records that have been claimed as confidential business information (CBI), may be redelegated to the division director level or equivalent, but not lower. The authority to issue initial determinations denying the release of records that have been claimed as CBI, as discussed in subpart B of this part 2, may be redelegated to levels below the division director level or equivalent.

(b) Components ordinarily will respond to requests no later than twenty (20) working days from the date the request is received. Requests ordinarily will be responded to according to their order of receipt.

(c) On receipt of a request, the Freedom of Information Office ordinarily will send an acknowledgment letter advising you of the date it was received and of the processing number assigned to the request for future reference.

(d) Multitrack processing. (1) A component may use two or more processing tracks by distinguishing between simple and complex requests based on the amount of work and/or time needed to process the request, including limits based on the number of pages involved. If a component does so, it will advise you of the processing track in which your request has been placed and of the limits of the different processing tracks.

(2) A component using multitrack processing may place your request in its slower track(s) while providing you the opportunity to limit the scope of your request in order to qualify for faster processing within the specified limits of the component's faster track(s). A component doing so will contact you either by telephone or by letter, whichever is most efficient in each case.

(e) Unusual circumstances. When the time limits for processing a request cannot be met because of unusual circumstances and the component determines to extend the time limits on that basis, the component will notify you in writing, as soon as practicable, of the unusual circumstances and of the date by which the component expects processing of the request to be completed. When the extension is for more than ten (10) working days, the

component will provide you with an opportunity either to modify the request so that it may be processed within the ten-day time limit extension or to arrange an alternative time period with the component for processing the original or modified request.

(f) Expedited processing. (1) Requests or appeals will be taken out of order and given expedited treatment whenever EPA determines that such requests or appeals involve:

(i) Circumstances in which the lack of expedited treatment could reasonably be expected to pose an imminent threat to the life or physical safety of an individual; or

(ii) An urgency to inform the public about an actual or alleged Federal government activity, if the information is requested by a person primarily engaged in disseminating information to the public.

(2) A request for expedited processing may be made at the time of the initial request for records or before processing of the request has been completed. For a prompt determination, you must send a request for expedited processing to the proper component.

(3) If you are seeking expedited processing, you must submit a statement, certified to be true and correct to the best of your knowledge and belief, explaining in detail the basis for the request. For example, if you fit within the category described in paragraph (f)(1)(ii) of this section and are not a full-time member of the news media, you must establish that you are a person whose primary professional activity or occupation is information dissemination, although it need not be your sole occupation. If you fit within the category described in paragraph (f)(1)(ii) of this section, you must also establish a particular urgency to inform the public about the government activity involved in the request, beyond the public's right to know about government activity generally.

(4) Within ten (10) working days from the date of your request for expedited processing, the proper component will decide whether to grant your request and will notify you of the decision. If your request for expedited treatment is granted, the request will be given priority and will be processed as soon as practicable. If your request for expedited processing is denied, any appeal of that decision will be acted on expeditiously.

(g) Grants of requests. Once a component makes a determination to grant a request in whole or in part, it will release the records or parts of records to you and notify you of any applicable fee charged under § 2.106. Records released in part will be annotated, whenever technically feasible, with the applicable FOIA exemption(s) at that part of the record from which the exempt information was deleted.

(h) Adverse determinations of requests. Once a component makes an adverse determination of a request, it will notify you of that determination in writing. An adverse determination consists of a determination to withhold any requested record in whole or in part; a determination that a requested record does not exist or cannot be located; a determination that what has been requested is not a record subject to the FOIA; a determination on any disputed fee matter, including a denial of a request for a fee waiver; and a denial of a request for expedited treatment.

(i) The letter denying a request for records in whole or in part will be signed by the head of the component, or the component head's designee, and will include:

(1) The name and title or position of the person responsible for the denial;

(2) A brief statement of the reason(s) for the denial, including any FOIA exemption applied by the component in denying the request;

(3) An estimate of the volume of records or information withheld, in number of pages or in some other reasonable form of estimation. This estimate does not need to be provided if the volume is otherwise indicated through annotated deletions on records disclosed in part, or if providing an estimate would harm an interest protected by an applicable exemption; and

(4) A statement that the denial may be appealed under, and a description of the requirements of paragraph (j) of this section.

(j) Appeals of adverse determinations. If you are dissatisfied with any adverse determination of your request by a component, you may appeal that determination to the Headquarters Freedom of Information Operations Staff (1105), Environmental Protection Agency, Ariel Rios Building, 1200 Pennsylvania Avenue, NW., Washington, DC 20460. The appeal must be made in writing, and it must be submitted to the Headquarters Freedom of Information Operations Staff no later than thirty (30) calendar days from the date of the letter denying the request. The appeal letter may include as much or as little related information as you wish, as long as it clearly identifies the determination being appealed (including the assigned FOIA request number, if known). For quickest possible handling, the appeal letter and its envelope should be marked "Freedom of Information Act Appeal." Unless the Administrator directs otherwise, the General Counsel or his/her designee will act on behalf of the Administrator on all appeals under this section, except that:

(1) In the case of an adverse determination on an initial request by the General Counsel or his/her designee, the Administrator or his/her designee will act on the appeal;

(2) An adverse determination on an initial request by the Administrator will be the final action of the Agency; and

(3) An appeal will not be acted on if the request becomes a matter of FOIA litigation.

(k) The decision on an appeal will be made normally, in writing, within twenty (20) working days of its receipt by the Headquarters Freedom of Information Operations Staff. A decision affirming a component's adverse determination in whole or in part will contain a statement of the reason(s) for the decision, including any FOIA exemption(s) applied, and inform you of the FOIA provisions for judicial review of the decision. If the component's adverse determination is reversed or modified on appeal, you will be notified in a written decision. This written decision will either have the requested information that has been determined on appeal to be releasable attached to it, or your request will be returned to the component so that it may be reprocessed in accordance with the appeal decision.

(l) If you wish to seek judicial review of any adverse determination, you must first appeal that adverse determination under this section.

§ 2.105 Preservation of records.

Each component shall preserve all correspondence pertaining to the FOIA requests that it receives, as well as copies of all requested records, until disposition or destruction is authorized by title 44 of the United States Code or the National Archives and Records Administration's General Records Schedule 14. Records shall not be disposed of while they are the subject of a pending request, appeal, or lawsuit under the FOIA.

§ 2.106 Fees.

(a) In general. Components will charge for processing requests under the FOIA in accordance with paragraph (c) of this section, except where fees are limited under paragraph (d) of this section or where a waiver or reduction of fees is granted under paragraph (l) of this section. Requesters will pay fees by

check or money order made payable to the U.S. Environmental Protection Agency.

(b) Definitions. For purposes of this section:

(1) "Commercial use request" means a request from or on behalf of a person who seeks information for a use or purpose that furthers his/her commercial, trade, or profit interests, which can include furthering those interests through litigation. Components will determine, whenever reasonably possible, the use to which a requester will put the requested records. When it appears that the requester will put the records to a commercial use, either because of the nature of the request itself or because a component has reasonable cause to doubt a requester's stated use, the component will provide the requester a reasonable opportunity to submit further clarification.

(2) "Direct costs" means those expenses that the Agency actually incurs in searching for and duplicating (and, in the case of commercial use requests, reviewing) records to respond to a FOIA request. Direct costs include, for example, the salary of the employee performing the work (the basic rate of pay for the employee, plus 16 percent of that rate to cover benefits) and the cost of operating duplication equipment. Not included in direct costs are overhead expenses such as the costs of space and heating or lighting of the facility in which the records are kept.

(3) "Duplication" means the making of a copy of a record, or of the information contained in it, necessary to respond to a FOIA request. Copies can take the form of paper, microform, audiovisual materials, or electronic records (for example, magnetic tape or disk), among others. Components will honor a requester's specified preference of form or format of disclosure if the record is readily reproducible with reasonable efforts in the requested form or format.

(4) "Educational institution" means a preschool, a public or private elementary or secondary school, an institution of undergraduate higher education, an institution of graduate higher education, an institution of professional education, or an institution of vocational education, that operates a program of scholarly research. To be in this category, a requester must show that the request is authorized by, and is made under the auspices of, a qualifying institution and that the records are not sought for a commercial use but are sought to further scholarly research.

(5) "Noncommercial scientific institution" means an institution that is not operated on a "commercial" basis, as that term is defined in paragraph (b)(1) of this section, and that is operated solely for the purpose of conducting scientific research the results of which are not intended to promote any particular product or industry. To be in this category, a requester must show that the request is authorized by, and is made under the auspices of, a qualifying institution and that the records are not sought for a commercial use but are sought to further scientific research.
